In a notice (DESI 11926) published in the FEDERAL REGISTER of February 26, 1971 (36 FR 3537), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group on the following drugs containing triclobisonium chloride:

1. NDA 11-926, Trib Vaginal Cream; and

2. NDA 12-523, Trib Vaginal Suppositories;

formerly marketed by Roche Laboratories, Division of Hoffmann-LaRoche, Inc., 340 Kingsland Avenue, Nutley, New Jersey 07110.

The notice stated that these drugs were regarded as probably effective and possibly effective for their labeled indications. The drugs have been reclassified as lacking substantial evidence of effectiveness in that no data have been submitted pursuant to the notice. Roche has stated that the products are no longer marketed.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Maryland 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before September 27, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Food and Drug Administration, Room 6-86, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within the specified time will constitute an election by him not to avail himself of the opportunity for a hearing. No extension of time may be granted.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before September 27, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after September 27, 1973, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated August 21, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Office of Education

NEW TRAINING GRANTS

Notice of Closing Dates for Receipt of Applications

Pursuant to the authority contained in section 632 of the Education of the Handicapped Act (84 Stat. 175, 184, 185 (20 U.S.C. 1432)) notice is hereby given that the U.S. Commissioner of Education has established the final closing date of October 1, 1973, for receipt of applications for new training grants and October 15, 1973, for receipt of applications for continuation grants under Part D of the Act by State educational agencies. Such applications must be postmarked on or before the aforementioned dates.

A notice of proposed rulemaking governing grants for teacher training, authorized under Part D of the Act, will soon be published in the FEDERAL REGISTER and will govern the program when republished in the FEDERAL REGISTER as final regulations.

(Catalog of Federal Domestic Assistance No. 13.451 Handicapped Teacher Education)

PETER P. MUIRHEAD,
Acting Commissioner of Education.

AUGUST 20, 1973.

Office of the Secretary

DEPUTY GENERAL COUNSEL ET AL.

Delegation of Authority To Certify True Copies

Under the authority delegated by the Secretary to the Assistant Secretary for Administration (34 FR 17346), and redelegated to me by the Assistant Secretary for Administration (34 FR 18049), I hereby redelegate to the Regional Attorneys the authority to certify true copies of any books, records, papers, or other documents on file within the Department, or extracts from such, to certify the complete original record, or to certify the nonexistence of records on file within the Department, and to cause the Seal of the Department to be affixed to such certifications.

These same officials are authorized to cause the Seal to be affixed to agreements, awards, citations, diplomas, and similar documents.

This material supplements the previous redelegation appearing at 35 FR 922 of January 22, 1970.

Dated August 15, 1973.

ST. JOHN BARRETT,
Acting General Counsel.

[FR Doc.73-18207 Filed 8-27-73;8:45 am]

OFFICE OF THE ASSISTANT SECRETARY FOR PLANNING AND EVALUATION

Statement of Organization, Functions, and Delegations of Authority

Part I of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare is revised to delete the Office of Indian Affairs, and to expand the responsibilities of two suboffices of the Office of Special Concerns of the Office of the Assistant Secretary (Planning and Evaluation) (38 FR 13577, May 23, 1973). (Deletion of the Office of Indian Affairs is necessitated by the functional transfer of that office, its responsibilities and associated personnel to the Office of the Assistant Secretary (Human Development). Upon publication, the Statement of Organization, Functions, and Delegations of Authority of the Office of Native American Programs, Office of the Assistant Secretary (Human Development) will reflect this functional transfer.) The revised functional statement is appended to Chapter G. 20H and reads as follows:

1. The Office of Spanish Surnamed Americans serves as the principal advisor on Spanish Surnamed American affairs for the Office of the Secretary; is responsible to the Assistant Secretary (Planning and Evaluation) for participation in the development of Department policies and programs pertaining to Spanish Surnamed Americans; recommends Department goals and policy in the provision of services to Spanish Surnamed Americans; seeks coordinated achievement of Departmental goal by operating agencies, through such mechanisms as DHEW's Program.

Reviews current legislative authorities to determine which Department programs should be of assistance to the Spanish Surnamed American population in the areas of education, health, and social welfare; makes recommendations to various Departmental authorities in the formulation of legislation which impacts upon Spanish Surnamed Americans; provides a central information resource to collect and disseminate materials related to Spanish Surnamed Americans; reflects responsibly the special needs of the Spanish Surnamed American community in operational decisions within the Department by advising the Secretary on ways for building and sustaining effective communication with the Spanish Surnamed American community, and by insuring an appropriate degree of community participation in the implementation and evaluation of DHEW programs.

2. The Women's Action Program is responsible for advising the Secretary on the coordination, development, and implementation of Department policies and programs as they pertain to the status of women in society.

The Women's Action Program serves as the pricipal advisor for the Office of the Secretary on Department policies and programs as they pertain to the status of women in society; is responsible to the Assistant Secretary/Planning and Evaluation for participation in the development of Department policies pertaining to the needs of women; seeks coordinated achievement of Departmental goals by operating agencies, through such mechanisms as DHEW's Program Guidance Memorandum and the Operational Planning System; makes recommendations for strengthening the Department's enforcement of legislation and Executive Orders prohibiting discrimination on the basis of sex in federally funded programs; formulates plans for assessing progress towards meeting designated objectives regarding Department services to women; makes recommendations to various Departmental authorities in the formulation of legislation which impacts upon women; maintains liaison with the offices within the Department whose programs most directly impact on women's concerns.

Dated August 21, 1973.

CASPAR W. WEINBERGER,
Secretary.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. EX72-1; Notice 4]

LOTUS CARS, LTD.

Temporary Exemption From Federal Motor Vehicle Standard

The National Highway Traffic Safety Administration has decided to extend the exemption from compliance with Federal Motor Vehicle Safety Standard No. 214, *Side Door Strength* (49 CFR 571.214) previously granted Lotus Cars, Ltd. The extension expires April 30, 1974. The ground for the extension of exemption is that compliance would cause the petitioner substantial economic hardship. The exemption is for the Europa model only.

Notice of the petition for extension was published in the FEDERAL REGISTER

V 38 - 166 AUG 28 73 XUM

on July 25, 1973 (38 FR 19921) and interested persons afforded an opportunity for comment. Only one valid comment was received. It was from Lotus/East, an importer and distributor of Lotus cars, stating that such vehicles are "our only source of income, [and] being out of merchandise [until May 1, 1974] would probably result in our going out of business". An anonymous communication was received, which in accordance with NHTSA procedural rules, 49 CFR 551.35, was not considered.

The NHTSA has decided that Lotus has adequately made and documented its case for continuing substantial economic hardship, on the basis of the discussion contained in the notice of July 25, 1973, as well as those of the original notice and grant of exemption (December 2, 1972, 37 FR 25768; January 11, 1973, 38 FR 1299). The company had intended to phase out the Europa before the January 1, 1973, effective date of Standard No. 214 but encountered developmental delays in the model intended as its successor. The NHTSA considers the fact that Lotus has been able to reengineer the Europa to comply with the new safety requirements that will be met by 1974 model year vehicles, such as roof crush resistance, rear bumper protection, seat belt ignition-interlock and accelerator control, as evidence of general good faith to meet Federal safety standards in a time manner.

In consideration of the foregoing, NHTSA Exemption No. 73-1 granted Lotus Cars, Ltd. is extended to exempt Europa models manufactured on or before April 30, 1974, from compliance with Federal Motor Vehicle Safety Standard No. 214, *Side Door Strength*.

(Sec. 3, Pub. L. 92-548, 86 Stat. 1159 (15 U.S.C. 1410) delegation of authority at 49 CFR 1.51).

Issued on August 23, 1973.

JAMES B. GREGORY,
Administrator.

ATOMIC ENERGY COMMISSION

[Docket No. 50-293]

BOSTON EDISON CO.

Order for Modification of License

I. The Boston Edison Co. (the licensee) is the holder of Facility License DPR-35. License DPR-35 authorizes operation of the Pilgrim Nuclear Power Station (the plant) in the Town of Plymouth, Plymouth County, Massachusetts. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plant, for operation of the plant during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 4, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM-10735, "Densification Considerations in BWR Fuel Design and Performance," dated December, 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM-10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July, 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM-10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR-35 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate of 11.1 kw/ft; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any rod in any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.5.K of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above.

It is ordered, That:

The Technical Specifications of License DPR-35 are hereby changed, to include Limiting Conditions for Operation, sections 3.5.J. and 3.5.K., and Surveillance Requirements, sections 4.5.J. and 4.5.K. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this order see: The Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to J. M. Carroll from A. Giambusso, November 20, 1972; letter to A. Giambusso from J. M. Carroll, January 4, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to J. M. Carroll from J. F. Stolz, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to A. Giambusso from J. M. Carroll, August 15, 1973; the Staff Technical Report of Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Pilgrim Nuclear Power Station, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING,
Director of Regulation.

NOTICE OF AVAILABILITY

Copies of Appendix I to Order for Modification of License, dated August 24, 1973, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

[FR Doc.73-18301 Filed 8-27-73;8:45 am]

[Docket Nos. 50-254, 50-265]

COMMONWEALTH EDISON CO.

Order for Modification of License

I. The Commonwealth Edison Co. (the licensee) is the holder of Facility Licenses DPR-29 and DPR-30. Licenses DPR-29 and DPR-30 authorize operation of the Quad-Cities Nuclear Power Station, Units 1 and 2 (the plants) in Rock Island County, Illinois. These licenses expressly provide, inter alia, that they are subject to all rules, regulations and orders of the Commission now or hereinafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plants, for operation of the plants during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 3, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM-10735, "Densification Considerations in BWR Fuel Design and Performance" dated December, 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM-10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July, 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM-10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plants are necessary in order to assure that the calculated peak cladding temperature of the core of the plants following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of Licenses DPR-29 and DPR-30 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate defined by the curve in Limiting Condition for Operation, figure 3.5.1, of section 3.5.J. of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any rod in any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.5.K. of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above.

It is ordered, That:

The Technical Specifications of Licenses DPR-29 and DPR-30 are hereby changed, to include Limiting Conditions for Operation, section 3.5.J. and 3.5.K., and Surveillance Requirements, sections 4.5.J. and 4.5.K. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: The Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to B. Lee, Jr. from A Giambusso, November 20, 1972; letter to A. Giambusso from L. D. Butterfield, Jr., January 3, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to B. Lee, Jr., from D. Zieman, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from J. S. Abel, August 15, 1973; the Staff Technical Report for Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Quad-Cities Nuclear Power Station, Units 1 and 2, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING,
Director of Regulation.

[FR Doc.73-18302 Filed 8-27-73;8:45 am]

[Docket No. 50-237]

COMMONWEALTH EDISON CO.

Order for Modification of License

I. The Commonwealth Edison Co. (the licensee) is the holder of Facility License DPR-19. License DPR-19 authorizes operation of the Dresden Nuclear Power Station, Unit No. 2 (the plant) in Grundy County, Illinois. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereinafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plants, for operation of the plants during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 3, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM-10735, "Densification Considerations in BWR Fuel Design and Performance" dated December 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM-10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM-10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR-19 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear generation rate defined by the curve in Limiting Condition for Operation, figure 3.5.1, of section 3.5.I. of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any rod in any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum

V 38-166 AUG 28 73 XUM

LHGR provided in Limiting Condition for Operation, section 3.5.J. of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomc Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above

It is ordered, That:

The Technical Specifications of License DPR–19 are hereby changed, to include Limiting Conditions for Operation, sections 3.5.I. and 3.5.J., and Surveillance Requirements, sections 4.5.I. and 4.5.J. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this Order in accordance with the provisions of 10 CFR 2.714 of the Commission's Rules of Practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: the Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to B. Lee, Jr. from A. Giambusso, November 20, 1972; letter to A. Giambusso from L. D. Butterfield, Jr., January 3, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to B. Lee, Jr., from D. Zieman, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from J. S. Abel, August 15, 1973; the Staff Technical Report of Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Dresden Nuclear Power Station, Unit 2, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room 1717 H Street NW., Washington, D.C

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

COMMONWEALTH EDISON CO.

Order for Modification of License

I. The Commonwealth Edison Co. (the licensee) is the holder of Facility License DPR–25. License DPR–25 authorizes the operation of the Dresden Nuclear Power Station, Unit No. 3 (the plant) in Grundy County, Illinois. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereinafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plants, for operation of the plants during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 3, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM–10735, "Densification Considerations in BWR Fuel Design and Performance" dated December 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM–10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM–10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and therefore, that the Technical Specifications of License DPR–25 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation rate of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate defined by the curve in Limiting Condition for Operation, figure 3.5.1, of section 3.5.I of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.5.J. of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above

It is ordered, That:

The Technical Specifications of License DPR–25 are hereby changed, to include Limiting Conditions for Operation, sections 3.5.I. and 3.5.J., and Surveillance Requirements, sections 4.5.I. and 4.5.J. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: the Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to B. Lee, Jr. from A. Giambusso, November 20, 1972; letter to A. Giambusso from L. D. Butterfield, Jr., January 3, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to B. Lee, Jr., from D. Zieman, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from J. S. Abel, August 15, 1973; the Staff Technical Report for Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Dresden Nuclear Power Station, Unit 3, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING,
Director of Regulation.

NOTICE OF AVAILABILITY

Copies of Appendix I to Order for Modification of License, dated August 24, 1973, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

[FR Doc.73–18298 Filed 8–27–73;8:45 am]

[Docket No. 50–245]

CONNECTICUT LIGHT & POWER CO., ET AL.

Order for Modification of License

I. The Connecticut Light & Power Co., Hartford Electric Light Co., Western Massachusetts Electric Co., and Millstone Point Co. (the Licensees) are the holders of Facility License DPR–21. License DPR–21 authorizes operation of the Millstone Nuclear Power Station, Unit No. 1 (the plant) in the Town of Waterford, New London County, Connecticut. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensees to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plant, for operation of the plant during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On December 29, 1972, the licensees provided the requested information including, by reference, the General Electric Company Report NEDM–10735, "Densification Considerations in BWR Fuel Design and Performance" dated December 1972. The Staff reviewed the licensees' submission as well as five additional supplements to NEDM–10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July 1973. By letter of July 16, 1973, the Staff requested the licensees, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 14, 1973, the licensees submitted the requested information including Supplement 6 to NEDM–10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plants are necessary in order to assure that the calculated peak cladding temperature of the core of the plants following a postulated loss-of-coolant accident will not exceed 2300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR–21 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation rate of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate defined by the curve in Limiting Condition for Operation, figure 3.11.1, of section 3.11.A. of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.11.B. of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above

It is ordered, That:

The Technical Specifications of License DPR–21 are hereby changed, to include Limiting Conditions for Operation, section 3.11.A. and 3.11.B., and Surveillance Requirements, sections 4.11.A. and 4.11.B. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, period any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this order see: the Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to D. C. Switzer from A. Giambusso, November 20, 1972; letter to A. Giambusso from D. C. Switzer, December 29, 1972, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to D. C. Switzer from D. Zieman, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from D. C. Switzer, August 14, 1973; the Staff Technical Report on Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Millstone Nuclear Power Station, Unit 1, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING,
Director of Regulation.

NOTICE OF AVAILABILITY

Copies of Appendix I to Order for Modification of License, dated August 24, 1973, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

[Docket No. 50–219]

JERSEY CENTRAL POWER & LIGHT CO.

Order for Modification of License

I. The Jersey Central Power & Light Co. (the licensee) is the holder of Facility License DPR–16. License DPR–16 authorizes operation of the Oyster Creek Nuclear Power Station (the plant) in Ocean County, New Jersey. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plant, for operation of the plant during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 18, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM–10735, "Densification Considerations in BWR Fuel Design and Performance," dated December, 1972. The Staff reviewed the licensee's submissions, as well as Facility Change Request No. 4 and its supplements No. 1, 3 and 4, and five additional supplements to NEDM–10735 which were

V38-166 AUG 28 73 XUM

submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July, 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM–10735 and "Exxon Nuclear Oyster Creek Densification Analysis."

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR–16 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate defined by the curves in Limiting Condition for Operation, figure 3.10.1, of section 3.10.A. of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any rod in any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.10.B. of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above.

It is ordered, That:

The Technical Specifications of License DPR–16 are hereby changed, to include Limiting Conditions for Operation, sections 3.10.A. and 3.10.B., and Surveillance Requirements, sections 4.10.A. and 4.10.B. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: the Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to R. H. Sims from A. Giambusso, November 20, 1972; letter to A. Giambusso from R. H. Sims, January 18, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to R. H. Sims from R. J. Schemel, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to R. J. Schemel from I. R. Finfrock, Jr., August 15, 1973; the Staff Technical Report of Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Technical Report of Densification of Exxon Nuclear Company Reactor Fuels (to be issued by September 4, 1973), the Staff Safety Evaluation of the Fuel Densification Effects on the Oyster Creek Nuclear Power Station, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING,
Director of Regulation.

NOTICE OF AVAILABILITY

Copies of Appendix I to Order for Modification of License, dated August 24, 1973, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

[Docket No. 50-220]

NIAGARA MOHAWK POWER CORP.

Order for Modification of License

I. The Niagara Mohawk Power Co. (the licensee) is the holder of Facility License DPR–17. License DPR–17 authorizes operation of the Nine Mile Point Nuclear Power Station, Unit No. 1 (the plant) in Oswego County, New York. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereinafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plant, for operation of the plant during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 3, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM–10735, "Densification Considerations in BWR Fuel Design and Performance" dated December, 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM–10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July, 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 14, 1973, the licensee submitted the requested information including Supplement 6 to NEDM–10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR–17 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation rate of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate defined by the curve in Limiting Condition for Operation, figure 3.1.7. of section 3.1.7.a of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.1.7.b. of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above

It is ordered, That:

The Technical Specifications of License DPR–17 are hereby changed, to include Limiting Conditions for Operation, sections 3.1.7.a. and 3.1.7.b., and Surveillance Requirements, sections 4.1.7.a. and 4.1.7.b. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: the Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to T. J. Brosnan from A. Giambusso, November 20, 1972; letter to A. Giambusso from T. J. Brosnan, January 3, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to P. D. Raymond from D. Zieman, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from R. R. Schneider, August 14, 1973; the Staff Technical Report on Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Nine Mile Point Nuclear Power Station, Unit 1, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING.
Director of Regulation.

NOTICE OF AVAILABILITY

Copies of Appendix I to Order for Modification of License, dated August 24, 1973, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

[Docket No. 50-263]

NORTHERN STATES POWER CO.

Order for Modification of License

I. The Northern States Power Co. (the licensee) is the holder of Facility License DPR–22. License DPR–22 authorizes operation of the Monticello Nuclear Power Station, (the plant) in Wright County, Minnesota. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereinafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plant, for operation of the plant during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On December 29, 1972, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM–10735, "Densification Considerations in BWR Fuel Design and Performance" dated December, 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM–10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July, 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM–10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300°F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR–22 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation rate of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate of 11.5 kw/ft; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any rod in any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.5.K of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following Order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above

It is ordered, That:

The Technical Specifications of License DPR–22 are hereby changed, to include Limiting Conditions for Operation, sections 3.5.J. and 3.5.K., and Surveillance Requirements, sections 4.5.J. and 4.5.K. attached hereto ase Appendix I and the plant shall be operated immediately in accordance therewith.

On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973, any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: The Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to A. V. Dienhart from A. Giambusso, November 20, 1972; letter to A. Giambusso from L. O. Mayer, December 29, 1972, with enclosure General Electric topical report, Densification Considerations in BRW Fuel Design and Performance; letter to A. V. Dienhart, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from L. O. Mayer, August 15, 1973; the Staff Technical Report on Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Monticello Nuclear Power Station, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

[Docket No. 50-271]

VERMONT YANKEE NUCLEAR POWER CORP.

Order for Modification of License

I. The Vermont Yankee Nuclear Co. (the licensee) is the holder of Facility License DPR-28. License DPR-28 authorizes operation of the Vermont Yankee Nuclear Power Station (the plant) in the Town of Vernon, Windham County, Vermont. This license expressly provides, inter alia, that it is subject to all rules, regulations and orders of the Commission now or hereafter in effect.

II. On November 14, 1972, the AEC Regulatory Staff (the Staff) issued a report entitled "Technical Report on Densification of Light Water Reactor Fuels" (the Report). By letter of November 20, 1972, the Staff requested the licensee to submit analyses and data specified in the report related to determining the consequences of fuel densification for normal operation of the plant, for operation of the plant during various maneuvers and transients, and under postulated accident situations, including the design basis loss-of-coolant accidents. On January 3, 1973, the licensee provided the requested information including, by reference, the General Electric Company Report NEDM-10735, "Densification Considerations in BWR Fuel Design and Performance" dated December 1972. The Staff reviewed the licensee's submission as well as five additional supplements to NEDM-10735 which were submitted by the General Electric Company in response to requests for additional information from the Staff. The latest of these supplements was dated July, 1973. By letter of July 16, 1973, the Staff requested the licensee, inter alia, to furnish additional analyses regarding the calculated peak cladding temperatures during a postulated loss-of-coolant accident. On August 15, 1973, the licensee submitted the requested information including Supplement 6 to NEDM-10735.

On the basis of the Staff's review of the above identified submittals and its evaluation of fuel densification effects upon the operation of boiling water reactors which are reflected in a safety evaluation report relating to the plant dated August 24, 1973, the Staff has determined that changes in the operating conditions for the plant are necessary in order to assure that the calculated peak cladding temperature of the core of the plant following a postulated loss-of-coolant accident will not exceed 2,300° F taking into account fuel densification effects as described in the Staff's safety evaluation identified above, and, therefore, that the Technical Specifications of License DPR-28 should be amended to require: (1) The immediate control of steady-state power operation so that the average linear heat generation of all the rods in any fuel assembly, as a function of planar exposure, at any axial location, shall not exceed the maximum average planar linear heat generation rate defined by the curve in Limiting Condition for Operation, figure 3.5.1, of section 3.5.J of the attached Appendix I, attached hereto; and (2) that during steady state power operation, the linear heat generation rate (LHGR) of any rod in any fuel assembly at any axial location shall not exceed the maximum allowable LHGR as calculated using the equation for maximum LHGR provided in Limiting Condition for Operation, section 3.5.K of the attached Appendix I.

III. In view of the foregoing, the Director of Regulation finds that the public health, safety, and interest require that the following order be made effective immediately. Pursuant to the Atomic Energy Act of 1954, as amended, the Commission's regulations in 10 CFR 2.204 and 50.100 and the license condition noted in Part I above.

It is ordered, That:

The Technical Specifications of License DPR-28 are hereby changed, to include Limiting Conditions for Operation, sections 3.5.J. and 3.5.K., and Surveillance Requirements, sections 4.5.J. and 4.5.K. attached hereto as Appendix I and the plant shall be operated immediately in accordance therewith.

IV. On or before September 27, 1973, the licensee may file a request for a hearing with respect to this order. On or before September 27, 1973 any other person whose interest may be affected may file a request for a hearing with respect to this order in accordance with the provisions of 10 CFR 2.714 of the Commission's rules of practice. If a request for a hearing is filed within the time prescribed herein, the Commission will issue a notice of hearing or an appropriate order.

For further details pertinent to this Order see: the Staff Technical Report on Densification of Light Water Reactor Fuels, November 14, 1972; letter to A. A. Cree from A. Giambusso, November 20, 1972; letter to U.S. Atomic Energy Commission from D. E. Vandenburgh, January 3, 1973, with enclosure General Electric topical report, Densification Considerations in BWR Fuel Design and Performance; letter to A. A. Cree from D. Zieman, with enclosure the Staff's GE Model for Fuel Densification, July 16, 1973; letter to D. Zieman from D. E. Vandenburgh, August 15, 1973; the Staff Technical Report on Densification of General Electric Reactor Fuels, August 23, 1973; the Staff Safety Evaluation of the Fuel Densification Effects on the Vermont Yankee Nuclear Power Station, August 24, 1973; all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

Copies of these documents may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

Dated at Bethesda, Md., this 24th day of August 1973.

For the Atomic Energy Commission.

L. MANNING MUNTZING,
Director of Regulation.

NOTICE OF AVAILABILITY

Copies of Appendix I to Order for Modification of License, dated August 24, 1973, are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., or may be obtained upon request addressed to the Deputy Director for Reactor Projects, Directorate of Licensing, U.S. Atomic Energy Commission, Washington, D.C. 20545.

[Docket Nos. 50-315, 50-316]

INDIANA AND MICHIGAN ELECTRIC CO., ET AL.

Order on Motions Re Scheduling of Prehearing Conference

In the matter of Indiana and Michigan Electric Co., et al., (Donald C. Cook Nuclear Plant, Units 1 and 2).

Take notice that a prehearing conference in the subject proceeding will be held on September 6, 1973, at 11:00 a.m., local time, in Suite 500, Postal Rate Commission Offices at 2000 L Street, NW., Washington, D.C. 20268.

The purpose of this prehearing conference is to discuss, amongst other matters, the key environmental issues in controversy between the parties. In addition, the Board will hear oral argument on a Joint Motion for adoption of hearing schedule.

Issued at Washington, D.C., this 22d day of August 1973.

It is so ordered.

ATOMIC SAFETY AND LICENSING BOARD,
MAX D. PAGLIN,
Chairman.

[FR Doc.73-18161 Filed 8-27-73;8:45 am]

[Docket No. 50-410]

NIAGARA MOHAWK POWER CORP.

Notice and Order for Third Prehearing Conference

In the matter of Niagara Mohawk Power Corporation, (Nine Mile Point, Unit No. 2), Docket No. 50-410.

Notice is hereby given, in accordance with § 2.752 of the Atomic Energy Commission's rules of practice, 10 CFR Part 2, the Atomic Safety and Licensing Board (the Board) will hold a third prehearing conference in the above-captioned cause on Wednesday, September 12, 1973 at 10 a.m., local time, in the Legislators Chambers, County Building, 46 East Bridge Street, Oswego, New York 13126.

This third prehearing conference shall consider the following matters:

1. The status of discovery;
2. Further simplification, clarification and specification of the issues;
3. The necessity or desirability or amending the pleadings;
4. The obtaining of stipulations and admissions of fact and of the contents and authenticity of documents to avoid unnecessary proof;
5. Identification of witnesses and the limitation of the number of expert witnesses, and other steps to expedite the presentation of evidence;
6. The setting of a hearing schedule; and
7. Such other matters as may aid in the orderly disposition of the proceeding.

The attorneys for the respective parties are directed to confer in advance of this prehearing conference, in such manner as they deem appropriate, and report to the Board at said conference on any stipulations regarding issues or evidence, and on any other mutually agreeable procedures to expedite the evidentiary hearing.

Members of the public are invited to attend this third prehearing conference as well as the evidentiary hearing to be held at a later date to be fixed by the Board.

Dated this 23d day of August 1973 at Washington, D.C.

By order of the Atomic Safety and Licensing Board.

DANIEL M. HEAD,
Chairman.

CIVIL AERONAUTICS BOARD

[Docket 25711; Order 73-8-105]

SOUTHERN AIRWAYS, INC., ET AL.

Order of Tentative Approval

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 21st day of August 1973.

By application filed on July 18, 1973 [1] SOADO Venture (SOADO), Southern Airways, Inc. (Southern), and various officers and directors of Southern [2] requested (a) approval pursuant to the third proviso of Section 408(b) of the Federal Aviation Act of 1958, as amended, (the Act) with respect to various control relationships which have arisen or may arise among the above-mentioned applicants, (b) approval pursuant to section 409(a) of the Act with respect to various interlocking relationships which may exist among certain of the applicants, and (c) as an alternative to the approval requested in (a) and (b) above, a disclaimer of jurisdiction with respect to certain control and interlocking relationships among the applicants. In addition to the foregoing, the applicants have requested a declaration by the Board that Section 409(b) of the Act does not prohibit the individual applicants from receiving and retaining the proceeds from the future sale of Southern securities as they may be required to purchase following the offer of such securities to the other common stockholders of Southern.

In brief the application concerns the formation of a joint venture (SOADO) by certain officers and directors of Southern for the purpose of (a) purchasing $7,000,000 principal amount of Southern's 6¼ percent Convertible Subordinated Debentures (Debentures) from the ISI Fund Corporation (ISI); (b) eliminating the warrants attached to such Debentures and converting 16⅔ percent of such Debentures into 116,700 shares of Southern's common stock and (c) offering the holders of Southern's common stock the right to purchase their pro rata portion of the remaining Debentures together with the newly issued common stock.

According to the application, in November 1968, Southern placed an issue of 6½ percent Convertible Debentures (Debentures) in the principal amount of $8,000,000 with three mutual funds managed by ISI. [3] As of April 1973, ISI owned $7,000,000 principal amount of the Debentures. On April 12, 1973, ISI inquired of Southern as to whether Southern was interested in retiring the Debentures at a substantial discount. [4] The application recites that Souhern's management recognized that it would be to Southern's benefit if the Debentures could be removed from the current market and placed with longer-term investors. Thus, according to the application, the convertibility feature with warrants together with a continuing offer by ISI would be injurious to the public market for future issues of Southern's equity securities. Moreover, it was recognized that the availability of the Debentures for retirement at a discount offered an opportunity for improvement of Southern's debt/equity ratio and reduction of its interest burden. Under its principal credit agreements Southern is restricted against commitment of its funds for the retirement of, or underwriting the reissue of, the type of securities discussed herein, and Southern was advised that such restrictions would not be waived. However, a plan was arrived at for a reduction in the outstanding Debentures and a realization of some of the benefits to Southern as described earlier.

On May 25, 1973 the individual applicants entered into a joint venture agreement for the formation of SOADO the functions of which were to borrow $3,200,000 to purchase the Debentures; convert $1,167,000 of the face amount of such Debentures to common stock; make the offer to Southern's shareholders; cancel and surrender to Southern the existing warrants; and dissolve. On May 30, 1973, the Debentures were sold by ISI to SOADO and in turn were pledged by SOADO with the First National Bank of Chicago to secure its loan of $3,200,000 to SOADO.

On June 1, 1973, the applicants filed a Registration Statement with the Securities and Exchange Commission covering the securities to be offered by SOADO to Southern's stockholders. Thus, the aforesaid statement indicates that Southern's common stockholders will be offered the right to purchase their pro rata portion of the Debentures remaining after conversion of $1,167,000 principal amount. The proposed price for the remaining Debentures (in units of $500) would be $2,584,019 (44.3 percent of the face amount), and for the newly issued 116,700 shares of common stock the proposed price would be $516,981 ($4.43 per share).

From the application it appears that the Debentures to be offered by SOADO represent $5,833,000 principal amount and the common stock will represent a little less than 8 percent of the total outstanding voting stock of Southern. In this connection, the application indicates that the offering is to be made to all holders of Southern's common stock. In this regard, the individual applicants, as stockholders, will also have rights to purchase a portion of the securities units to be offered. However, pursuant to the Joint Venture Agreement (Agreement) the individual participants shall transfer their respective rights to a rights pool in the joint venture. Following the offering, the individual participants will purchase out of the joint venture pool their pro rata parts of such rights. Furthermore, the individual applicants are obligated to take up any units which are unsubscribed to by the remaining stockholders.

According to the application, the individual applicants presently own 18.1 percent of the voting stock of Southern. It is expected that the offer will be fully subscribed or substantially fully subscribed by the non-SOADO common stockholders. The application asserts that if the offer is virtually fully subscribed the individual applicants collectively will, after taking up in accordance with their joint obligations the remaining securities, continue to own 18.1 percent of Southern's voting stock. Moreover, the 18.1 percent of ownership by the applicants would not vary even if 100 percent of the Debentures are eventually converted into Southern common stock. The existence of SOADO will terminate 45 days after the offering or on November 1, 1973, whichever first occurs.

No comments or requests for a hearing with respect to the application have been received.

Applicants assert that the transaction here involved should not be regarded as an acquisition of control requiring approval, nor should SOADO be regarded as a company engaged in a phase of aeronautics. To the extent that the acquisition is designed merely as a process by which the outstanding Debentures of

[1] The application was amended on July 30, 1973.

[2] Frank W. Hulse, George M. Gross, Graydon Hall, Cecil A. Beasley, Jr., Alexander J. Brunini, Alton F. Irby, Jr., G. Gunby Jordan, Henry P. Johnston, R. Eugene Orr, G. Frank Purvis, Jr., A. L. Maxson, Victor C. Pruitt, Frank H. Wheeler, T. A. Wiley, Jr., Elton B. Stephens, Richard A. Trippeer, Jr., and Wm. Ben White Jr. (hereinafter referred to as the individual applicants).

[3] Each $1,000 of principal amount of the Debentures carries rights for the purchase of eighteen shares of Southern's common stock at $10 per share.

[4] ISI indicated that it did not wish to retain the Debentures.

V38-166 AUG 28 73 XUM

Southern will be acquired and distributed to existing shareholders in roughly the same proportions as their present stockholdings, it does not appear that the control of Southern Airways would be significantly affected.[6] We have concluded, however, that a declination of jurisdiction would not be appropriate.[7]

At the very least, the transaction will result in a transitory change in both the form and extent of control. Through the acquisition of the Debentures, the individual applicants have undertaken significant holdings in the debt securities of Southern (approximately 25 percent of the long-term debt as of April 30, 1973) and, through conversion privileges, acquired the rights to a substantial additional amount of Southern's common stock. Moreover, the individual applicants have introduced a new entity (SOADO) into the previously existing control picture and through this transaction and the current increase in the holding of Southern's securities have created a new control relationship between themselves and Southern. Moreover, SOADO itself plays an integral part in this new control relationship and shares in such control. Even if these changes are transitory, and will cease when the transaction is completed, approval of the acquisition of control of Southern by the individual participants under section 408(a)(5) is required.[8]

Moreover, the Board cannot be certain at this time that all changes of control will be transitory. As noted, the SOADO Agreement obligates the individual participants to purchase any investment units not subscribed to by non-SOADO shareholders. To be sure, if the non-SOADO shareholders fully subscribe to the offering (as contemplated), the SOADO shareholders will not increase their proportionate shareholdings. However, if the unanticipated comes to pass, and the SOADO shareholders are required to purchase a substantial number of unsubscribed investment units, their degree of control could be significantly increased.

Consequently, we will limit our approval to the anticipated transaction—that is, one in which the non-SOADO shareholders substantially subscribe to the offering and the SOADO shareholders do not substantially increase the degree of their control of Southern Airways. In that event, no further Board approval will be required. On the other hand, should there be a significant percentage of the investment units not subscribed to, with the result that the participants will substantially change their present investment holdings in Southern, the applicants will be required to obtain further Board approval with respect to such changed control. (See TWA, Further Control by Hughes Tool Company, 9 CAB 381, 390 (1948).)

As a result of the transaction described herein it appears that Southern may realize a strengthened financial position through (a) a more stable market for the issuance of future equity securities; (b) an improved equity to debt ratio; and (c) the lessening of its interest payment burden. Furthermore, it appears that Southern's existing stockholders have an opportunity to share in the new securities issue on an equitable basis with the individual applicants who, if the offer is virtually fully subscribed, will continue to own 18.1 percent of Southern's common stock as they did before the instant transaction. Moreover, as the application points out, the individual applicants are persons who have been long associated with Southern and it can reasonably be concluded, under the circumstances as described, that such persons are attempting to aid and benefit Southern.

In view of the foregoing, we have tentatively concluded that the transactions described herein and the resulting control relationships will not be inconsistent with the public interest, will not result in creating a monopoly, and will not tend to restrain competition. Our approval, however, will apply only to the interim control relationships herein described, which are necessary for the purpose of acquisition and ultimate distribution of the debentures to existing shareholders roughly in proportion to their existing holdings. Since upon successful consummation of the transaction in this manner, the existing control relationships of Southern will not be significantly affected, the Board finds that the transaction does not affect the control of an air carrier directly engaged in the operation of aircraft in air transportation within the meaning of the third proviso of section 408(b). Furthermore, no person disclosing a substantial interest in the proceedings is currently requesting a hearing, and it does not appear that the public interest requires a hearing. Accordingly, the Board tentatively finds that, to the extent set forth above, the control relationships arising from the proposed transaction should be approved pursuant to the third proviso of section 408(b).

In addition to the control relationships discussed above, it appears that interlocking relationships within the meaning of section 409(a) of the Act have been created between an air carrier (Southern), on the one hand, and a person engaged in a phase of aeronautics (SOADO), on the other hand. However, upon final approval of the control relationships described herein the aforesaid interlocking relationships would appear to come within the scope of the exemption from section 409 afforded by section 287.3 of the Board's Economic Regulations. Accordingly, in our final order we will dismiss the application to the extent it requests approval of such interlocking relationships.

With regard to the applicants' request that the Board include in this order a declaration that section 409(b) of the Act does not prohibit the individual applicants from receiving and retaining the proceeds from the future sale of such securities as they may be required by the Agreement to purchase following the offer of the securities to the other common stockholders of Southern, the Board notes that section 409(b) of the Act reads as follows:

"Profit From Transfer of Securities: (b) It shall be unlawful for any officer or director of any air carrier to receive for his own benefit, directly or indirectly, any money or thing of value in respect of negotiation, hypothecation, or sale of any securities issued or to be issued by such carrier, or to share in any of the proceeds thereof."

The applicants argue that this section applies only to transactions in which the air carrier itself is a party, and not to transactions by officers and directors with third parties in carrier securities which are outstanding. They argue that if the section applied to the latter case, officers and directors would not be able to sell stock in their own air carriers for value, whether at a profit or loss. They point to legislative history of the language of section 409(b) to support their interpretation of it. Since the language of 409(b) is identical to that of section 20a.(12) of the Interstate Commerce Act, 49 U.S.C. 20.a(12), they cite legislative statements of the evil sought to be remedied by that section. That evil, they contend, was the practice of some railroad officers and directors of causing their carriers to make public offerings of securities, the proceeds of which were siphoned off in various ways for the private enrichment of the individuals involved. It is the applicants' position that there is no indication whatsoever that Congress ever intended to concern itself with any problems with respect to officer and director transactions with third persons in outstanding securities of publicly-held carriers. They say this is how the Interstate Commerce Commission had dealt with section 20a.(12) of their Act. Any other interpretation by the Board of section 409(b) would, they say, be so novel that thousands of violations in every air carrier would be found to exist. They contend

[6] The Board notes that the individual participants prior to the formation of SOADO already controlled in excess of 18% of the voting stock of Southern. This fact, together with the facts that there is apparently no other single stockholder holding as much as 5% of the voting stock of Southern and the individual participants constitute 13 of the 17 directors of Southern, indicates that such participants prior to the acquisition shared, in a major way, in the control of Southern.

[7] Various control and interlocking relationships which are included in the instant proceeding were established without Board approval. However, exceptional circumstances appearing to exist, it has been decided not to enforce the doctrine expressed in Sherman, Control and Interlocking Relationships, 15 CAB 876 (1952) and to consider the application on its merits.

[8] We also find approval to be required under section 408(a)(6), since SOADO, as a company whose sole function is holding and distributing securities of an air carrier, must be considered a "phase of aeronautics." The Board does not, as applicants contend, confine the definition of "phase of aeronautics" strictly to companies involved in the science and art of flight. See *e.g.*, Consolidated Airline Purchasing Corporation, Orders E–19721, E–20109; and Allegheny Airlines-Corcoran Thom, Order E–17654.

that the words of that section are aimed at a type of dealing which is harmful to the air carriers' capital structure, not a transaction which will be beneficial to the capital structure, as in this case. Another way of putting this, according to the applicants, is that section 409(b) prohibits a form of breach of fiduciary duty. They say it is because Southern cannot itself take the steps that SOADO is taking that the joint venture was formed to secure the benefits of this transaction for Southern.

Section 409(b) is not so limited in its application as the applicants herein contend. This is demonstrated by reference to the legislative history of the language of that section, and by a comparison of that language with a contemporaneously enacted law.

The applicants are wrong in their contention that there is no indication that Congress intended to concern itself with officers and directors of air carriers dealing in the stock of their companies. The following testimony appears in the hearings that led to enactment of the Civil Aeronautics Act of 1938: [9]

"Mr. WRIGHT • • • we suggest that the meaning is not clear where it says:

It shall be unlawful for any officer or director of any air carrier or airport operator to receive for his own benefit, directly or indirectly, any money, or thing of value in respect of negotiation, hypothecation, or sale of securities, issued or to be issued by such air carrier or airport operator.

Does this mean that no officer or director can buy or sell for his own account stock in his own company?

Senator McCARRAN. That language is taken from the Interstate Commerce Act.

Senator TRUMAN. *That is what it is intended for, to keep the officers of the company from speculating in the stock of their own company.* (emphasis added)

Mr. WRIGHT. That is the point I wanted to bring out. It is conceivable, however, that a man sufficiently interested in a company to be a director of it, and a man who spends his life in the company being an officer and directing the affairs of it, might wish for his own account to purchase securities issued by that company. It is a most normal thing, I should think.

Senator McCARRAN. That is what caused the difficulty with the railroad organizations.

Mr. WRIGHT. Then may I suggest that some amended provision might be put in there to cover the question of speculation, but for legitimate investment give proper protection to the officers and directors. I merely lay that thought before you for your consideration.

Senator McCARRAN. You are giving us a hard problem.

Mr. WRIGHT. We respectfully point out that the stockholdings of all officers and directors of air carriers are not a matter of record with the Securities and Exchange Commission and such holdings are regularly reported to that body • • •"

It seems clear, therefore, that the Congressional intent in enacting section 409(b) included the prevention of speculation by air carrier officers and directors in the stock of their companies. It does not appear that Congress intended to preclude an officer's or director's investment for his own account in the stock of the air carrier, so long as the purpose was investment and not speculation.

A comparison of the language of this section with that of a similar section of a contemporaneous act further supports this interpretation of section 409(b) of the Act. The Natural Gas Act, 15 USC 717 et seq., contains language similar to that of section 409(b) of the Act, and it was enacted at almost the same time as the Civil Aeronautics Act of 1938. Section 717k. of the Natural Gas Act reads as follows:

"Officials Dealing in Securities: It shall be unlawful for any officer or director, of any natural-gas company to receive for his own benefit, directly or indirectly, any money or thing of value in respect of negotiation, hypothecation, or sale *by such natural-gas company* of any security issued, or to be issued, by such natural gas company, or to share in any of the proceeds thereof • • •" (emphasis added)

This language and that of section 409(b) of the Act are identical except for the underlined words of section 717k. of the Natural Gas Act, which clearly show that it applies only to instances where securities are issued by the company itself. If Congress wanted to similarly limit section 409(b) of the Act, it could have done so by the addition of a few words. Since no such limiting words appear in section 409(b) of the Act, it must be concluded that Congress did not intend to limit the applicability of section 409(b) as the applicants herein contend.

However, in the present case, it does not appear that the individual applicants' motivation in participating in the joint venture is speculation in the stock of Southern (see Certifications in Appendix A to the application in Docket 25711).[9] As the previous discussion in this order concluded, it appears that the transactions herein will not be detrimental to Southern, nor do they appear to put the individual applicants in positions of conflict of interest with their fiduciary responsibilities to Southern. Therefore, although the reasons given by the applicants for their request are not correct in that section 409(b) of the Act does not have so restrictive an application as they contend, we will grant their request with respect to interpretation of section 409(b) to the extent indicated above.

In accordance with section 408(b) of the Act, this order, constituting notice of the Board's tentative findings, will be published in the FEDERAL REGISTER and interested persons will be afforded an opportunity to file comments or request a hearing on the Board's tentative decision.

Accordingly, it is ordered, That:

1. The control of (a) SOADO by the individual applicants while they control Southern and (b) Southern by the individual applicants and SOADO, resulting from the formation of SOADO by the individual applicants; the purchase of the Debentures by SOADO; and the conversion of $1,167,000 principal amount of such Debentures into shares of Southern's common stock, be and they are hereby tentatively approved pursuant to section 408(b) of the Act insofar as necessary to permit the acquisition of the Debentures, and proportional offering and distribution thereof to Southern's existing shareholders.

2. The request for a disclaimer of jurisdiction by the applicants in Docket 25711 be and it hereby is denied;

3. Applicants' request for an interpretation and declaratory order with respect to section 409(b) of the Act, be and it hereby is granted to the extent indicated herein, and is otherwise denied;

4. Interested persons be and they hereby are afforded a period of 10 days within which to file comments or request a hearing with respect to the Board's proposed action on the application in Docket 25711; [10] and

5. The Attorney General of the United States be furnished a copy of this order within one day of publication.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.73–18224 Filed 8–27–73;8:45 am]

[9] Hearings on S. 2 and S. 1760 before a subcommittee of the Senate Committee on Interstate and Foreign Commerce, 75th Congress, 1st Session, pp. 651–52 (1937), (Statement of Paul A. Wright, representing the United Air Lines Transport Corporation).

[9] Applicants have certified that the securities being purchased are being purchased for an investment and not with the view to the distribution thereof, and with the ultimate purpose of protecting and aiding Southern.

[10] Comments shall conform to the requirements of the Board's Rules of Practice for filing comments. Further, since an opportunity to file comments is provided for, petitions for reconsideration of this order will not be entertained.

[Dockets 25743, 25748, 25751]

UNITED AIR LINES, INC.

Order Dismissing Complaints

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 22nd day of August 1973.

By tariff revisions [1] marked to become effective September 1, 1973, United Air Lines, Inc. (United) proposes to establish a common-rated roundtrip midweek excursion fare of $166.62 ($179.95 tax included) in markets of 2,000 miles or more in distance. The fare, which provides discounts up to 48 percent, would be available between October 16, 1973 and February 28, 1974 [2] on most United routes in the 48 contiguous states.[3] The fare would be available for travel on Tuesdays, Wednesdays, and Thursdays for passengers who purchase tickets at least seven days in advance of departure

[1] Revisions to Airline Tariff Publisheds, Inc. Agent, CAB No. 136.

[2] The proposed fares will not be valid for traffic originating during Thanksgiving week (November 20, 21, 22) or during the Christmas/New Year's holiday period (December 7, 1973 through January 7, 1974).

[3] The fare will not apply in the Florida, Atlanta, or mainland-Hawaii markets.

V38-166 AUG 28 73 XUM

and who agree to a length of stay of between seven and nine days, inclusive. American Airlines, Inc. (American), Northwest Airlines, Inc. (Northwest), and Trans World Airlines, Inc (TWA) have filed to match United's proposal.[4]

United's justification for the proposed fare rests primarily on the traffic results and economic evaluation derived from last year's similar experiment. Based on these data, United expects to board 35,000 roundtrip excursion passengers for the 15-week winter period, and to experience a 42.5/57.5-generation/diversion ratio. Assuming an incremental expense of approximately $392,000, the carrier anticipates a net profit impact of $506,960.

United alleges that the modifications of last year's program are intended to improve profits and reduce risk. In extending the period of availability from six to 15 weeks, United alleges that it will achieve a greater economic impact per advertising and promotional dollar expended, while simultaneously affording the public more time to solidify travel plans. Similarly, based on experience with last year's three-tier fare structure, the carrier has concluded that it should concentrate its efforts only in markets over 2,000 miles where consumer response proved to be greatest. It is also anticipated that the more limited market application will "reduce the need to spend advertising and promotional dollars in as many cities, thereby permitting concentration in major metropolitan areas for maximum impact." Finally, United excludes Hawaii, Florida, and Atlanta from the present filing "because of high load factors, United's circuitous southeast route authority, and the unique market situation which already provides them with an adequate and separate promotional fare structure."

Continental Air Lines, Inc. (Continental), Northwest, and TWA have filed complaints requesting investigation and suspension. Continental and Northwest allege, inter alia, that the proposed fare is anticompetitive since smaller carriers without United's extensive route structure will be unable to match the fare; that the proposal will result in a loss of interline traffic since United does not intend to interline travel at the fare and carriers will be unable to absorb the otherwise excessive prorate dilution; and that the fare violates previously established policy with respect to commonrating.

TWA alleges that United has failed to provide sufficient justification for its proposal and that the fare does not adequately satisfy the profit impact criteria established by the Board in Phase 5 of the Domestic Passenger-Fare Investigation (DPFI). Specifically, TWA alleges that United has grossly understated the degree of "borrowed traffic" which occurred during last year's excursion-fare experiment, since it fails "to differentiate between the traffic moving in the latter three weeks of December (after the fare expired) versus the first week in December (while the fare was still in effect)."[5] TWA contends that treating December as if the whole month lacked the excursion fare results in an inflated traffic level for the post-fare period, and hence understates the degree of diversion caused by the fare. Using the New York-Los Angeles market as its example, TWA alleges that United's traffic growth rate immediately following expiration of last year's fare fell from a positive 25-percent/35-percent growth to a negative 13-percent growth—a swing which would conclusively indicate that United's 17.5-percent "borrowed" factor is significantly understated.

In addition, TWA alleges that United has understated the degree of revenue dilution inherent in its proposal by treating diverted passengers as though they would otherwise have used an alternative discount fare. TWA asserts that, based on submissions made to the Board following last year's excursion fare, TWA and American experienced diversion factors from full coach fares of 30 percent and 44 percent, respectively. Finally, TWA contends that approval of United's fare would be tantamount to withdrawing previous approval of Demand Scheduling, since the two fares offer a comparable discount although the reservation and ticketing requirements for Demand Scheduling are far more restrictive.[6] In TWA's opinion, the public would no longer accept the rather stringent requirements of Demand Scheduling, since it could receive the same discount without them.

United has answered the complaints alleging that, contrary to TWA's opinion, the fare is fully consistent with the Phase 5 decision; that it successfully meets the profit-impact test; and that the Board's approval of TWA's Demand Scheduling does not preclude United or any other carrier from introducing competitive discount fares as long as they are cost justified.

Specifically, United asserts that it has not understated the degree of "borrowed traffic" in its analysis of the results of last year's midweek excursion fare, but merely referenced erroneously as "December" the results for the Christmas travel period following expiration of the fare (December 17 through January 9). The decline in growth rate evidenced in the New York-Los Angeles market was allegedly not simply the result of "borrowed traffic," but representative of a traffic decline experienced by United throughout its system. In any event, United claims to have significantly reduced the danger of "borrowed traffic" in its instant proposal by applying a blackout on originating traffic for the full Thanksgiving week as well as throughout the Christmas/New Year's holiday season.

In response to other arguments advanced by the complainants, United alleges that revenue dilution caused by diversion from the full coach fare will be minimized this year by the fare's limitation to long-haul markets where many other discount fares presently apply; that the fare may well help carriers achieve their load factor objectives under present capacity agreements; that the principle of common-rating is a well-established concept approved by the Board on numerous occasions; and that the argument relating to prorate dilution is an insufficient reason for suspension, since it might be applied to virtually any discount fare which is filed by a long-haul carrier.

Upon consideration of the tariff filing, the justification, complaints, and answer thereto, and all other relevant matters, the Board finds that the complaints do not set forth sufficient facts to warrant investigation of the proposal, and the request therefor and consequently the requests for suspension will be denied and the complaints dismissed.

United's proposal appears to constitute a reasonable attempt to generate additional traffic during a traditionally offpeak season. While the discounts in the longest markets amount to a generous 48 percent, they are not out of line with several types of discount fares presently available in a variety of markets. Nor are we persuaded that United has failed to justify its proposal adequately. It is based substantially on the results of last year's 7–9-day midweek excursion fare, which produced a positive profit impact for the three participating carriers (American, TWA, and United) of $322,832.

TWA has advanced a number of arguments against United's proposal, among them that the traffic generated by the proposed fare, in combination with the recent capacity agreement load factor objective of 60 percent, will result in an inordinate displacement of full-fare passengers, or create an unnecessary demand for extra sections. On the other hand, the fares will be applicable only on three off-peak days of the week, and only during the offpeak season. In our opinion, this should significantly minimize the possibility of insufficient capacity to satisfy demand, notwithstanding the capacity agreement. Furthermore, United and its competitors offer numerous one-stop services in markets over 2,000 miles, which could readily accommodate any displaced passengers.

TWA also alleges that United has failed to compute accurately the generation/diversion ratio which will result from the fare and has, therefore, overstated its profitability. Specifically, TWA asserts that United overstates the generation factor by failing to quantify correctly the amount of "borrowed traffic" manifested by last year's similar fare. However, United has clarified this question in its answer, and its estimate of "borrowed traffic" does not appear to be understated. United points out that last year's estimated 17.5-percent diversionary shift from December was used in calculating the amount of "borrowed traffic" which may be involved in the instant proposal, despite the fact that the entire Thanksgiving week will be blacked out this year, as it was not last year. For this reason, and since the markets considered most diversionary (i.e., 1,000–2,000 miles) have been eliminated in the present filing, it is not unreasonable to assume that actual generation may well be significantly higher than 42.5 percent, which represents last year's experience in all markets. If anything, the profit impact may be more favorable than United projects.

TWA contends that approval of United's proposal would force it to abandon the Demand-Scheduling experiment, and destroy the many public benefits which allegedly will flow from that experiment. While it is only reasonable to anticipate some diversion of traffic from Demand Scheduling, it is not at all clear from the evidence at hand that the two programs cannot coexist on an economic basis. For example, if length of stay or one-way travel are primary factors, United's program will not provide an attractive alternative since the fare is only for round-trip travel and the length of stay is rather severely restricted. In any event, TWA has provided no data regarding the travel characteristics of its Demand-Schedule passengers, information which would do much to answer the question of probable impact on its Demand-Scheduling service.

It is also important to note that reservations for Demand Scheduling are now finalized for travel commencing through at least the second week of November and, on the assumption that United will not actively promote its fare until it receives Board approval around the first of September, they should be virtually finalized through to the year-end blackout period. With reservations already made there would seem to be little or no incentive for passengers to go to the bother of switching to another fare plan, and we are unable to conclude that United's excursion fare would pose a threat until January 8, 1974, after the Christmas/New Year's holiday blackout period. On the other hand, if the 7-9-day midweek excursion fare proves successful in the marketplace after that date, it can then be argued that the public has made its choice.

Finally, Continental and Northwest argue that United's proposal is anticompetitive. Essentially, Continental alleges that, due to the prorate dilution that would be involved, it cannot economically meet United's fares on an interline basis and will thus lose traffic to United. Northwest, on the other hand, alleges that to prevent a total loss of traffic to United it will be compelled to enter into uneconomic joint fares. The evidence presented by these carriers does not convince us that the fares would necessarily be uneconomic on an interline basis. Various other fare proposals at similarly low levels have been permitted in the past, and we are not prepared to suspend United's proposal here on this basis.[7]

In summary, the Board believes that United has adequatedly demonstrated a favorable profit impact in accordance with the criteria established in Phase 5 of the DPFI. In our opinion, each discount-fare proposal is entitled to be considered on its own individual merits. However, we would caution that we have considered this proposal in the context of the limited off-peak period during which it is to be effective, and would be extremely reluctant to permit its extension beyond the tariff's expiration date of February 28, 1974 in the absence of a most convincing showing.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

It is ordered, That:

1. The complaints in Dockets 25743, 25748, and 25751 be and hereby are dismissed; and

2. Copies of this order be served upon Trans World Airlines, Inc., Continental Air Lines, Inc., Northwest Airlines, Inc., American Airlines, Inc., and United Air Lines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board:

[SEAL] EDWIN Z. HOLLAND,
Secretary.

[FR Doc.73-18223 Filed 8-27-73;8:45 am]

[4] TWA has also filed a separate tariff revision effective September 9, 1973, proposing initiation of the plan on October 2, 1973 and eliminating the holiday blackout periods.

[5] By "borrowed traffic," TWA is referring to traffic which would have traveled in any event at a time when the 7–9-day excursion fare was not in effect, but was diverted to take advantage of the lower fare.

[6] Demand-Scheduling fares require reservations 90 days in advance of departure accompanied by a $20 nonrefundable deposit for each one-way booking. The balance of the ticket price is due 60 days in advance, at which time the passenger is notified of the precise flight departure time. Under United's plan, no deposit is required, full refunds are available for missed flights, and the reservation lead time is only a minimum of seven days.

[7] We note that in Phase 4 of the DPFI the Board specifically stated its intention to reserve the matter of joint fares for discount traffic (other than children's-fare traffic) for the proper exercise of managerial discretion.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN COSTA RICA

Entry or Withdrawal From Warehouse for Consumption

AUGUST 27, 1973.

On October 11, 1972 and January 29, 1973, there was published in the FEDERAL REGISTER (37 FR 21456 and 38 FR 2714) letters dated October 5, 1972 and January 22, 1973 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, establishing levels of restraint applicable to cotton textile products in Categories 53 and 51, respectively, produced or manufactured in Costa Rica and exported to the United States during the twelve-month periods beginning October 1, 1972 and extending through September 30, 1973 for Category 53; and beginning November 28, 1972 and extending through November 27, 1973 for Category 51.

These levels of restraint are subject to adjustment pursuant to paragraph 4 of Article 3 of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962. Paragraph 4 of Article 3 provides, in substance, that where more than one product is under restraint, the level of restraint for any one product may be exceeded by 5 percent, provided that the total exports subject to restraint do not exceed the aggregate level for all products so restrained.

The Government of Costa Rica has requested that such an increase be applied to Category 53 with an equivalent reduction effected in Category 51.

Accordingly, there is published below a letter of August 27, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the directives of October 5, 1972 and January 22, 1973 by adjusting the levels of restraint applicable to imports of cotton textile products in Categories 53 and 51 from Costa Rica.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

AUGUST 27, 1973.

DEAR MR. COMMISSIONER: This directive amends but does not cancel the directives issued, to you on October 5, 1972, and January 22, 1973, by the Chairman, Committee for the Implementation of Textile Agreements, regarding imports into the United States of cotton textile products in Categories 53 and 51, respectively, produced or manufactured in Costa Rica.

Under the terms of Article 3 of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, including Article 6(c) thereof relating to nonparticipants, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective as soon as possible and for the twelve-month periods beginning October 1, 1972 and extending through September 30, 1973 for Category 53; and beginning November 28, 1972 and extending through November 27, 1973 for Category 51, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 53 and 51, produced or manufactured in Costa Rica, in excess of the following adjusted levels of restraint:

Category	*Adjusted Twelve-Month Levels of Restraint*[1]
53	32,414 dozen
51	13,817 dozen

[1] These levels have not been adjusted to reflect any entries made in Category 53 on or after October 1, 1972, or in Category 51 on or after November 28, 1972.

V 38-166 AUG 28 73 XUM

The actions taken with respect to the Government of Costa Rica and with respect to imports of cotton textile products from Costa Rica have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

ENVIRONMENTAL PROTECTION AGENCY

ENVIRONMENTAL RADIATION EXPOSURE ADVISORY COMMITTEE

Notice of Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the Environmental Radiation Exposure Advisory Committee will be held on October 2-3, 1973, from 9 a.m. to 5 p.m. each day, in the Executive Conference Room, National Environmental Research Center, 944 East Harmon Avenue, Las Vegas, Nevada 89114.

This is the eleventh meeting of the Committee and will center on the Office of Radiation Programs approach for programmatic efforts in the radiological emergency preparedness area. Some of the specific topics to be covered are Radiation Accidents, Protective Action Guides, Protective Measures, and Emergency Planning.

The meeting will be open to the public. Any member of the public wishing to attend the meeting should contact Mr. Robert I. Chissler, Administrative Officer, Office of Radiation Programs, (202) 755-5482.

CHARLES L. ELKINS,
Acting Assistant Administrator for Hazardous Materials Control.

[FR Doc.73-18184 Filed 8-27-73;8:45 am]

[I.F. & R. Docket No. 2]

PAX CO.

Determination and Order

This proceeding involves a challenge by the Pax Company of Utah, a corporation, (Pax) pursuant to section 4(c) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) (7 U.S.C. 135b (c)), to an order canceling the registration of five arsenical-based products. Subsequently, the petitioner withdrew its petition with respect to four of the products, leaving only PAX 3-Year Crabgrass Control, EPA Reg. No. 3234-3 to be considered in this proceeding. For the reasons set forth herein, the original determination to cancel the registration of this product is hereby vacated, without prejudice to further action in the future by this Agency, if warranted.

On July 18, 1969, the Department of Agriculture notified Pax that the registration of its five products would be canceled, effective 30 days from receipt of said notice, on the basis of the requirements of Interpretation 25 (40 CFR 162.123). That Interpretation provided that "Labeling for economic poisons submitted in connection with registration under the Act bearing directions for use of products containing more than 2-percent sodium arsenite or more than 1.5-percent arsenic trioxide in or around the home is not acceptable." The Interpretation further provided that products bearing otherwise acceptable labeling for commercial, industrial, or agricultural use must bear warnings against use or storage around the home and against allowing domestic or animals grazing treated areas. Pax then filed a petition requesting that the scientific questions raised by the notice of cancellation be referred to a scientific advisory committee.

On May 24, 1973, the Advisory Committee, which was convened at the request of Pax, issued its report and recommended that the registration of the Pax product not be canceled. In so doing, the Committee felt that further research needed to be done not only with respect to the Pax product but with related arsenicals as well.

Based on consideration of the views of the Committee and other data available to me, I concur in the recommendation of the Committee. Such concurrence is based, in part, upon the fact that this Agency has underway a comprehensive review of data with respect to all arsenical based pesticides.

Order. It is ordered that the cancellation of registration number 3234-3 be vacated, without prejudice to any future action that may be taken by this Agency with respect to arsenical based pesticides pursuant to the provisions of the Federal Insecticide, Fungicide and Rodenticide Act as amended (86 Stat. 973).

Done this 22d day of August 1973.

JOHN QUARLES,
Acting Administrator.

USE OF PRODUCTS CONTAINING CALCIUM CYANIDE, STRYCHNINE, SODIUM MONOFLUOROACETATE (1080) AND SODIUM CYANIDE FOR HOME, URBAN AND FIELD RODENTICIDES

Notice of Public Hearings

By a Notice of Intent to Hold a Hearing, dated June 19, 1973, this Agency noticed a hearing to determine whether or not the use of products containing calcium cyanide, strychnine, sodium monofluoroacetate (1080), and sodium cyanide as rodenticides in field, home, or urban areas, should be canceled or amended. In order to expedite preparation for this hearing, which this Agency desires to commence by December 1973, it has been decided that it is in the best interest of the orderly administration of government to hold informal public hearings to solicit the views of all interested persons prior to the formal hearings in December.

This notice is published to notify all interested persons that such hearings are to be held in the following cities on the dates indicated:

Washington, D.C.---------September 17, 1973
Denver, Colorado---------September 25, 1973
Dallas, Texas---------September 27, 1973
Sacramento, California------October 2, 1973

The initial hearing of two days duration in Washington, D.C., will be held in Room 3906, Waterside Mall, 401 M Street SW. Specific addresses and number of days duration for other hearings will be published by September 10, 1973.

It should be emphasized that these informal hearings are only in preparation for formal hearings to be held, pursuant to section 6(b)(2) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended, by the notice dated June 19, 1973.

While this notice is not intended to limit the views of all interested parties, the views solicited herein should deal with the Statement of Issues dated June 19, 1973, that accompanied the Notice of Intent to Hold a Hearing. The Statement of Issues is published herewith as Appendix A below. Furthermore, any person wishing to present his views in writing other than at these informal hearings in September and October may do so by filing them in duplicate with the Hearing Clerk, Environmental Protection Agency, Waterside Mall East, 401 M Street SW., Washington, D.C. 20460, on or by October 15, 1973.

Dated August 20, 1973.

(86 Stat. 996)

CHARLES L. ELKINS,
Acting Assistant Administrator for Hazardous Materials Control.

ENVIRONMENTAL PROTECTION AGENCY

Before the Administrator.

In regards the use of products containing calcium cyanide, strychnine, sodium monofluoroacetate (1080) and sodium cyanide for home, urban and field rodenticides, I.F. & R. Docket No. 294, statement of issues.

Pursuant to the accompanying Notice of Intention to hold a hearing, issued pursuant to the authority vested in me by section 6(b) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended, I desire the following issues to be addressed by such hearing concerning the use of calcium cyanide, strychnine, sodium monofluoroacetate (1080), and sodium cyanide as rodenticides for use in the field, home, or urban areas, in addition to any other the Administrative Law Judge deems relevant, namely:

I. Whether considerations of human health and economics require continued control by these products of rodent species, including, but not limited to house mice, ground squirrels (including the Beechey ground squirrel in Southern California), chipmunks, prairie dogs, field mice, pocket gophers, cotton rats, woodchucks, moles, kangaroo rats, jackrabbits, porcupines, Norway rats, feral pigeons, English sparrows.

II. Whether the present use of rodenticides containing these compounds poses an environmental threat of extinction to certain endangered and target species, and a substantial danger through secondary poisoning to non-target species.

III. Whether the major rodenticides containing these compounds are in fact more effective than their alternatives; whether the alternatives pose in some cases a more substantial environmental hazard, and also in some cases less effective control; whether the use of rodenticides in general can be sufficiently restricted and controlled to render them environmentally safe to a high degree but still effective on target species.

IV. In addressing these general issues, attention should be given to the following specific concerns:

A. *Need for rodent control.*—1. The danger of plague from epizootics (animal die-offs) particularly among ground squirrels and Norway rats;

2. The economic threat from destruction by field mice to reforestation;

3. The economic threat from damage to facilities and underground equipment by tunneling and burrowing activities of rodents, particularly the Beechey ground squirrel in Southern California;

4. The economic threat to rangeland enterprises from competition for forage by prairie dogs, and danger to livestock from holes and tunnels of burrowing animals;

B. *Alternative rodenticides.*—1. The extent to which less hazardous alternatives are available and would achieve equally effective control;

2. The question whether the method of death involved in the use of some alternatives is as inhumane as the effect of the rodenticide compounds herein in question;

C. *Environmental threat.*—1. The danger of species extinction through direct control as on prairie dogs or through secondary poisoning of non-target species, including the California condor;

2. The magnitude of secondary poisoning of non-target species not considered endangered; and

3. The potential for restriction and control on use of certain or all rodenticides, including: (a) Strict recording of sales and shipment; (b) Restricted sales; (c) Application restricted to trained personnel; (d) Use restricted to justified need; (e) Development of alternative application methods, i.e., ground as opposed to aerial; and (f) Development of alternative rodent control or accommodation procedures.

Dated June 19, 1973.

ROBERT W. FRI,
Acting Administrator.

FREQUENCY COORDINATION EXTENDED BEYOND AUGUST 31, 1973 IN CHICAGO

Public Notice

AUGUST 20, 1973.

In the Second Report and Order in Docket No. 19150, the Commission indicated that frequency coordination would not be required of applicants in the Chicago District after August 31, 1973. However, because of unforeseen delays in completing the data base, the requirement for frequency coordination will be continued until further notice. It is expected that the delay will not exceed 60 to 90 days.

FEDERAL COMMUNICATIONS COMMISSION,

FEDERAL MARITIME COMMISSION

AMERICAN MAIL LINE LTD. AND EVERETT ORIENT LINE, INC.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763 (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, by September 17, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Mr. W. R. Purnell, Assistant Vice President, American Mail Line Ltd., 601 California Street, Suite 610, San Francisco, California 94108.

Agreement No. 10060-1, between American Mail Line Ltd. and Everett Orient Line, Inc., amends Article 1 of their approved Transshipment Agreement to provide for the westbound movement of cargo in addition to the present eastbound movements, in the trade between Thailand and Pacific Northwest ports of the United States, with transshipment at Hong Kong or Japanese ports.

By Order of the Federal Maritime Commission.

Dated August 21, 1973.

JOSEPH C. POLKING,
Assistant Secretary.

J. M. SCHIFFINO & CO. ET AL.

Independent Ocean Freight Forwarder License Applicants

Notice is hereby given that the following applicants have filed with the Federal Maritime Commission applications for licenses as independent ocean freight forwarders pursuant to section 44(a) of the Shipping Act, 1916 (75 Stat. 522 (46 U.S.C. 841 (b))).

Persons knowing of any reason why any of the following applicants should not receive a license are requested to communicate with the Director, Bureau of Certification and Licensing, Federal Maritime Commission, Washington, D.C. 20573.

J. M. Schiffino & Co., One Broadway, New York, New York 10004.

Darwin H. Liao, P.O. Box 2204, Inglewood, California 90305.

Frank Delgadillo, d/b/a Gateway Forwarders International, 1354 Third Street No. 310, Alameda, California 94501.

Senderex Cargo Company, Inc., 5315 West 102nd Street, Los Angeles, California 90045.

OFFICERS AND DIRECTORS

Philip R. Torres, Director/President/Treasurer; Gene A. Stone, Director/Vice President/Secretary, and Leonard Block, Director.

Herman Schmid, 84-60 123rd Street, Kew Garden, New York 11415.

Forwarding Systems, Inc., 840 Hinckley Road, Suite 151, Burlingame, California 94010.

OFFICERS

John H. Jensen, President; Pamela A. Jensen, Secretary/Treasurer, and Alan K. Farber, Vice President.

By the Commission.

Dated August 23, 1973.

JOSEPH C. POLKING,
Assistant Secretary.

[FR Doc.73-18197 Filed 8-27-73;8:45 am]

PORT OF OAKLAND AND JAPAN LINE, LTD. ET AL.

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as

V 38-166 AUG 28 73 XUM

amended (39 Stat. 733, 75 Stat. 763 (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, by September 17, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

J. Kerwin Rooney, Esq., Port Attorney, Port of Oakland, 66 Jack London Square, P.O. Box 2064, Oakland, California 94607.

Agreement No. T-2836, between the Port of Oakland (Oakland) and Japan Line, Ltd., Kawasaki Kisen Kaisha, Ltd., Mitsui O.S.K. Lines, Ltd., and Yamashita-Shinnihon Steamship Co., Ltd. (the Lines), is a 3-year nonexclusive containership preferential assignment of certain marine terminal facilities in Oakland, California, which the Lines will use primarily for handling containerized traffic. Oakland reserves secondary berthing privileges and all charges in connection therewith will accrue to and be billed by Oakland. The Lines will pay Oakland's terminal tariff charges subject to a certain annual minimum plus a portion of the cost for the construction of improvements by Oakland, as further provided for in the basic agreement. Once the minimum annual guarantee is reached, provision is made for a division of certain revenues from secondary use by the Lines. The Lines agree that if they publish a terminal tariff for services they perform at the terminal, all charges will be identical to the charges appearing in Oakland's tariff.

By Order of the Federal Maritime Commission.

Dated August 23, 1973.

JOSEPH C. POLKING,
Assistant Secretary.

WEDEMANN & GODKNECHT, INC., AND SOPAC TRANSPORT CORP.

Notice of Agreement Filed

Notice is hereby given that the following Agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763 (46 U.S.C. 814)).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by September 7, 1973.

Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement filed by:

Gerald H. Ullman, Esq., 120 Broadway, New York, New York 10005.

Agreement No. FF 74-1, between Wedermann & Godknecht, Inc. (WGI FMC No. 889), Sopac Transport Corp. (Sopac FMC No. 832) and L. B. Fichtmann, the sole stockholder of Sopac, provides for the purchase of certain assets of Sopac by WGI. Under the terms of the agreement WGI is to acquire all of Sopac's New York ocean export accounts, its goodwill and all rights to the use of the name "Sopac" or any variant thereof on the east coast of the United States, except the State of Florida. In addition, a noncompete clause provides that for a period of five years after the closing, neither L. B. Fichtmann nor Sopac will in any manner, directly or indirectly, compete with or become interested in any competitor of WGI. The covenant applies to the east coast of the United States, except the State of Florida where Sopac operates an ocean forwarding business.

Sopac is to retain its independent ocean freight forwarder license and operate in the State of Florida.

By order of the Commission.

Dated: August 20, 1973.

JOSEPH C. POLKING,
Assistant Secretary.

FEDERAL RESERVE SYSTEM

AMERICAN BANCSHARES, INC.; NORTH MIAMI, FLORIDA

Order Approving Acquisition of Bank

American Bancshares, Inc., North Miami, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the outstanding voting shares of Executive Bank of Fort Lauderdale, Fort Lauderdale, Florida (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none have been received. The application has been considered in light of the factors set out in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant has seven subsidiary banks, with aggregate deposits of $190.8 million,[1] representing less than one percent of deposits held by banks in Florida. Acquisition of Bank, which has deposits of $4.9 million, will have little effect on statewide concentration and on Applicant's share of deposits.

Bank opened for business in November, 1972, in the north Broward County banking market, extending from Fort Lauderdale to Boca Raton, Florida. Bank is one of the smaller of 48 banks in the market, with less than one percent of bank deposits in the area. Applicant's subsidiary nearest to Bank is Sterling National Bank of Davie, seventeen miles southwest, in the contiguous but separate market of south Broward County. Applicant does not compete with Bank, and Bank does not compete with any of Applicant's subsidiaries. No competition will be eliminated nor is it likely that Applicant will obtain a dominant position in the market by consummating the proposed acquisition.

The area's banking needs are being met by the organizations in the market. This acquisition should aid Bank in meeting the borrowing needs of its larger customers, and Applicant will assist Bank in developing a more diverse loan portfolio. Convenience and needs factors support approval.

Considerations relating to the financial and managerial resources and future prospects of Applicant, its subsidiaries and Bank, in view of Applicant's commitments to reduce its debt and to furnish additional capital to Bank, are regarded as satisfactory and consistent with approval of the application. It is this Federal Reserve Bank's judgment that the proposed transaction is in the public interest and that the application should be approved.

On the basis of the record in this case, the application is approved for the reasons summarized above. However, the transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the date of this Order, unless such period is extended for good cause by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Federal Reserve Bank of Atlanta, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective August 16, 1973.

[SEAL] MONROE KIMBREL,
President.

[FR Doc.73-18219 Filed 8-27-73;8:45 am]

[1] Banking data are as of December 31, 1972, except that deposits of Bank are as of March 28, 1973. Holding company formations and acquisitions approved by the Board through June 28, 1973, are included.

EXCHANGE BANCORPORATION, INC.; TAMPA, FLORIDA

Order Approving Acquisition of Bank

Exchange Bancorporation, Inc., Tampa, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire up to 100 percent of the outstanding stock of Madeira Beach Bank, Madeira Beach, Florida (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none have been received. The application has been considered in light of the factors set out in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant has ten subsidiary banks with aggregate deposits of $390.6 million, 2.29 percent of deposits in all banks in Florida, and is the tenth largest banking organization in the state.[1] Acquisition of bank, which as of March 28, 1973, had deposits of $30.9 million, will have only nominal effect on state-wide concentration and on Applicant's share of deposits.

Bank is the 14th largest bank in the relevant banking market, south Pinellas County, Florida, and holds 2.82 percent of aggregate deposits in this market. Applicant has one subsidiary in this market and three existing or proposed subsidiaries within a 25-mile radius of Bank. There is some overlap in the service areas between Applicant's subsidiaries and Bank, and Bank attracts a small percentage of commercial mortgage loans from the service area of Applicant's lead bank, Exchange National Bank of Tampa. Concurrently with this application Applicant is seeking to acquire First Gulf Beach Bank and Trust Company, St. Petersburg Beach, an affiliate of Bank through stockholders in common, and the limited competition between them would remain unchanged if this acquisition is approved. The two banks would also be eliminated as potential entry vehicles into the market for holding companies not present in the market. The effects of approval on competition are viewed as slightly adverse.

The banking needs of the community are being met by organizations in the market. Applicant has stated that improvements will be sought in the data processing operations, trust operations, and investment portfolio management of Bank. Furthermore, Bank has a relatively low loan to deposit ratio, and Applicant intends to improve Bank's lending practices and increase its volume of loans. These factors of meeting the convenience and needs of the community to be served lend sufficient support for approval to offset the slightly adverse competitive effects.

Considerations relating to the financial and managerial resources and future

[1] Banking data are as of June 30, 1972 unless otherwise stated.

V38-166 AUG 28 73 XUM

prospects of Applicant, its subsidiaries, and Bank, in view of Applicant's commitment to increase equity capital in one subsidiary, are regarded as satisfactory and consistent with approval. It is this Federal Reserve Bank's judgment that the proposed transaction is in the public interest and the application should be approved.

On the basis of the record in this case, the application is approved for the reasons summarized above. However, the transaction shall not be consummated (a) before the 30th calendar day following the effective date of this Order or (b) later than three months after the date of this Order, unless such period is extended for good cause by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Federal Reserve Bank of Atlanta, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective August 16, 1973.

[SEAL] MONROE KIMBREL, *President.*

[FR Doc.73-18218 Filed 8-27-73;8:45 am]

EXCHANGE BANCORPORATION, INC.; TAMPA, FLORIDA

Order Approving Acquisition of Bank

Exchange Bancorporation, Inc., Tampa, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire up to 100 percent of the outstanding voting shares of First Gulf Beach Bank and Trust Company, St. Petersburg Beach, Florida (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none have been received. The application has been considered in light of the factors set out in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant has ten subsidiary banks with aggregate deposits of $390.6 million,[1] 2.29 percent of deposits in Florida banks. Acquisition of Bank, which has deposits as of March 28, 1973 of $46.3 million, will have only nominal effect on statewide concentration and on Applicant's share of deposits.

Bank is the tenth largest in south Pinellas County, Florida, the relevant banking market, and holds 4.22 percent of bank deposits in this market. Applicant has one subsidiary in this banking market and three existing or proposed subsidiaries within a 25-mile radius of Bank. There is some overlap in service areas between Bank and Applicant's subsidiaries, and Bank attracts a small percentage of commercial mortgage loans from the service area of Applicant's lead bank, Exchange National Bank of Tampa. Concurrently with this application, Applicant is seeking to acquire Madeira Beach Bank, an affiliate of Bank through stock ownership in common. Acquisition of these two banks would leave unchanged the limited competition between them, and would eliminate Bank as a potential entry vehicle into the market for companies not presently in the market. The competitive effects of the proposed acquisition are viewed as slightly adverse.

The Banking needs of the community are being met by organizations in the market. However, Applicant intends to improve Bank's data processing operations, trust operations and investment portfolio management. Bank has a relatively low loan to deposit ratio, and Applicant intends to change Bank's lending practices and increase its loan volume. The convenience and needs factors lending support for approval are sufficient to offset the slightly adverse competitive effects.

Considerations relating to the financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank, in view of Applicant's commitment to increase the equity capital in one of its subsidiary banks, are regarded as satisfactory and consistent with approval. It is this Federal Reserve Bank's judgment that the proposed transaction is in the public interest and that the application should be approved.

On the basis of the record in this case, the application is approved for the reasons summarized above. However, the transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the date of this Order, unless such period is extended for good cause by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Federal Reserve Bank of Atlanta, acting pursuant to delegated authority for the Board of Governors of the Federal Reserve System, effective August 16, 1973.

[SEAL] MONROE KIMBREL, *President.*

[FR Doc.73-18217 Filed 8-27-73;8:45 am]

FIRST NATIONAL AGENCY OF AITKIN, INC.

Order Approving Formation of Bank Holding Company and Continuation of Insurance Agency Activities

The First National Agency of Aitkin, Inc., Aitkin, Minnesota, has applied for the Board's approval under § 3(a)(1) of the Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 80 percent or more of the voting shares of The First National Bank of Aitkin, Aitkin, Minnesota (Bank).

At the same time, Applicant has applied for the Board's approval under section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of Regulation Y to continue to engage in permissible insurance agency activities in Aitkin, Minnesota (population of less than 2,000). The operation by a bank holding company of a general insurance agency in a community with a population not exceeding 5,000 is an activity that the Board has previously determined to be closely related to banking (12 CFR 225.4(a)(9)(iii)(a)).

Notice of receipt of the applications has been given in accordance with sections 3 and 4 of the Act, and the time for filing comments and views has expired. The Board has considered the applications and all comments received in light of the factors set forth in section 3(c) of the Act, and the considerations specified in section 4(c)(8) of the Act.

Applicant, which is wholly-owned by the president and principal shareholder of Bank, is a general insurance agency whose business operations are conducted from the premises of Bank. Bank ($12.5 million in deposits) the larger of two banks in Aitkin, a rural community in central Minnesota, controls 26.3 percent of the total deposits held by the five banks in the Aitkin banking market and is the largest bank in that market.[1] Since Applicant has no banking subsidiaries, acquisition of Bank by Applicant would not eliminate any existing competition. Moreover, it does not appear that the proposal would have an undue adverse effect on any other bank in the market, nor preclude the establishment of new banks in the area. Therefore, competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of Applicant and Bank are regarded as generally satisfactory and consistent with approval. Applicant will incur debt in acquiring Bank; however, its income from Bank and insurance agency activities should provide sufficient revenue to service the debt adequately without impairing the financial condition of Bank. Although consummation of the transaction would have no immediate effect on the area's banking needs, improved services may result in the future under the more flexible corporate structure of the holding company. Considerations relating to the convenience and needs of the community to be served, therefore, are consistent with approval of the application. It is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application to acquire Bank should be approved.

Applicant is one of three insurance agencies located in Aitkin and has been closely associated with Bank through common ownership. Continuation of Applicant's insurance activities would enable Bank's customers to enjoy the continued convenience of obtaining banking and insurance activities in conjuction with each other. There is no evidence in the record indicating consummation of the proposal would result in any undue concentration of resources, unfair competition, conflicts of interest, unsound banking practices or other adverse effects on the public interest. On the basis of the foregoing and other facts reflected in the record, the Board has determined that the considerations affecting the competitive factors under section 3(c) of the Act and the balance of the public interest factors the Board must consider under section 4(c)(8) in permitting a holding company to engage in an activity on the basis that it is closely related to banking both favor approval of Applicant's proposal.

Accordingly, the applications are approved for the reasons summarized above. The acquisition of Bank shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Minneapolis pursuant to delegated authority. The determination as to Applicant's insurance activities is subject to the Board's authority to require reports by, and make examinations of, holding companies and their subsidiaries and to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

By order of the Board of Governors,[2] effective August 20, 1973.

[SEAL] THEODORE E. ALLISON, *Assistant Secretary of the Board.*

[FR Doc.73-18216 Filed 8-27-73;8:45 am]

FIRST NEW MEXICO BANKSHARE CORP.

Order Approving Acquisition of Bank

First New Mexico Bankshare Corp., Albuquerque, New Mexico, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 80 percent or more of the voting shares of Grant County Bank, Silver City, New Mexico (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is the largest banking organization in New Mexico with seven subsidiary banks and controls, in the aggregate, approximately $542 million in deposits, representing approximately 25 percent of the deposits in commercial banks in the State. Consummation of this proposal would increase Applicant's share of the deposits in the State by less than one percent and would not significantly increase the concentration of banking resources in New Mexico.

Bank is the slightly larger of two banks in Silver City, New Mexico, controlling approximately $14 million in deposits. Applicant's closest present subsidiary is located more than 238 miles from Bank and there is no existing competition between Bank and any of Applicant's present subsidiaries. Due to the cyclical nature of the economy, which is based on mining, and the fact that deposits per banking office in the Silver City market are lower than the state average, de novo entry does not appear attractive. The Board concludes that consummation of the proposal would have no adverse effects on existing or potential competition.

The financial and managerial resources and future prospects of Applicant (and its subsidiary banks) are satisfactory to excellent. The financial resources and future prospects of Bank are generally satisfactory. Bank appears to have a slight management succession problem as well as a problem in obtaining competent middle management. Applicant would help solve this problem and provide continuous aggressive and competent management. Considerations relating to financial and managerial resources lend slight weight in favor of approval of the application. While there is no evidence that the banking needs of the public in the Silver City market are going unserved, there are public benefits to be derived from this proposal in the form of proposed new services to be offered. Applicant proposes to have Bank offer trust services, payroll accounting services, and placement of real estate loans with permanent investors, as well as raise the passbook savings rate to the maximum. Considerations relating to the convenience and needs of the community therefore also lend slight weight in favor of approval of this application.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[3] effective August 20, 1973.

[SEAL] THEODORE E. ALLISON, *Assistant Secretary of the Board.*

SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 34-10260, 34-10351; File No. 4-168]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Request for Comments on Proposed Tax Shelter Rule

The Commission today announced that it is requesting public comment on proposed rules[1] now being considered for adoption by the National Association of Securities Dealers, Inc. ("NASD") which would establish a system of regulation in connection with the distribution by NASD members of securities of tax sheltered programs.[2]

The NASD published for comment on May 9, 1972 proposals which were substantially similar to the present proposals. The Commission has decided to supplement and update the NASD's publication by requesting all persons interested in this matter (including those who submitted comments to the NASD last May) to submit their views directly to the Commission. The Commission desires comments not only to aid in its possible consideration of the specifics of the NASD's proposed plan of regulation, when it is filed formally under the provisions of section 15A(j) of the Exchange Act, but also to provide itself with a broadened basis for developing its own policy respecting an appropriate regulatory approach in the tax shelter area generally. It should be emphasized that the Commission has not yet officially reviewed the NASD rules and has suggested that the NASD defer further action to establish and implement its program until the Commission and the Association have had an opportunity to examine the responses to this release.

A. *Background.*—For the past few years the NASD, as well as other regulatory and self-regulatory organizations, has been concerned about the expanding number of sales of tax sheltered securities which it believed were not being adequately regulated. The present NASD rule proposals reflect two years of effort on the part of the NASD and its special committees to remedy various significant problems it believes are present in many tax sheltered offerings. During this period the NASD has advised the Commission staff of its progress on a regular basis.

The Commission has also been concerned with tax sheltered programs. For example, it has initiated a proposal for federal legislation which would provide for the protection of participants in oil and gas drilling funds or programs.[3] The proposal is designed to deal with oil and gas programs which provide flow-through federal tax treatment to investors and which generally offer their participation interests to the public. Its regulatory provisions would, among other things, provide controls designed to prevent conflicts of interest and unfair transactions between oil and gas programs and their managers; prohibit changes in fundamental policies of an oil and gas program without the approval of program participants; and require that persons acting as program managers do so pursuant to a written contract, material alterations of which would have to receive the participants' approval.

In another area, the Commission on May 3, 1972 appointed a Real Estate Advisory Committee to study the securities regulatory questions raised by real estate investment programs. The Committee's report which was published on October 12, 1972 emphasized the importance of certain present regulatory tools, such as the disclosure requirements under the Federal securities laws, to ensure that adequate information is available to customers; but, it also expressed caution against extending present Commission regulation over real estate securities.[4] The Committee concluded, however, that if improved disclosure and enforcement policies do not adequately protect the interests of public purchasers in a competitive market, and if the state regulatory agencies and self-regulatory organizations are unable to achieve satisfactory uniformity in their regulatory programs in this regard, then a federal legislative approach may be necessary. The Committee also indicated that if legislation is deemed appropriate it might be modeled after the proposed Oil and Gas Investment Act.

Many of the states and various groups of state securities administrators have also been active in pursuing effective regulatory control over tax sheltered programs. In California, for example, the Real Estate Advisory Committee to the Commissioner of Corporations submitted its findings on February 23, 1973, and proposed rules for the offer and sale of real estate programs covering disclosure, investor suitability and management fees, among other matters. Rule proposals covering real estate syndications comparable to California's have also been adopted by the Midwest Securities Commissioners Association and we understand that they have been implemented in about 24 states represented in that group. These rules are substantially comparable to the NASD's proposals in the real estate area. The North American Securities Administrators Association also has been actively concerned with developing model rules and guidelines for use by its members within their own jurisdictions.

B. *Nature of the NASD proposals.*—The NASD rule proposals, which would prescribe standards governing tax shelters in which its members may participate, are rather lengthy (about 50 pages) and cover a great many aspects of their operations and underwriting arrangements. We have therefore prepared the following summary of them in order to facilitate discussion. The section numbers in parentheses refer to the appropriate sections of the NASD's draft.

1. Expertise (section 2(a) and (b))—NASD members who desire to act as sponsors of a program would be required to have a certain expertise appropriate to such a program (i.e., at least 4 years of experience in such matters).

2. Minimum Program Net Worth and Public Sales (section 2(c) and (d))—a sponsor would have to have a certain net worth before NASD members could underwrite or participate in the distribution of the program.[5] In oil and gas programs, a minimum amount of public sales would have to be effected before the program could be activated. If such an amount were not raised, then all funds received from participants would have to be returned to them.

[1] The full current text of the rules is available for review or copying at the Commission's Public Reference Room, at 500 North Capitol St., Washington, D.C. 20549, or upon request from the NASD's Department of Corporate Financing, 1735 K Street NW., Washington, D.C. 20006, after July 5, 1973. It is suggested that persons wishing to comment on the specifics of these rule proposals utilize this text as the basis for such comments. For those who may be interested only in responding to the policy questions discussed in section C of this release, the May 9, 1972 draft of the rules previously disseminated by the NASD appears to be sufficient for this purpose.

Under section 15A(j) of the Securities Exchange Act of 1934, the NASD is required to submit any change in or addition to its rules for Commission review. Any such rule change or addition automatically takes effect thirty days after filing it with the Commission (or sooner if the Commission permits) unless the Commission enters an order disapproving it; such disapproval is given if the alterations or additions are inconsistent with the requirements of the Securities Exchange Act.

The subject rule proposals, which represent the NASD's most recent draft, are not at this stage a formal NASD filing under section 15A(j). The Commission understands, however, that the NASD is now prepared to make such a filing.

[2] Basically, a "tax shelter" is an investment in which flow-through tax benefits are a material factor affording investors relatively large deductions and lower income tax rates. Because of their tax significance these investments are usually sold to individuals who have substantial incomes.

[3] S.-1050, 93d Cong., 2nd Session (February 28, 1973), as submitted by the Securities and Exchange Commission. This bill was originally introduced on August 7, 1972, S.-3884.

This proposed legislation was drafted by the Commission pursuant to the directive of the Managers on the part of the House in their statement appended to the Report of the Conference Committee on the Investemnt Company Amendment Act of 1970 (Pub. L. 91-547, approved December 14, 1970).

[4] Real Estate Advisory Committee, Report to the Securities and Exchange Commission (October 12, 1972) at pp. 5, 14 and 15.

[5] It should be noted that the NASD uses the concept of net worth based on fair market value whereas the Midwest Securities Commissioners Association guidelines (as referred to above) use book value in computing net worth. Comments are invited as to the relative validity of these two methods for use by the NASD in the real estate area.

In programs other than oil and gas, there would likewise have to be minimum public sales before the program could be activated; however, unlike the oil and gas requirements, there would be no specified minimum dollar standard. Instead, this provision would require that there be sufficient funds to effect the objectives of the program.

3. Tax Benefits (section 2(e))—if the program could not substantiate its favorable tax benefits as described in the prospectus, by presenting a tax ruling or an opinion in respect to such matters by an independent tax counsel, an NASD member could not underwrite or participate in the distribution. Another provision of the proposed rules would require that purchasers have a right of withdrawal if the tax benefit representations in the prospectus were not accurate.

4. Subscriptions (section 2(f))—the amount of a subscription for an oil and gas program could not be less than $5,000. Other types of programs would not be required to have a minimum subscription amount.

Installment Payments (section 2(g))—deferred subscription payments beyond a 12-month period may be permitted only in certain types of offerings, for example, in farming and real estate developments, among others.

5. Assessments[6] (section 2(j)-(p))—proper disclosure would be required by the rules of possible assessments, mandatory or optional, which may be levied against program participants. Also, certain limitations would be placed on the maximum amount of mandatory assessments, and on the amount of certain penalties for failing to pay various assessments.

6. Reinvestment (section 2(g))—an investor would be provided with complete information on the amount of money to which he is entitled under a reinvestment program and with a copy of a prospectus relating to such subsequent program before deciding to participate.

7. Liquidation of Program Interests (section 2(r), (s) and (t))—programs whose sponsors are permitted to liquidate their interests would be required to allow public participants to transfer or sell their program interests on a comparable basis. When the latter possibility is provided, the rules would require that an independent appraisal be made of the liquidation values.

8. Disclosure of Certain Transactions (section 2(u) and (v))—in addition to requirements that all of the above information be fully disclosed in the prospectus, the rules would require specifically that information concerning business transactions of the program with any person would have to be similarly disclosed, if the aggregate amount of such transaction is at least 20 percent of the total dollar value of the participants' interest in the program.

9. Rights of Participants (section 3)—the provisions in this area concern the legal relationships between the program and its participants. If the enumerated standards were not met, an NASD member would be prohibited from participating in the distribution of the program. Some of these requirements would be the right of participants by majority vote to remove the sponsor, to amend the partnership agreement and to dissolve the partnership; the termination of all contracts between the program and the sponsor without penalty on 60 days notice in writing; and the right of a participant to obtain a list of the names, addresses and interests held by all participants in the program (after payment of reproduction costs).

10. Conflicts of Interest (section 4)—all potential conflicts of interest of sponsors and managers would be required to be fully disclosed in the prospectus. Also, if any property is sold to a program by its sponsor, the sale price would have to be established as fair according to the procedures established by the proposed rules; for example, the fair market value of the property would have to be determined by an independent qualified appraiser.

11. Suitability (section 5)—a program would be required to establish and disclose in the prospectus its suitability standards for program participants. In order to determine the suitability of a program for a particular investor, the rules would establish certain minimum guidelines, among which are that the customer should be reasonably anticipated to be in at least a 50 percent tax bracket, in certain high risk situations, and that the customer have a net worth sufficient to sustain the risk inherent in the program, including the loss of his investment.

12. Organization and Offering Expenses[7] (section 6)—the underwriting arrangements, including compensation received by NASD members for underwriting activities, would have to be fair and reasonable and fully disclosed in the prospectus. The rules also would provide that the organization and offering expenses must not exceed 15 percent of the dollar amount of the cash receipts of the offering.

13. Sponsor's Compensation (section 7)—a summary of all compensation to the sponsor would be required to be disclosed in the prospectus and such compensation would have to be fair and reasonable. Also, the amount of compensation to sponsors would be subject to specific guidelines, with separate standards for oil and gas and real estate programs. For example, in the real estate area, the rules would require that programs prohibit the payment of rebates, concessions and comparable forms of compensation to the sponsor by a third party who has rendered services to the program for which he was compensated and would limit property management fees paid to a sponsor to an amount no higher than customary charges for similar services by an non-affiliated person engaged in property management as a regular business.

14. Periodic Reports (section 8)—these provisions would require sponsors and programs to send specified reports to participants—e.g., quarterly reports (by oil and gas programs during the drilling phase of operations only), containing information concerning the receipt and disbursement of revenue and other information, and annual statements after the close of the fiscal year.

15. Sales Literature (section 9)—the proposed rules set forth detailed standards regarding the content of sales literature utilized by members and would require such literature to be filed with the NASD for review in advance of use. The rules would require that certain information be included in all sales literature; for example, a statement of the relevant factors relating to investment suitability of the program, the amount of sales charges and an accurate statement of the tax aspects of the program.

C. *Policy questions.*—While there appears to be wide support for more precise and effective regulation concerning tax sheltered distributions, and while considerable effort has already been devoted to formulating standards, the Commission believes that further discussion of some overall policy issues relating to the NASD proposals would be appropriate. Thus, the Commission requests that interested persons direct comments to the following policy questions.

1. *Scope of NASD regulation.*—a. In many of the areas covered by the proposed rules, the NASD has traditionally regulated the activities of its members. Among other things, it has dealt with qualification requirements for its members (under which would fall the proposed experience requirement referred to in paragraph 1 of the above summary), and it maintains standards for a review of sales literature (comparable to those discussed in paragraph 15).[8] Also in this category are the provisions that would require NASD members adequately to assure themselves that purchasers of tax sheltered securities have sufficient financial resources to undertake the risks of such an investment (paragraph 11).[9] Tax shelter organization and offering ex-

[6] Assessments, as used here, are understood to include additional amounts of capital which a participant may be required or requested to furnish beyond the subscription price.

[7] Such expenses, as defined by the proposed rules, are those "charged directly to the program which are incurred in preparing a tax sheltered program for registration and subsequently offering and distributing it to the public • • •."

[8] See qualification requirements under Article 1, section 12 and Schedule C of its Bylaws (CCH, NASD Manual, Par. 1102A) and standards for sales literature used by member firms pursuant to the Interpretation of the NASD's Board of Governors concerning advertising generally (CCH, NASD Manual, Par. 2151) and investment company securities (CCH, NASD Manual, Par. 5252).

[9] This suitability requirement is comparable in certain respects to the present NASD rule concerning member recommendations to customers. Article III, Section 2 of the NASD's Rules of Fair Practice (CCH, NASD Manual, Par. 2152).

V 38-166 AUG 28 73 XUM

penses (paragraph 12) and the requirements concerning prospectus disclosures (paragraphs 3, 5, 6, 8, 10, and 11) are additional subjects covered by the proposed rules which are now covered under comparable present NASD provisions for other underwritings.[10]

b. On the other hand, the NASD is also considering rules concerning tax shelters which may indirectly affect non-NASD members (e.g. sponsors and issuers) in ways not thought of heretofore as within the usual scope of the NASD's functions.[11] These include requirements relating to the program's net worth and public sales (paragraph 2), amount of participant subscriptions and arrangements for installment payments (paragraph 4), assessments (paragraph 5), liquidation of program interests (paragraph 7), rights of participants (paragraph 9), conflicts of interest (paragraph 10), sponsor's compensation (paragraph 13) and periodic reports (paragraph 14).[12] The effect of these provisions would be that NASD members would be prevented from underwriting or participating in the distribution of the securities of tax sheltered programs unless such programs (e.g. the issuer and their managers) met the standards and requirements of the proposed rules. To this extent the issuer would be indirectly regulated by the NASD under federally granted powers. Since several of these regulatory standards would appear to go to the merits of tax shelter securities and to the propriety of various policies and practices of the managements of such issuers, they are substantially similar in impact to the "blue-sky" fairness statutes of a number of states. These aspects of the NASD's contemplated regulatory program give rise to a number of important policy issues:

i. The "blue-sky" impact may be in contrast with the underlying philosophy of the federal scheme of regulation of the public distribution by issuers of securities reflected in the Securities Act of 1933, which is basically one of full and fair disclosure. The thrust of the 1933 Act in this regard is "to assure ample and reliable data for decision making by investors and the financial community, as distinguished from the Federal Government assuming the more paternalistic role of passing on the merits of securities." [13] Thus, there is a policy question, on which comments would be appreciated, as to whether the NASD, in the exercise of its broad authority under the Exchange Act over the conduct of its members,[14] would be engaging in a type of issuer-oriented regulation inconsistent with the intent of the 1933 Act. If so, the further question arises whether the Exchange Act affords adequate legislative sanction for such regulation.

ii. The NASD estimates that its members distribute about three-quarters of all registered tax sheltered programs and in about one-half of these, an NASD member or an affiliate is the sponsor. In view of the NASD membership's involvement in the issuer-management phases of the investment products it sells to investors, its issuer-oriented proposals may be appropriate to that extent. Thus, if it is determined that the NASD should not, as a general proposition, pursue its rule proposals insofar as they relate to issuer-quality and management practices, then, in the alternative, it may be deemed appropriate for the NASD to enact the latter rules limiting their applicability to member affiliated issuers. Public comment on the practicality of this approach is invited.

iii. It has been contended by some that if additional regulation of issuers of tax sheltered programs along the lines described in the preceding two paragraphs (i and ii) is necessary, it should be achieved through comprehensive federal regulation rather than NASD rulemaking. The argument here seems to be predicated on concern whether it would be appropriate to give a self-regulatory organization composed of businessmen the authority and responsibility to effectively bar access to the capital markets for specific categories of investment "products." Since it is possible that federal regulation with respect to tax sheltered programs in the areas highlighted by the NASD proposal may be in order ultimately, there is a question as to whether the necessary authority and responsibility to administer such regulation, to the degree required, should reside solely in governmental hands rather than in the hands of distributors of competitive products. Comments on this question are invited.

iv. Considerations of the nature discussed in paragraphs i, ii, and iii above bear on the question of the appropriate allocation of regulatory responsibility, in this instance as between the Commission and the NASD. Interested persons are therefore invited to comment on the NASD's tax shelter proposals from the viewpoint of how this responsibility and authority, with respect to each of the problem areas they would deal with, should be apportioned.

2. *Improved disclosures.*—It should be noted that the Commission has been considering under its present powers possible additional measures in the tax shelter area, including stepped up enforcement of present rules and the need for additional rules to improve prospectus disclosures.[15] Among the recommendations included in the Report to the Commission of the Real Estate Advisory Committee (October 1972) were suggestions that the Commission augment its efforts to ensure that full and proper disclosure is provided in prospectuses under the Securities Act of 1933 relating to real estate tax shelter offerings and to consider promulgating additional disclosure rules which would more adequately treat the individual characteristics of these tax sheltered programs.[16] The Commission intends to pursue this course.

3. *Need for development of a legislative program.*—The information gathered by the Commission through its surveillance programs and the cooperative efforts of the state authorities and the NASD indicates that additional regulation of tax shelters in the general areas included in the NASD rule proposals may well be needed. Many of these problems cannot readily be addressed by the Commission under its present statutory powers. By means of legislation the Commission could acquire full and flexible direct authority to regulate, when necessary. Legislation also may be desirable to help resolve some or all of the legal and policy questions regarding the proper scope of NASD authority considered above. The Commission's views with respect to the formulation of a legislative program will hinge in large part on the conclusions it reaches following consideration of the public comments it receives in response to this release. Accordingly, the Commission also would welcome views of all interested persons on the need for and the appropriate structure and content of such a program.

4. *Partial Regulation by the NASD.*—Commentators also are invited to consider the advisability of the NASD proceeding to implement rules covering one or more of the "traditional" areas discussed above (at p. 7) without going forward, pending possible legislative action, in the other, less traditional areas. The Commission is now inclined to the view that the implementation of the NASD proposals which do not raise the legal and policy issues previously noted should proceed, subject to Commission and NASD consideration of the responses to this release, pending development of a legislative program.

The Commission desires to receive comments from all interested persons and requests that such comments be directed as much as possible to the issues discussed heretofore. While comments with regard to the specifics of the NASD rule proposals are also welcome, the Commission is particularly interested in receiving the views concerning the basic policy questions referred to above as to the proper regulatory approach to tax sheltered programs.

Interested persons are requested to submit their views, any data or other comments or information, in writing with two copies, on the foregoing issues prior to September 15, 1973 [1] to the Office of the Secretary, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. All communications should refer to File No. 4–168.

By the Commission.

[SEAL] RONALD F. HUNT, *Secretary.*

JULY 2, 1973.

[FR Doc.73–18234 Filed 8–27–73;8:45 am]

[10] See Review of Corporate Financing Interpretation of the (NASD) Board of Governors relating to Section 1 of Article III of the Rules of Fair Practice (CCH, NASD Manual, Par. 2151).

[11] The Commission must also consider the NASD's rule proposals in light of its regulatory responsibilities respecting those nonmember broker-dealers who qualify under section 15(b)(8) of the Exchange Act as "SECO" firms. In this regard, the Commission generally would consider proposing rules comparable to the NASD's in order to maintain the comparability between NASD and SECO firms from a regulatory viewpoint.

[12] It should be noted that several of these sections also include some provisions, such as participant suitability or disclosure standards, where the NASD has had an interest in the past.

[13] Securities and Exchange Commission, Report of the Special Study of the Securities Markets, H.R. Doc. 95, 88th Cong., 1st Sess., pt. 1 (1962) at p. 591; see also section 23 of the Securities Act of 1933 (15 U.S.C. § 77w).

[14] Section 15A(b)(8) of the Exchange Act provides, in pertinent part: "An applicant association shall not be registered as a national securities association unless it appears to the Commission that • • • the rules of the association are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to provide safeguards against unreasonable profits or unreasonable rates of commissions or other charges and, in general, to protect investors and the public interest, and to remove impediments to and perfect the mechanism of a free and open market."

[15] With regard to recent Commission action in the disclosure area, we note that on February 2, 1973 (Release No. 33–5362 and Release No. 34–9984) the Commission announced plans to take the first steps toward integrating projections of sales and earnings of issuers into the disclosure system. The Commission also indicated, among other things, that it recognizes that any rules it may adopt in this area will have to accommodate the different time periods which may be used to formulate projections of tax sheltered programs.

[16] For example, in its report, the Advisory Committee recommended that a prospectus offering real estate securities should contain, among other things:

"(a) A clear exposition of the real and potential conflicts of interest that may be involved in the sale of the securities, the use of the proceeds, and the management of the properties purchased. This section should include a summary of each type of transaction in which an affiliate may engage with the registrant, and the manner of resolving the conflicts."

"(b) A clear statement of the duties that the general partner owes to the limited partners • • • along with an explanation of the various ways of enforcing the duties."

[1] The original deadline of August 15, 1973 is extended by Release No. 34–10351. The Commission has received several requests for such an extention and has determined to extend the deadline in view of the significance of the relevant issues and its desire to afford sufficient time for all interested persons to respond. (August 20, 1973.)

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

WISCONSIN DEVELOPMENTAL PLAN

Notice of Informal Hearing

On January 31, 1973 (38 FR 3019), notice was published of the submission, pursuant to section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) and 29 CFR 1902.11, and availability for public comment of the Occupational Safety and Health Plan for the State of Wisconsin. An initial examination of the plan, reveals that it proposes to meet the standards of section 18(c) of the Act and 29 CFR Part 1902 by extensive use of general administrative rulemaking authority. Under the plan, the following requirements, among others, would be met by regulatory rather than statutory authority: Prohibition of advance notice of inspections, procedures and criteria for granting variances to standards, employee complaint and participation in inspection procedures, and employee protection against discrimination. In addition, the State's penalty and collection provisions are different from those of the Act.

In view of the necessity for the widest information on the effectiveness of these different approaches in meeting the requirements of the Act and the regulations for State plan approval, the Assistant Secretary for Occupational Safety and Health hereby gives notice under 29 CFR 1902.11(e) that an informal hearing will be held on the plan on September 12, 1973, commencing at 9:30 a.m. (c.s.t.). Interested persons are invited to present orally data, views, or arguments concerning the plan and the issues presented thereby at the informal hearing. The informal hearings will be held in the auditorium, Wisconsin Center Building, 702 Langdon Street, Madison, Wisconsin 53706.

Beginning at 9:30 a.m. on September 12, 1973, the administrative law judge will hold abrief prehearing conference in order to establish the order and time for the presentation of statements and settle any other matters which may be relevant to the disposition of the hearing. The informal hearing will begin at the close of the prehearing conference.

Interested persons desiring to appear at the informal hearing shall file in writing a notice of intention to appear with the Acting Director of Federal and State Operations, Room 305, Railway Labor Building, 400 First Street NW., Washington, D.C. 20210. The notice of intention to appear (original and two copies) must be filed no later than September 7, 1973. The notice must state the name and address of the person to appear, and the approximate amount of time required for his presentation. The notice must also include, or be accompanied by, a statement of the position to be taken with regard to the plan and of the evidence to be adduced in support of the position. The use of prepared statements by witnesses is encouraged. All documents intended to be submitted for the record at the hearing should be submitted in duplicate.

The informal hearing will be conducted in accordance with 5 U.S.C. 556 and 557 by an administrative law judge to be appointed pursuant to 5 U.S.C. 3105. The presiding administrative law judge is empowered to:

(1) Rule upon procedural requests, objections, and other procedural matters;

(2) Regulate the course of the hearing and the presentation of oral data, views, or arguments concerning the plan.

The hearing will be reported verbatim, and transcripts will be available for inspection to any interested person on such conditions as the presiding administrative law judge may prescribe. The judge will have discretion to keep the record of the hearing open for a reasonable stated time to receive written recommendations, and additional data, views, and arguments from any person who has participated in the oral proceeding. Within a reasonable time following the close of the record the administrative law judge shall certify the complete record, including the transcript of the hearing, all exhibits filed during the hearing, all written submissions on the proposed rules, and any posthearing presentations to the Assistant Secretary of Labor for Occupational Safety and Health for his decision.

The Assistant Secretary of Labor for Occupational Safety and Health shall thereafter consider all relevant comments and arguments presented and issue his decision on the Plan. Signed at Washington, D.C., this 24th day of August, 1973.

JOHN STENDER,
Assistant Secretary of Labor.

RAISIN ADVISORY BOARD

Notice of Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463; 86 Stat. 770), notice is given of a meeting of the Raisin Advisory Board at 7:30 p.m., P.d.t., September 10, 1973, in the Press Room of the Fresno Hilton Hotel, Fresno, California.

The purpose of the meeting is to: Develop recommendations to be submitted to the Raisin Administrative Committee regarding marketing policy for the 1973–74 crop year; receive a report of the International Sultana Conference meeting which was held in London in June; and receive a report of a meeting between industry representatives and exporters. The meeting of the Raisin Advisory Board will be open to the public.

The Raisin Advisory Board is established under the marketing agreement, as amended, and Order No. 989, as amended (7 CFR Part 989), regulating the handling of raisins produced from grapes grown in California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674)).

The names of board members, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Clyde E. Nef, Manager, Raisin Administrative Committee, 732 North Van Ness, Fresno, California 93720; telephone 209–268–5666.

Dated August 22, 1973.

E. L. PETERSON,
Administrator,
Agricultural Marketing Service.

HUMANELY SLAUGHTERED LIVESTOCK

Identification of Carcasses; List of Establishments

Pursuant to section 4 of the Act of August 27, 1958 (7 U.S.C. 1904), and the statement of policy thereunder in 9 CFR 391.1, the following table lists the establishments operating under Federal inspection pursuant to the Federal Meat Inspection Act, as amended (21 U.S.C. 601 et seq.) which were officially reported as humanely slaughtering and handling the species of livestock respectively designated for such establishments in the table. Additions to and deletions from this list will be made from time to time as the facts may warrant, by notices published in the FEDERAL REGISTER. The establishment number given with the name of the establishment is branded on each carcass of livestock inspected at that establishment. The table should not be understood to indicate that all species of livestock slaughtered at a listed establishment are slaughtered and handled by humane methods uness all species are listed for that establishment in the table. Nor should the table be understood to indicate that the affiliates of any listed establishment use only humane methods.

Rural Electrification Administration

SOUTHERN MARYLAND ELECTRIC COOPERATIVE, INC.

Draft Environmental Statement

Notice is hereby given that the Rural Electrification Administration has prepared a Draft Environmental Statement in accordance with section 102(2)(c) of the National Environmental Policy Act of 1969, in connection with a proposed loan application from Southern Maryland Electric Cooperative, Inc., Hughesville, Maryland. This loan application, together with funds from other sources, will include financing for approximately 22.3 miles of 230 kV transmission line with a switching station at one terminal and a 230 kV to 69 kV step down substation at the other terminal.

Additional information may be secured by request submitted to Mr. David H. Askegaard, Assistant Administrator—Electric, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250. Comments are particularly invited from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved from which comments have not been requested specifically.

Copies of the REA Draft Environmental Statement have been sent to various Federal, State and local agencies, as outlined in the Council on Environmental Quality Guidelines. The Draft Environmental Statement may be examined during regular business hours at the offices of REA in the South Agriculture Building, 12th Street and Independence Avenue SW, Washington, D.C., Room 4310, or at Southern Maryland Electric Cooperative, Inc., Hughesville, Maryland.

Comments concerning the environmental impact of the construction proposed should be addressed to Mr. Askegaard at the address given above. Comments must be received on or before October 12, 1973 to be considered in connection with the proposed use of loan funds.

Any loan which may be made pursuant to this application will be subject to, and release of funds thereunder contingent upon, REA's reaching satisfactory conclusions with respect to environmental effects and after compliance with Environmental Statement procedures required by the National Environmental Policy Act of 1969.

Dated at Washington, D.C., this 22 day of August, 1973.

DAVID A. HAMIL,
Administrator, Rural Electrification Administration.

Office of the Secretary

LAUREL RIVER LAKE, KENTUCKY

Joint Order Interchanging Administrative Jurisdiction of Department of the Army Lands and National Forest Lands

CROSS REFERENCE: For a document issued jointly by the Department of Defense and the Department of Agriculture transferring Army lands and National Forest lands, see FR Doc. 73-18181, Department of Defense, Department of the Army, *supra*.

INTERSTATE COMMERCE COMMISSION

[Notice 329]

ASSIGNMENT OF HEARINGS

AUGUST 23, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MCC 8088, Point Express, Inc.—Investigation and Revocation of Certificates—now assigned September 27, 1973, at Columbus, Ohio, is postponed indefinitely.

MCC 8089, Interstate Motor Freight System—Investigation and Revocation of Certificates—MC 35628 Sub 343, Interstate Motor Freight System, now being assigned prehearing conference September 24, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC 20824 Sub 31, Commercial Motor Freight, Inc., now assigned October 23, 1973, at Indianapolis, Ind., will be held in Conference Room, State Office Bldg., 100 N. Senate Avenue.

MC 119493 Sub 100, Monkem Company, Inc., now assigned September 12, 1973, at Kansas City, Mo., is postponed indefinitely.

MC 5623 Sub 22, Arrow Trucking Co., now assigned September 10, 1973, at Kansas City, Mo., is canceled and the application is dismissed.

No. 35717, Southern Railway Company V. Union Pacific Railroad Company and the Denver and Rio Grande Western Railroad Company; No. 35717 Sub 1, Louisville and Nashville Railroad Company V. Union Pacific Railroad Company and the Denver and Rio Grande Western Railroad Company now being assigned further prehearing conference October 2, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73-18233 Filed 8-27-73;8:45 am]

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 23, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 42736—*Perlite Rock from Antonito, Colorado.* Filed by Western Trunk Line Committee, Agent (No. A-2688), for interested rail carriers. Rates on perlite rock, in carloads, as described in the application, from Antonito, Colorado, to Woodbury, N.J.

Grounds for relief—Rate relationship.

Tariff—Supplement 365 to Western Trunk Line Committee, Agent, tariff 134-Q, ICC No. A-4620. Rates are published to become effective on September 25, 1973.

FSA No. 42737—*Salt to Rittman, Ohio.* Filed by Southwestern Freight Bureau, Agent (No. B-425), for interested rail carriers. Rates on salt, common, in bulk in covered hopper cars, as described in the application, from specified points in Louisiana, to Rittman, Ohio.

Grounds for relief—Market and barge-truck competition.

Tariff—Supplement 2 to Southwestern Freight Bureau, Agent, tariff 137-I, ICC No. 5091. Rates are published to become effective on September 29, 1973.

By the Commission.

[SEAL] JOSEPH M. HARRINGTON,
Acting Secretary.

TELECOMMUNICATIONS

Proposed Standards

V 38 - 166 AUG 28 73 XUM

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1910]

TELECOMMUNICATIONS

Proposed Safety and Health Standards

Pursuant to section 6(b) of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1593; 29 U.S.C. 655), Secretary of Labor's Order No. 12–71 (36 FR 8754) and 29 CFR 1911.11, it is hereby proposed to establish Safety and Health Standards relating to work involved in the provision of telecommunications services. The foremost concern of these standards is to assure that telecommunication workers will take proper precautionary measures and have proper training with respect to them and will use appropriate protective equipment in the carrying out of their duties. The primary hazards to which these standards are directed relate to the prevention of injuries caused by electricity and falling.

As helicopters and aerial lifts are frequently used in telecommunication work as well as in other industries, this notice also proposes to make the current standards relating to their use in construction (29 CFR 1926.551 & .556) generally applicable. The standards proposed herein are not intended to apply to construction which is specifically the subject of 29 CFR Part 1926.

The proposed new Subpart T—"Telecommunications" is substantially based on the recommendations of a 28-member telecommunications standards committee. The committee included representatives of telephone companies, communications unions, and other affected groups.

Written data, views, and arguments concerning the proposal may be mailed to the Office of Standards, Occupational Safety and Health Administration, Attention S. Patti, Room 308, 400 First Street, NW, Washington, D.C. 20001, at any time prior to October 12, 1973. The data, views, and arguments will be available for public inspection and copying at the above address.

Oral and written views, and arguments will be received by an administrative law judge to be assigned by the Chief Administrative Law Judge of the United States Department of Labor at a hearing beginning at 10 a.m. on October 24, 1973, in Room 107 of the United States Department of Labor Building, 14th Street and Constitution Avenue, NW, Washington, D.C. Persons desiring to appear at the hearing must file with the Office of Standards a notice of intention to appear, no later than October 15, 1973. The notice must state the name and address of the person to appear, the capacity in which he will appear, and the approximate amount of time required for his presentation. The notice must also include, or be accompanied by, a statement of the positions to be taken and of the evidence to be adduced in support of them.

The hearing shall be conducted and the decision thereafter shall be made in accordance with the rules of procedure in 29 CFR Part 1911.

1. A new § 1910.185 would be added to 29 CFR Part 1910 to read as follows:

§ 1910.185 Helicopters.

(a) *Helicopter regulations.*—Helicopter cranes shall be expected to comply with any applicable regulations of the Federal Aviation Administration.

(b) *Briefing.*—Prior to each day's operation a briefing shall be conducted. This briefing shall set forth the plan of operation for the pilot and ground personnel.

(c) *Slings and tag lines.*—Load shall be properly slung. Tag lines shall be of a length that will not permit their being drawn up into rotors. Pressed sleeve, swedged eyes, or equivalent means shall be used for all freely suspended loads to prevent hand splices from spinning open or cable clamps from loosening.

(d) *Cargo hooks.*—All electrically operated cargo hooks shall have the electrical activating device so designed and installed as to prevent inadvertent operation. In addition, these cargo hooks shall be equipped with an emergency mechanical control for releasing the load. The hooks shall be tested prior to each day's operation to determine that the release functions properly, both electrically and mechanically.

(e) *Personal protective equipment.*—(1) Personal protective equipment for employees receiving the load shall consist of complete eye protection and hardhats secured by chinstraps.

(2) Loose-fitting clothing likely to flap in downwash and thus be snagged on hoist line, shall not be worn.

(f) *Loose gear and objects.*—Every practical precaution shall be taken to provide for the protection of the employees from flying objects in the rotor downwash. All loose gear within 100 feet of the place of lifting the load, depositing the load, and all other areas susceptible to rotor downwash shall be secured or removed.

(g) *Housekeeping.*—Good housekeeping shall be maintained in all helicopter loading and unloading areas.

(h) *Operator responsibility.*—The size and weight of loads, and the manner in which loads are connected to the helicopter shall be checked. The helicopter operator shall not make a lift if he believes the lift cannot be made safely.

(i) *Hooking and unhooking loads.*—When employees are required to perform work under hovering craft a safe means of access shall be provided for employees to reach the hoist line hook and engage or disengage cargo slings. Employees shall not be permitted to perform work under hovering craft except when necessary to hook or unhook loads.

(j) *Static charge.*—Static charge on the suspended load shall be dissipated with a grounding device before ground personnel touch the suspended load, or protective rubber gloves shall be required to be worn by all ground personnel touching the suspended load.

(k) *Weight limitation.*—The weight of an external load shall not exceed the manufacturer's rating.

(l) *Ground lines.*—Hoist wires or other gear, except for pulling lines or conductors that are allowed to "pay out" from a container or roll off a reel, shall not be attached to any fixed ground structure, or allowed to foul on any fixed structure.

(m) *Visibility.*—When visibility is reduced by dust or other conditions, ground personnel shall exercise special caution to keep clear of main and stabilizing rotors. Precautions shall also be taken by the employer to eliminate, as far as practical, the dust or other conditions reducing the visibility.

(n) *Signal systems.*—Signal systems between aircrew and ground personnel shall be understood and checked in advance of hoisting the load. This applies to either radio or hand signal systems. Hand signals shall be as shown in Figure N–1.

(o) *Approach distance.*—No unauthorized person shall be allowed to approach within 50 feet of the helicopter when the rotor blades are turning.

(p) *Approaching helicopter.*—Whenever approaching or leaving a helicopter with blades rotating, all employees shall remain in full view of the pilot and keep in a crouched position. Employees shall avoid the area from the cockpit or cabin rearward unless authorized by the helicopter operator to work there.

(q) *Personnel.*—Sufficient ground personnel shall be provided when required for safe helicopter loading and unloading operations.

(r) *Communications.*—There shall be constant reliable communication between the pilot and a designated employee of the ground crew who acts as a signal man during the period of loading and unloading. This signalman shall be distinctly recognizable from other ground personnel.

(s) *Fires.*—Open fires shall not be permitted in an area that could result in such fires being spread by the rotor downwash.

(Sec. 6, Pub. L. 91–596, 84 Stat. 1593 (29 U.S.C. 655))

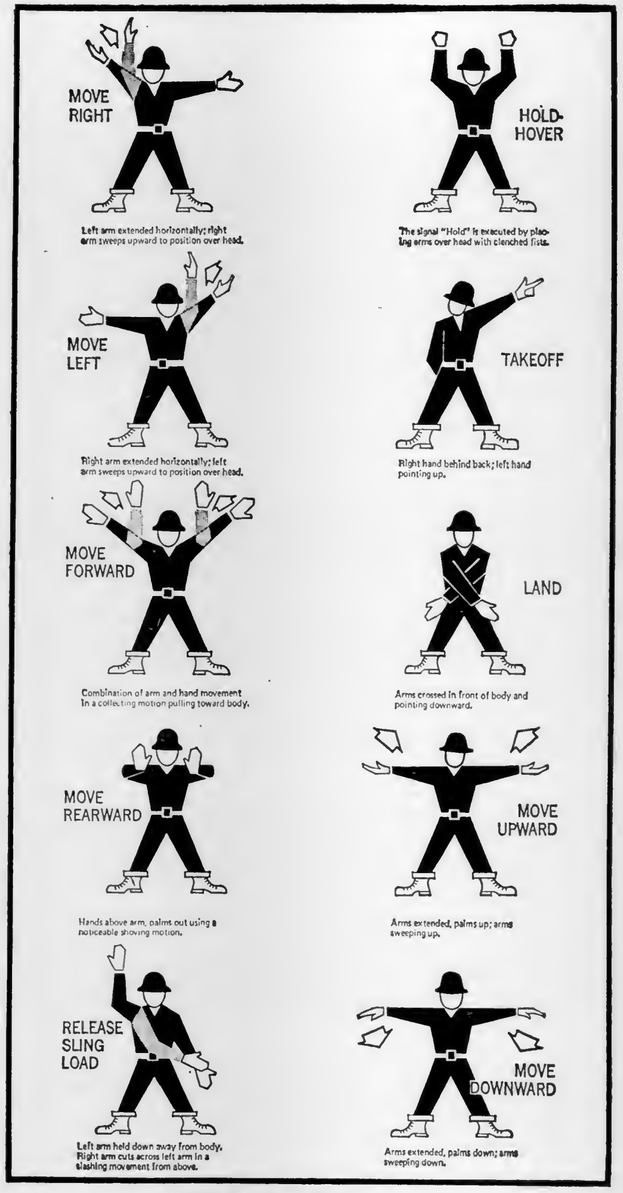

FIGURE N-1 HELICOPTER HAND SIGNAL

2. Paragraph (b) would be revised and a new paragraph (c) would be added to § 1910.67 to read as follows:

§ 1910.67 Vehicle-mounted elevating and rotating platforms.

* * * * *

(b) *General Requirements.*—(1) Unless otherwise provided in this section aerial devices (aerial lifts) acquired for use on or after [the effective date of this provision will be inserted here] must have been designed and constructed in conformance with the applicable requirements of the American National Standard for "Vehicle Mounted Elevating and Rotating Work Platforms," (ANSI) ANSI A92.2–1969, including appendix. Aerial lifts acquired before the effective date, which do not meet the requirements of ANSI A92.2–1969, may not be used after January 1, 1976, unless they shall have been modified so as to conform with the applicable design and construction requirements of ANSI A92.2–1969. Aerial devices includes the following types of vehicle-mounted devices used to elevate personnel to jobsites above ground: (i) Extensible boom platforms, (ii) aerial ladders, (iii) articulating boom platforms, (iv) vertical towers, and (v) a combination of any of the above. Aerial equipment may be made of metal, wood, fiberglass reinforced plastic (FRP), or other material, may be powered or manually operated; and are deemed to be aerial lifts whether or not they are capable of rotating about a substantially vertical axis.

(2) Aerial lifts may be "field modified" for uses other than those intended by the manufacturer provided the modification has been certified in writing by the manufacturer or by any other equivalent entity, such as a nationally recognized testing laboratory, to be in conformity with all applicable provisions of ANSI A92.2–1969 and this section and to be at least as safe as the equipment was before modification.

(3) The requirements of this section do not include any matter relating to firefighting equipment or any matter relating to the vehicles upon which aerial devices are mounted, except in respect to a vehicle being a stable support for the aerial device.

(4) Operating near electric power lines. (i) Except where the electrical distribution and transmission lines have been deenergized and visibly grounded at point of work or where insulating barriers not a part of or an attachment to the aerial lift have been erected to prevent physical contact with the lines, aerial lifts shall be operated proximate to, under, over, by, or near powerlines only in accordance with the following:

(A) For lines rated 50 kv. or below, minimum clearance between the lines and any part of the aerial lift shall be 10 feet.

(B) For lines rated over 50 kv., minimum clearance between the lines and any part of the aerial lift shall be 10 feet plus 0.4 inch for each 1 kv. over 50

V 38 - 166 AUG 28 73 XUM

kv., or shall be twice the length of the line insulator, but never less than 10 feet.

(ii) Proximity warning devices may be used on aerial lifts, but the use of such devices shall not operate to alter the requirements of subdivision (i) of this subparagraph.

(iii) Before the commencement of operations near electrical lines, the owners of the lines or their authorized representatives shall be notified and provided with all pertinent information. The owner's cooperation shall be requested.

(iv) Any overhead wire shall be considered to be an energized line until the owner of the line or their authorized representative state that it is deenergized.

(c) *Specific requirements.* (1) *Ladder trucks and tower trucks.*—Aerial ladders shall be secured in the lower traveling position by the locking device on top of the truck cab, and the manually operated device at the base of the ladder before the truck is moved for highway travel.

(2) *Extensible and articulating boom platforms.*—(i) Lift controls shall be tested each day prior to use to determine that such controls are in safe working condition.

(ii) Only authorized persons shall operate an aerial lift.

(iii) Belting off to an adjacent pole, structure, or equipment while working from an aerial lift shall not be permitted.

(iv) Employees shall always stand firmly on the floor of the basket, and shall not sit or climb on the edge of the basket or use planks, ladders, or other devices for a work position.

(v) A body belt shall be worn and lanyard attached to the boom or basket when working from an aerial lift.

(vi) Boom and basket load limits specified by the manufacturer shall not be exceeded.

(vii) The brakes shall be set and when outriggers are used, they shall be positioned on pads or a solid surface. Wheel chocks shall be installed before using an aerial lift on an incline.

(viii) An aerial lift truck shall not be moved when the boom is elevated in a working position with men in the basket, except for equipment which is specifically designed for this type of operation in accordance with the provisions of subparagraphs (1) and (2) of paragraph (b) of this section.

(ix) Articulating boom and extensible boom platforms, primarily designed as personnel carriers, shall have both platform (upper) and lower controls. Upper controls shall be in or beside the platform within easy reach of the operator. Lower controls shall provide for overriding the upper controls. Controls shall be plainly marked as to their function. Lower level controls shall not be operated unless permission has been obtained from the employee in the lift, except in case of emergency.

(x) Climbers shall not be worn while performing work from an aerial lift.

(xi) The insulated portion of an aerial lift shall not be altered in any manner that might reduce its insulating value.

(xii) Before moving an aerial lift for travel, the boom(s) shall be inspected to see that it is properly cradled and outriggers are in stowed position except as provided in subdivision (viii) of this subparagraph.

(3) *Electrical tests.*—All electrical tests shall conform to the requirements of ANSI A92.2–1969, Section 5. However, equivalent DC voltage tests may be used in lieu of the AC voltage specified in A92.2–1969. DC voltage tests which are approved by the equipment manufacturer or equivalent entity shall be considered an equivalent test for the purpose of this subparagraph (3).

(4) *Bursting safety factor.*—The provisions of the American National Standards Institute standard ANSI A92.2–1969, Section 4.9 Bursting Safety Factor, shall apply to all critical hydraulic and pneumatic components. Critical components are those in which a failure would result in a free fall or free rotation of the boom. All noncritical components shall have a bursting safety factor of at least two to one.

(5) *Welding standards.*—All welding shall conform to the following standards as applicable:

(i) Standard Qualification Procedure, AWS B3.0–41.

(ii) Recommended Practices for Automotive Welding Design, AWS D8.4–61.

(iii) Standard Qualification of Welding Procedures and Welders for Piping and Tubing, AWS D10.9–69.

(iv) Specifications for Welding Highway and Railway Bridges, AWS D2.0–69.

(Sec. 6, Pub. L. 91–596, 84 Stat. 1593 (29 U.S.C. 655))

3. A new Subpart T—"Telecommunications" would be added to Part 1910 to read as follows:

Subpart T—Telecommunications

Sec.

1910.330 Application.
1910.331 General.
1910.332 Training.
1910.333 Employee Protection in Public Work Areas.
1910.334 Tools and Personal Protective Equipment.
1910.335 Rubber Insulating Equipment.
1910.336 Personal Climbing Equipment.
1910.337 Ladders.
1910.338 Other Tools and Personal Protective Equipment.
1910.339 Vehicle-mounted Material Handling Devices and other Mechanical Equipment.
1910.340 Materials Handling and Storage.
1910.341 Cable Fault Locating and Testing.
1910.342 Grounding for Employee Protection—Pole Lines.
1910.343 Overhead Lines.
1910.344 Underground Lines.
1910.345 Microwave Transmission.
1910.346 Tree Trimming—Electrical Hazards.
1910.347 Definitions.
1910.348 Standards Organizations.

AUTHORITY: Sec. 6, Pub. L. 91–596, 84 Stat. 1593 (29 U.S.C. 655).

§ 1910.330 Application.

(a) This Subpart sets forth Safety and Health Standards that apply to the conditions, practices, means, methods, operations, installations and processes performed at telecommunications centers and telecommunications field work, when performed under the control of employers providing telecommunications services located outdoors or in building spaces used for such field installations. "Field" work includes installations, operation, maintenance, rearrangement, and removal of conductors and other equipment used for signal or communication service, and of their supporting or containing structures, overhead or underground, on public or private rights of way, including buildings or other structures. "Center" work includes installation, operation, maintenance, rearrangement, and removal of communications equipment and other associated equipment in telecommunications switching centers.

(b) These standards do not apply to construction work, as this phrase is defined in § 1910.12; nor to installations under the exclusive control of electric utilities for the purpose of communications or metering, or for generation, control, transformation, transmission, and distribution of electric energy, located in buildings used exclusively by the utilities for such purposes, or located outdoors on property owned or leased by the utilities or on public highways, streets, roads, etc., or outdoors by established rights on private property.

(c) Operations or conditions not specifically covered by this Subpart T are subject to applicable general standards in Subpart D through Q and S of this Part 1910, see § 1910.5(c). The fact that attention is directed in several provisions of this Subpart to the application of sections of other Subparts of this Part 1910 to facilitate their use is not intended to detract from the applicability of any other general standard dealing with matters not covered by this Subpart T.

§ 1910.331 General.

(a) *Buildings containing telecommunications centers.* (1) *Electrical plans.*—Buildings which contain telecommunications centers shall be constructed and equipped in accordance with engineering plans whose electrical specifications for the building power and light shall conform to § 1910.309.

(2) *Illumination.*—Lighting in telecommunication centers shall be provided such that continuing work operations, routine observations, and the passage of employees can be carried out in a safe and healthful manner. Certain specific tasks in centers such as splicing cable and the maintenance and repair of equipment frame lineups may require a higher level of illumination while they are being performed. In such cases, where it is not reasonable to install permanent lighting of that higher level, portable supplemental lighting to attain that higher level shall be provided as needed to safely perform the required task.

(3) *Working surfaces.*—Guard rails and toe boards on distribution frame mezzanine platforms may be omitted to permit access to equipment only on the side facing the frame where the frame is equipped. The general provisions of § 1910.23 shall also be applicable to working surfaces.

(4) *Working spaces.*—"Maintenance aisles," or "wiring aisles," between equipment frame lineups are considered to be working spaces and are not a means of egress as defined in § 1910.35(a).

(5) *Special doors.*—Where provided, blastproof doors and power operated doors in special purpose buildings or spaces shall be installed in accordance with the building plans. However, doors shall be so designed and installed that they will not impede or prevent emergency use of the exit.

(6) *Equipment, machinery and machine guarding.*—Power plant machinery in telecommunications centers may be operated with commutators and couplings uncovered, provided the adjacent housing is clearly marked to alert personnel to the rotating machinery.

(b) *Battery rooms.*—(1) Employees taking battery readings or handling electrolyte shall wear eye protection devices which provide side as well as frontal eye protection. Acid resistant gloves and aprons shall be worn for protection against spattering. Facilities for quick drenching or flushing of the eyes and body shall be provided in battery rooms unless the storage batteries are of the enclosed type (equipped with explosion proof vents) in which case sealed water rinse or neutralizing packs shall be provided. Employees assigned to work with storage batteries shall be instructed in emergency procedures such as coping with accidental acid spills, as well as routine operations.

(2) Electrolyte (acid and distilled water) or sodium hydroxide for battery cells shall be mixed in a well ventilated room. Acid or sodium hydroxide shall be poured gradually while stirring into the water. Water shall never be poured into concentrated (greater than 75 percent) acid solutions. Electrolyte shall never be placed in metal containers nor stirred with metal objects.

(3) When taking specific gravity readings, an acid resistant gloved finger shall be placed over the end of the hydrometer while moving it from cell to cell to avoid splashing or throwing the electrolyte.

(c) *Medical and first aid.*—First aid supplies recommended by a consulting physician shall be placed in weatherproof containers (unless stored indoors) and shall be easily accessible. Expended items shall be replaced.

(d) *Hazardous materials.*—Highway mobile vehicles and trailers stored in garages in accordance with Section 1910.110 may be equipped to carry more than one LP-gas container, but the total capacity of LP-gas containers per work vehicle stored in garages shall not exceed 100 pounds LP-gas. All container valves shall be closed when not in use.

(e) *Compressed gas.*—Nitrogen cylinders may be transported and used in a horizontal position only if special compartments, racks, or adequate blocking to prevent cylinder movement is provided.

(f) *Support structures.*—No employee or any material or equipment shall be supported or permitted to be supported on any portion of a pole structure, platform, ladder, walkway or other elevated structure or aerial device without its first being inspected, determined to be adequately strong, in good condition and properly secured in place.

(g) *Approach distances.*—No employees shall be permitted to approach or take any conductive object closer to any electrically energized parts than prescribed in Table T–1, unless:

(1) The employee is insulated or guarded from the energized parts (insulating gloves rated for the voltage involved shall be considered adequate insulation), or

(2) The energized parts are insulated or guarded from the employee and any other conductive object at a different potential, or

(3) The power conductors and equipment are deenergized and grounded.

TABLE T–1.—APPROACH DISTANCES TO EXPOSED ENERGIZED POWER CONDUCTORS

Voltage Range (nominal, phase to phase):	*Distance Avoid Contact*
300 v and less	12 in.
Over 300, not over 750 v	18 in.
Over 750 v, not over 2 kv	24 in.
Over 2 kv, not over 15 kv	36 in.
Over 15 kv, not over 37 kv	42 in.
Over 37 kv, not over 87.5 kv	48 in.
Over 87.5 kv, not over 121 kv	54 in.
Over 121 kv, not over 140 kv	

(h) When working closer than 6" from exposed energized power conductors the employee shall wear head protection, insulating gloves and safety glasses.

§ 1910.332 Training.

(a) Employees may not be allowed by any employer to engage in the activities to which this Subpart applies until they have received training pursuant to an established written training program in precautions they may be required to take in accordance with this Subpart. In addition, such training shall, where appropriate, include the subjects of avoidance of harmful substances and dangers relating to encounters with animal or plant life and procedures for use in emergency situations. First-aid training which includes artificial respiration shall also be provided.

§ 1910.333 Employee Protection in Public Work Areas.

(a) Before engaging in work in the vicinity of vehicular or pedestrian traffic which may endanger employees, warning signs and/or flags or other traffic control devices shall be placed conspicuously to alert and channel approaching traffic. Where further protection is needed, barriers shall be utilized. At night warning lights shall be prominently displayed and excavations shall be enclosed with protective barricades.

(b) If work exposes energized or moving parts that are normally protected, danger signs shall be displayed and a barricade erected, as necessary, to warn other personnel in the area.

(c) An employee finding any crossed or fallen wires at the work area which create or may create a hazard shall remain on guard or adopt other adequate means to warn other employees of the danger and shall have the proper authority notified at the earliest practical moment.

§ 1910.334 Tools and Personal Protective Equipment. Generally.

Employees shall be required to use the personal protective equipment, the protective devices, and the special tools required for their work. Before use, these devices and tools shall be carefully checked by the employee to make sure that they are in good condition.

§ 1910.335 Rubber Insulating Equipment.

(a) Rubber insulating equipment designed for the voltage levels to be encountered shall be used as required in other Sections of this Subpart. This equipment shall meet the electrical and physical properties requirements contained in ANSI J6.6–1971 and ANSI J6.4–1971 with the exception that a modified (thinner) Class I glove is permitted in telecommunications operations. This "Modified Class I" glove shall meet the following electrical test voltages.

Class of glove	3 minimum proof test voltage-RMS volts	Maximum proof-test current, ma 14-in. glove	Minimum breakdown voltage, RMS volts
Modified Class I	10,000	16	17,000

(b) When these gloves are being used on jobs where they are likely to be torn, they shall be protected with heavy outer canvas or leather gloves, and in pole placing or removal operations, pole insulating devices shall be used in accordance with § 1910.343(k).

(c) Multi-ply construction with contrasting colors may be used with insulating gloves to aid in detecting cuts, cracks, and deep abrasions.

(d) Protective equipment fabricated of material other than rubber shall provide equal or better electrical and mechanical protection.

(e) The employer is responsible for periodic retest of insulating gloves and blankets. This retest shall be electrical, visual and mechanical. The following maximum retest intervals shall apply:

	Natural rubber	Synthetic rubber
New Gloves	12 months	18 months.
Re-issued Gloves	9 months	15 months.
New Blankets	12 months	18 months.
Re-issued Blankets	9 months	15 months.

(f) Gloves and blankets shall be marked in some manner to indicate compliance with the retest schedule. They shall be legibly stamped with the date the next test is due. Gloves found to be

V 38 - 166 AUG 28 73 XUM

defective in the field or by electrical test shall be destroyed by cutting open from the finger to the gauntlet.

(g) When not being used, insulating gloves shall be stored in glove bags or their original containers to minimize chances for damage. Insulating blankets shall be stored in a canister or other device which offers equivalent protection.

(h) Insulating gloves and blankets shall be stored away from the direct sunlight, steam pipes, radiators and other excessive heat. Gloves and blankets shall not be folded while in storage, however blankets may be rolled for storage.

§ 1910.336 Personal Climbing Equipment.

(a) No safety belts, safety straps or pole climbers acquired after [effective date of this subpart] shall be used unless they meet the requirements set forth in this section. Safety belts and straps shall be used by employees to protect them in working positions at elevated locations (more than 4 feet above ground) on poles, towers or other outside structures (excluding portable ladders) as discussed further in § 1910.343, *Overhead Lines*. Safety belts and straps shall be checked at least semiannually by the employer to determine that they are in safe working condition.

(b) *Telecommunication lineman's body belts, safety straps, and lanyards.*—(1) *General requirements.*—Hardware for lineman's body belts, safety straps, and lanyards shall be drop forged or pressed steel and have a corrosive resistive finish tested to American Society for Testing and Materials B117–64 (50-hour test). Surfaces shall be smooth and free of sharp edges. Lineman's safety straps, body belts and lanyards shall be approved by a nationally recognized testing laboratory as having been tested in accordance with the requirements of this section.

(2) All buckles shall withstand a 2,000-pound tensile test with a maximum permanent deformation no greater than one sixty-forth inch.

(3) D rings shall withstand a 5,000-pound tensile test without failure. Failure of a D ring shall be considered cracking or breaking.

(4) Snaphooks shall withstand a 5,000-pound tensile test without failure, or a 3,000-pound tensile test and a bend test. Tensile failure of a snaphook shall be distortion sufficient to release the keeper. Failure of the bend test shall be cracking of the snaphook.

(c) *Specific requirements.*—(1) (i) All fabric used for safety straps shall be capable of withstanding an A.C. dielectric test of not less than 25,000 volts per foot "dry" for 3 minutes, without visible deterioration.

(ii) All fabric and leather used shall be tested for leakage current which shall not exceed 1 milliampere when a potential of 3,000 volts is applied to the electrodes positioned 12 inches apart.

(iii) Direct current tests may be permitted in lieu of alternating current tests.

(2) The cushion part of the body belt shall:

(i) Contain no exposed rivets on the inside. This provision shall not apply to belts used by craftsman not engaged in line work.

(ii) Be at least three (3) inches in width;

(iii) Be at least five thirty-seconds ($\frac{5}{32}$) inch thick, if made of leather and and

(iv) Have pocket tabs that extended at least 1½ inches down and three (3) inches back of the inside of the circle of each D ring for riveting on plier or tool pockets. On shifting D belts, this measurement for pocket tabs shall be taken when the D ring section is centered.

(3) A maximum of four (4) tool loops shall be situated on the body belt.

(4) Suitable copper, steel, or equivalent liners shall be used around the bar of D rings to prevent wear between these members and the leather or fabric enclosing them.

(5) All stitching shall be a minimum 42-pound weight nylon or equivalent thread and shall be lock stitched. Stitching parallel to an edge shall not be less than three-sixteenths ($\frac{3}{16}$) inch from edge of narrowest member caught by the thread. The use of cross stitching on leather is prohibited.

(6) The keeper of snaphooks shall have a spring tension that will not allow the keeper to begin to open with a weight of 2½ pounds or less, but the keeper of snaphooks shall begin to open with a weight of four (4) pounds, when the weight is supported on the keeper against the end of the nose.

(7) Safety straps and lanyards shall be tested in accordance with the following procedure:

(i) Attach one end of the safety strap or lanyard to a rigid support, the other end shall be attached to a 250-pound canvas bag of sand:

(ii) Allow the 250-pound canvas bag of sand to free fall 4 feet for (safety strap test) and 6 feet for (lanyard test) in each case stopping the fall of the 250-pound bag:

(iii) Failure of the strap or lanyard shall be indicated by any breakage or slippage sufficient to permit the bag to fall free of the strap or lanyard. The entire "body belt assembly" shall be tested using one D ring. A safety strap or lanyard shall be used that is capable of passing the "impact loading test" as described in subdivision (ii) and attached as required in subdivision (i) of this subparagraph. The body belt shall be secured to the 250-pound bag of sand at a point to simulate the waist of a man and allowed to drop as stated in subdivision (ii) of this subparagraph. Failure of the body belt shall be indicated by any breakage, or slippage sufficient to permit the bag to fall free of the body belt.

(d) *Pole climbers.*—(1) Pole climbers shall not be used after the gaffs are worn to less than 1¼ inches long as measured on the underside of the gaff.

(2) Pole climbers shall be inspected for the following conditions; fractured or cracked gaffs or leg irons, loose or dull gaffs, broken straps or buckles. If found, these conditions shall be corrected before the climbers are used.

(3) Pole climbers shall be inspected before each use and tested at least weekly when in use. The employer shall make at least a semiannual inspection of all climbers in active use in their operations.

(4) Pole climbers shall not be worn when:

(i) Working in trees, however specifically designed tree climbers shall be used for tree climbing.

(ii) Working on ladders.

(iii) working in an aerial lift.

(iv) driving a vehicle.

(v) walking on rocky, brushy or hilly terrain.

§ 1910.337 Ladders.

(a) No employee or any material or equipment, shall be supported or permitted to be supported on any portion of a ladder without its first being determined, by inspections and checks that such a ladder is adequately strong, in good condition, and properly secured in place.

(b) The spacing of steps or rungs permanently installed on poles and towers and fixed ladders on towers when so equipped, shall be no more than 18 inches (36 inches on any given side) and steps shall be uniform above the initial unstepped section except where working, standing or access steps are required. Fixed ladder rungs and step rungs for poles and towers shall have a minimum diameter of ⅝". Fixed ladder rungs shall have a minimum clear width of 12 inches. Steps for poles and towers shall have a minimum clear width of 4½ inches. Spacing of detachable steps shall not exceed 30 inches and steps shall be properly secured when in use.

(c) Portable wood ladders intended for general use shall not be painted but may be coated with a translucent nonconductive coating. They shall not be longitudinally reinforced with metal.

(d) Portable wood ladders that are not being carried on vehicles and are not being used for extended periods shall be stored where they will not be exposed to the elements but where there is good ventilation. Ladders shall not be stored near radiators, stoves, steampipes or in places where the wood may be subjected to excessive heat or dampness.

(e) Rolling ladders used in telephone Communication Centers shall have a minimum width between the side rails, inside of at least eight inches.

(f) Climbing ladders or stairways on scaffolds may be used for access and egress, if affixed or built into the scaffold by proper design and engineering, and located so that its use will not disturb the stability of the scaffold. The rungs of the climbing device shall be equally spaced, but not less than 12 inches nominal or more than 16 inches nominal. Horizontal end rungs used for platform supports may also be used as

the climbing device if they are spaced as provided above, and provided that there is sufficient clearance between the rung and the edge of the platform to afford an adequate handhold. In lieu of these requirements a portable ladder with rungs equally spaced as above may be securely attached to the scaffold. A clearance in the back of the ladder of not less than 6 inches from center of rung to the nearest scaffold structural member shall be provided.

(g) When a ladder is supported by aerial strand and ladder hooks or other supports are not being used the ladder shall be at least 2 feet above the strand and be secured to it (e.g. lashed or held by safety strap around strand and ladder side rail).

(h) *Metal manhole ladders.*—(1) Except as provided herein specific design and construction requirements are not contained in this section because of the wide variety of metals and design possibilities. However, the design shall be such as to produce a ladder without structural defects or accident hazards such as sharp edges and burrs. The metal selected shall be protected against corrosion unless inherently corrosion-resistant.

(2) Because of the varied conditions, and the wide variety of ladder uses, ladders may be designed with parallel side rails, with side rails varying uniformly in separation along the length (tapered), or with side rails flaring at the base to increase stability.

(3) The spacing of rungs or steps shall be on 12-inch centers.

(4) Rungs or steps to side rail connections shall be so constructed as to insure rigidity as well as strength.

(5) Rungs and steps shall be corrugated, knurled, dimpled, coated with skid-resistant material, or otherwise treated to minimize the possibility of slipping.

(6) Hardware shall meet strength requirements of the ladder's component parts, and shall be of a material that is protected against corrosion unless inherently corrosion-resistant. Metals shall be so selected as to avoid excessive galvanic action.

§ 1910.338 Other Tools and Personal Protective Equipment.

(a) *Head protection.*—Helmets for the protection of heads of employees exposed to possible head injury from impact, or from falling or flying objects or exposed to high voltage electrical contact shall be worn and meet the requirements of ANSI Standard Z89.2–1971 (Class B).

(b) *Eye protection.*—Eye protection shall meet the requirement prescribed in § 1910.133 of this part. Eye protection shall be used where foreign objects may enter the eyes due to work operations such as but not limited to:

(1) Drilling or chipping stone, brick or masonry, breaking concrete or pavement, etc., by hand tools (sledgehammer, etc.) or power tools such as pneumatic drill or hammer.

(2) Working on or around high speed emery or other grinding wheels unprotected by guards.

(3) Cutting or chipping terra cotta ducts, tile, etc.

(4) Working under motor vehicles requiring hammering.

(5) Cleaning operations using compressed air, steam, or sand blast.

(6) Acetylene welding or similar operations where sparks are thrown off.

(7) Using powder actuated stud drivers.

(8) Tree pruning or cutting underbrush.

(9) Handling battery cells and solutions such as taking battery readings with a hydrometer and thermometer.

(10) Removing or rearranging strand or open wire.

(11) While performing lead sleeve opening and closing as covered in § 1910.338(1) of this part.

(c) *Hearing protection.*—The provisions of § 1910.95 shall apply.

(d) *LP-gas.*—LP-gas used at work locations shall be transported in DOT approved cylinders and marked in accordance with § 1910.110(c)(2) of this part. NOTE: Section 1910.110(b)(5) does not apply to these cylinders.

(e) *Tent heaters.*—Unless aerial or ground tent covers are constructed of fire resistant material and adequate ventilation is provided, heaters used on platforms and within tents at outdoor locations require an automatic fuel shutoff device.

(f) *Torches.*—Torches may be used on aerial splicing platforms or buckets enclosed by tents provided the tent material is constructed of fire resistant material and torch is turned off when not in actual use. Aerial tents shall be ventilated while the torch is in operation.

(g) *Portable power equipment.*—Nominal 120V, or less, portable generators for providing power at work locations do not require grounding provided the output circuit is completely isolated from the frame of the unit.

(h) *Vehicle-mounted utility generators.*—Vehicle-mounted utility generators for providing nominal 240V AC or less for powering portable tools and equipment need not be grounded to earth provided all of the following conditions met:

(1) One side of the voltage source is solidly strapped to the metallic structure of the vehicle;

(2) Use grounding-type outlets, with a "grounding" conductor between the outlet grounding terminal and the side of the voltage source that is strapped to the vehicle;

(3) All metallic encased tools and equipment that are powered from this system shall be equipped with three-wire cords and plugs, except as designated in § 1910.338 (i) and (j) of this part.

(i) *Portable lights, tools, and appliances.*—Portable lights, tools, and appliances having noncurrent carrying external metal housing may be used with power equipment described in paragraph (g) without the need for a grounding conductor. When operated from commercial power such metal parts of these devices shall be grounded, except as provided in paragraph (j) of this section.

(j) *Portable tools and appliances.*—Portable tools and appliances which are protected by a system of double insulation, or its equivalent, need not be grounded. Where such a system is employed, the equipment shall be distinctively marked.

(k) *Soldering devices.*—Grounding shall be omitted when using soldering irons, guns or power wire-wrap tools on telecommunications circuits.

(l) *Lead work.*—The wiping or unwiping of lead joints using melted solder gas fueled torches, soldering irons or other appropriate heating devices and the soldering of wires or other electrical connections does not constitute welding, cutting, and brazing as covered in Subpart Q of Part 1910. Electric solder pots may be used with power equipment described in (g) without the need for a grounding conductor. When operated from commercial power the metal housing of such pots must be grounded. Eye protection shall be provided by the employer and worn at all times while lead wiping, unwiping, and soldering are being performed. Wiping gloves shall be provided and used in lead wiping or unwiping. A drip pan to catch hot lead dripping shall also be provided and used.

§ 1910.339 Vehicle-mounted Material Handling Devices and other Mechanical Equipment.

(a) *General.* (1) Visual inspections shall be required to be made of the equipment to insure it is in good condition each day the equipment is to be used.

(2) Tests shall be made at the beginning of each shift to insure the vehicle brakes and operating systems are in proper working condition.

(b) *Scrapers, loaders, dozers, graders, and tractors.*—(1) All rubber-tired, self-propelled scrapers, rubber-tired front-end loaders, rubber-tired dozers, agricultural and industrial tractors, crawler tractors, crawler-type loaders, and motor graders, with or without attachments, that are used in telecommunications work shall have rollover protective structures in accordance with Subpart W of Part 1926.

(2) Operators shall wear eye protection when working in areas where flying material is generated.

(c) *Vehicle-mounted elevating and rotating work platforms.*—This equipment shall conform to § 1910.67 of this part. These devices shall not be operated with any conductive part of the equipment closer to exposed energized power lines than the clearances set forth in Table T–1 of § 1910.331(g).

(d) *Derrick trucks and similar equipment.*—(1) This equipment shall not be operated closer to energized parts than permitted in § 1910.331(g) of this part;

(2) When derricks are used to handle poles near energized power conductors, these operations shall comply with § 1910.343(k) and § 1910.331(g) of this part;

(3) Moving parts of telecommunication line trucks may be protected with barricades as specified in § 1910.333(b) of this part;

V 38-166 AUG 28 73 XUM

(4) Derrick requirements. (i) Manufacturer's specifications, load ratings and instructions for derrick operation shall be strictly observed.

(ii) Rated load capacities and instructions related to derrick operation shall be conspicuously posted on a permanent weather-resistant plate or decal in a location that is plainly visible to the derrick operator.

(iii) Prior to derrick operation the parking brake must be set and the stabilizers extended if the vehicle is so equipped. When the vehicle is situated on a grade, the wheels must be chocked on the downgrade side of the rear wheels.

(iv) Only persons trained in the operation of the derrick shall be permitted to operate the derrick.

(v) All hand signals employed between the operator and other persons directing the work operation shall be thoroughly understood by all persons concerned.

(vi) The derrick and associated equipment shall be inspected at intervals designated by the manufacturer and employer but in no case less than once per year. Records shall be maintained denoting the dates of inspection and necessary repairs made if corrective action is required.

(vii) Modifications or additions to the derrick and associated equipment that alter the capacity or affect its safe operation shall be made only with written certification from the manufacturer, or other equivalent entity such as a nationally recognized testing laboratory. Such changes shall require the changing and posting of revised capacity and instruction decals or plates, the new ratings or limitations being provided by the manufacturer or other equivalent entity. The certification shall state that the modification results in the equipment being as safe as the equipment was before modification.

(viii) Wire rope associated with derricks shall be of improved plow steel grade or equivalent and shall have a maximum rated working load of not more than one-half the published breaking strength of the wire rope.

(ix) Wire rope shall be taken out of service or the effected portion removed when any of the following conditions exist; (A) The rope strength has been significantly reduced due to corrosion, pitting, or excessive heat, or

(B) The thickness of the outer wires of the rope has been reduced by wear to one-half or more of the original thickness, or

(C) There are more than nine broken wires in any one rope lay, or

(D) There is excessive permanent distortion caused by kinking, crushing, or severe twisting of the rope.

(x) Telecommunications derricks are defined in this section as a rotating or nonrotating derrick structure having a working capacity of 2,000 pounds or greater, mounted on a vehicle for the purpose of lifting, lowering the positioning hardware and materials used in telecommunications work.

§ 1910.340 Materials Handling and Storage.

(a) *Poles.*—When working with poles in piles or stacks, employees shall work from the ends of the poles as much as possible, and shall be alert for a man at the other end of the pole. During pole hauling operations, all loads shall be secured to prevent displacement, and lights, reflector and/or flags shall be displayed on the end and sides of the load as necessary. The installation, removal, or other handling of poles in pole lines is governed by § 1910.343 of this part for Overhead Lines. In the case of hoisting machinery equipped with a positive stop load-holding device it shall be permissible for the operator to leave his position at the controls while a load is suspended for the purpose of assisting in positioning the load prior to landing it. Prior to unloading steel, poles, crossarms and similar material the load shall be thoroughly examined to ascertain that the load has not shifted, that binders or stakes have not broken or that the load is not otherwise hazardous to employees.

(b) *Cable reels.*—Cable reels in storage shall be chocked or otherwise restrained when there is a possibility they might accidentally roll from position.

§ 1910.341 Cable Fault Locating and Testing.

When high voltages are used in locating trouble or testing a cable the employer shall instruct the employees involved in steps to be taken for their own and other employee's safety. These include isolating the cable conductors to the extent practical and warning employees, by such techniques as briefing and tagging at all affected locations, to stay clear while the voltage is applied.

§ 1910.342 Grounding for Employee Protection—Pole Lines.

(a) Electric power conductors and equipment shall be treated as energized unless it can be seen that they are bonded to one of the grounds listed in paragraph (e) of this section.

(b) *Nonworking open wire.*—Nonworking open wire communications lines shall be bonded to one of the grounds listed in paragraph (e) of this section.

(c) *Vertical power conduit, power ground wires and street light fixtures.*—(1) Metal power conduit on joint use poles, exposed vertical power ground wires, and street light fixtures which are below communications attachments or less than 20 inches above shall be considered energized and tested for voltage unless it can be seen that they are bonded to the communications suspension strand or cable sheath.

(2) If no hazardous voltage is shown by the voltage test, a temporary bond shall be placed between such street light fixture, exposed vertical power grounding conductor, or metallic power conduit and the communications cable strand. Temporary bonds used for this purpose shall have sufficient conductivity to carry at least 500 amperes for a period of one second without fusing.

(d) *Line installation.*—Installation of telecommunication suspension strands can be considered as deenergized where no energized power conductors are present and no thunderstorm activity is evident.

(e) *Suitable grounds for protective grounding.*—Suitable grounds for protective grounding are as follows:

(1) A vertical ground wire which has been tested, found safe, and is connected to a power system multigrounded neutral or the grounded neutral of a power secondary system where there are at least three services connected.

(2) Communications cable sheath or shield and its supporting strand where the sheath or shield is:

(i) Bonded to underground or buried cable which is connected to a central office ground or,

(ii) Bonded to an underground metallic piping system or,

(iii) Bonded to a power system multigrounded neutral or grounded neutral of power secondary system which has at least three services connected.

(3) Guys which are bonded to (1) or (2) above, and whose continuity is not interrupted by an insulator.

(4) In the absence of any of the preceding grounds, arrays of driven ground rods may be used where the resultant resistance to ground will be less than 25 ohms.

(f) *Attaching and removing temporary bonds.*—When attaching grounds (bonds), the first attachment shall be made to the protective ground. The bond shall be attached while wearing insulating gloves. When removing bonds, the connection to the line or equipment shall be removed first. Insulating gloves shall be worn during this operation.

(g) *Temporary grounding of suspension strand.*—(1) Suspension strand shall be grounded to existing grounds listed in paragraph (e) preceding when being placed

(i) On jointly used poles or

(ii) During thunderstorm activity. Intervals between such grounds need not be closer than ¼ mile.

(2) Where power crossings are encountered on nonjoint lines, the strand shall be bonded to an existing ground (see paragraph (e) of this section) as close as possible to the crossing. This is not required where crossings are made on a common crossing pole unless there is an upward change in grade at the pole.

(3) Where roller type bonds are used, they shall be restrained so as to avoid stressing the electrical connections.

(4) Bonds between the suspension strand and the existing ground shall be at least #6AWG copper.

(5) Temporary bonds shall be left in place until the strand has been tensioned, dead ended, and permanently grounded.

(6) The preceding paragraphs (1 through 5) do not apply to the installation of insulated strand.

(h) Antenna work—radio transmitting stations (3–30 MHZ).—(1) Prior to grounding a radio transmitting station antenna, the rigger in charge shall:

(i) Prepare a danger tag signed with his signature,

(ii) Contact the transmitting technician regarding the transmitter shutdown and the grounding of the antenna with its grounding switch.

(iii) be notified by the transmitting technician that the transmitter has been shutdown. After the antenna has been grounded by the transmitting technician, the rigger shall tag the antenna ground switch personally in the presence of the transmitting technician. Power shall not be applied to the antenna, or the ground switch opened under any circumstance while tag is on. Where no ground switches are provided, ground sticks shall be used, one each side of line, and the tag put on the ground sticks, antenna switch, or plate power switch, in a conspicuous place. In certain cases, ground sticks or short circuits may be needed directly on the transmission lines near the transmitter in addition to the regular ground switches in order to reduce excessive radio frequency pickup. In other cases it may reduce pickup at the point in the field if the antenna lines are disconnected from ground and the transmitter.

(2) Riggers shall test all radio frequency line wires for pickup with an insulated probe before handling with bare hands or metal tools.

(3) Transmitting technicians shall warn the riggers of adjacent lines which are, or may become energized.

(4) When antenna work has been completed, the rigger in charge of the job shall return to the transmitter, notify the transmitting technician in charge and personally remove the tag.

§ 1910.343 Overhead Lines.

(a) *Handling suspension strand.*—(1) Persons handling cable suspension strand being installed on poles carrying exposed energized power conductors shall wear insulating gloves and avoid body contact with the strand until after it has been tensioned, deadened, and permanently grounded.

(2) Strand shall be restrained against upward movement during installation where there is an upward change in grade on joint-use poles, and on nonjoint poles where the line crosses under energized power conductors.

(b) *Need for testing wood poles.*—Unless temporary guys or braces are attached first, poles shall be tested before climbing where one or more of the following conditions exist:

(1) At deadend poles (does not include properly braced or guyed "Y" or "T" cable junction poles).

(2) Straight line poles which are not storm guyed and adjacent span lengths exceed 165 feet.

(3) Where there is a downward change in grade at the pole and it is not a guyed or braced corner pole or a cable junction pole.

(4) Where the pole supports only telephone drop wire.

(5) Where the pole carries less than ten communication line wires (on joint use poles), one power line wire shall be counted as two communication wires.

(c) *Methods of testing wood poles.*—One of the following methods or its equivalent shall be used.

(1) Rap the pole sharply with a hammer weighing about 3 pounds, beginning near the ground line and continuing to a height of about 6 feet, going completely around the pole. The hammer will produce a clear sound and rebound sharply when striking sound wood. Decay pockets will be indicated by a dull sound and the hammer rebound is less pronounced. In this case, the pole shall be considered unsafe. Also, prod the pole as near the ground line as possible using a pole prod or a screwdriver with 5 inch or longer blade. If substantial decay is encountered, the pole shall be considered unsafe.

(2) Apply a horizontal force to the pole and attempt to rock it back and forth in a direction across the line. (Caution must be exercised to avoid causing power wires to swing together.) The force may be applied either by pushing with a pike pole or pulling with a rope. If the pole cracks during the test, it shall be considered unsafe.

(d) *Unsafe poles or structures.*—Poles or structures found to be unsafe by test or observation shall not be climbed until made safe by guying, bracing or other adequate means. Poles found unsafe to climb shall, until they are made safe, be tagged in a conspicuous place to alert and warn all employees of the unsafe condition.

(e) *Testing cable suspension strand.*—Before attaching a splicing platform to cable suspension strand, it shall be tested as follows to make sure it has sufficient strength to support the weight of the platform and the employee, except that where the strand crosses above power wires or railroad tracks, an inspection should be made as described in paragraph (f) of this section below. One of the following methods or its equivalent shall be used:

(1) Throw ⅜ inch rope (or larger) over the strand. On joint lines, pass the rope over the strand using tree pruner handles or a wire raising tool. If two employees are present, both shall grip the double rope and slowly transfer their entire weight to the rope. The feet should not be more than about 12 inches above the ground.

(2) If only one employee is present, one end of the rope shall be tied to the bumper of the truck or other equally secure anchorage; the employee shall then grasp the other end of the rope and attempt to raise himself about a foot above the ground.

(f) *Inspection of strand.*—Where strand passes over electric power wires or major railroad tracks, it shall not be tested, but shall be inspected from a convenient working position at both poles supporting the span in question. If any of the following conditions exist, such strand shall not be used to support any splicing platform, scaffold or cable car.

(1) Corrosion so that no galvanizing can be seen.

(2) One or more wires of the strand are broken.

(3) Any worn spots.

(4) Burn marks such as those caused by contact with electric power wires.

(g) *Outside work platforms.*—Safety straps and body belts shall be used while working on elevated work platforms such as aerial splicing platforms, pole platforms, ladder platforms and terminal balconies unless railings are provided.

(h) *Other elevated locations.*—Safety straps and body belts shall be worn to protect employees working at elevated positions on poles, towers or similar structures, which do not have suitably guarded work areas.

(i) *Installing and removing wire and cable.*—Before installing or removing wire or cable, the pole or structure shall be guyed, braced, or otherwise supported as necessary to prevent failure of the pole or structure.

(j) *Avoiding contact with energized power conductors or equipment.*—When setting, moving, or removing poles using cranes, derricks, or other mechanized equipment, precautions shall be taken to avoid contact with energized power conductors or equipment.

(k) *Handling poles near energized power conductors.*—(1) Joint use poles shall not be set, moved or removed by telecommunication employees where the nominal voltage of open electrical power conductors exceed 34.5kv phase to phase (20kv to ground).

(2) Poles shall not be placed, moved or removed during heavy rain, sleet or wet snow fall in joint lines carrying more than 8.7kv phase to phase voltage (5kv to ground) except that poles which have been cut off two feet or more below the level of the lowest power conductor may be removed where the nominal phase to phase voltage does not exceed 34.5kv provided the pole is also cut off near the ground line.

(3) (i) Wet poles being placed, moved or removed where power voltages are over 750 volts, but not over 34.5kv phase to phase voltage (20kv to ground) shall be insulated with either a rubber insulating blanket, a fiberglass box guide or equivalent protective equipment.

(ii) Dry poles being set, moved or removed where power voltages exceed 8.7kv phase to phase (5kv to ground) but do not exceed 34.5kv phase to phase (20kv to ground) shall be insulated with either a rubber insulating blanket, a fiberglass box guide or equivalent.

(iii) Insulation is not required where wet or dry poles are being removed provided the pole is cut off 2 feet or more below the lowest power wire and cut off near the ground line.

(4) Insulating gloves shall be worn by all persons handling the pole either with their hands or with tools throughout the time that there is a possibility that the pole may contact a power conductor. Where the voltage to ground of the power conductor exceeds 15kv to ground, the gloves shall be Class II (ANSI J–6 Stand-

V 38 - 166 AUG 28 73 XUM

ard). For voltages not exceeding 15kv to ground, insulating gloves shall have a breakdown voltage of at least 17kv.

(5) The guard or insulating material used to protect the pole shall meet the appropriate 3 minute proof test voltage requirements contained in the ANSI J-6.4–1971.

(6) During the time that there is a possibility of contact between the pole or the equipment used to handle it, and an energized power conductor, the following precautions shall be observed by the operator of the equipment:

(i) When on the vehicle which carries the derrick, the employee shall avoid all contact with the ground itself, persons standing on the ground, and all grounded objects such as guys, tree limbs, metal sign posts, etc. If possible, the employee shall remain on the vehicle as long as the possibility of contact exists.

(ii) When it is necessary to leave the vehicle, the employee shall step onto an insulating blanket and break all contact with the vehicle before stepping off the blanket and onto the ground. As a last resort if a blanket is not available, the employee may jump cleanly from the vehicle.

(iii) When it is necessary to enter the vehicle, the employee shall first step onto an insulating blanket and break all contact with the ground, grounded objects and other persons before touching the truck or derrick. As a last resort if a blanket is not available, the employee may jump cleanly onto the vehicle, avoiding all contact with the grounded objects and persons.

(l) *Approach distances.*—No employee shall bring any part of his body, or any conductive tools or conductive objects closer to exposed energized power conductors than the distances permitted in § 1910.331(g) of this part.

(m) *Working position on poles.*—Except as provided in this section, employees shall not climb or work above the level of the lowest electric power conductor on the pole (exclusive of vertical runs and street light wiring). This rule does not apply where the communications facilities are attached above the electric power conductors if a rigid fixed barrier has been installed between the electric power facility and the communications facility. This rule does not apply to cabled secondary service drops carrying less than 300v to ground and attached 40 inches or more below the communitions conductors or cables.

(n) *Metal tapes and ropes.*—(1) Metal measuring tapes, metal measuring ropes, or tapes containing conductive strands shall not be used when working near exposed energized parts.

(2) Where it is necessary to measure clearances from energized parts, only non-conductive devices shall be used.

§ 1910.344 Underground Lines.

The following provisions of this section apply to guarding manholes and street openings and ventilation and testing for gas in manholes and unvented vaults for telecommunications field work on or with underground lines:

(a) *Guarding manholes and street openings.*—(1) When covers of manholes or vaults are removed, the opening shall be promptly guarded by a railing, temporary cover, or other suitable temporary barrier substantial enough to prevent an accidental fall through the opening and suitable to protect persons working in the manhole from foreign objects from above.

(2) While work is being performed in the manhole, a person with basic first aid training shall be immediately available to render assistance if there is cause for believing that a safety hazard exists and the requirements listed under §§ 1910.333(a) and 1910.344(a)(1) of this part do not adequately protect the employee(s). Examples of manhole work site hazards deemed to constitute such cause could include, but are not limited to:

(i) Manhole work sites where safety hazards are created by traffic patterns that cannot be corrected by provisions of § 1910.333(a) "Employee Protection in Public Work Areas."

(ii) Manhole work sites that are subject to unusual water hazards that cannot be abated by conventional means.

(iii) Manhole work sites that are occupied jointly with power utilities as described in § 1910.344(c) of this part.

(b) *Requirements prior to entering manholes and unvented vaults.*—(1) Prior to an employee entering a manhole the following shall be complied with.

(i) The internal atmosphere shall be tested for combustible gas and, except when continuous forced ventilation is provided, the atmosphere shall also be tested for oxygen deficiency.

(ii) When unsafe conditions are detected by testing or other means, the work area shall be ventilated and otherwise made safe before entry.

(2) An adequate continuous supply of air shall be provided while work is performed.

(i) Where combustible or explosive gas vapors have been initially detected and subsequently reduced to a safe level by ventilation.

(ii) Where organic solvents are used in the work procedure.

(iii) Where open flame torches are used in the work procedure.

(iv) In that portion of a public right of way open to vehicular traffic and/or exposed to a seepage of gas or gases, or

(v) Where toxic gases or oxygen deficiency is found.

(3) *Central office cable vaults.*—(i) Central office cable vaults that are adequately vented do not need to comply with § 1910.344(b)(1)&(2) of this part.

(ii) Unvented vaults shall comply with the provisions of § 1910.344(b)(1)&(2) of this part.

(c) *Joint power and telecommunication manholes.*—While work is being performed in a manhole occupied jointly, by an electric utility and a telecommunication utility, an employee shall be available in the immediate vicinity to render emergency assistance as may be required. This shall not preclude the employee in the immediate vicinity from occasionally entering a manhole to provide assistance, other than emergency. This requirement does not preclude a qualified employee, working alone, from entering for brief periods of time, a manhole where energized cables or equipment are in service, for the purpose of inspection, housekeeping, taking readings, or similar work if such work can be performed safely.

(d) *Ladders.*—Ladders shall be used when going in or out of manholes in excess of 4 feet deep.

(e) *Flames.*—Where open flames must be used in manholes, the following special precautions shall be taken to provide protection against combustible gas levels during the period in use.

(1) A test for combustible gas shall be made immediately prior to use of the open flame device.

(2) While using the open flame device, not more than one hour shall elapse without repeating the test for combustible gas.

(3) A fuel tank, e.g. acetylene, shall be in the manhole only when in actual use.

§ 1910.345 Microwave Transmission.

(a) *Eye protection.*—Employees shall not look into an open waveguide which is connected to any energized source of microwave radiation.

(b) *Safe area.*—(1) Accessible areas associated with microwave radio systems where the exposed radiated power density exceeds 10mw/cm² shall be posted in accordance with § 1910.97 of this part. The lower half of the warning symbol shall include the following:

"Radiation in this area may exceed hazard limitations and special precautions are required.

See Instruction----------before entering."

Employees shall not enter an area posted according to above unless one of the following is compiled with:

(i) The power is reduced until the radiated power density is equal to or less than 10mw/cm², (prior to restoring normal operating power levels, the operator shall verify that all employees have been cleared from the posted area); or

(ii) Microwave protective garments are worn as described in paragraph (c) of this section.

(2) Power density in front of microwave transmitting antennas is computed by using the Formula Wo=4P/A, where Wo is power density in mw/cm², P is the combined input power in milliwatts and A is the areas of the antenna aperture in square centimeters.

(3) When the temperature is greater than 68°F, a radiation protective garment may be required even with power densities less than 10mw/cm². This is determined by a Temperature Humidity Index (THI) as shown in Table T-2 of this section. When such climatic conditions (THI greater than 70) exist, a microwave radiation protective garment shall be worn if the power density exceeds the value shown in Table T-2 of this section for that THI.

Table T-2

Temperature Humidity Index (THI) (See Note 1)	*Maximum Power Density (mw/cm²)*
70 or less	10
71	9
72	8
73	7
74	6
75	5
76	4
77	3
78	2
79 or more	1

Note 1: An approximation of the THI (within 1%) above 50% relative humidity (the range of concern) may be obtained from the relation:

$$THI = 0.8T + RH/10 + 5$$

Where T is degrees farenheit and RH is relative humidity in percent.

(c) *Protective garments.*—(1) These garments shall be such that the employee shall not be exposed to microwave radiation greater than 10mw/cm².

(2) Employees wearing microwave protective garments shall maintain safe distances from exposed electrically energized conductors and equipment. For the purpose of this paragraph (c) of this section, microwave protective garments shall be considered conductive objects and employees shall comply with the distance requirements § 1910.331(g) of this part.

(3) Microwave protective garments shall be inspected by the employee prior to each use to be sure that they are free from tears or ripped seams. Any such tears or rips shall be repaired before using the suit.

(d) *Hot patching.*—An employee shall wear a radiation protective garment when patching waveguide which is propagating RF energy (a procedure known as "hot patching") unless the following safety precautions are complied with:

(1) The total RF input power to the waveguide is 30 watts or less; and

(2) The employee's head and body (excluding limbs) is not permitted closer to the propagating open end of the waveguide than the following distances:

(i) 24 inches from the propagating open end of the waveguide measured along its axis; and

(ii) 12 inches measured perpendicularly from the axis as projected from the propagating open end of the waveguide.

§ 1910.346 Tree Trimming—Electrical Hazards.

(a) *General.* (1) Tree workers shall consider all overhead and underground electrical conductors and all communications wires and cables to be energized with potentially fatal voltages, never to be touched (contacted) either directly or indirectly.

(2) Every tree worker shall be instructed that:

(i) A direct contact is made when any part of the body touches or contacts an energized conductor, or other energized electrical fixture or apparatus.

(ii) An indirect contact is made when any part of the body touches any object in contact with an energized electrical conductor, or other energized fixture or apparatus.

(iii) An indirect contact can be made through conductive tools, tree branches, trucks, equipment, or other objects, or as a result of communications wires, cables, fences, or guy wires being accidentally energized.

(iv) Electric shock will occur when a tree worker, by either direct or indirect contact with an energized conductor, energized tree limb, tool equipment, or other object, provides a path for the flow of electricity to a grounded object or to the ground itself. Simultaneous contact with two energized conductors will also cause electric shock which may result in serious or fatal injury.

(3) The system operator/owner shall be advised before any work is performed in proximity to energized conductors. This rule shall not apply to persons working on behalf of, or employed by, the system operator/owner.

(b) *Working in proximity to electrical hazards.*—(1) A close inspection shall be made by the tree worker and by the man in charge to determine whether an electrical conductor passes through the tree or passes within reaching distance of the tree worker before climbing, entering, or working around any tree. If any of these conditions are found either directly or indirectly, it shall be considered that an electrical hazard exists, unless the system operator/owner has caused the hazard to be removed by deenergizing or installing protective equipment.

(2) Only a qualified line-clearance tree trimmer or qualified line-clearance tree-trimmer trainee will be assigned to the work if it is found that an electrical hazard exists.

(3) During all tree working operations aloft where an electrical hazard of more than 750 V exists, there shall be a second qualified line-clearance tree trimmer or qualified line-clearance tree-trimmer trainee within normal voice communication. This does not apply to utility workers engaged in tree trimming incidental to their normal occupation or to one-man service crews.

(4) Line-clearance tree trimmers and line-clearance tree-trimmer trainees shall maintain clearances from energized conductors as given in Table T-3.

TABLE T-3.—MINIMUM WORKING DISTANCES FROM ENERGIZED CONDUCTORS FOR LINE-CLEARANCE TREE TRIMMERS AND LINE-CLEARANCE TREE-TRIMMER TRAINEES

Voltage Range (phase to phase) (kv):	*Minimum Working Distance*
2.1 to 15.0	2 ft 0 in
15.1 to 35.0	2 ft 4 in
35.1 to 46.0	2 ft 6 in
46.1 to 72.5	3 ft 0 in
72.6 to 121.0	3 ft 4 in
138.0 to 145.0	3 ft 6 in
161.0 to 169.0	3 ft 8 in
230.0 to 242.0	5 ft 0 in
345.0 to 362.0	7 ft 0 in
500.0 to 552.0	11 ft 0 in
700.0 to 765.0	15 ft 0 in

(5) Tree workers shall maintain a minimum clearance of 10 feet from any conductors rated 50 kv or less. For lines rated over 50 kv, the minimum clearance shall be 10 feet plus 4/10 inch for each kilovolt over 50 kv. If safe clearances cannot be maintained, the system operator/owner shall be contacted to provide adequate protective measures or devices before any work is begun in or near the tree.

(6) Branches hanging on an energized conductor may only be removed using appropriately insulated equipment.

(7) Rubber footwear, including lineman's overshoes, shall not be considered as providing any measure of safety from electrical hazards.

(8) Ladders, platforms, and aerial devices, including insulated aerial devices, shall not be brought in contact with an electrical conductor. Reliance shall not be placed on their dielectric capabilities.

(9) When an aerial lift device contacts an electrical conductor, the truck supporting the aerial lift device shall be considered as energized.

(c) *Storm work and emergency conditions.*—(1) Storm work and emergency conditions create special hazards, and only authorized representatives of the system operator/owner shall perform tree work where conductors are involved.

(2) When an emergency condition develops due to tree operations, work shall be suspended and the system operator/owner shall be notified immediately.

§ 1910.347 Definitions.

(a) *Aerial lift.*—An aerial lift relates to the following types of vehicle-mounted aerial devices used to elevate personnel to job sites above ground:

(1) Extensible boom platforms,
(2) Aerial ladders,
(3) Articulate boom platforms,
(4) Vertical towers,
(5) A combination of any of the above

defined in ANSI A92.2–1969. These devices are made of metal, wood, fiberglass reinforced plastic (FRP), or other material and are powered or manually operated; whether or not they are capable of rotating about a substantially vertical axis.

(b) *Aerial splicing platform.*—This consists of a platform approximately 3 ft. x 4 ft. used to perform aerial cable work. It is furnished with fiber or synthetic ropes for supporting the platform from aerial strand, detachable guy ropes for anchoring it and a device for raising and lowering it with a handline.

(c) *Aerial tent.*—A small tent usually constructed of vinyl coated canvas, usually supported by light metal or plastic tubing. It is designed to protect employees in inclement weather while working on ladders, aerial splicing platforms, or aerial devices.

(d) *Alive or live (energized).*—Electrically connected to a source of potential difference, or electrically charged so as to have a potential significantly different from that of the earth in the vicinity. The term "live" is sometimes used in place of the term "current-carrying," where the intent is clear, to avoid repetition of the longer term.

(e) *Barricade.*—A physical obstruction such as types, cones, or "A" frame

V 38-166 AUG 28 73 XUM

type wood and/or metal structure intended to warn and limit access to a work area.

(f) *Barrier.*—A physical obstruction which is intended to prevent contact with energized lines or equipment, or to prevent unauthorized access to work area.

(g) *Battery room.*—A room in which batteries are located and whose aggregate capacity at the 8-hour discharge rate exceeds 5 kilowatt hours.

(h) *Bond.*—An electrical connection from one conductive element to another for the purpose of minimizing potential differences or providing suitable conductivity for fault current or for mitigation of leakage current and electrolytic action.

(i) *Cable.*—A conductor with insulation, or a stranded conductor with or without insulation and other coverings (single-conductor cable) or a combination of conductors insulated from one another (multiple-conductor cable).

(j) *Cable sheath.*—A protective covering applied to cables. NOTE: A cable sheath may consist of multiple layers of which one or more is conductive.

(k) *Circuit.*—A conductor or system of conductor through which an electric current is intended to flow.

(l) *Communication lines.*—The conductors and their supporting or containing structures for telephone, telegraph, railroad signal, data, clock, fire, police-alarm, community television antenna and other systems which are used for public or private signal or communication service, and which operate at potentials not exceeding 400 volts to ground or 750 volts between any two points of the circuit, and the transmitted power of which does not exceed 150 watts. When operating at less than 150 volts no limit is placed on the capacity of the system. Specifically designed communications cables may include communication circuits not complying with preceding limitation, where such circuits are also used incidentally to supply power to communication equipment.

(m) *Conductor.*—A material, usually in the form of a wire, cable, or bus bar suitable for carrying an electric current.

(n) *Effectively grounded.*—Intentionally connected to earth through a ground connection or connections of sufficiently low impedance and having sufficient current-carrying capacity to prevent the build-up of voltages which may result in undue hazard to connected equipment or to persons.

(o) *Equipment.*—A general term which includes fittings, devices, appliances, fixtures, apparatus, and the like, used as part of, or in connection with, a supply or communications installation.

(p) *Ground. (Reference).*—That conductive body, usually earth, to which an electric potential is referenced.

(q) *Ground (as a Noun).*—A conductive connection whether intentional or accidental, by which an electric circuit or equipment is connected to reference ground.

(r) *Ground (as a Verb).*—The connecting or establishment of a connection, whether by intention or accident, of an electric circuit or equipment to reference ground.

(s) *Ground tent.*—A small tent usually constructed of vinyl coated canvas supported by a metal or plastic frame. Its purpose is to protect employees from inclement weather while working at buried cable pedestal sites or similar locations.

(t) *Grounded conductor.*—A system or circuit conductor which is intentionally grounded.

(u) *Grounded systems.*—A system of conductors in which at least one conductor or point (usually the middle wire, or neutral point of transformer or generator windings) is intentionally grounded, either solidly or through a current-limiting device (not a current-interrupting device).

(v) *Grounding electrode conductor. (Grounding conductor).*—A conductor used to connect equipment or the grounded circuit of a wiring system to a grounding electrode.

(w) *Insulated.*—Separated from other conducting surfaces by a dielectric substance (including air space) offering a high resistance to the passage of current.

NOTE: When any object is said to be insulated, it is understood to be insulated in suitable manner for the conditions to which it is subjected. Otherwise, it is within the purpose of these rules, uninsulated. Insulating covering of conductors is one means of making the conductor insulated.

(x) *Insulation (as applied to cable.)*—That which is relied upon to insulate the conductor from other conductors or conducting parts or from ground.

(y) *Joint use.*—The sharing of a common facility such as a manhole, trench or pole by two or more different kinds of utilities (e.g., power and telecommunications).

(z) *Ladder platform.*—Designed to facilitate working aloft from an extension ladder. Consists of a platform (approximately 9" x 18") hinged to a welded pipe frame. The rear edge of platform and the bottom cross-member of the frame are equipped with latches to lock the platform to ladder rungs.

(aa) *Ladder seat.*—A removable seat used to facilitate work at an elevated position on rolling ladders in telecommunication centers.

(bb) *Manhole.*—A subsurface enclosure which personnel may enter and which is used for the purpose of installing, operating and maintaining submersible equipment and/or cable.

(cc) *Manhole platform.*—Consists of separate planks which are laid across steel platform supports. The ends of the supports are engaged in the manhole cable racks.

(dd) *Nominal voltage.*—The nominal voltage of a system or circuit is the value assigned to a system or circuit of a given voltage class for the purpose of convenient designation. The actual voltage may vary above or below this value.

(ee) *Pole balcony or seat.*—This balcony or seat is used as a support for workmen at pole mounted equipment or terminal boxes. It consists of a bolted assembly of steel details and a wooden platform. Steel braces run from the pole to the underside of the balcony. A guard rail (approximately 30" high) may be provided.

(ff) *Pole platform.*—This is intended for use by a workman in splicing and maintenance operations on aerial operations adjacent to a pole. It consists of a platform equipped at one end with a hinged chain binder for securing the platform to a pole. A brace from the pole to the underside of the platform is also provided.

(gg) *Qualified line-clearance tree trimmer.*—A tree worker who through related training and on-the-job experience is familiar with the special techniques and hazards involved in line clearance.

(hh) *Qualified line-clearance tree-trimmer trainee.*—Any worker regularly assigned to a line-clearance tree trimming crew and undergoing on-the-job training who, in the course of such training, has demonstrated his ability to perform his duties safely at his level of training.

(ii) *Qualified personnel.*—Any worker who by reason of his training and experience has demonstrated his ability to safely perform his duties.

(jj) *Qualified tree worker.*—A worker who through related training and on-the-job experience is familiar with the techniques and hazards of tree pruning, trimming, repairing, or removal, and the equipment used in such operations.

(kk) *System operator/owner.*—The person or organization that operates or controls the electrical conductors involved.

(ll) *Telecommunications center.*—An installation of communication equipment under exclusive control of an organization providing telecommunications service, located outdoors, or in a vault, chamber, or building space used primarily for such installations.

NOTE.—Telecommunication centers are facilities established, equipped, and arranged in accordance with engineered plans for the purpose of providing telecommunications service. They may be located on premises owned or leased by the organization providing telecommunication service, or on the premises owned or leased by others. Included in this definition are switch rooms, (whether electromechanical, electronic, or computer controlled), terminal rooms, power rooms, repeater rooms, transmitter and receiver rooms, switchboard operating rooms, cable vaults, and miscellaneous communications equipment rooms. Simulations of telecommunication centers for training or developmental purposes are also included.

(mm) *Telecommunication line truck.*—A truck used to transport men, tools, and material, and to serve as a traveling workshop for telecommunication installation and maintenance work. It is sometimes equipped with a boom and auxiliary equipment for setting poles, digging holes, and elevating material or men.

(nn) *Telecommuncation service.*—The furnishing of a capability to signal or communicate at a distance by means such as telephone, telegraph, police and fire-alarm, community antenna television, or similar system, using wire, conventional cable, coaxial cable, wave guides, or microwave transmission or other similar means.

(oo) *Unvented vault.*—An enclosed vault in which the only openings are access openings.

(pp) *Vault.*—An enclosure above or below ground which personnel may enter and is used for the purpose of installing, operating, and/or maintaining equipment and/or cable which need not be of submersible design.

(qq) *Vented vault.*—An enclosure as described in paragraph (pp) above, with provision for air changes using exhaust flue stack(s) and low level air intake(s), operating on differentials of pressure and temperature providing for air flow.

(rr) *Voltage of an effectively grounded circuit.*—The voltage between any conductor and ground unless otherwise indicated.

(ss) *Voltage of a circuit not effectively grounded.*—The voltage between any two conductors. If one circuit is directly connected to and supplied from another circuit of higher voltage (as in the case of an autotransformer), both are considered as of the higher voltage, unless the circuit of lower voltage is effectively grounded, which case its voltage is not determined by the circuit of higher voltage. Direct connection implies electric connection as distinguished from connection merely through electromagnetic or electrostatic induction.

§ 1910.348 Standards Organizations.

Specific standards of the following organizations have been referenced in this subpart. Copies of the referenced standards may be obtained from the issuing organizations. The names and address of the issuing organizations are as follows:

American National Standards Institute (ANSI), 1430 Broadway, New York, N.Y. 10018.

American Society for Testing & Materials (ASTM), 1916 Race Street, Philadelphia, Pa. 19103.

Signed at Washington, D.C., this 18th day of August 1973.

JOHN STENDER,
Assistant Secretary of Labor.

type wood and or metal structure intended to warn and limit access to a work area.

(f) *Barrier.*—A physical obstruction which is intended to prevent contact with energized lines or equipment, or to prevent unauthorized access to work area.

(g) *Battery room.*—A room in which batteries are located and whose aggregate capacity at the 8-hour discharge rate exceeds 5 kilowatt hours.

(h) *Bond.*—An electrical connection from one conductive element to another for the purpose of minimizing potential differences or providing suitable conductivity for fault current or for mitigation of leakage current and electrolytic action.

(i) *Cable.*—A conductor with insulation, or a stranded conductor with or without insulation and other coverings (single-conductor cable) or a combination of conductors insulated from one another (multiple-conductor cable).

(j) *Cable sheath.*—A protective covering applied to cables. NOTE: A cable sheath may consist of multiple layers of which one or more is conductive.

(k) *Circuit.*—A conductor or system of conductor through which an electric current is intended to flow.

(l) *Communication lines.*—The conductors and their supporting or containing structures for telephone, telegraph, railroad signal, data, clock, fire, police-alarm, community television antenna and other systems which are used for public or private signal or communication service, and which operate at potentials not exceeding 400 volts to ground or 750 volts between any two points of the circuit, and the transmitted power of which does not exceed 150 watts. When operating at less than 150 volts no limit is placed on the capacity of the system. Specifically designed communications cables may include communication circuits not complying with preceding limitation, where such circuits are also used incidentally to supply power to communication equipment.

(m) *Conductor.*—A material, usually in the form of a wire, cable, or bus bar suitable for carrying an electric current.

(n) *Effectively grounded.*—Intentionally connected to earth through a ground connection or connections of sufficiently low impedance and having sufficient current-carrying capacity to prevent the build-up of voltages which may result in undue hazard to connected equipment or to persons.

(o) *Equipment.*—A general term which includes fittings, devices, appliances, fixtures, apparatus, and the like, used as part of, or in connection with, a supply or communications installation.

(p) *Ground. (Reference).*—That conductive body, usually earth, to which an electric potential is referenced.

(q) *Ground (as a Noun).*—A conductive connection whether intentional or accidental, by which an electric circuit or equipment is connected to reference ground.

(r) *Ground (as a Verb).*—The connecting or establishment of a connection, whether by intention or accident, of an electric circuit or equipment to reference ground.

(s) *Ground tent.*—A small tent usually constructed of vinyl coated canvas supported by a metal or plastic frame. Its purpose is to protect employees from inclement weather while working at buried cable pedestal sites or similar locations.

(t) *Grounded conductor.*—A system or circuit conductor which is intentionally grounded.

(u) *Grounded systems.*—A system of conductors in which at least one conductor or point (usually the middle wire, or neutral point of transformer or generator windings) is intentionally grounded, either solidly or through a current-limiting device (not a current-interrupting device).

(v) *Grounding electrode conductor. (Grounding conductor).*—A conductor used to connect equipment or the grounded circuit of a wiring system to a grounding electrode.

(w) *Insulated.*—Separated from other conducting surfaces by a dielectric substance (including air space) offering a high resistance to the passage of current.

NOTE: When any object is said to be insulated, it is understood to be insulated in suitable manner for the conditions to which it is subjected. Otherwise, it is within the purpose of these rules, uninsulated. Insulating covering of conductors is one means of making the conductor insulated.

(x) *Insulation (as applied to cable.)*—That which is relied upon to insulate the conductor from other conductors or conducting parts or from ground.

(y) *Joint use.*—The sharing of a common facility such as a manhole, trench or pole by two or more different kinds of utilities (e.g., power and telecommunications).

(z) *Ladder platform.*—Designed to facilitate working aloft from an extension ladder. Consists of a platform (approximately 9" x 18") hinged to a welded pipe frame. The rear edge of platform and the bottom cross-member of the frame are equipped with latches to lock the platform to ladder rungs.

(aa) *Ladder seat.*—A removable seat used to facilitate work at an elevated position on rolling ladders in telecommunication centers.

(bb) *Manhole.*—A subsurface enclosure which personnel may enter and which is used for the purpose of installing, operating and maintaining submersible equipment and/or cable.

(cc) *Manhole platform.*—Consists of separate planks which are laid across steel platform supports. The ends of the supports are engaged in the manhole cable racks.

(dd) *Nominal voltage.*—The nominal voltage of a system or circuit is the value assigned to a system or circuit of a given voltage class for the purpose of convenient designation. The actual voltage may vary above or below this value.

(ee) *Pole balcony or seat.*—This balcony or seat is used as a support for workmen at pole mounted equipment or terminal boxes. It consists of a bolted assembly of steel details and a wooden platform. Steel braces run from the pole to the underside of the balcony. A guard rail (approximately 30" high) may be provided.

(ff) *Pole platform.*—This is intended for use by a workman in splicing and maintenance operations on aerial operations adjacent to a pole. It consists of a platform equipped at one end with a hinged chain binder for securing the platform to a pole. A brace from the pole to the underside of the platform is also provided.

(gg) *Qualified line-clearance tree trimmer.*—A tree worker who through related training and on-the-job experience is familiar with the special techniques and hazards involved in line clearance.

(hh) *Qualified line-clearance tree-trimmer trainee.*—Any worker regularly assigned to a line-clearance tree trimming crew and undergoing on-the-job training who, in the course of such training, has demonstrated his ability to perform his duties safely at his level of training.

(ii) *Qualified personnel.*—Any worker who by reason of his training and experience has demonstrated his ability to safely perform his duties.

(jj) *Qualified tree worker.*—A worker who through related training and on-the-job experience is familiar with the techniques and hazards of tree pruning, trimming, repairing, or removal, and the equipment used in such operations.

(kk) *System operator/owner.*—The person or organization that operates or controls the electrical conductors involved.

(ll) *Telecommunications center.*—An installation of communication equipment under exclusive control of an organization providing telecommunications service, located outdoors, or in a vault, chamber, or building space used primarily for such installations.

NOTE.—Telecommunication centers are facilities established, equipped, and arranged in accordance with engineered plans for the purpose of providing telecommunications service. They may be located on premises owned or leased by the organization providing telecommunication service, or on the premises owned or leased by others. Included in this definition are switch rooms, (whether electromechanical, electronic, or computer controlled), terminal rooms, power rooms, repeater rooms, transmitter and receiver rooms, switchboard operating rooms, cable vaults, and miscellaneous communications equipment rooms. Simulations of telecommunication centers for training or developmental purposes are also included.

(mm) *Telecommunication line truck.*—A truck used to transport men, tools, and material, and to serve as a traveling workshop for telecommunication installation and maintenance work. It is sometimes equipped with a boom and auxiliary equipment for setting poles, digging holes, and elevating material or men.

(nn) *Telecommuncation service.*—The furnishing of a capability to signal or communicate at a distance by means such as telephone, telegraph, police and fire-alarm, community antenna television or similar system using wire conventional cable, coaxial cable, wave guides, or microwave transmission or other similar means.

(oo) *Unvented vault.*—An enclosed vault in which the only openings are access openings.

(pp) *Vault.*—An enclosure above or below ground which personnel may enter and is used for the purpose of installing, operating, and/or maintaining equipment and/or cable which need not be of submersible design.

(qq) *Vented vault.*—An enclosure as described in paragraph (pp) above, with provision for air changes using exhaust flue stack(s) and low level air intake(s), operating on differentials of pressure and temperature providing for air flow.

(rr) *Voltage of an effectively grounded circuit.*—The voltage between any conductor and ground unless otherwise indicated.

(ss) *Voltage of a circuit not effectively grounded.*—The voltage between any two conductors. If one circuit is directly connected to and supplied from another circuit of higher voltage (as in the case of an autotransformer), both are considered as of the higher voltage, unless the circuit of lower voltage is effectively grounded, which case its voltage is not determined by the circuit of higher voltage. Direct connection implies electric connection as distinguished from connection merely through electromagnetic or electrostatic induction.

Office of Education

NATIONAL DEFENSE STUDENT LOAN PROGRAM

List of Schools Determined To Have a High Concentration of Students From Low-Income Families

Pursuant to the provisions of section 205(b)(3)(A)(i) of the National Defense Education Act of 1958 as amended (20 U.S.C. 425(b)(3)(A)(i)), notice is hereby given of the public and other nonprofit elementary and secondary schools which have been listed in accordance with the regulations governing the administration of the National Defense Student Loan Program (45 CFR 144.8(i)(2)) as being in school districts of local educational agencies eligible for assistance pursuant to title II of Public Law 874, 81st Congress, as amended (title I of the Elementary and Secondary Education Act of 1965), and as having high concentrations of children from low-income families during the school year 1972–73. Loans made subsequent to June 30, 1972 under the National Direct Student Loan Program (20 U.S.C. 1087aa–1087ff) are not subject to provisions of section 205(b)(3)(A)(i) and as such are not subject to this notice.

Teachers with outstanding indebtedness as a result of loans made prior to July 1, 1972 under the National Defense Student Loan Program are entitled to the 15 percent per annum rate of loan cancellation for each complete academic year (or equivalent) of full-time service performed in a public or other nonprofit elementary or secondary school which for that year has been designated by the U.S. Commissioner of Education as having a high concentration of students from low-income families.

The purpose of the lists published under this notice is to identify those schools in each of the States in which loan cancellation for teaching service during both the 1972–73 and 1973–74 school years is authorized under the special incentive terms and rates provided under section 205(b)(3)(A) of the National Defense Education Act of 1958.

The school lists appear in alphabetical order by State. The entries for American Samoa, Guam, Puerto Rico, the Trust Territory of the Pacific Islands, and the Virgin Islands appear following the list for the State of Wyoming. The District of Columbia is included in the alphabetical sequence.

Despite the fact that every reasonable precaution has been taken to assure the accuracy of these lists, it is possible that some errors may occur. Should an apparent discrepancy be noted, inquiry may be made to the appropriate State educational agency or the Program Support Branch, Division of Student Assistance, Bureau of Higher Education, U.S. Office of Education, Washington, D.C. 20202.

Dated: June 4, 1973.

S. W. HERRELL,
Acting Deputy Associate Commissioner for Higher Education.

Approved: June 6, 1973.

JOHN R. OTTINA,
Acting U.S. Commissioner of Education.

ALABAMA

List of Schools Determined To Have a High Concentration of Students From Low-Income Families; This List Is for Cancellation Benefits During Both the 1972–73 and 1973–74 School Years

Location (city or town); name of school

Abbeville:
- Abbeville, EL.
- Abbeville, HS.
- Henry County Middle.

Akron; Akron Community, HS.
Alberta; Alberta, JHS.
Albertville; Albertville, HS.
Aliceville:
- Aliceville, EL.
- Aliceville, HS.
- Aliceville, JHS.

Anniston; 12th Street, EL.
Ansley:
- Shellhorn, JHS.
- Shellhorn Primary.

Ardmore (Tennessee); Ardmore, HS.
Athens:
- Clements, HS.
- East Limestone, HS.
- Johnson, JHS.
- Piney Chapel, JHS.
- Reid, EL.

Atmore; Atmore, HS.
Attalla:
- Attalla, EL.
- Curtiston, EL.
- Stowers, EL.

Bakerhill; Bakerhill, HS.
Banks:
- Banks, JHS.
- Banks Primary.

Bay Minette; Baldwin County, HS.
Bayou La Batre; Alba, HS.
Beatrice; Beatrice, HS.
Berry; Berry, HS.
Bessemer:
- Abrams, HS.
- Addison, JHS.
- Red Ore, EL.

Bexar; Gravel Springs, JHS.
Birmingham:
- A. G. Gaston, JHS.
- Alabama Boy's Industrial School.
- Edgewater, JHS.
- Ensley, HS.
- Hayes, HS.
- Hudson, EL.
- Ketona, EL.
- Lewis, EL.
- State Training School for Girls.
- Wenonah, EL.
- Western, HS.
- Woodland, HS.

Blountsville; Summit, EL.
Boaz; Center Point, JHS.
Boligee; Paramount, HS.
Boykin; Boykin, HS.
Brantley; Brantley, HS.
Brewton; Southern Normal, HS.
Bridgeport:
- Bridgeport, EL.
- Bridgeport, HS.

Brilliant:
- Brilliant, EL.
- Brilliant, HS.

Brookwood; Brookwood, EL.
Brundidge:
- New Hope, JHS.
- Pike County, HS.

Bryant; Bryant, JHS.
Buhl; Buhl, EL.
Butler:
- Butler, EL.
- Choctaw County, HS.
- East Choctaw, HS.

Calhoun:
- Calhoun, EL.
- Calhoun, HS.

Camden; Camden Academy, HS.
Carbon Hill:
- Carbon Hill, EL.
- Carbon Hill, HS.
- Carbon Hill, JHS.

Carrollton:
- Carrollton, HS.
- Pickens County, HS.

Castleberry; Conecuh County, HS.
Centre:
- Alexis, EL.
- Centre, JHS.
- Hardin, JHS.

Centreville; Centreville, EL.
Cherokee:
- Cherokee, EL.
- Cherokee, Middle.

Childersburg:
- A. H. Watwood, EL.
- Childersburg, EL.

Clanton; Henry M. Adair, EL.
Clayton; Clayton, HS.
Clio; Clio, HS.
Coatopa; Belmont, JHS.
Coffee Springs; Coffee Springs, HS.
Coffeeville; Coffeeville, EL.
Coker; Westwood, EL.
Collinsville; Collinsville, HS.
Cottondale; Vance, EL.
Courtland; Courtland, HS.
Coy:
- Coy Public, JHS.
- Tate's Chapel, JHS.

Crossville:
- Crossville, HS.
- Kilpatrick, JHS.
- Whiton, EL.

Cuba; Kinterbish, HS.
Cullman; Jones Chapel, JHS.
Cusseta; Cusseta, EL.
Daleville; Daleville, HS.
Danville; Speake, HS.
Decatur:
- Lakeview, EL.
- Westlawn, EL.

Demopolis:
- Demopolis, JHS.
- Eastside, EL.
- John Essex, HS.

Dixons Mill; Marengo, HS.
Dothan:
- East Highland, EL.
- Highlands, EL.
- Lake Street, EL.
- Montana Street, EL
- Rose Hill, EL.
- Stringer Street, EL.
- Wilson Street, EL.

Double Springs; Wilcox County, HS.
Dozier; Dozier, HS.
Duncanville; Duncanville, EL.
Dutton; Dutton, JHS.
East Tallassee; East Tallassee, EL.
Elba:
- Elba, EL.
- Elba, Middle.

Elkmont; Limestone County, HS.
Eufaula; Rebecca Comer, HS.
Eutaw:
- Eatman, JHS.
- Eutaw, HS.
- Eutaw, Middle.

Evergreen:
- Evergreen City, EL.
- Evergreen, HS.
- Lyeffion, HS.
- Marshall, Middle.
- Southside, EL.

Excel; Excel, HS.
Fairhope; Fairhope, HS.
Faunsdale; Faunsdale, EL.
Fayette:
- Fayette, HS.
- Hubbertville, HS.

Five Points:
- Five Points, EL.
- Five Points, HS.

Foley; Foley, HS.
Forkland; Birdine, JHS.
Fort Deposit; Fort Deposit, EL.
Fosters; Myrtlewood, EL.
Frisco City:
- Frisco City, HS.

MICHIGAN

List of Schools Determined To Have a High Concentration of Students From Low-Income Families; This List Is for Cancellation Benefits During Both the 1972–73 and 1973–74 School Years

Location (city or town); name of school

Adrian:
Adrian Training School (Ungraded).
Comstock EL.
Garfield EL.
Jefferson EL.
Madison K–12.
McKinley EL.
Michener EL.
Alanson; Littlefield K–12.
Alba; Alba EL–JHS–SHS.
Albion:
Crowell EL.
Dalrymple EL.
Harrington EL.
Washington Gardner JHS.
Algonac:
Algonac EL.
Roy T. Gilbert JHS.
Allegan; Southward EL.
Alma:
Pine EL.
Republic EL.
Alpena:
Hinks EL.
Lincoln EL.
Alto; Kettle Lake EL.
Ann Arbor:
Arbor Heights Center (Ungraded).
Clinton I and II EL.
Jones EL.
Mack EL.
Mitchell EL.
Northside EL.
Applegate; Applegate EL.
Ashley; Ashley K–12.
Athens:
Athens JHS.
Athens SHS.
Atlanta; Atlanta K–12.
Atlantic Mine; Redridge EL.
Auburn:
Auburn EL.
John Adams EL.
Auburn Heights; Auburn Heights EL.
Au Gres:
Au Gres-Sims EL.
Au Gres-Sims J–SHS.
Avoca; Avoca EL.
Bach; St. Peter EL.
Baldwin:
Baldwin EL.
Baldwin JHS.
Baldwin SHS.
Nelson EL.
Bangor:
Bangor EL.
Bangor JHS.
Baraga; Philip La Tendresse EL.
Bark River; Ford River EL.
Barryton; Barryton EL.
Barton City; Barton City EL.
Battle Creek:
Ann J. Kellogg EL.
Brownlee Park EL.
Central SHS.
Franklin EL.
Lincoln EL.
McKinley EL.
Northwestern JHS.
Poulsen EL.
Roosevelt EL.
Southeastern JHS.
Southwestern JHS.
Wilson EL.
Bay City:
Bangor JHS.
Central EL.

OKLAHOMA

List of Schools Determined to Have a High Concentration of Students From Low-Income Families. This List is for Cancellation Benefits During Both the 1972–1973 and 1973–1974 School Years.

(Please note that all elementary and secondary schools in this State operated by the Bureau of Indian Affairs are considered to meet the qualification of a high concentration of students from low-income families, and are, therefore, not included on this list.)

Location: city or town; name of school

Ada:
- Ada JHS.
- Ada HS.
- Byng EL–JHS–HS.

- Cottonwood, D–4.

Colbert; Colbert EL.
Colcord; Colcord EL–JHS–HS.
Commerce; Commerce EL–JHS–HS.
Connerville; Connerville EL.
Coweta; Coweta EL–JHS–HS.
Cromwell; Butner EL–JHS–HS.
Davenport; Davenport EL–JHS–HS.
Dewar; Dewar EL–JHS–HS.
Drumright; Olive EL–JHS–HS.
Duncan; Empire EL–JHS–HS.
Durant:
- Durant HS.
- Silo EL–JHS–HS.
- Silo I–1.

Dustin; Dustin EL–JHS–HS.
Eagletown; Eagletown EL–JHS–HS.
Elgin; Elgin EL–JHS–HS.
Elk City; Elk City JHS–HS.
Enid; Enid HS.
Eufaula; Eufaula JHS–HS.
Fairfax; Fairfax EL–JHS–HS.
Fillmore; Fillmore EL.
Fort Cobb; Fort Cobb EL–JHS–HS.
Fort Gibson; Fort Gibson EL–JHS–HS.
Fort Smith; (Arkansas) Pocola EL–JHS–HS.
Fort Towson; Fort Towson EL–JHS–HS.
Fox; Fox EL–JHS–HS.
Foyil; Foyil EL–JHS–HS.
Frederick:
- Central EL.
- Frederick JHS.

Gore; Gore EL–JHS–HS.
Graham; Graham EL–JHS–HS.
Grandfield; Grandfield EL–JHS–HS.
Grant; Grant EL–JHS–HS.
Grove:
- Grove EL.
- Grove JHS–HS.

Guthrie; Guthrie HS.
Haileyville; Haileyville EL–JHS–HS.
Hanna; Hanna EL–JHS–HS.
Hartshorne:
- Hartshorne JHS–HS.
- North Ward EL.

Haskell; Haskell EL–JHS–HS.
Haworth; Haworth EL–JHS–HS.
Heavener:
- Heavener EL.
- Heavener JHS–HS.

Henryetta:
- Henryetta EL.
- Henryetta JHS–HS.
- Ryal EL, Ryal, D–3.

Hobart:
- Eugene Field EL.
- Francis Willard EL.
- Hobart JHS–HS.

Hodgens; Hodgens EL.
Holdenville:
- Holdenville JHS–HS.
- Park View EL.
- Thomas EL.

Hollis; Hollis EL–JHS–HS.
Hominy; Hominy EL–JHS–HS.
Hugo:
- Eugene Field EL.
- Goodland EL, Goodland, D–13.

UTAH

List of Schools Determined To Have a High Concentration of Students From Low-Income Families. This List is for Cancellation Benefits During Both the 1972–1973 and 1973–1974 School Years.

(Please note that all elementary and secondary schools in this State operated by the Bureau of Indian Affairs are considered to meet the qualification of a high concentration of students from low-income families, and are, therefore, not included on this list.)

Goshen; Goshen EL.
Greenwood; Greenwood EL.
Gretna; Mt. Airy EL.
Grundy:
  Big Rock EL.
  Grundy EL.
  Harman EL.
Hague; Cople Primary.
Halifax:
  Halifax JHS.
  Sinai EL.
  Halifax EL.
Hampton:
  Phoebus EL.
  Robert R. Moton EL.

Hanover:
  Dawn EL.
  Hanover School for Boys.
Hayst; Hayst HS.
Heathsville:
  Northumberland HS.
  Northumberland JHS.
Hilton; Hilton Combined (1–8).
Hiwassee:
  Hiwassee EL.
  Snowville EL.
Holland:
  Holland Primary.
  Southwestern Middle.
Honaker:
  Honaker EL.
  Honaker HS.
  Juvenile Vocational Institute.
Hot Springs; Valley EL.
Hurley; Hurley EL.
Independence; Bridle Creek EL.
Ivanhoe; Ivanhoe EL.
Ivor:
  Ivor EL.
  Ivor Primary.
Jarratt:
  Jefferson EL.
  Jarratt EL.
Jonesville:
  Flatwoods Combined (K–12).
  Jonesville HS.
  Jonesville EL.
Kenbridge:
  Kenbridge EL.
  Kenbridge Primary.
Keokee; Keokee Combined (K–12).
Keysville:
  Keysville EL.
  West End EL.
Kilmarnock; Lancaster HS.
King George:
  King George HS.
  King George EL.
Lacrosse:
  Lacrosse EL.
  Lacrosse Primary.
Lambsburg; Lambsburg EL.
Lancaster; Mantua Intermediate.
Lawrenceville; Sturgeon EL.
Lebanon:
  Oak Grove EL.
  Lebanon EL.
Leesburg; Lucketts EL.
Lexington; Effinger EL.
Lively; Lively Primary.
Lottsburg; Lottsburg Primary.
Louisa:
  Louisa Intermediate.
  Louisa EL.
Lovingston; Lovingston EL.
Lynchburg; Robert S. Payne EL.

  Norview EL.
  Oceanview EL.
  Pineridge EL.
  Pretty Lake Primary.
  R. A. Tucker EL.
  Robert Gatewood EL.
  Roberts Park EL.
  Ruffner JHS.
  Sherwood Forest EL.
  St. Helena EL.
  Stuart EL.
  Tidewater Park EL.
  W. H. Taylor EL.
  Willard JHS.
  Young Park EL.
Norge; Norge EL.
Norlina; (North Carolina) Palmer Springs EL.
North Garden; Red Hill EL.
North Tazewell; Springville EL.
Norton:
  Norton EL.
  J. I. Burton HS.
  West Norton EL.
Oak Grove:
  Oak Grove EL.
  Washington District Primary.
Oak Hall; Atlanitc HS.
Oakwood:
  Garden EL.
  Street EL.
Painter; Central HS.
Palmyra:
  Central EL.
  Columbia EL.
  Cunningham EL.
  Palmyra EL.
Pamlin; Pamlin EL.
Peaks; Janie Porter Barrett School for Girls
Pennington Gap:
Pennington EL.
Pennington HS.
Petersburg:
  Eastside EL.
  Roholc EL.
  Stonewall Jackson EL.
  Walnut Hill EL.
  Westview EL.
Phenix; Phenix EL.
Pocahontas; Pocahontas Combined (7–12).
Portsmouth:
  Academy Park, EL.
  Alfred J. Mapp Combined (7–8).
  Brighton EL.
  Churchland Academy EL.
  Churchland EL.
  Douglass Park EL.
  Emily N. Spong EL.
  Harry Hunt JHS.
  Highland Baltimore EL.
  I. C. Norcom HS.
  James Hurst EL.

Buena; Buena EL.
Burien; Ruth School for Girls HS.
Burlington:
Roosevelt EL.
West View EL.
Carson; Carson EL.
Cashmere:
Cashmere HS.
Vale EL.
Centralia; Maple Lane HS.
Chehalis:
Evaline EL.
Green Hill HS.
Chelan; Lake Chelan EL.
Chewelah; Chewelah EL.
Chimacum:
Chimacum EL.
Chimacum HS.
Clarkston; Poplar EL.
Clayton; Clayton EL.
Cle Elum:
Cle Elum EL.
Cle Elum HS.
Clearwater; Clearwater EL.
College Place; Davis EL.
Colville:
Aster EL.
Colville HS.
David Thompson JHS.
Hofstetter EL.
Sprute Canyon Youth Camp HS.
Cowiche; Marcus-Whitman, Cowiche EL.
Curtis; Boistfort EL.
Cusick; Cusick 1–12.
Darrington; Darrington EL.
Davenport; Sunrise Hill EL.
Dayton; Dayton EL.
Deer Park:
Deer Park EL.
Deer Park Middle.
Dixie; Dixie EL.
Dryden:
Dryden EL.
DuPont JHS.
Laughbon HS.
Duvall; Cherry Valley EL.
Easton; Easton 1–12.
Eastsound; Nellie Milton K–12.
Edmonds; Alderwood JHS.
Elma:
Elma EL.
Elma HS.
Entiat; Entiat EL.
Ephrata:
Grant EL.
Parkway EL.
Everett:
Everett HS.
Fairmount EL.
Garfield EL.
George Washington Carver Middle.
Hawthorne EL.
Jackson EL.
Lowell EL.
Madison EL.
Port Gardner Middle.
Federal Way:
Brigadoon EL.
Decatur HS.
Federal Way HS.
Kilo JHS.
Lake Grove EL.
Lakota JHS.
Mirror Lake EL.
Olympic View EL.
Panther Lake EL.
Forks:
Forks HS.
Forks Intermediate.
Forks JHS.
Fort Lewis:
Greenwood EL.
Parkway EL.
Four Lakes; Four Lakes EL.
Friday Harbor; Friday Harbor K–12.
Gig Harbor; Purdy Treatment Center for Women School.
Glenwood; Glenwood EL.
Goldendale; Goldendale Primary.
Grand Coulee; Center EL.
Grandview:
Central EL.
Grandview HS.
Grandview JHS.
Smith EL.
Thompson EL.
Granger:
Granger HS.

Current White House Releases

WEEKLY COMPILATION OF PRESIDENTIAL DOCUMENTS

This unique service makes available transcripts of the President's news conferences; messages to Congress; public speeches, remarks, and statements; and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. It includes an Index of Contents and a system of cumulative indexes. Other finding aids include lists of laws approved by the President and of nominations submitted to the Senate, a checklist of White House releases, and a digest of other White House announcements.

This systematic publication of Presidential items provides users with up-to-date information and a permanent reference source concerning Presidential policies and pronouncements.

Subscription Price: $9.00 per year

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

federal register
Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

PROCLAMATION 4238

Amending Part 3 of The Appendix to The Tariff Schedules of The United States With Respect to The Importation of Agricultural Commodities

By the President of the United States of America

A Proclamation

WHEREAS, pursuant to section 22 of the Agricultural Adjustment Act, as amended (7 U.S.C. 624), limitations have been imposed by Presidential proclamations on the quantities of certain dairy products which may be imported into the United States in any quota year; and

WHEREAS, the import restrictions proclaimed pursuant to said section 22 are set forth in part 3 of the Appendix to the Tariff Schedules of the United States; and

WHEREAS, the Secretary of Agriculture has reported to me that he believes that additional quantities of dried milk provided for in item 950.02 of the Tariff Schedules of the United States (hereinafter referred to as "nonfat dry milk") may be entered for a temporary period without rendering or tending to render ineffective, or materially interfering with, the price support program now conducted by the Department of Agriculture for milk or reducing substantially the amount of products processed in the United States from domestic milk; and

WHEREAS, under the authority of section 22, I have requested the United States Tariff Commission to make an investigation with respect to this matter; and

WHEREAS, the Secretary of Agriculture has determined and reported to me that a condition exists with respect to nonfat dry milk which requires emergency treatment and that the quantitative limitation imposed on nonfat dry milk should be increased during the period ending October 31, 1973, without awaiting the recommendations of the United States Tariff Commission with respect to such action; and

V 38-167 AUG 29 73 XUM

WHEREAS, I find and declare that the entry during the period ending October 31, 1973, of an additional quantity of 100,000,000 pounds of nonfat dry milk will not render or tend to render ineffective, or materially interfere with, the price support program which is being undertaken by the Department of Agriculture for milk and will not reduce substantially the amount of products processed in the United States from domestic milk; and that a condition exists which requires emergency treatment and that the quantitative limitation imposed on nonfat dry milk should be increased during such period without awaiting the recommendations of the United States Tariff Commission with respect to such action;

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, acting under and by virtue of the authority vested in me as President, and in conformity with the provisions of section 22 of the Agricultural Adjustment Act, as amended, and the Tariff Classification Act of 1962, do hereby proclaim that subdivision (vi) of headnote 3(a) of part 3 of the Appendix to the Tariff Schedules of the United States is amended to read as follows:

(vi) Notwithstanding any other provision of this part, 25,000,000 pounds of dried milk described in item 115.50 may be entered during the period beginning December 30, 1972, and ending February 15, 1973, 60,000,000 pounds of such milk may be entered during the period beginning May 11, 1973, and ending June 30, 1973, 80,000,000 pounds of such milk may be entered during the period beginning July 19, 1973, and ending August 31, 1973, and 100,000,000 pounds of such milk may be entered during the period beginning the day after the date of issuance of this proclamation and ending October 31, 1973, in addition to the annual quota quantity specified for such article under item 950.02, and import licenses shall not be required for entering such additional quantities. No individual, partnership, firm, corporation, association, or other legal entity (including its affiliates or subsidiaries) may during each such period enter pursuant to this provision quantities of such additional dried milk totaling in excess of 2,500,000 pounds. The 100,000,000 pound additional quota quantity authorized to be entered during the period ending October 31, 1973, shall be allocated among supplying countries as follows:

Supplying Country	*Quantity in Pounds*
Australia	25,000,000
New Zealand	25,000,000
Canada	10,000,000
Member States of the European Economic Community	40,000,000

The 100,000,000 pound additional quota quantity provided for herein shall continue in effect pending Presidential action upon receipt of the report and recommendations of the Tariff Commission with respect thereto.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of August, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America the one hundred ninety-eighth.

Richard Nixon

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 535-73]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart V—The Board of Parole

REORGANIZATION OF THE UNITED STATES BOARD OF PAROLE

The following amendments to subpart V, Part 0, Chapter I, of Title 28 of the Code of Federal Regulations reflect a reorganization agreed upon by the United States Board of Parole.

By virtue of the authority vested in me by 28 U.S.C. 510 and 18 U.S.C. 4201, 5005, subpart V, Part 0, chapter 1, Title 28, Code of Federal Regulations, is amended as follows:

1. Section 0.127 is amended to read as follows:

§ 0.127 Youth Correction Division.

(a) All members of the Board of Parole shall serve as members of the Youth Correction Division, and one member shall be designated by the Attorney General as Youth Division Chairman.

(b) The Youth Correction Division of the Board of Parole shall:

(1) Consult with, and make recommendations to, the Director of the Bureau of Prisons as to general treatment and correctional policies for committed youth offenders.

(2) Make recommendations to the Director of the Bureau of Prisons as to individuals committed under the Federal Youth Corrections Act.

(3) Report, within 60 days to the committing court, the findings as to individuals committed for observation and study.

(4) Prescribe the terms and conditions governing those under supervision.

(5) Order parole for youth offenders committed under the Federal Youth Corrections Act and juvenile delinquents sentenced under the Federal Juvenile Delinquency Act.

(6) Direct Federal probation officers to submit reports as to parole supervision of committed youth offenders and to limit and define the powers and duties of voluntary supervisory agents and sponsors.

(7) Issue warrants for the retaking of parole or mandatory release violators, and order the return to custody for further treatment of committed youth offenders.

(8) Revoke parole or mandatory release, or reparole or re-release under supervision.

(9) Discharge committed youth offenders unconditionally at its discretion after a year of parole supervision.

(2) Subpart V is further amended by adding at the end thereof the following new sections:

§ 0.128 Organization.

(a) The Board of Parole shall consist of eight members appointed by the President with the advice and consent of the Senate (18 U.S.C. 4201).

(b) The Board shall consist of a headquarters office and such regional offices as are needed to efficiently and effectively execute the Board's responsibilities. The Chairman of the Board, who shall be designated by the Attorney General, and at least two Board members shall be designated National Directors and serve in the headquarters office, i.e., Washington, D.C., and each regional office shall be directed by a Board member who shall be designated the Regional Director.

§ 0.129 Chairman of the Board of Parole.

The Chairman of the Board of Parole shall:

(a) Represent the position and policies of the Board to the Attorney General, the Administrative Office of the U.S. Courts, other Federal agencies, and the U.S. Congress.

(b) Assign Board members to serve as Regional Directors.

(c) Call meetings of the entire Board at least quarterly to consider, promulgate and oversee Board of Parole policies, and call special meetings at the written request of three Board members.

(d) Designate a Board member, from the National Directors serving in the headquarters office, as Vice Chairman to assist the Chairman in the execution of his responsibilities.

(e) Assign on a temporary basis, any Board member to act for any Regional Director or National Board member in his absence to ensure the proper functioning of the Board.

(f) Ensure that regional offices comply with established Board of Parole policies and procedures.

(g) Exercise the power and authority vested in the Attorney General to take final action in matters pertaining to the employment, direction and general administration, e.g., including appointment, assignment, training, promotion, demotion, compensation, leave, classification and separation, of Board of Parole personnel, except as provided in 28 CFR 0.135.

(h) Allocate, use, and monitor the expenditure of Board funds.

(i) Direct the preparation of the Board's budget request for submission to the Attorney General.

(j) Perform all other executive functions and duties required to execute the responsibilities and policies of the Board.

§ 0.129-1 Regional Director.

A Board member serving as Regional Director shall:

(a) Implement the policies, regulations, and procedures of the Board in the region.

(b) Serve as initial reviewing officer of parole decisions in the appellate process.

(c) Assign and supervise, subject to Board personnel policies, all personnel employed in the regional office.

(d) Prepare and submit to the Chairman a proposed regional budget for each fiscal year.

(e) Serve as the Board's regional liaison representative with Federal and state agencies, the judiciary, the state legislatures, law enforcement and probation officials, correctional and institutional personnel, and the general public.

§ 0.129-2 Discretionary authority of the Board of Parole to delegate decision-making authority to hearing examiners.

Under authority of sections 4203, 4207, 5017, and 5020 of Title 18 of the United States Code, the Board of Parole may, at its discretion, delegate decision-making authority to its hearing examiners.

Dated: August 21, 1973.

ELLIOTT L. RICHARDSON,
Attorney General.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 6—IMPORT QUOTAS AND FEES

Subpart—Section 22 Import Quotas

PRICE DETERMINATION FOR CERTAIN CHEESE

The subpart, Section 22 Import Quotas, is amended to change the price, determined by the Secretary of Agriculture in accordance with headnote 3(a)(v) of the Appendix to the Tariff Schedules of the United States, which is used as a basis for establishing import restrictions under section 22 on certain cheese. The change from 69 to 72 cents per pound is required since one of the factors used in determining such price (the Commodity Credit Corporation purchase price for Cheddar Cheese under the milk price support program) has been increased.

The subpart, Section 22 Import Quotas, of Part 6, Subtitle A of Title 7, is amended as follows:

§ 6.16 Price determination.

The price referred to in items 950.10B through 950.10E of part 3 of the Appendix to the Tariff Schedules, determined by the Secretary of Agriculture in accordance with headnote 3(a)(v) of said part 3, is 72 cents per pound. This price shall continue in effect until changed by amendment of this section.

Group V of Appendix 1, under the heading "Licensing Regulations", is amended by changing the description appearing immediately below "Group V" to read as follows:

Cheese described below, if shipped otherwise than in pursuance to a purchase, or if having a purchase price under 72 cents per pound.

The foregoing amendment shall be effective August 29, 1973. In accordance with headnote 3(a)(v) of part 3 of the Appendix to the Tariff Schedules of the United States, the change in price effected by this amendment will not make the import restrictions contained in items 950.10B through 950.10E of part 3 of the Appendix to the Tariff Schedules of the United States applicable to cheese having a purchase price of 69 or more cents per pound if such cheese had been exported to the United States on a through bill of lading or had been placed in bonded warehouse on or before the date of publication in the Federal Register of this amendment. Since the action taken herewith involves foreign affairs functions of the United States, this amendment falls within the foreign affairs exception to the notice and effective date provisions of 5 U.S.C. 553.

(Sec. 3, 62 Stat. 1248, as amended, 7 U.S.C. 624; Part 3 of the Appendix to the Tariff Schedules of the United States, 19 U.S.C. 1202.)

Issued at Washington, D.C., this 23d day of August 1973.

EARL L. BUTZ,
Secretary of Agriculture.

[FR Doc.73-18345 Filed 8-28-73;8:45 am]

CHAPTER I—AGRICULTURAL MARKETING SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—REGULATIONS AND STANDARDS UNDER THE AGRICULTURAL MARKETING ACT OF 1946

PART 53—LIVESTOCK, MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

Subpart A—Regulations

VOLUNTARY MEAT GRADING AND RELATED SERVICES

This document, issued pursuant to sections 203 and 205 of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 19622, 19624), makes several changes needed to update the regulations under which voluntary meat grading and related services are provided. Briefly, the changes concern (1) inspection requirements in plants eligible for grading, (2) the addition of a Carcass Data Service as a kind of service available, (3) certificate forms issued for graded or accepted animals and products, (4) certain class designations for bovine carcasses and cuts, grade designations for swine carcasses, and the use of grade designations on boxes or cartons of fabricated meat, and (5) charges for transportation costs to users of this fee-supported service. The paragraphs that follow contain more detailed explanation of the changes and the reasons for them.

Meat grading or acceptance service has been provided only in plants operated under Federal inspection or another acceptable inspection system. As a result of implementation of the Wholesome Meat Act of 1967, all establishments in a State or organized Territory, engaged in the business of preparing meat products for nonretail sale, must operate under the Federal inspection or a State inspection program determined to impose requirements at least equal to the Federal requirements. Accordingly, provisions in the regulations outlining detailed inspection requirements for eligibility of nonfederally inspected plants for grading service, the procedures followed in surveying such plants to determine eligibility, and the basis for charging for such surveys are deleted.

Detailed information on value-determining carcass characteristics is becoming increasingly important in livestock improvement programs. A readily available means for livestock producers and others to obtain carcass information on specific animals helps speed improvement efforts and facilitates the production and marketing of livestock and meat. Such a service has been available as a part of the grading program on a limited basis in a pilot study in a 4-State midwest area. Because of widespread industry interest and demand for the service, on July 31, 1972, the Department announced expansion of the pilot study to a nationwide test of the Beef Carcass Data Service. The regulations are changed to show the availability of this additional kind of service.

A revision in the "Official U.S. Standards for Carcass Beef," effective July 1, 1973, for the first time provides for a class (sex) identification—Bullock—to distinguish beef from younger and older bulls. This identification will be applied to carcasses and cuts classed as bullocks when they are officially graded. In the same revision, the class designation "Stag" was deleted from the standards as an official class identification. The April 1968 revision of the "Official U.S. Standards for Grades of Pork Carcasses" provided for an additional numerical grade designation—U.S. No. 4. Therefore, all three of these changes are being made to make the regulations consistent with the official U.S. standards.

The paragraph in the regulations concerning grade designations which may not be applied to a carcass unless it has been federally graded does not reference pork carcass grade U.S. No. 4 or yield grades 1, 2, 3, 4, or 5. Therefore, the regulations are being changed to include these grades in addition to those already listed. Also, a statement has been added to include the application of Federal grade designations to containers of meat when their contents have not been federally graded as specified in these regulations as a reason for withdrawal of service.

A single type of certificate has been issued for all animals or products whether graded or accepted under the regulations. The regulations are changed to designate two separate forms of official certificates—one for certifying the official grade and another for certifying compliance with applicable specifications.

The regulations provide that applicants may obtain grading service on a commitment basis—they agree to pay for a full 40 hours of service each week. The regulations are amended so that an applicant who terminates a commitment, and within 1 year after cancellation is granted a new commitment at his request, shall pay the actual moving costs incurred in transferring a grader to service a new commitment. This will permit collection of the costs of the transfer from the particular applicant responsible for the unusual costs. Otherwise, this expense item would affect the regular fee that must be charged to all users of the service. In a related change, provision is made for an applicant to enter into a temporary commitment or agreement for 3 months or less which does not involve a grader's transfer. Also, the basis for assessing per diem charges to applicants who request service away from an official grader's headquarters is changed. Previously, per diem was charged only when the travel extended beyond 1 calendar day. However, graders now may be authorized per diem reimbursement for travel periods of less than 1 calendar day. Accordingly, the regulations are changed to provide that applicants will be charged per diem whenever the grader performing the service is paid per diem under existing travel regulations.

Another amendment changes the name of the Consumer and Marketing Service to Agricultural Marketing Service wherever it appears in the regulations. This change is necessitated by the Agency name change announced by the Secretary of Agriculture, effective April 2, 1972.

Also, other minor changes are made.

Pursuant to the authority contained in sections 203 and 205 of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1622, 1624), the regulations in Part 53, Title 7, Code of Federal Regulations are hereby amended in the following respects:

§§ 53.1, 53.30, 53.31 [Amended]

1. Sections 53.1 (d), (e), (f), and (jj); 53.11; 53.29(b); 53.30; and 53.31 are each hereby amended by changing the term, "Consumer and Marketing Service" wherever it appears in said sections to "Agricultural Marketing Service."

2. In § 53.1, paragraph (mm) is amended and a new paragraph (pp) is added to read as follows:

§ 53.1 Meaning of words.

• • • • • •

(mm) *Yield grade.* The designation related to the quantity of trimmed, boneless, major retail cuts to be derived from the carcass or wholesale cuts—rounds or legs, loins, ribs, or racks, and chucks or shoulders—referred to as yield grade in Subpart B of this part.

• • • • • •

(pp) *Carcass Data Service.* The service established and conducted under the regulations to provide producers and other interested persons with data on carcass characteristics.

3. Section 53.4 is hereby amended to read as follows:

§ 53.4 Kind of service.

Grading service under the regulations shall consist of the determination and certification and other identification, upon request by the applicant, of the class, grade, or other quality of livestock or products under applicable standards in Subpart B of this part. Class, grade and other quality may be determined under said standards for livestock or meat of cattle, sheep, or swine in carcass form or for wholesale cuts of such meat, other than pork wholesale cuts. Acceptance service under the regulations shall consist of the determination of the conformity of livestock or products to specifications approved by the Director or Chief and the certification and other identification of such livestock or products in accordance with specifications, upon request by the applicant. Determination as to product compliance with specifications for ingredient content or method of preparation may be based upon information received from the inspection system having jurisdiction over the products involved. The Carcass Data Service, under the regulations, shall consist of the evaluation of carcass characteristics, in accordance with applicable official United States Standards which appear in Title 7, Chapter I, Part 53 of the Code of Federal Regulations (7 CFR Part 53), of carcasses of animals identified with the official eartag as shown in § 53.19, the recording of such data, and transmittal of the data to, or as directed by, the applicant for the service.

4. Section 53.5 is hereby amended to read as follows:

§ 53.5 Availability of service.

Service under these regulations may be made available with respect to livestock or products shipped or received in interstate commerce, and with respect to the livestock or products not so shipped or received if the Director or Chief determines that the furnishing of service for such livestock or products would facilitate the marketing, distribution, processing, or utilization of agricultural products through commercial channels. Also, such service may be made available under a cooperative agreement. Service under these regulations shall be provided without discrimination as to race, color, sex, creed, or national origin. Service will be furnished for products only if they were derived from animals slaughtered in federally inspected establishments or operated under State meat inspection in a State other than one designated in 9 CFR 331.2. Service under these regulations will be furnished for imported meat only if it is marked so that the name of the country of origin appears on most of the major retail cuts. The mark of foreign origin shall be imprinted by roller brand or handstamp and shall be applied so that the imprint is at least 2 inches from the backbone of lamb, 3 inches from the backbone of

V 38 167 AUG 29 73 XUM

veal and calf, and 4 inches from the backbone of beef carcasses. The mark of foreign origin shall be repeated parallel to the backbone of the carcass so as to appear on each round, rump, full loin, rib, and chuck of each bovine and ovine carcass in letters at least one-fourth of an inch high, with no more than three-fourths of an inch space between impressions. Imprints of each such brand shall be submitted to the Chief for the determination of compliance with these regulations prior to use of the brand on meats offered for Federal grading. It shall be the responsibility of the applicant to notify the meat grader performing the service whenever imported meat is offered for grading.

§§ 53.6, 53.7 [Revoked]

5. Sections 53.6 and 53.7 are revoked and reserved as follows:

6. Section 53.3 is hereby amended to read as follows:

§ 53.8 How to obtain service.

(a) *Application.* Any person may apply to the Director or Chief for service under the regulations with respect to livestock or products in which the applicant is financially interested. The application shall be made on a form approved by the Director. In any case in which the service is intended to be furnished at an establishment not operated by the applicant, the application shall be approved by the operator of such establishment and such approval shall constitute an authorization for any employees of the Department to enter the establishment for the purpose of performing their functions under the regulations. The application shall state: (1) The name and address of the establishment at which service is desired; (2) the name and post office address of the applicant; (3) the financial interest of the applicant in the livestock or products, except where application is made by an official of a Government agency in his official capacity; and (4) the signature of the applicant (or the signature and title of his representative). The application shall indicate the legal status of the applicant as an individual, partnership, corporation, or other form of legal entity. Any change in such status, at any time while service is being received, shall be promptly reported to the Director or Chief by the person receiving the service.

(b) *Notice of eligibility for service.* The applicant for service at any establishment will be notified whether his application is approved.

(c) *Request by applicant for service—*(1) *Noncommitment.* Upon notification of the approval on an application for service, the applicant may, from time to time as desired, make oral or written requests for service under the regulations with respect to specific livestock or products for which the service is to be furnished under such application. Such requests shall be made at an office for grading either directly or through any employee of the Agricultural Marketing Service who may be designated for such purposes.

(2) *Commitment.* If desired, the applicant may enter into an agreement with the Agricultural Marketing Service for the furnishing of service on a weekly commitment basis, whereby the applicant agrees to pay for 8 hours of service per day, 5 days per week, Monday through Friday, as provided in § 53.29(b), and the Agricultural Marketing Service agrees to make an official grader available to perform such service for the applicant. However, the Agricultural Marketing Service reserves the right to use any grader assigned to a plant under such a commitment to perform service for other applicants, when, in the opinion of the Chief, the grader is not needed to perform service for the applicant. An applicant who terminates a commitment, and within 1 year after cancellation is granted a new commitment at his request, shall pay for the moving costs actually incurred by the Agricultural Marketing Service to cover the transfer of the grader who will service the applicant's new commitment. If more than one applicant is involved in the reapplication for a canceled meat grading commitment requiring the transfer of the grader, the moving costs will be prorated among the applicants according to each applicant's committed portion of the grader's services. However, the moving costs will be charged only to those applicants who were parties to the previously canceled commitment. An applicant may, for periods of 3 months or less, enter into an agreement by memorandum with the Agricultural Marketing Service for the furnishing of service on a weekly basis. In the latter case, transfer of graders would not be involved and charges will be made in accordance with § 53.29.

7. Section 53.10 is hereby amended to read as follows:

§ 53.10 When request for service deemed made.

A request for service under the regulations shall be deemed to be made when received by an office of grading. Records showing the date and time of the request shall be made and kept in such office. However, in the case of the Carcass Data Service, the purchase of official USDA eartags shall constitute a request for such service and the requisition form used to purchase the eartags shall be kept in the designated office of record.

8. Section 53.13—Paragraph (a)(1)(vii) is hereby amended, subdivision (viii) is renumbered (ix), and a new subdivision (viii) is added as follows:

§ 53.13 Denial or withdrawal of service.

(a) *For misconduct—*(1) *Bases for denial or withdrawal.* • • • (vii) has applied the designation "Prime," "Choice," "Good," "Standard," "Commercial," "Utility," "Cutter," "Canner," "Cull," "Medium," "No. 1," "No. 2," "No. 3," "No. 4," "Yield Grade 1," "Yield Grade 2," "Yield Grade 3," "Yield Grade 4," or "Yield Grade 5" by stamp, or brand directly on any carcass, wholesale cut, or retail cut of any carcass, as part of a grade designation; or (viii) has applied to immediate containers or shipping containers of carcasses, wholesale cuts, or retail cuts, grade designations specified in paragraph (a)(1)(vii) of this section, when such carcasses, wholesale cuts, or retail cuts contained therein have not been federally graded; or (ix) has in any manner not specified in this paragraph violated subsection 203(h) of the Act: *Provided,* That paragraph (a)(1)(vi) of this section shall not be deemed to be violated if the person in possession of any item mentioned therein notifies the Director or Chief without delay that he has possession of such item and, in the case of an official device, surrenders it to the Chief, and, in the case of any other item, surrenders it to the Director or Chief or destroys it or brings it into compliance with the regulations by obliterating or removing the violative features under supervision of the Director or Chief: *And provided, further,* That paragraph (a)(1)(ii) through (viii) of this section shall not be deemed to be violated by any act committed by any person prior to the making of an application for service under the regulations by the principal person. An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person who operates an establishment for which he has made application for service if, with the knowledge of such operator, any other person conducting any operations in such establishment has committed any of the offenses specified in paragraph (a)(1)(i) through (ix) of this section after such application was made. Moreover, an application or a request for service made in the name of a person otherwise eligible for service under the regulations may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, such a person (*a*) in case the service is or would be performed at an establishment operated (*1*) by a corporation, partnership, or other person from whom the benefits of the service are currently being withheld under this paragraph, or (2) by a corporation, partnership, or other person having an officer, director, partner, or substantial investor from whom the benefits of the service are currently being withheld and who has any authority with respect to the establishment where service is or would be performed, or (*b*) in case the service is or would be performed with respect to any livestock or product in which any corporation, partnership, or other person within paragraph (a)(1)(ix)(*a*)(*1*) of this section has a contract or other financial interest.

9. Section 53.16 is hereby amended to read as follows:

§ 53.16 Official certificates.

(a) *Required; exception.* The official grader shall prepare, sign, and issue either (1) an official Agricultural Products Grading Certificate for products graded by him, or (2) an official Agricultural Products Acceptance Certificate covering products for which he has determined compliance except in the Beef Carcass Data Service as provided for in § 53.4. In the latter case, complete records of the services shall be furnished to the office of grading.

(b) *Form.* (1) The following forms constitute forms of official certificates for products under the regulations.

determined to be 4,764 short tons, raw value, is herein determined to be 2,264 short tons, raw value.

On the basis of final outturn weights and polarizations, the Department's records show that Haiti has shipped 295 tons of sugar to the United States in excess of its current quota. Therefore, the total deficit in the quota for Haiti, established under section 202 of the Act, previously determined to be 11,321 short tons, raw value, is herein determined to be 11,026 short tons, raw value.

The combined total deficits and deficit adjustments determined in quotas established under section 202 of the Act for Puerto Rico, Venezuela, Panama, and Haiti are reallocated by allocating 30.08 percent to the Republic of the Philippines and prorating the balance to Western Hemisphere countries that have not declared deficits. The section 202 quota and deficit prorations assigned to Honduras are prorated to other Central American Common Market countries.

It is hereby determined that deficits previously declared and those declared herein constitute all known deficits on which data are currently ascertainable by the Department.

By virtue of the authority vested in the Secretary of Agriculture by the Act, Part 811 of this chapter is hereby amended by amending §§ 811.21, 811.22, and 811.23 as follows:

1. Section 811.21 is amended by amending paragraph (a) (2) to read as follows:

§ 811.21 Quotas for domestic areas.

(a) • • •

(2) It is hereby determined, pursuant to section 204(a) of the Act, for the calendar year 1973, the Domestic Beet Sugar Area and Puerto Rico will be unable by 49,000 and 765,000 short tons, raw value, respectively, to fill the quotas established for such areas in paragraph (a) (1) of this section. Pursuant to section 204(b) of the Act, the determination of such deficits shall not affect the quotas established in paragraph (a) (1) of this section.

• • • • •

2. Section 811.22 is amended by amending paragraph (a) to read as follows:

§ 811.22 Proration and allocation of deficits in quota.

(a) The total deficits determined in quotas established under section 202 of the Act in short tons, raw value, are as follows: Domestic Beet Sugar Area 49,000; Puerto Rico 765,000; the West Indies 114,703; Panama 2,264; Honduras 10,189; Venezuela 20,317 and Haiti 11,026. The deficits for the domestic areas, the West Indies, Venezuela, Haiti, and Panama totalling 962,310 tons are reallocated by allocating 30.08 percent or 289,463 tons to the Republic of the Philippines and by prorating the remaining 672,847 tons to Western Hemisphere quota countries with quotas in effect in accordance with section 204(a) of the Act, except such prorations to the West Indies, Panama, Venezuela, and Haiti are limited so that total quotas for each country will not exceed 114,703, 52,500, 31,902, and 15,295 tons, respectively. The section 202 quota and deficit prorations to Honduras are prorated to other Central American Common Market countries on the basis of quotas determined under section 202 of the Act.

• • • • •

3. Section 811.23 is amended by amending paragraphs (b) and (c) to read as follows:

§ 811.23 Quotas for foreign countries.

• • • • •

(b) For the calendar year 1973, the quota for the Republic of the Philippines is 1,426,779 short tons, raw value, representing 1,126,020 short tons, established pursuant to section 202(b) of the Act, 289,463 short tons, established pursuant to section 204(a) of the Act and 11,296 short tons, established pursuant to section 202(d) of the Act. Of the quantity of 1,126,020 short tons established pursuant to section 202(b) of the Act, only 59,920 short tons, raw value, may be filled by direct-consumption sugar pursuant to section 207(d) of the Act.

(c) For the calendar year 1973, the prorations to individual foreign countries other than the Republic of the Philippines, pursuant to section 202 of the Act, are shown in columns (1) and (2) of the following table. Deficits and deficit prorations previously established in this Sugar Regulation 811 are shown in column (3). The deficits and deficit prorations established herein are shown in column (4). Total quotas and prorations are shown in column (5).

(Secs. 201, 202, 204, and 403; 61 Stat. 923, as amended, 924, as amended, 925, as amended, and 932; and 7 U.S.C. 1111, 1112, 1114, and 1153)

Effective date.—In order to promote orderly marketing, it is essential that this amendment be effective immediately so that all persons selling and purchasing sugar for consumption in the continental United States can promptly plan and market under the changed marketing opportunities. Therefore, it is hereby determined and found that compliance with the notice, procedure, and effective date requirements of 5 U.S.C. 553 is unnecessary, impracticable and contrary to the public interest and this amendment shall be effective when filed for public inspection in the Office of the Federal Register.

Signed at Washington, D.C., on August 23, 1973.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.73-18205 Filed 8-23-73;3:22 pm]

[Sugar Reg. 814.11]

PART 814—ALLOTMENT OF SUGAR QUOTAS, MAINLAND CANE SUGAR AREA

1973 Quotas

Basis and purpose.—This allotment order is issued under section 205(a) of the Sugar Act of 1948, as amended (61 Stat. 926, as amended), hereinafter called the "Act" for the purpose of allotting the 1973 sugar quota for the Mainland Cane Sugar Area among persons who process sugar from sugarcane and market such sugar for consumption in the continental United States.

Section 205(a) of the Act requires the Secretary to allot a quota whenever he finds that the allotment is necessary among other things: (1) to prevent disorderly marketing of sugar or liquid sugar; and (2) to afford all interested persons an equitable opportunity to market sugar or liquid sugar. Section 205(a) also requires that such allotment be made after such hearing and upon such notice as the Secretary may prescribe.

Pursuant to the applicable rules of practice and procedure a preliminary finding was made that allotment of the quota is necessary and a notice was published on March 20, 1973 (38 FR 7339), of a public hearing to be held in Atlanta, Ga., in the Federal Building, Room 556, on April 13, 1973, beginning at 10 a.m. local time, for the purpose of receiving evidence to enable the Secretary (1) to affirm or revoke the preliminary finding of necessity for allotments, (2) to establish a fair, efficient, and equitable allotment of the 1973 quota for the Mainland Cane Sugar Area, (3) to revise or amend the allotment of the quota for the purposes of (a) allotting any increase or decrease in the quota, (b) prorating any deficit in the allotment for any allottee when written notification of release by an allottee of any part of an allotment becomes a part of the official records of the Department, and (c) substituting revised or corrected data where such data become a part of the official records of the Department, and (4) to make provision for transfer and exchange of allotments.

The hearing was held at the place and time specified in the notice and testimony was given with respect to all of the issues referred to in the hearing notice. In arriving at the findings, conclusions, and regulatory provisions of this order, all proposed findings and conclusions were carefully and fully considered in conjunction with the record evidence pertaining thereto.

Omission of the recommended decision and effective date.—The record of the hearing shows that the supply of sugar available for marketing is in excess of the quota of 1,591,000 tons and that 1973 marketings of mainland cane sugar, unless restricted, could exceed the 1973 quota for the Mainland Cane Sugar Area. The proceeding to which this order relates was instituted for the purpose of alloting the quota for the Mainland Cane Sugar Area to prevent disorderly marketing and to afford each interested person an equitable opportunity to market sugar within the quota for the area. In view of the need for allotments, it is imperative that processors know as soon as possible the approximate quantity of sugar each may market within the quota during the balance of the year in order to plan marketings and prevent disorderly marketing that could occur if the effective date of the allotment order is unduly delayed. Accordingly, in order to fully effectuate the purposes of section 205(a) of the Act it is hereby found that due and timely execution of the functions imposed upon the Secretary under the Act imperatively and unavoidably requires the omission of a recommended decision in this proceeding. It is also hereby further found and determined for the reasons given above for the omission of a recommended decision that compliance with the 30-day effective date requirement of 5 U.S.C. 553 (80 Stat. 378) is impractical and contrary to the public interest, and consequently, this order shall become effective on August 29, 1973.

Basis for findings and conclusions.—Section 205(a) of the Act reads in pertinent parts as follows:

• • • Allotments shall be made in such manner and in such amounts as to provide a fair, efficient, and equitable distribution of such quota or proration thereof, by taking into consideration the processings of sugar or liquid sugar from sugar beets or sugarcane, limited in any year when proportionate shares were in effect to processings to which proportionate shares, determined pursuant to the provisions of subsection (b) of section 302, pertained; the past marketings or importations of each such person; and the ability of such person to market or import that portion of such quota or proration thereof alloted to him. • • • The Secretary is also authorized in making such allotments of a quota for any calendar year to take into consideration in lieu of or in addition to the foregoing factors of processing, past marketings, and ability to market, the need for establishing an allotment which will permit such marketing of sugar as is necessary for the reasonably efficient operation of any non-affiliated single plant processor of sugar beets or any processor of sugarcane and as may be necessary to avoid unreasonable carryover of sugar in relation to other processors in the area: Provided, That • • • marketing allotment of a processor of sugarcane shall not be increased under this provision above an allotment equal to the effective inventory of sugar of such processor on January 1, of the calendar year for which such allotment is made: • • • Provided further, That the total increases in marketing allotments made pursuant to this sentence • • • to processors in the mainland cane sugar areas shall be limited to 16,000 short tons of sugar, raw value, for each calendar year. In making such allotments, the Secretary may also take into consideration and make due allowance for the adverse effect of drought, storm, flood, freeze, disease, insects, or other similar abnormal and uncontrollable conditions seriously and broadly affecting any general area served by the factory or factories of such person. • • •

The record of the hearing indicated that the prospective supply of mainland cane sugar available for marketing in 1973 exceeds the quota for that area to an extent that allotment of the quota is necessary (R. 9).

The Government witness introduced for the record annual data on processings, marketing, and inventories for the most recent 5-year period (R. 10 Ex. 5).

The three factors of "processings," "past marketings," and "ability to market," the adverse effect of storm, freeze, and other similar abnormal conditions have been considered by the allotment method herein adopted as set forth in finding 4.

The allotment method adopted herein is the same as that proposed at the hearing by the Government witness with the exception that the fixed allotment for Louisiana State University of 25 short tons, raw value, for 1973 has been reduced to 10 short tons, raw value, and the period for reporting the final 1972 crop production has been extended for Florida processors beyond April 30, 1973, until the completion of the harvest of the 1972 Florida crop. The period for reporting final 1972 production and marketing data of Florida processors was extended to May 31, 1973, at the request of the Florida Sugar Cane League, Inc. and the Sugar Cane Growers Cooperative of Florida in briefs filed May 15, 1973. Any revision in 1972 crop production or marketing data received in reports after this period will be considered as pertaining to the 1973 crop. The fixed allotment for Louisiana State University was reduced to 10 tons according to the joint request made at the hearing by the processors of Louisiana and Florida.

The Government witness proposed that the factor "processings from proportionate shares" should be measured for each processor by the higher of either its production of sugar from 1972 crop sugarcane or 101 percent of his average production from the 1970 and 1971 crops of sugarcane in short tons, raw value, expressed as a percentage of the total of the measure for all processors and weighted by 60 percent. The primary purpose for using an alternative measure of "processings" (101 percent of his average production from the 1970 and 1971 crops of sugarcane), is to give protection against a crop failure or some other unavoidable occurrence which reduced processings of the crop used for the measure of processings.

Giving consideration to "past marketings" by using the average annual marketings for each processor for the 3-year period 1970 through 1972 and giving this factor a weighting of 20 percent in determining allotments contributes to an orderly rate of change in the marketings of each processor relative to others. Measuring the factor "ability to market" as herein adopted and giving this factor a weighting of 20 percent in determining allotments gives recognition to the sugar produced from 1972 crop sugarcane which each processor will have available for marketing within the 1973 quota and also recognizes the relative sharing of each processor in past new-crop marketings within the quota.

An allotment of 10 short tons, raw value, is established herein for Louisiana State University as proposed by the witnesses representing mainland sugarcane processors.

As proposed by the Government witness at the hearing a quantity of the quota is reserved for those processors who released excess deficits in 1972. The purpose of this provision is to encourage allottees to be as accurate as possible in determining deficits and the allotment method used herein provides that a quantity of sugar equal to excess deficits released by allottees in 1972 be reserved and added to 1973 allotments of the applicable processors.

V 38-167 AUG 29 73 XUM

The Department has been officially notified by the Louisiana State Penitentiary that it will not process any 1973 crop sugarcane and therefore, allotment has been provided for the Penitentiary equal to its January 1, 1973, effective inventory. Since the Penitentiary processes only cane produced at the Penitentiary and no 1973 crop will be grown, all other processors will share in the unused portion of the allotment that would have been provided for the Penitentiary had it continued to operate. No comments or requests other than those noted above were offered by processors at the hearing or subsequent thereto.

Findings and conclusions.—On the basis of the record of the hearing, I hereby find and conclude that:

(1) The quantity of sugar available for marketing in 1973, consisting of January 1, 1973, effective inventories of mainland cane sugar of 851,994 tons plus 1973 crop sugar produced before January 1, 1974, of between 950,000 and 1,050,000 tons would substantially exceed the current 1,591,000 ton quota established for the area.

(2) The supply situation makes necessary the allotment of the 1973 sugar quota for the Mainland Cane Sugar Area to assure an orderly marketing of sugar, and to afford all interested persons equitable opportunities to market sugar within the quota.

(3) Eight-hundred and ninety-eight short tons, raw value, shall be set aside from the quota providing for an allotment of 10 short tons, raw value, for Louisiana State University, 569 tons for the Louisiana State Penitentiary and providing a reserve of 319 tons to be added to the allotment of processors who released excess deficits in 1972. The reserve quantities to be added to 1973 allotments equal to excess allotments released are 127 tons for Alma Plantation, Ltd.; 68 tons for Louisa Sugar Cooperative, Inc. and 124 tons for Milliken and Farwell, Inc., now Smithfield Sugar Cooperative, Inc.

(4) The remainder of the 1973 Mainland Cane Sugar Area quota for consumption within the continental United States, after setting aside 898 tons as provided in finding (3) shall be alloted to processors other than Louisiana State University and Louisiana State Penitentiary by measuring and weighting each of the three factors of "processing," "past marketings," and "ability to market" specified in section 205(a) of the Act; and by determining allotments as follows based on data in the hearing record and any revised or corrected final data of which official notice will be taken:

(a) The factor "processings from proportionate shares," shall be measured for each processor by the higher of either his production of sugar from 1972 crop sugarcane in short tons, raw value, or 101 percent of his average crop-year production from the 1970 and 1971 crops of sugarcane in short tons, raw value, expressed as a percentage of the total of the measure for all processors and weighted by 60 percent.

(b) The factor "past marketings" shall be measured for each processor by his average annual quota marketing for the years 1970 through 1972 in short tons, raw value, expressed as a percentage of the total of the measure for all processors and weighted 20 percent.

(c) The factor "ability to market" shall be measured by the sum of (i) each processor's January 1, 1973, effective inventory, and (ii) his share of the difference between the 1973 quota in short tons, raw value, for the Mainland Cane Sugar Area after deducting 898 tons set aside under finding (3) and the total of the effective inventories of all processors listed in the table in finding (7). Each processor's share of such difference shall be determined by applying to the area total difference the percentage that his avearge 1970 through 1972 new-crop marketings were of the total average new-crop marketings of all processors for such years. The sum of (i) and (ii) in short tons, raw value, expressed for each processor as a percentage of the total of the measure for all processors shall be weighted 20 percent.

(d) To determine each processor's allotment in short tons, raw value, the total percentage for each processor derived by measuring and weighting the three factors as heretofore proposed shall be multiplied by the quota for the Mainland Cane Sugar Area in short tons, raw value, less 898 tons set aside under finding (3).

(e) Any revision in allotments made to give effect to any increase or decrease in the Mainland Cane Sugar Area quota shall be determined by the full application of the formula for determining allotments as provided in paragraphs (a) through (d) of this finding (4).

(f) Any revision in allotments made to give effect to a release of all or a part of an allotment by an allottee shall be determined by prorating such release or deficit to all other allottees to the extent they are able to market additional sugar on the basis of allotments as determined pursuant to preceding paragraphs of this finding (4).

(5) Final adjustments in the data for 1972 crop including January 1, 1973, effective inventories, were made on the basis of sugar production and marketing reports covering the period ending May 31, 1973.

(6) According to official records received by the Department the operations of Poplar Grove Planting and Refining Co., Inc. and Milliken and Farwell, Inc., have been combined into a new company known as Smithfield Sugar Cooperative, Inc. The allotment history of the respective companies, therefore, is combined for purposes of determining the allotment of the new company, Smithfield Sugar Cooperative, Inc.

(7) The quantities of sugar and the percentages referred to in finding (4) and the computation of processor allotments are set forth in the following table:

Processor	Processings of sugar [1]		Average quota marketings [2]		Ability to market					Processor's basic allotment [4]	
	Short tons, raw value	Percent of total	Short tons, raw value	Percent of total	Effective inventory 1-1-73 [3]	New crop quota marketings		Measures used		Percent of total	Short tons, raw value

[1] The higher of either the production of sugar from the 1972 crop or 101 percent of the average production for the 1970 and 1971 crops of sugarcane.
[2] Average annual quota marketing for each processor for years 1970 through 1972.
[3] Effective inventory, January 1, 1973 is the physical inventory January 1, 1973 plus processings from 1972 crop cane in 1973.
[4] The difference between 1,590,102 tons (quota for 1973 established by S.R. 811-Amdt. 2, less 10 tons reserved for Louisiana State University, less reserves for processors who released excess 1972 allotments amounting to 127 tons for Alma, 68 tons for Louisa, and 124 tons for Milliken and Farwell, now Smithfield Sugar Cooperative, Inc., and less 569 tons for the Louisiana State Penitentiary which is a quantity equal to their January 1, 1973 effective inventory) and January 1, 1973 effective inventories of listed processors amounting to 851,994 tons. This difference of 738,108 tons prorated on the basis of each processor's average 1970-72 new-crop marketings.
[4] Column (10) was determined by weighting "processings" Col. (2) by 60 percent, "marketings" Col. (4) by 20 percent, and "ability" Col. (9) by 20 percent. Column (11) was determined by multiplying the quota, less total reserves of 898 tons, by Column (10).

(8) The order shall be revised without further notice or hearing for the purpose of (a) allotting any quantity of an allotment to other allottees when written notification of release by an allottee of any part of an allotment becomes a part of the official records of the Department, (b) revising allotments by the substitution of revised or corrected data which have become a part of the official records of the Department; and (c) revising allotments to give effect to any increase or decrease in the quota made by the Administrator pursuant to the provisions of the Sugar Act of 1948, as amended. Any revision in allotments made to give effect to (a) of this finding (8) shall be made by increasing proportionately the allotments as provided in finding (4) (f), except that the quantity prorated to any allottee releasing allotments in excess of a specified quantity should be limited in accordance with the written statement of release by any such allottee. In making changes under (b) and (c) of this finding (8) allotments shall be determined by the full application of the formula for determining allotments as provided in paragraphs (a) through (d) of finding (4).

(9) Official notice will be taken of (a) written notification to the Agricultural Stabilization and Conservation Service by an allottee that he is unable to fill all or a part of his allotment when the notification becomes a part of the official records of the Department, (b) substitution of revised or corrected data where such data becomes a part of the official records of the Department, and (c) any regulation issued by the Administrator, after publication in the FEDERAL REGISTER, which changes the 1973 Mainland Cane Sugar Area quota.

(10) To facilitate full and effective use of allotments, provision shall be made in the order for transfer of allotments under circumstances of a succession of interest, and under circumstances involving an allottee becoming unable to process sugarcane and such sugarcane as he would normally process, if operating, is processed by other allottees.

(11) To aid in the efficient movement and storage of sugar, provision shall be made to enable a processor to market a quantity of sugar of his own production in excess of his allotment equivalent to the quantity of sugar which he holds in storage and which was acquired by him within the allotment of another allottee.

(12) Allotments established in the foregoing manner and in the amounts set forth in the order provide a fair, efficient, and equitable distribution of any 1973 Mainland Cane Sugar Area quota that may be established for consumption within the continental United States and meet the requirements of section 205(a) of the Act.

Order.—Pursuant to the authority vested in the Secretary of Agriculture by section 205(a) of the Act: It is hereby ordered:

§ 814.11 Allotment of the 1973 sugar quota for the Mainland Cane Sugar Area.

(a) *Allotments.*—The 1973 sugar quota for the Mainland Cane Sugar Area of 1,591,000 short tons, raw value, is hereby allotted to the following processors in the quantities which appear opposite their respective names:

(b) *Marketing limitations.*—Marketings shall be limited to allotments as

V 38-167 AUG 29 73 XUM

established herein subject to the prohibitions and provisions of §§ 816.1 through 816.9 of this subchapter (33 FR 8495).

(c) *Transfer of allotments.*—The Director, Sugar Division, Agricultural Stabilization and Conservation Service of the Department, may permit marketings to be made by one allottee, or other persons, within the allotment established for another allottee upon relinquishment by such allottee of a quantity of its allotment and upon receipt of evidence satisfactory to the Director that (1) a merger, consolidation, transfer of sugar-processing facilities, or other action of similar effect upon the allottees or persons involved has occurred, or (2) the allottee receiving such permission will process 1973 crop sugarcane which the allottee relinquishing allotment has become unable to process.

(d) *Exchanges of sugar between allottees.*—When approved in writing by the Director, Sugar Division, Agricultural Stabilization and Conservation Service of the Department, any allottee holding sugar or liquid sugar acquired by him within the allotment of another person established in paragraph (a) of this section may ship, transport, or market up to an equivalent quantity of sugar processed by him in excess of his allotment established in paragraph (a) of this section. The sugar or liquid sugar held under this paragraph shall be subject to all other provisions of this section as if it had been processed by the allottee who acquired it for the purpose authorized by this paragraph.

(e) *Revision of allotments.*—Allotments established under this order may be revised without further notice or hearing in accordance with findings and conclusions heretofore made, to give effect to (1) the substitution of revised or corrected data, (2) the reallocation of any quantity of an allotment released by an allottee, and (3) any change in the Mainland Cane Sugar Area quota.

(Secs. 205, 209, 403, 61 Stat. 926, as amended, 928, 932 (7 U.S.C. 1115, 1119, 1153).)

Effective date.—This docket will become effective on August 29, 1973.

Signed at Washington, D.C., on August 20, 1973.

GLENN A. WEIR,
Acting Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 73-SO-37]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Redesignation of VOR Federal Airways

On June 29, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 17249) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would redesignate a segment of V-11 between Greene County, Miss., VORTAC and Richton, Miss., Intersection; also, redesignate a segment of V-70 between Greene County VORTAC and Picayune, Miss., VORTAC.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., October 11, 1973, as hereinafter set forth.

Section 71.123 (38 FR 307, 5627, and 9488) is amended as follows:

1. In V-11 "28 miles 95 MSL Laurel, MS.," is deleted and "Laurel, Miss.;" is substituted therefor.

2. In V-70 "95 MSL Greene County, Miss.;" is deleted and "Greene County, Miss.;" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on August 21, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 73-SW-44]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate a 700-foot transition area at Pleasanton, Tex.

On July 13, 1973, a notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 18685) stating the Federal Aviation Administration proposed to designate the Pleasanton, Tex., transition area.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., November 8, 1973, as hereinafter set forth.

In § 71.181 (38 FR 435), the following transition area is added:

PLEASANTON, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Pleasanton Municipal Airport (latitude 28°57'00" N., longitude 98°31'20" W.) and within 3 miles each side of the 175° bearing from the Pleasanton NDB extending from the 5-mile radius to 8 miles south of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act [49 U.S.C. 1655(c)])

Issued in Forth Worth, Tex., on August 21, 1973.

HENRY L. NEWMAN,
Director, Southwest Region.

Title 15—Commerce and Foreign Trade

CHAPTER I—BUREAU OF THE CENSUS, DEPARTMENT OF COMMERCE

PART 30—FOREIGN TRADE STATISTICS

Exporting Carriers Authorized To Correct Shipping Weights on Shipper's Export Declarations

The following amendment is made to the regulations published in the FEDERAL REGISTER on August 27, 1966 (31 FR 11367) (15 CFR Part 30). In accordance with administrative procedure, 5 U.S.C. 553, notice and hearing on this amendment and postponement of the effective date thereof is unnecessary because the amendment is a change in the substantive rules which grants an exemption and relieves restrictions.

This regulation is issued under authority of Title 13, United States Code, section 302, Department of Commerce Organization Order No. 35-4A, January 1, 1972, 37 FR 3461.

Effective date.—This amendment to the Foreign Trade Statistics Regulations is effective August 29, 1973.

A new subparagraph (e) is hereby added to § 30.22 to read as follows:

§ 30.22 Requirements for the filing of Shipper's Export Declarations by departing carriers.

* * * * *

(e) Exporting carriers are authorized to amend incorrect shipping weights reported on Shipper's Export Declarations, and to prorate total shipping weights among the individual commodities where such carriers are able to do so based upon information in their possession.

Dated August 9, 1973.

VINCENT P. BARABBA,
Director, Bureau of the Census.

I concur:

EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

CHAPTER III—DOMESTIC AND INTERNATIONAL BUSINESS ADMINISTRATION, DEPARTMENT OF COMMERCE

[13th Gen. Rev., Export Regs.]

PART 377—SHORT SUPPLY CONTROLS

Ferrous Scrap

The FEDERAL REGISTER issuance of July 2, 1973, established a licensing system for exports of ferrous scrap under which no licenses were issued for exports of ferrous scrap against orders of 500 short tons or more which were accepted after July 1, 1973, or which called for export after July 31, 1973. Applications to export ferrous scrap against accepted orders for less than 500 short tons were considered, irrespective of the date on which such orders were accepted. A similar licensing system against orders of 500 short tons or more of ferrous scrap for export in August 1973 was announced in the FEDERAL REGISTER of July 27, 1973. The purpose of this issuance is to announce the licensing system for exports in September 1973.

I. *Licensing System Against Orders of Ferrous Scrap for Export in September 1973.*—A. *Orders for 500 short tons or more.*—The licensing system against orders for 500 short tons or more of ferrous scrap for export in September 1973 is hereby announced.

Validated licenses will be issued in the case of applications to export scrap against unfilled or partially filled orders calling for export during the month of September 1973, which were accepted by an exporter on or before July 1, 1973. Such licenses will be granted under the same terms and conditions as apply with respect to validated licenses for export of scrap during the month of August 1973. Thus, the orders must have been reported by the exporter pursuant to the reporting requirement of § 377.1 (c) and the application must be accompanied by the supporting documentation (described in § 377.4(b)(1)) which would be required in the case of license applications for August exports of scrap. Further, in the case of an application for export to Japan, the requirement of § 377.4(b)(2) with respect to a Japanese Import Certificate must be fulfilled. Licenses issued for September exports of scrap to all destinations against orders for 500 short tons or more shall have a validity period of 60 days from the date of issuance.

Special rules are provided in the case of an export order accepted by a U.S. exporter on or before July 1, 1973, to export 500 short tons or more of ferrous scrap to Japan, if such order calls for export during the month of September 1973. In such a case, an Import Certificate (for the full quantity of the export which would be covered by the validated license) must have been issued by the Government of Japan. However, in situations where the ferrous scrap was ordered by a Japanese trading company and the country of ultimate destination was *from the outset* intended to be other than Japan, no import certificate is required.

In those situations where the accepted order or contract initially provided for export to a destination other than Japan and such order was initially so reported by the exporter to the Office of Export Control, no problem arises in establishing that this order was never intended for importation into Japan. However, where the accepted order or contract did not specify ultimate destination, the exporter must establish with the support of satisfactory evidence that Japan was never intended as the country of ultimate destination before an export license can be issued.

In such cases, a problem arises as to what constitutes satisfactory evidence which may be presented to the Office of Export Control to demonstrate that the intent was *from the outset* to export the ferrous scrap to an ultimate destination other than Japan. At present, it is impossible for the Office of Export Control to verify which orders properly fall within that category. The Office of Export Control is not prepared to license for export against an order to a destination other than Japan unless this order was clearly, and in any case before July 1, 1973, intended for such third country destination at the time it was placed.

The Government of Japan has previously advised us that the total amount of orders by Japanese trading companies accepted on or before July 1 for export of ferrous scrap to a destination other than Japan represented approximately 500,000 short tons. The Department of Commerce has requested from the Japanese trading companies involved, a detailed list of all those orders for which Japan was never the intended ultimate destination and which they can document were earmarked for shipment to a third country. Such documentation, for example, might involve the order which they received from a third country importer prior to placing their order in the United States. If the total amount of such orders substantially exceeds 500,000 short tons, the licensing policy with respect to such orders will have to be reconsidered.

B. *Orders for less than 500 short tons.*—As previously, applications to export ferrous scrap against accepted orders for less than 500 short tons will be considered irrespective of the date on which such orders were accepted. Licenses issued for September export of scrap to all destinations against orders for less than 500 short tons shall have a validity period of 30 days from the date of issuance.

II. *Evasion of Licensing Requirements Prohibited.*—Any arrangement which would be used to evade the validated export license requirements with respect to accepted orders of ferrous scrap is prohibited. Such arrangements include, but are not limited to, the substitution of several orders for less than 500 short tons to fill an order for 500 short tons or more which would not be eligible for licensing under the provisions applicable with respect to licensing orders for 500 short tons or more.

III. *Licensing System Against Orders of 500 Short Tons or More for Export in October 1973, to be Announced.*—The licensing system for exports of ferrous scrap against reported orders of 500 short tons or more calling for export during October 1973, which were accepted on or before July 1, 1973, will be announced in a subsequent FEDERAL REGISTER.

Accordingly, § 377.4 of the Export Control Regulations (15 CFR Part 377) is amended to read as follows:

§ 377.4 Ferrous scrap.

(a) *In general.*—Ferrous scrap commodities listed in Supplement No. 1 to this Part 377 require a validated license for export to all foreign destinations, including Canada. Except as provided in paragraph (c) of this section, no license will be issued for export of ferrous scrap during the 1973 calendar year against an order which was accepted after July 1, 1973; and no application for a validated license to export ferrous scrap will be considered until further notice, unless it is against an unfilled or partially filled order calling for export during the month of July, August, or September 1973, which was accepted by an exporter on or before July 1, 1973, and reported by him pursuant to the reporting requirement of § 377.1(c).

(b) *Licensing system against orders of 500 short tons or more for export in July, August, or September 1973.*—(1) *Submission of application with supporting documentation.*—Any exporter who reported (pursuant to § 377.1(c)) an unfilled or partially filled order accepted on or before July 1, 1973, for export during the month of July, August, or September 1973, of 500 short tons or more of any of the ferrous scrap commodities listed in Supplement No. 1 to this Part 377, who wishes to be considered for the issuance of a validated license for export with respect to such order, shall file with the Office of Export Control (Attention: 546), U.S. Department of Commerce, Washington, D.C. 20230, an application with the following supporting documentation:

(i) A photocopy or certified copy of the contract of sale for export to a foreign buyer, accepted by the applicant on or before July 1, 1973;

(ii) A sworn affidavit by the applicant as to the amount previously exported against each such contract, if any;

(iii) A statement, in the affidavit referred to in the preceding subdivision, that the applicant has the necessary quantity of such commodity earmarked for such accepted order, as of the date of filing such application; and

(iv) In the case of exports to Japan, an Import Certificate issued by the Government of Japan or such other document as may be required by the provisions of paragraph (b)(2) of this section. For purposes of paragraph (b)(1)(iii) of this section, the term "earmarked" refers to commodities which are specifically allocated for export against the accepted order and either in stock or scheduled for timely delivery under binding arrangements. The application shall be submitted on Forms FC-419, *Application for Export License*, and FC-420, *Application Processing Card*. The above-mentioned documentation will serve in lieu of Form FC-842, *Single Transaction Statement by Consignee and Purchaser*, that would otherwise be required pursuant to § 375.2 of this chapter.

(2) *Requirement of Japanese import certificate.*—In the case of an accepted order for export of ferrous scrap to Japan, which calls for export during the month of August or September, an Import Certificate (for the full quantity of the export which would be covered by the validated license) must have been issued

V38-167 AUG 29 73 XUM

by the Government of Japan. Such import Certificate, or a photocopy or certified copy thereof, shall be filed with the application pursuant to the procedures specified in paragraph (b) (1) of this section. Where Japan is the destination indicated in the accepted order but the country of ultimate destination was from the outset intended to be another, no Import Certificate shall be required, but the circumstances must be established and documented to the satisfaction of the Office of Export Control for the requirements of this subparagraph to be waived.

(3) *Issuance of licenses for exportation.*—The Office of Export Control will verify the authenticity of the application and supporting documentation referred to in paragraph (b) (1) and (where applicable) (2) of this section and, if they meet the requirements of such subparagraphs, will issue a validated license for 100 percent of the unfilled balance of the accepted order; provided, however, that with respect to orders, which do not specify a country of destination, against which the applicant is seeking a license to export to a destination other than Japan, he must establish to the satisfaction of the Office of Export Control that the ferrous scrap was not originally intended for exportation to Japan.

(4) *Special terms.*—Each license issued under this procedure will only be valid for shipment against the particular contract, allowing shipment:

(i) In the case of a validated license which indicates July as the month for shipment, until August 30, 1973, and

(ii) In the case of a validated license which indicates August or September as the month for shipment, during the 60-day period following the date of issuance of such license.

Any cancellation of a contract automatically revokes the license that was issued against it. In the event of the cancellation of a contract, the applicant shall file a report of such cancellation with the Office of Export Control no later than five days from the date of cancellation. If a license has been issued against such contract, the license shall be returned to the Office of Export Control with the notice of cancellation.

(5) *Prohibited arrangements.*—Any arrangement used to evade the validated export license requirements with respect to accepted orders for export of ferrous scrap is prohibited. Such arrangements include, but are not limited to, the substitution of several orders for less than 500 short tons to fill an order for 500 short tons or more which would not be eligible for licensing under the provisions of this paragraph.

(c) *Licensing system against orders of less than 500 short tons.*—(1) *In general.*—An application for a license to export ferrous scrap against an accepted order for less than 500 short tons, which is submitted on Forms FC–419 and FC–420, will be considered by the Office of Export Control, irrespective of the date on which the order was accepted, if accompanied by a photocopy or certified copy of the contract of sale for export to a foreign buyer, and a sworn affidavit by the applicant as to the amount previously exported against each such contract, if any. The copy of the contract will serve in lieu of Form FC–842, *Single Transaction Statement by Consignee and Purchaser*, that would be otherwise required pursuant to § 375.2 of this chapter. After verification of the authenticity of the documentation submitted by the applicant, a license will be issued for export during the month specified in the contract for the total amount of the contract or the unfilled balance, whichever is the lesser amount. Such licenses shall expire 30 days after the date of issuance. Any cancellation of the contract automatically revokes the license that was issued against it. In the event of the cancellation of a contract, the applicant shall file a report of such cancellation with the Office of Export Control no later than five days from the date of cancellation. If a license has been issued against such a contract, the license shall be returned to the Office of Export Control with the notice of cancellation.

(2) *Notice.*—Exporters are hereby placed on notice that in the event the volume of exports under the licensing procedure of this paragraph reaches an unacceptable level, further restrictions may be imposed on exports against orders of less than 500 short tons.

(d) *Reduction of shipping tolerance allowance.*—Paragraph 386.7(b) (1) of the Export Control Regulations states, in part, that commodities listed in Supplement No. 1 to Part 377 are subject to the tolerance set forth in Part 377. Shipping tolerances applicable to the commodities subject to the requirements of this § 377.4(d) are accordingly shown in Supplement No. 1 to Part 377.

Effective date of action: August 24, 1973.

RAUER H. MEYER,
Director,
Office of Export Control.

Title 17—Commodity and Securities Exchange

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–7926, File No. S7–459]

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

New Requirement for Exemptions; Notices and Orders

The Securities and Exchange Commission published notice in Investment Company Act Release No. IC–7535 on December 1, 1972, and in the FEDERAL REGISTER issued on December 21, 1972 (37 FR 28198) that it had under consideration the amendment of Rules 0–2 and 0–5 [17 CFR 270.0–2, 270.0–5] under the Investment Company Act of 1940 (Act) pursuant to Section 38(a) of the Act [15 U.S.C. 80a–37(a)]. The notice invited all interested persons to comment on the proposed amendments on or before January 3, 1973. After taking the letters of comment received into consideration, the Commission has determined to adopt the amendments in the following form:

Rule 0–2.—Rule 0–2 [17 CFR 270.0–2] under the Act, "General Requirements of Papers and Applications," specifies procedures to be followed by persons in filing papers and applications with the Commission and prescribes a format for their preparation. The Commission is now amending this rule by adding a new paragraph (g) which will require applicants under the Act to submit proposed notices which might be used by the Commission in giving public notice of the applications. This procedure is designed to facilitate the processing of applications. To insure that draft notices submitted for this purpose are subject to the verification requirements of Rule 0–2(d) [17 CFR 270.0–2(d)] under the Act, the rule as adopted also makes clear that the proposed notice will constitute a formal exhibit to the application.

The Commission received one comment on this proposed procedure which expressed the hope that the requirement of a draft notice was not "placing a burden on applicants to furnish information which goes beyond what is presently required in the application itself." This is not the intent of the amendment. Notices are designed to inform the public of the nature of the underlying transaction or matter; and, like the applications they accompany, they should contain the relevant, material facts and present factual summaries in a manner that is balanced, complete, and otherwise suitable for issuance as a public notice. Applicants should be aware that proposed notices may not be published by the Commission in the precise form submitted. The amended rule does not contemplate the submission of a proposed Commission order by which the relief sought by the application might be granted because experience with the submission of such orders by applicants seeking "expedited treatment" pursuant to the instructions contained in Investment Company Act Release No. 5632 [34 FR 5547] has demonstrated that such orders may not be particularly helpful.

Accordingly, the Securities and Exchange Commission, pursuant to authority granted to it in section 38(a) of the Act, hereby amends § 270.0–2 of Chapter II of Title 17 of the Code of Federal Regulations by adding a new paragraph (g) reading as follows:

§ 270.0–2 General requirements of papers and applications.

* * * * *

(g) *Proposed notice.*—A proposed notice of the proceeding initiated by the filing of the application shall accompany each application as an exhibit thereto and, if necessary, shall be modified to reflect any amendments to such application.

Rule 0–5. Rule 0–5 [17 CFR 270.0–5] under the Act presently provides, in pertinent part, that

> With respect to any proceeding initiated by the filing of an application, or upon the Commission's own motion, pursuant to any section of the Act or any rule or regulation thereunder, unless in the particular case a different procedure is provided: * * *
>
> (b) An order disposing of the matter will be issued as of course on a date to be specified in the notice, unless prior to such date the Commission orders a hearing on the matter.

It appears to the Commission that the procedure described above is neither appropriate nor practical. Under current practice, notices contain no exact date when "(a)n order disposing of the matter will be issued." Instead as prescribed by Rule 0–5(a) [17 CFR 270.0–5(a)], they merely specify the date by which interested persons who wish to do so must request a hearing on the matter and provide that an order disposing of the matter may be issued at any time after that date. In Release No. IC–7535 [37 FR 28198], the Commission proposed to delete present paragraph (b) of Rule 0–5 and, as a consequence thereof, to redesignate the subsequent paragraphs. One comment received on this proposal suggested that, instead of eliminating paragraph (b), it be modified to eliminate the setting of a specific date as of which an order would be issued. This comment has merit. It was also suggested, however, that the order would be issued, as of course, unless the Commission ordered a hearing prior to the expiration of the period for comment. This feature might be impracticable since a request for a hearing might be received a day or two before the expiration of the period for the receipt of such requests and for ordering a hearing. In such a situation, there would be insufficient time for the Commission to evaluate the request and determine whether a hearing should be held or not. Consequently, paragraph (b) will be retained but revised to simply provide that an order disposing of the matter will be issued as of course, following the expiration of the specified period, unless the Commission thereafter orders a hearing on the matter.

The Securities and Exchange Commission, pursuant to authority granted to it in section 38(a) of the Act, hereby amends § 270.0–5 of Chapter II of Title 17 of the Code of Federal Regulations by revising paragraph (b) thereof. Since paragraph (b) is not to be deleted as was proposed, there is no need to redesignate paragraphs (c) and (d). As so amended § 270.0–5 reads as follows:

§ 270.05 Procedure with respect to applications and other matters.

The procedure herein below set forth will be followed with respect to any proceeding initiated by the filing of an application, or upon the Commission's own motion, pursuant to any section of the Act or any rule or regulation thereunder, unless in the particular case a different procedure is provided:

(a) Notice of the initiation of the proceeding will be published in the FEDERAL REGISTER and will indicate the earliest date upon which an order disposing of the matter may be entered. The notice will also provide that any interested person may, within the period of time specified therein, submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, stating his reasons therefor and the nature of his interest in the matter.

(b) An order disposing of the matter will be issued as of course, following the expiration of the period of time referred to in paragraph (a), unless the Commission thereafter orders a hearing on the matter.

(c) The Commission will order a hearing on the matter, if it appears that a hearing is necessary or appropriate in the public interest or for the protection of investors, (1) upon the request of an interested person or (2) upon its own motion.

(d) At the time of filing an application under the Act, the applicant or applicants shall pay to the Commission a total fee of $500 no part of which shall be refunded; however, this fee shall not be applicable to (1) any application for deregistration of an investment company pursuant to section 8(f) of the Investment Company Act if such company has assets of less than $100,000; or (2) any application pursuant to Section 9(c) of such Act.

These amendments of Rules 0–5 and 0–2 will become effective September 21, 1973.

(Sec. 38(a), 54 Stat. 841 (15 U.S.C. 80a–37))

By the Commission, August 7, 1973.

[SEAL] RONALD F. HUNT,
Secretary.

[FR Doc.73-18286 Filed 7-28-73;8:45 am]

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Regs. No. 5, further amended]

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED

Subpart L—Conditions of Participation; Home Health Agencies

WORDS OF ISSUANCE; CORRECTION

In FR Doc. 73–14305 published in the FEDERAL REGISTER of July 16, 1973 (38 FR 18978), §§ 405.1203–405.1208 which were in effect prior to the publication of FR Doc. 73–14305 were inadvertently deleted. It is contemplated that these sections will later be incorporated in a proposed new subpart of Part 405. However, they are to remain in effect in Subpart L until further notice. (For the convenience of the reader, §§ 405.1203–405.1208 are set forth below.)

Accordingly, the Words of Issuance in FR Doc. 73–14305 are corrected to read as follows:

Subpart L of Part 405 of Chapter III of Title 20 of the Code of Federal Regulations is revised to read as follows, except that present §§ 405.1203 through 405.1208 will remain in effect:

* * * * *

§ 405.1203 Standards; general.

As a basis for a determination as to whether or not there is substantial compliance with the prescribed conditions in the case of any particular home health agency, explanations are given under each condition. These explanations provide an indication of the various ways in which such agencies may carry out the functions embodied in the conditions. Reference to these explanations will enable the State agency surveying a home health agency to document the activities of the agency, to establish the nature and extent of its deficiencies, if any, with respect to any particular function, and to assess the agency's need for improvement in relation to the prescribed conditions. In substance, the explanations will help the State agency determine the extent and degree to which a home health agency is complying with each condition.

§ 405.1204 Certification by State agency.

(a) The Health Insurance for the Aged Act provides that the services of State agencies, operating under agreements with the Secretary, will be used by the Secretary in determining whether institutions meet the conditions of participation. Pursuant to these agreements, State agencies will certify to the Secretary home health agencies which are found to be in substantial compliance

V38-167 AUG 29 73 XUM

with the conditions. Such certifications shall include findings as to whether each of the conditions is substantially met. The Secretary, on the basis of such certification from the State agency, will determine whether or not an entity is a home health agency eligible to participate in the health insurance program as a provider of services.

(b) The decisions of the State agency represent recommendations to the Secretary. Notice of determination of eligibility or noneligibility made by the Secretary on the basis of a State agency decision will be sent to the home health agency by the Social Security Administration after such review and professional consultation with the Public Health Service as may be required. If it is determined that the home health agency does not comply with the conditions of participation, the home health agency may request that the determination be reviewed. For procedures relating to appeals process, see Subpart O of this Part 405.

§ 405.1205 Principles for the evaluation of home health agencies to determine whether they meet the conditions of participation.

Home health agencies will be considered in substantial compliance with the conditions of participation upon acceptance by the Secretary of findings, adequately documented and certified to by the State agency, showing that:

(a) The home health agency meets the specific statutory requirements of section 1861(o) and is found to be operating in accordance with all other conditions of participation with no significant deficiencies, or

(b) The home health agency meets the specific statutory requirements of section 1861(o) but is found to have deficiencies with respect to one or more other conditions of participation which:

(1) It is making reasonable plans and efforts to correct, and

(2) Notwithstanding the deficiencies, is rendering adequate care and without hazard to the health and safety of individuals being served, taking into account special procedures or precautionary measures which have been or are being instituted.

§ 405.1206 Time limitations on certifications of substantial compliance.

(a) All initial certifications by the State agency to the effect that a home health agency is in substantial compliance with the conditions of participation will be for a period of 2 years, beginning with July 1, 1966, or, if later, with the date on which the home health agency is first found to be in substantial compliance with the conditions. State agencies may visit or resurvey home health agencies where necessary to ascertain continued compliance or to accommodate to periodic or cyclical survey programs. A State finding and certification to the Secretary that an agency is no longer in compliance may occur within a 2-year or subsequent period of certification and will thereby terminate the State's certification as to compliance.

(b) If a home health agency is in substantial compliance under the provisions of § 405.1205(b), the following information will be incorporated in the Secretary's finding and into the notice of eligibility to the home health agency:

(1) A statement of the deficiencies which were found; and

(2) A description of progress which has been made and further action which is being taken to remove the deficiencies; and

(3) A scheduled time for a resurvey of the home health agency to be conducted not later than the 18th month (or earlier, depending on the nature of the deficiencies) of the period of certification.

§ 405.1207 Certification of noncompliance.

The State agency will certify that a home health agency is not in compliance with the conditions of participation, or, where a determination of eligibility has been made, that it is no longer in compliance where:

(a) The home health agency is not in compliance with one or more of the statutory requirements of section 1861(o); or

(b) The home health agency has deficiencies of such character as to seriously limit its capacity to render adequate care or to place health and safety of individuals in jeopardy, and consultation to the home health agency has demonstrated significant improvement as to establish that there is no early prospect of such substantial compliance as of a later beginning date; or

(c) After a previous period or part thereof for which the home health agency was certified under circumstances outlined in § 405.1205(b), there is a lack of progress toward a removal of deficiencies which the State agency finds are adverse to the health and safety of individuals being served.

(d) If, on the basis of a State agency certification, it is determined by the Secretary that the home health agency does not substantially meet, or no longer substantially meets, the conditions of participation, the agreement for participation may not be accepted for filing, or if filed, may be terminated. The agency may request that the determination be reviewed. For procedures relating to the appeals process, see Subpart O of this Part 405.

§ 405.1208 Documentation of findings.

The findings of the State agency with respect to each of the conditions of participation should be adequately documented. Where the State agency certification to the Secretary is that a home health agency is not in compliance with the conditions of participation, such documentation should include a report of all consultation which has been undertaken in an effort to assist the home health agency to comply with the conditions, a report of the home health agency's responses with respect to the consultation, and the State agency's assessment of the prospects for such improvements as to enable the home health agency to achieve substantial compliance with the conditions.

Title 41—Public Contracts and Property Management

CHAPTER 18—NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

MISCELLANEOUS AMENDMENTS TO CHAPTER

The following revisions to Chapter 18 of Title 41 are prescribed as set forth below. These revisions to Chapter 18 covering changes made by Revision 5 of the NASA Procurement Regulation are effective 60 days from April 20, 1973.

This Revision 5 was prepared through the use of computer technology, and it is the first to be issued under a new NASA policy to issue Procurement Regulation revisions in lieu of Procurement Regulation Directive's, where practicable. This new policy was adopted to relieve the user of the many administrative and other problems associated with the old method of issuing several Directives and periodically consolidating the outstanding Directives and other revised material into one large Procurement Regulation revision. Currently, there is one large Revision to the Regulation in process which uses the traditional approach. In the future, however, we will issue Procurement Regulation Directives only to disseminate that procurement policy or procedure that is temporary,. pending finalization, or is such that it would not be incorporated into the Procurement Regulation at all.

PART 18–1—GENERAL PROVISIONS

1. Section 18–1.315 is revised to read as follows:

§ 18–1.315 Procurement of jewel bearings.

(a) *Definitions.* As used in this paragraph:

(1) "Jewel bearing" means a piece of synthetic sapphire or ruby of any shape, except a phonograph needle, which has one or more polished surfaces and which is suitable for use in an instrument, mechanism, subassembly or part without any additional processing to the synthetic sapphire or ruby. A jewel bearing may be either unmounted, or mounted into a ring or bushing. Examples of types of jewel bearings are: watch hole—olive, watch hole—straight, pallet stones, roller jewels (jewel pins), end stones (caps), vee (cone) jewels, instrument rings, cups, double cups and orifice jewels.

(2) "Price list" is the official U.S. Government Jewel Bearing Price List for jewel bearings produced by the William Langer Jewel Bearing Plant in Rolla, North Dakota, which is issued periodically by the General Services Administration.

(3) "Plant" means the Government-owned William Langer Jewel Bearing Plant, Rolla, North Dakota.

(4) "Military standard jewel bearing" means a jewel bearing conforming to Military Specification No. MIL–B–27497 (latest revision) entitled "Bearings, Jewel, Sapphire or Ruby, Synthetic."

(b) *Policy.* It has been determined that NASA's requirements for jewel bearings must, to the maximum extent practicable, be procured from the Government-owned William Langer Jewel Bearing Plant, Rolla, North Dakota, which is operated through a contractor by the General Services Administration.

(c) *Procedures.* (1) All direct Government purchases of jewel bearings shall be made from the plant where it can meet the requirements.

(2) All procurements of items in the Federal Supply Classes and Groups listed in § 18–1.315(d), or any subassembly, component or part, thereof, shall provide that jewel bearings, in the quantities and of the types and sizes (including tolerances) required to produce the end items to be supplied, be purchased from the plant and incorporated in the items delivered by contractor and subcontractor at every tier. To accomplish this, the clause in § 18–1.315(e) shall be inserted in all contracts for items in paragraph (d) of this section except:

(i) In small purchases using small purchase procedures;

(ii) When the contracting officer knows that the item being procured does not contain jewel bearings;

(iii) When quantity requirements, quality standards, or delivery requirements cannot be satisfied by bearings manufactured by the plant;

(iv) For jewel bearings used in items that are to be procured by a NASA activity outside the United States and the procured items are intended for use outside the United States, its possessions, and Puerto Rico; or

(v) When the urgency of the requirement for all or part of a procurement of a jewelled item is such that delivery of prefabricated end items offers the best possible solution. The required source provision will apply to any quantity in excess of the prefabricated items specified for immediate delivery.

(3) Whenever it is necessary to redesign or re-engineer jewelled items in the Federal Supply Classes and Groups cited in paragraph (d) of this section to satisfy performance requirements, the contractors or subcontractors who manufacture the jewelled items shall be required to use military standard jewel bearings in the redesign. The only exception to this requirement will be when the dimensional tolerances or configurations of military standard jewel bearings are such that their use in the product would prevent attainment of the required level of performance specified for the item. When one or more nonstandard bearings must be used to satisfy performance requirements of the jewelled product but military standard bearings will function satisfactorily for other applications within the same item, the item will be required to be redesigned to provide for the use of military standard bearings in such "other" applications. However, in no case shall a contractor or subcontractor be required to redesign a jewelled item solely for the purpose of converting from the use of nonstandard to military standard jewel bearings. This is not intended to prevent any contractor or subcontractor from voluntarily redesigning a jewelled item solely to accommodate the use of military standard bearings. Such voluntary redesign may be economically advantageous due to the lower unit price of military standard bearings from the plant.

(4) The plant may reject a contractor's or subcontractor's purchase order due to currently outstanding, excessive and overdue indebtedness to the plant by such customer. The plant is required to refuse shipments against purchase orders whenever shipments would increase the indebtedness of a customer beyond a credit limit which may have been set by the General Services Administration. Rejection by the plant of a contractor's or subcontractor's purchase order, or refusal to ship against an accepted purchase order under these circumstances will not be considered justification for a waiver of the purchase requirement and adjustment in the contract price as specified in paragraph (b) of the contract clause in § 18–1.315(e). In the event the contractor or subcontractor whose purchase order is rejected or to whom shipments are refused for the foregoing reasons, and the customer and the management of the plant are in disagreement on whether such indebtedness actually exists or the amount of such indebtedness, the Government will require the plant to accept the contractor's purchase order and to make shipments against such purchase order on a "cash-on-delivery" (C.O.D.) basis for each lot shipped. If necessary, arrangements can be made with the contracting officer for "progress payments" by the Government to finance the C.O.D. requirements. Such measures will be independent of and have no effect on the final disposition of the alleged indebtedness or controversy between the contractor and management of the Langer plant.

(5) The cost differential between Langer-made bearings and imported bearings shall not be used as justification to avoid the purchase and use of bearings from the plant.

(6) Subsequent to award of a contract which includes the clause, the contracting officer will waive the "use" requirement of the clause, when the prime contractor or his subcontractor, whichever is required to place a purchase order on the plant pursuant to the contract or the subcontract, submits a written request for waiver and the contracting officer determines that the contractor or subcontractor has on hand jewelled subassemblies or jewelled end items such as required to be delivered under the contract; and either:

(i) The production of such subassemblies or end items, specifically in performance of all or a part of the contract using Langer bearings would increase his costs or interfere with economical or normal production scheduling of the product under contract or with the production of another item; or

(ii) The delivery schedule under the contract or subcontract is such that the

V 38-167 AUG 29 73 XUM

use of on hand jewel bearings or jeweled subassemblies or parts is necessary.

(7) A contractor (or subcontractor) will not be authorized to purchase from the plant a quantity of jewel bearings which exceeds the quantity required to satisfy the contract.

(8) A contracting officer may, in his discretion, conduct a special review of the extent of the contractor's compliance with the "purchase" requirement of the clause as evidenced by examination of appropriate contractor records.

(d) *Federal supply classes and groups.* Procurement of items in the following Federal Supply Classes and Groups are subject to the prescribed policy and procedures:

FS Class:	*Description*
6605	Navigational Instruments
6610	Flight Instruments
6615	Auto Pilot Mechanisms & Airborne Gyro Components
6620	Engine Instruments
6625	Electrical & Electronic Properties Measuring & Testing Instruments
6630	Chemical Analysis Instruments
6635	Physical Properties Testing Equipment
6636	Environmental Chambers & Related Equipment
6640	Laboratory Equipment & Supplies
6645	Time Measuring Instruments
6650	Optical Instruments
6655	Geophysical & Astronomical Instruments
6660	Meteorological Instruments & Apparatus
6665	Hazard Detecting Instruments & Apparatus
6670	Scales and Balances
6675	Drafting, Surveying & Mapping Instruments
6680	Liquid and Gas Flow, Liquid Level, and Mechanical Motion Measuring Instruments
6685	Pressure, Temperature and Humidity Measuring and Controlling Instruments
6695	Combination and Miscellaneous Instruments

FS Groups:	*Description*
12	Fire Control Equipment
14	Guided Missiles
15	Aircraft, Airframe Structural Comps.
16	Aircraft Components & Accessories
18	Space Vehicles
23	Motor Vehicles & Cycles
25	Vehicular Equipment Components
42	Fire Fighting, Rescue and Safety Equipment
52	Measuring Tools
58	Communications Equipment
59	Electrical and Electronic Equipment Components
63	Alarm and Signal Systems
65	Medical, Dental and Veterinary Equipment and Supplies
67	Photographic Equipment
69	Training Aids and Devices

(e) In all procurements subject to these procedures the following clause shall be used:

REQUIRED SOURCE FOR JEWEL BEARINGS (MARCH 1973)

(a) For the purpose of this clause:

(1) "Jewel bearings" means a piece of synthetic sapphire or ruby of any shape, except a phonograph needle, which is suitable for use in an instrument, mechanism, subassembly or part without any additional processing to the synthetic sapphire or ruby. A jewel bearing may be either unmounted, or mounted into a ring or bushing. Examples of types of jewel bearings are: watch hole-olive, watch hole-straight, pallet stones (caps), vee (cone) jewels, instrument rings, cups, double cups and orifice jewels.

(2) "Price List" means the official United States Government Jewel Bearing Price List for jewel bearings which are produced by the William Langer Jewel Bearing Plant in Rolla, North Dakota, published periodically by the General Services Administration.

(3) "Plant" means the Government-owned William Langer Jewel Bearing Plant, Rolla, North Dakota.

(4) "Military Standard Jewel Bearing" means a jewel bearing conforming to Military Specification No. MIL–B–27497 (latest revision) entitled "Bearings, Jewel, Sapphire or Ruby, Synthetic."

(b) Jewel bearings required in the performance of this contract shall be procured from the Plant at prices established in the Price List dated (*insert latest effective date*). Each purchase order issued to the Plant under this contract shall include the prime contract number and date of the Price List cited above. The Contractor agrees that the quantities, types and sizes (including tolerances) of jewel bearings so ordered will be those required for the performance of this contract. The Contractor agrees to notify the Contracting Officer promptly of the rejection of his (or any subcontractor's) purchase order in whole or in part by the Plant. The requirement for purchase and use of jewel bearings from the Plant will be waived to the extent of such rejected orders. If such a waiver is granted, an equitable adjustment shall be made in the contract price or delivery schedule, or both, in accordance with the "Changes" clause of this contract. Further, the requirement for use (but not the requirement for purchase from the Plant) of jewel bearings may be waived by the Contracting Officer when such waiver is determined by him to be consistent with established policy.

(c) Whenever it is necessary for the Contractor or any subcontractor to redesign or re-engineer jewelled items in order to satisfy performance requirements, the Contractor or subcontractor shall provide in such redesign for the use of military standard jewel bearings. This requirement does not apply when the dimensional tolerances or configurations of military standard jewel bearings are such that their use in the product would prevent attainment of the required level of performance specified for the item. However, when one or more nonstandard bearings must be used to satisfy performance requirements of the jewelled product but military standard bearings will function satisfactorily for other applications within the same item, the item will be required to be redesigned to provide for the use of military standard bearings in such other applications. The Contractor or subcontractor is not required to redesign a jewelled item solely for the purpose of converting from the use of nonstandard to the use of military standard jewel bearings. Nothing in this contract shall prevent any Contractor or subcontractor from voluntarily redesigning a jewelled item solely to accommodate the use of military standard bearings.

(d) The Contractor agrees to retain until the expiration of three years from the date of final payment under this contract and to make available during such period, upon request of the Contracting Officer, records showing compliance with this clause.

(e) The Contractor agrees to insert this clause, including this paragraph (e), in every subcontract and purchase order issued in performance of this contract unless he knows that the subassembly, component or part being purchased does not contain jewel bearings.

PART 18–2—PROCUREMENT BY FORMAL ADVERTISING

1. Sections 18–2.406–3 and 18–2.406–4 are revised to read as follows:

§ 18–2.406–3 Other mistakes disclosed before award.

(a) In lieu of submission to the General Accounting Office for decision, the Comptroller General, by Decision B–140233, has granted to NASA the authority to make the administrative determinations described below in connection with mistakes in bids, other than apparent clerical mistakes, alleged after opening of bids and prior to award. The authority contained herein to permit correction of bids is limited to bids which, as submitted, are responsive to the invitation for bids, and may not be used to permit correction of bids to make them responsive. This authority is in addition to that in § 18–2.406–2, or that which may be otherwise available.

(1) A determination may be made permitting the bidder to withdraw his bid where the bidder requests permission to do so and clear and convincing evidence establishes the existence of a mistake. However, if the evidence is clear and convincing both as to the existence of a mistake and as to the bid actually intended, and if the bid, both as uncorrected and corrected, is the lowest received, a determination may be made to correct the bid and not permit its withdrawal.

(2) A determination may be made permitting the bidder to correct his bid where the bidder requests permission to do so and clear and convincing evidence establishes both the existence of a mistake and the bid actually intended. However, if such correction would result in displacing one or more lower acceptable bids, the determination shall not be made unless the existence of the mistake and the bid actually intended are ascertainable substantially from the invitation and the bid itself. If the evidence is clear and convincing only as to the mistake, but not as to the intended bid, a determination permitting the bidder to withdraw his bid may be made.

(3) If the evidence does not warrant a determination under subparagraph (1) or (2) of this paragraph, a determination may be made that a bidder may neither withdraw nor correct his bid, and the bid shall be considered for award in the form submitted.

(b) Mistakes in bid cases covered by paragraph (a) (1), (2), or (3) of this section shall be referred by the contracting officer to the Procurement Office, NASA Headquarters (Code DKP–3) for determination.

(c) Each proposed determination shall have the concurrence of the Office of General Counsel prior to issuance.

(d) Suspected or alleged mistakes in bids shall be processed as follows:

(1) Whenever the contracting officer suspects that a mistake may have been made in a bid, he shall immediately request the bidder to verify the bid. Such request shall inform the bidder why the request for verification is made—that a mistake is suspected and the basis for such suspicion; e.g., that the bid is significantly out of line with the next low or other bids or with the Government's estimate. If the time for acceptance of bids is likely to expire before a decision can be made, the contracting officer shall request all bidders whose bids may become eligible for award to extend the time for acceptance of their bids. If the bidder whose bid is believed erroneous does not grant such extension of time and a decision cannot be reached before expiration of the time for acceptance, even if handled by telegraph or telephone as provided in paragraph (a) (4) of this section, the bid shall be considered as originally submitted.

(2) If the bidder verifies his bid, the contracting officer shall consider it as originally submitted. If the bidder alleges a mistake, the contracting officer shall advise him to support his allegation by statements concerning the alleged mistake and by all pertinent evidence, such as the bidder's file copy of the bid, his original worksheets and other data used in preparing the bid, subcontractors' and suppliers' quotations, if any, published price lists, and any other evidence which will serve to establish the mistake, the manner in which it occurred, and the bid actually intended.

(3) Where the bidder furnishes evidence in support of an alleged mistake, the case shall be referred to the Procurement Office, NASA Headquarters (Code DKP–3) together with the following data:

(i) All evidence furnished by the bidder including his written request to withdraw or modify the bid;

(ii) A copy of the signed bid, of the invitation for bids, and any specifications or drawings relevant to the alleged mistake;

(iii) An abstract or record of the bids received;

(iv) A written statement by the contracting officer setting forth—

(*a*) The expiration date of the bid in question and of the other bids submitted;

(*b*) Specific information as to how and when the mistake was alleged;

(*c*) A summary of the evidence submitted by the bidder;

(*d*) In the event only one bid was received, a quotation of a recent contract price for the supplies or services involved, or, in the absence of a recent comparable contract, the contracting officer's estimate of a fair price for the supplies or services and the basis for such estimate;

(*e*) Any additional evidence considered pertinent including copies of all correspondence between the contracting officer and the bidder concerning the alleged mistakes; and

(*f*) The course of action with respect to the bid that the contracting officer considers proper on the basis of the evidence.

(v) Written comments or concurrence of the Office of Chief Counsel.

(4) When time is of the essence, because of the expiration of bids or otherwise, the contracting officer may refer the case by telegraph or telephone to the Procurement Office, NASA Headquarters. Ordinarily, contracting officers will not refer mistake in bid cases by telegraph or telephone, particularly when the determinations set forth in paragraph (a) (2) or (3) of this section are applicable, since actual examination of the evidence is generally necessary to determine the proper action to be taken.

(5) Where the bidder fails or refuses to furnish evidence in support of a suspected or alleged mistake, the contracting officer shall consider the bid as submitted unless the amount of the bid is so far out of line with the amounts of other bids received or with the amount estimated by the Government or determined by the contracting officer to be reasonable, or there are other indications of error so clear, as reasonably to justify the conclusion that acceptance of the bid would be unfair to the bidder or to other bona fide bidders, in which case it may be rejected. The attempts made to obtain the information required and the action taken with respect to the bid shall be fully documented.

(e) Nothing contained in this § 18–2.406–3 shall deprive the Comptroller General of his statutory right to question the correctness of any administrative determination made hereunder nor deprive any bidder of his right to have the matter determined by the Comptroller General should he so request. All doubtful cases will be submitted to the Comptroller General for advance decision.

(f) A record shall be kept of all administrative determinations made in accordance with this § 18–2.406–3, including a complete statement of the facts involved, and the action taken in each case. Copies of all such administrative determinations shall be included in the case file. Where a contract is awarded, a copy of any related determination shall be retained in the contract file.

§ 18–2.406–4 Disclosure of mistakes after award.

(a) When a mistake in a contractor's bid is not discovered until after the award, the mistake may be corrected by supplemental agreement if correcting the mistake would make the contract more favorable to the Government without changing the essential requirements of the contract. All other cases shall be referred to the Procurement Office, NASA Headquarters. They will either be decided by the Director of Procurement under paragraph (b) and (c) of this section, be referred by the Director of Procurement to the Comptroller General, or be processed in accordance with Part 18–17 of this chapter.

(b) In lieu of submission to the General Accounting Office for decision, the Comptroller General, by Decision B–140233, dated February 3, 1961, has granted to NASA the authority to make the administrative determinations described below in connection with mistakes in bids alleged or disclosed after award. This authority is in addition to that provided by Public Law 85–804 (50 U.S.C. 1431–1435) (Part 18–17 of this chapter), or that which otherwise may be available.

(1) A determination may be made to rescind a contract where the original contract price does not exceed $1,000.

(2) A determination may be made to reform a contract, irrespective of amount:

(i) To delete the item or items involved in the mistake where such deletion does not reduce the contract price by more than $1,000; or

(ii) To increase the price where such increase does not exceed $1,000 and if the contract price, as corrected, does not exceed that of the next lowest acceptable bid under the original invitation for bids.

(c) Determinations under paragraph (b) of this section may be made only on the basis of clear and convincing evidence that a mistake in bid was made, and either that the mistake was mutual or that the unilateral mistake made by the contractor was so apparent as to have charged the contracting officer with notice of the probability of the mistake. Relief requested by a contractor due to an alleged mistake may be denied regardless of the monetary amount involved where it is determined the evidence is not clear and convincing.

(i) That a mistake in bid or proposal was made by the contractor, or

(ii) That the mistake was mutual or the contracting officer was or should have been on notice of the error prior to the award of the contract.

(d) The Director of Procurement is the NASA official authorized to make determinations under this § 18–2.406–4. This authority may not be redelegated.

(e) Each proposed determination shall have the concurrence of the Office of General Counsel.

(f) Mistakes disclosed after award shall be processed as follows:

(1) Whenever a mistake in bid is alleged or disclosed after award, the contracting officer shall advise the contractor to support the alleged error by written statements and by all pertinent evidence, such as the contractor's file copy of the bid, his original work sheets and other data used in preparing the bid, subcontractors' and suppliers' quotations (if any), published price lists, and any other evidence which will serve to establish the mistake, the manner in which it occurred, and the bid actually intended.

(2) Where the contractor furnishes evidence in support of an alleged mistake, the contracting officer may either correct the mistake if authorized under paragraph (a) of this section, or refer the case to the Procurement Office, NASA Headquarters (Code DKP–3) together with the following data:

(i) All evidence furnished by the contractor;

(ii) A copy of the contract, including a copy of the bid and any specifications

V 38-167 AUG 29 73 XUM

or drawings relevant to the alleged mistake, and any change orders or supplement agreements thereto;

(iii) An abstract or record of the bids received;

(iv) A written statement by the contracting officer setting forth—

(*a*) Specific information as to how and when the mistake was alleged or disclosed;

(*b*) A summary of the evidence submitted by the contractor;

(*c*) His opinion whether a bona fide mistake was made in the bid and whether he was, or should have been, on constructive notice of the mistake before the award, together with the reasons or data upon which his opinion is based;

(*d*) In the event that only one bid was received, a quotation of a recent contract price for the supplies or services involved, or, in the absence of a recent comparable contract, the contracting officer's estimate of a fair price for the supplies or services, and the basis for such estimate;

(*e*) Any additional evidence considered pertinent, including copies of all relevant correspondence between the contracting officer and the contractor concerning the alleged mistake;

(*f*) The course of action with respect to the alleged mistake that the contracting officer considers proper on the basis of the evidence, and, if other than a change in contract price is recommended, the manner by which the item will otherwise be procured; and

(*g*) The status of performance and payments under the contract, including contemplated performance and payments.

(v) Written comments or concurrence of the Office of Chief Counsel.

(g) Nothing contained in this § 18–2.406–4 shall deprive the Comptroller General of his statutory right to question the correctness of any administrative determination made hereunder or deprive any contractor of his right to have the matter determined by the Comptroller General should he so request.

(h) The Procurement Office, NASA Headquarters (Code DKP–3) shall maintain a record of all administrative determinations made in accordance with this § 18–2.406–4, the facts involved, and the action taken in each case. A copy of the determination shall be attached to each copy of any contract rescission or reformation resulting therefrom.

(i) When administrative determination is precluded by the limitations set forth in this § 18–2.406–4, the matter may be considered in accordance with Part 18–17, or submitted to the Comptroller General for decision.

(j) Nothing contained in this § 18–2.406–4 shall prevent the submission by the Director of Procurement of any doubtful case to the Comptroller General. If a contractor's request for correction of an alleged mistake is denied by the Director of Procurement, the contracting officer shall so notify the contractor.

2. Section 18–2.407–8 is revised to read as follows:

§ 18–2.407–8 Protests against award.

(a) *General.*

(1) Contracting officers shall consider all protests or objections to the award of a contract, whether received before or after award. If the protest is oral and the matter cannot otherwise be resolved, written confirmation of the protest shall be requested. The protester shall be notified in writing of the final decision on the written protest.

(2) Every effort shall be made to resolve protests at the installation. It is the responsibility of the contracting officer to decide whether a protest has a valid basis and to take appropriate action when possible without referral to NASA Headquarters. Such action may be taken only with the concurrence of local counsel and shall be followed by a written explanation to NASA Headquarters accompanied by a copy of any pertinent correspondence. However, in the following cases written protests received by the contracting officer should be referred to NASA Headquarters:

(i) The protesting party requests referral to higher authority;

(ii) The protest is known to have been lodged directly with the Comptroller General, a member of Congress, the Small Business Administration, or NASA Headquarters;

(iii) The contracting officer entertains some doubt as to proper action regarding the protest or believes it to be in the best interest of the Government that the protest be considered by NASA Headquarters or the Comptroller General.

(3) In referring a protest to NASA Headquarters, a completely documented case shall be submitted to the Procurement Office, NASA Headquarters (Code DKP–3) including the following:

(i) The letter or other document which initiated the protest, together with all supporting evidence submitted by the person making the protest;

(ii) Relevant letters or other written statements, received from other persons or bidders affected by or involved in the protest, that set forth the facts with respect to their position in the matter, together with any additional supporting evidence;

(iii) A copy of the bid of the protesting bidder and a copy of the bid of the bidder to whom award has been made or who is being considered for award, if relevant to the protest;

(iv) A copy of the invitation for bids, including, where practicable, pertinent specifications, if relevant to the protest;

(v) A copy of the abstract of bids;

(vi) Any other documents which are relevant to the protest;

(vii) A statement signed by the contracting officer setting forth his findings, actions, and recommendations in the matter, together with any additional information and evidence considered to be necessary in determining the validity of the protest. If the award of a contract was made pending resolution of the protest, the contracting officer's statement shall include the determination prescribed in § 18–2.407–8(b)(3); and

(viii) Written comments or concurrence of the Office of Chief Counsel.

(4) Where protests are made directly to NASA Headquarters or where NASA Headquarters receives notice of protests made directly to the Comptroller General, a member of Congress, or the Small Business Administration, the contracting officer shall be requested to furnish information. This will usually require submittal of a completely documented case as prescribed in subparagraph (3) of this this paragraph.

(5) Protests received by NASA Headquarters, in accordance with subparagraphs (2) and (4) of this paragraph, will be acted upon by the Procurement Office, NASA Headquarters. Where substantial doubt exists as to the validity of a protest, the views of the Comptroller General will be obtained.

(6) Where a protest affects another bidder, a contractor, or any other party having a legitimate interest, the contracting officer normally should give prompt notice of the protest to such parties in order that they may take appropriate action on their own behalf. The extent of information to be furnished the affected parties in any particular case will be governed by such matters as legal considerations, the interest of the Government, equitable consideration for the interests of affected parties, and mitigation of losses or other injuries to any and all parties concerned. Affected parties shall be advised that such a notice of protest in no way relieves them of any obligations, under a contract or otherwise, but is intended primarily to afford them a fair opportunity to be heard by, and to present evidence for the consideration of, the agency which will render a decision in the case.

(b) *Protests before award.* If award has not been made, the contracting officer may require that written confirmation of an oral protest be submitted by a specified time and inform the protester that award will be withheld until the specified time. If the written protest is not received by the time specified, the oral protest may be disregarded and award may be made in the normal manner unless the contracting officer, upon investigation, finds that remedial action is required, in which event such action shall be taken.

(1) In appropriate cases, notice of a protest will be given to bidders affected thereby. For example, when a protest against the making of an award is received and the contracting officer determines to withhold the award pending disposition of the protest, each bidder to whom award is proposed and each bidder whose bid might become eligible for award should be informed of the protest and requested, before expiration of the time for acceptance of their bids, to extend the time for acceptance (with consent of sureties, if any) in order to avoid the need for readvertisement. In the event of failure to obtain such extension of bids, then consideration should be given to proceeding with award under subparagraph (3) of this paragraph.

(2) Where a protest has been lodged with NASA, the views of the Comptroller General regarding the protest may be obtained before award whenever such action is considered to be desirable. Where it is known that a protest against the making of an award has been lodged directly with the Comptroller General, a determination to make award need not be withheld pending final disposition by the Comptroller General of a protest, but a notice of intent to make award in such circumstances shall be furnished the Comptroller General, and formal or informal advise should be obtained concerning the current status of the case prior to making the award.

(3) Where a written protest against the making of an award is received, or if it is known that a protest has been made to the Comptroller General, a member of Congress, the Small Business Administration, or NASA Headquarters, award shall not be made until the matter is resolved, unless the contracting officer determines that:

(i) The items to be procured are urgently required;

(ii) Delivery or performance will be unduly delayed by failure to make award promptly; or

(iii) A prompt award will otherwise be advantageous to the Government.

If award is made under subpararaph (3)(i), (ii), or (iii) of this paragraph, the contracting officer shall document the file to explain the need for an immediate award, and shall give written notice of the decision to proceed with the award to the protester and, as appropriate, to others concerned.

(4) The determination required by subparagraph (3) of this paragraph shall be referred to the Procurement Office, NASA Headquarters for approval prior to award if an unresolved protest against such award has been, or is expected to be, referred to NASA Headquarters in accordance with paragraph (a)(2) of this section, or if information on a protest is being prepared by the contracting officer at the request of NASA Headquarters in accordance with paragraph (a)(4) of this section.

(c) *Protests after award.* The general instructions in paragraph (a) of this section are applicable to protests received after award.

PART 18–5—INTERDEPARTMENTAL PROCUREMENT

1. Section 18–5.703 is revised to read as follows:

§ 18–5.703 Procurement of helium.

(a) NASA is required under the provisions of Pub. Law 86–777 (50 U.S.C. 167a et seq.) to obtain its major requirements for helium from the Secretary of the Interior.

(b) Each procurement office shall obtain its requirements for gaseous helium from the Department of the Interior (Bureau of Mines) or other Government support activity supplying Bureau of Mines helium.

(c) Requirements for liquid helium, or gaseous helium of a quality not supplied by the Bureau of Mines may be procured from commercial sources, provided such sources are qualified by the Bureau of Mines and included in the Bureau of Mines publication. "List by Shipping Points of Private Distributors Eligible to Sell Helium to Federal Agencies." Copies of this publication may be obtained from Bureau of Mines, Helium Operations, P.O. Box H4372, Herring Plaza, Amarillo, Texas 79101.

(d) Procurement documents for the commercial procurement of helium shall be annotated:

Pursuant to Parts 1 and 2, Subchapter A, Chapter 1, Title 30, Code of Federal Regulations, helium furnished under this contract (purchase order) shall be Bureau of Mines helium, or shall be replaced by the supplier with an equivalent volume of helium purchased from the Bureau of Mines.

(e) A copy of each contract or purchase order for the supply of helium from commercial sources shall be forwarded to the Bureau of Mines, Helium Operations, P.O. Box H4372, Herring Plaza, Amarillo, Texas 79101.

Dated: August 23, 1973.

GEORGE J. VECCHIETTI,
Director of Procurement.

[FR Doc.73–18309 Filed 8–28–73;8:45 am]

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. R–430; Order No. 490]

MISCELLANEOUS AMENDMENTS

AUGUST 22, 1973.

On October 8, 1971, the Commission issued a notice of proposed rulemaking in this proceeding (36 FR 40174, October 16, 1971) proposing to amend its Uniform Systems of Accounts for Public Utilities and Licensees (Classes A, B, C, and D); FPC Report Form No. 1, Annual Report for Electric Utilities, Licensees and others (Class A and Class B); FPC Report Form No. 1–F, Annual Report for Public Utilities and Licensees (Class C and Class D); FPC Report Form No. 1–M, Annual Report for Municipal Electric Utilities Having Annual Electric Operating Revenues of $250,000 or More; FPC Report Form No. 6, Initial Cost Statement for Licensed Projects; FPC Report Form No. 9, Annual Report Form for Licensees of Privately Owned Major Projects (Utility and Industrial); and its Uniform System of Accounts for Natural Gas Companies (Classes A, B, C, and D); FPC Report Form No. 2, Annual Report for Natural Gas Companies (Class A and Class B); and FPC Report Form No. 2–A, Annual Report for Natural Gas Companies (Class C and Class D). Essentially, it was proposed to (1) eliminate Account 271, Contributions in Aid of Construction, from the systems of accounts, (2) prescribe disposition of the related balances, and (3) prescribe accounting treatment for amounts of contributions in aid of construction (CIAC) in the future, since these amounts continue to accumulate with no procedure for the extinguishment and certain amounts found in the account relate to property no longer in existence.

Comments were invited from interested parties to be submitted by November 23, 1971. Due to requests, this date was extended to February 29, 1972, and finally to March 31, 1972, with seventy-five responses being received, Attachment A. No conference was scheduled due to the comprehensiveness of the responses received.

After considering the responses to the rulemaking, it was determined that the preference between the two proposals, Proposal A [1] and Proposal B [2], were about evenly divided. However, the majority of the group preferring Proposal B did so while making major suggested changes to the proposal.

We are convinced that the need to eliminate Account 271, Contributions in Aid of Construction, from the systems of accounts is warranted (as was borne out by respondents). We have concluded that the most practical, simple, direct and effective means to eliminate the CIAC account is by use of Proposal A procedures, with slight modification. We do so in that the present amounts in the CIAC account continues to grow and in some cases are reaching unreasonable proportions. There is every reason to believe the amounts will continue to increase with no procedure for their extinguishment. In so doing, this balance sheet classification, which has often confused investors and other readers of financial statements, will be completely eliminated. Because of the present arbitrary rules surrounding the use and disposition of amounts accumulated in Account 271 it has led, in some instances, to accounting that does not conform to economic facts. Since the CIAC represents construction and property acquisition at no cost to the company it does not seem equitable that customers should pay, as now allowed through depreciation, a recovery of investment not belonging to stockholders. This elimination does nothing to prevent such stockholders from earning upon the actual dollars that they invested.

We are aware that initially there will be certain administrative problems involved in transferring the accumulated balances from Account 271, particularly in the area of transferring such balances to the related plant in service accounts, however, this added effort at the outset, we believe, will be more than offset by the quality of accounting records as well as the ease of record keeping over that of Proposal B.

A few respondents mentioned the necessity for keeping records of CIAC for certain ad valorem taxes and other administrative purposes. However, others pointed out that crediting these amounts

[1] Credit CIAC to plant, essentially.
[2] Credit CIAC to accumulated provisions for depreciation, essentially.

V 38-167 AUG 29 73 XUM

to plant in service accounts would reduce ad valorem tax payments. It was also mentioned that a reduction in the amount of property available to be pledged under the mortgage indenture agreements would take place. In this connection we understand that it may be advisable to use the contributed amounts for company benefit in some cases. Companies always have the option of maintaining the amounts of CIAC on a memorandum basis for use where the detail is needed for other purposes.

Some respondents suggested that the amounts, if any, of customer advances for construction recorded in Account 252, Customer Advances for Construction, remaining when a customer is refunded the amount to which he is entitled should also be credited to plant accounts, rather than to depreciation accounts as proposed. In this we agree and have so provided.

It was mentioned that Proposal A procedure is contrary to usual accounting practice in commercial and industrial fields. There is no comparison between commercial and utility use of contributions. In other than the regulated industries, contributions become the uncontested property of the company. In the regulated industries, contributions are treated as consumer donated capital on which there is no return allowed to stockholders, and on which we now believe no depreciation should be allowed. We know of no cases in the regulatory field where CIAC is accounted for as presently handled in the commercial and industrial field.

Proposal A, as modified, revokes Account 271, Contributions in Aid of Construction, from the systems of accounts and transfers the account balances therein relating to plant in service to the related property investment account of plant in service, giving rise to the contribution. The amounts accumulated in Account 271 which are related to depreciable property which is no longer in service, or cannot be identified or associated with a plant function, shall be credited to Account 108, Accumulated Provision for Depreciation of Electric (Gas) Utility Plant. Amounts accumulated in Account 271 which are related to nondepreciable type of property that is no longer in service shall be credited to Account 111, Accumulated Provision for Amortization of Electric Utility Plant, for electric utilities, and to Account 111, Accumulated Provision for Amortization and Depletion of Gas Utility Plant, for natural gas companies.[1] Future CIAC shall be credited to the appropriate plant in service account when booked. Where amounts in Account 271 relate to nonutility plant, the amounts shall be credited to Account 122, Accumulated Provision for Depreciation and Amortization of Nonutility Property.

[1] For Class A and Class B companies, Class C and Class D companies use corresponding accounts.

The Commission finds:

(1) The notice and opportunity to participate in this rulemaking proceeding with respect to the matters presently before this Commission through the submission, in writing, of data, views, comments, and suggestions in the manner described above, are consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) The amendments to Parts 101 and 104 of the Commission's Uniform Systems of Accounts for Public Utilities and Licensees; to Annual Report Form No. 1, prescribed by § 141.1; to Annual Report Form No. 1–F, prescribed by § 141.2; to Annual Report Form No. 1–M, prescribed by § 141.7; to FPC Form No. 6 prescribed by § 141.11; to Report Form No. 9, prescribed by § 141.13; all in Chapter I, Title 18, of the Code of Federal Regulations, herein prescribed are necessary and appropriate for the administration of the Federal Power Act.

(3) The amendments to Parts 201 and 204 of the Commission's Uniform Systems of Accounts for Natural Gas Companies; to Part 154, Rate Schedules and Tariffs; to Annual Report Form No. 2, prescribed by § 260.1; and to Annual Report Form No. 2–A, prescribed by § 260.2; all in Chapter I, Title 18 of the Code of Federal Regulations, herein prescribed are necessary and appropriate for the administration of the Natural Gas Act.

(4) Since the amendments prescribed herein, which were not included in the notice of this proceeding, are consistent with the prime purpose of the proposed rulemaking, further compliance with the notice provision of 5 U.S.C. 553 is unnecessary.

(5) Good cause exists for making the amendments to the Uniform Systems of Accounts, Rate Schedules, and Tariffs ordered herein effective January 1, 1974; and the amendments to the report forms ordered herein, effective for the reporting year 1974.

The Commission, acting pursuant to the provisions of the Federal Power Act, as amended, particularly sections 3, 4, 301–304, 308, 309, 311, (41 Stat. 1063–1066, 1353; 46 Stat. 798; 49 Stat. 838–841, 854–856, 858, 859; 61 Stat. 501; 16 U.S.C. 796, 797, 825, 825a, 825b, 825c, 825g, 825h, 825j; and the Natural Gas Act, as amended, particularly Sections 4, 7–10, 15, 16 (52 Stat. 822, 824–826, 829, 830; 56 Stat. 83, 84; 61 Stat. 459; 76 Stat. 72; 15 U.S.C. 717c, 717f, 717g, 717h, 717i, 717n, 717o), orders:

PART 101—UNIFORM SYSTEM OF ACCOUNTS PRESCRIBED FOR CLASS A AND CLASS B PUBLIC UTILITIES AND LICENSEES

A. The Commission's Uniform System of Accounts for Class A and Class B Public Utilities and Licensees prescribed by Part 101, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

1. General Instruction "16. *Separate Accounts or Records for Each Licensed Project*" is amended by revising paragraphs 16(a) and 16(c) thereof. As so amended, paragraphs 16 (a) and (c) read:

General Instructions

. . . . . .

16. *Separate Accounts or Records for Each Licensed Project.* • • •

(a) The actual legitimate original cost of the project, including the original cost (or fair value, as determined under sec. 23 of the Federal Power Act) of the original project, the original cost of additions thereto and betterments thereof and credits for property retired from service, as determined under the Commission's regulations:

. . . . . .

(c) the credits and debits to the depreciation and amortization accounts, and the balances in such accounts;

. . . . . .

2. The Electric Plant Instructions are amended by:

a. Revising the second and third sentences of paragraph C of instruction "1. *Classification of Electric Plant at Effective Date of System of Accounts.*"

b. Revising paragraph D of instruction "2. *Electric Plant to be Recorded at Cost.*"

c. Revoking paragraph B(4) and recodifying present paragraph B(5) as B(4) of instruction "5. *Electric Plant Purchased or Sold.*"

d. Revising the first sentence in paragraph F of instruction "5. *Electric Plant Purchased or Sold.*"

As so amended, the revised portions of the Electric Plant Instructions read:

Electric Plant Instructions

1. *Classification of Electric Plant at Effective Date of System of Accounts.*

. . . . . .

C. • • • The difference between the original cost, as above, and the cost to the utility of electric plant after giving effect to any accumulated provision for depreciation or amortization shall be recorded in account 114, Electric Plant Acquisition Adjustments. The original cost of electric plant shall be determined by analysis of the utility's records or those of the predecessor or vendor companies with respect to electric plant previously acquired as operating units or systems and the difference between the original cost so determined, less accumulated provisions for depreciation and amortization and the cost to the utility with necessary adjustments for retirements from the date of acquisition, shall be entered in account 114, Electric Plant Acquisition Adjustments.• • •

2. *Electric Plant To Be Recorded at Cost.*

. . . . . .

D. The electric plant accounts shall not include the cost or other value of electric plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of electric plant shall be credited to accounts charged with the cost of such construction. Plant constructed from contributions of cash or its equivalent shall be shown as a reduction to gross plant constructed when assembling cost data in work orders for posting to plant ledgers of accounts. The accumulated gross costs of plant accumulated in the work order shall be recorded as a debit in the plant ledger of accounts along with the related amount of contributions concurrently be recorded as a credit.

. . . . . .

5. *Electric Plant Purchased or Sold.*

. . . . . .

B. • • •

(4) The amount of contributions in aid of • • •

F. When electric plant constituting an operating unit or system is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in account 114, Electric Plant Acquisition Adjustments. The amounts (estimated if not known) carried with respect thereto in the accounts for accumulated provision for depreciation and amortization and in account 252, Customer Advances for Construction, shall be charged to such accounts and contra entries made to account 102, Electric Plant Purchased or Sold.• • •

. . . . . .

3. The chart of Balance Sheet Accounts is amended by:

a. Revoking subtitle "10. Contributions in Aid of Construction" and account title "271, Contributions in Aid of Construction."

b. Recodifying subtitle "11. Accumulated Deferred Income Taxes" as "10."

As so amended, the chart of Balance Sheet Accounts reads:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

10. ACCUMULATED DEFERRED INCOME TAXES

. . . . . .

4. The text of the Balance Sheet Accounts is amended as follows:

a. The last sentence in account "252, Customer Advances for Construction," is revised.

b. Subtitle "10. Contributions in Aid of Construction" and account "271, Contributions in Aid of Construction," are revoked.

c. Subtitle "11. Accumulated Deferred Income Taxes" is recodified as "10."

As so amended, these portions of the text of Balance Sheet Accounts read:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

8. DEFERRED CREDITS

. . . . . .

252 **Customer advances for construction.**

• • • When a customer is refunded the entire amount to which he is entitled, according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the respective plant account.

. . . . . .

10. Accumulated Deferred Income Taxes.

. . . . . .

PART 104—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C PUBLIC UTILITIES AND LICENSEES

B. The Commission's Uniform System of Accounts for Class C and Class D Public Utilities and Licensees, prescribed by Part 104, Title 18 of the Code of Federal Regulations is amended as follows:

1. General Instruction "14. *Separate Accounts or Records for Each Licensed Project*" is amended by revising paragraphs 14(a) and 14(c) thereof. As so amended, paragraphs "14(a)" and "(c)" read:

General Instructions

. . . . . .

14. *Separate Accounts or Records for Each Licensed Project.* • • •

(a) the actual legitimate original cost of the project, including the original cost (or fair value, as determined under section 23 of the Federal Power Act) of the original project, the original cost of additions thereto and betterments thereof and credits for property retired from service, as determined under the Commission's regulations;

. . . . . .

(c) the credits and debits to the depreciation and amortization account and the balance in such account;

. . . . . .

2. The Electric Plant Instructions are amended by:

a. Revising paragraph "D" of instruction "1. *Electric Plant to Be Recorded at Cost.*"

b. Revoking paragraph B(4) and recodifying present paragraph B(5) as B(4) of instruction "4. *Electric Plant Purchased or Sold.*"

c. Revising the first sentence in paragraph "F" of instruction. "4. *Electric Plant Purchased or Sold.*"

As revised, these portions of the Electric Plant Instructions read:

Electric Plant Instructions

1. *Electric Plant To Be Recorded at Cost.*

. . . . . .

D. The electric plant accounts shall not include the cost or other value of electric plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of electric plant shall be credited to accounts charged with the cost of such construction. Plant constructed from contributions of cash or its equivalent shall be shown as a reduction to gross plant constructed when assembling cost data in work orders for posting to plant ledgers of accounts. The accumulated gross cost of plant accumulated in the work order shall be recorded as a debit in the plant ledger of accounts along with the related amount of contributions concurrently being recorded as a credit.

. . . . . .

4. *Electric Plant Purchased or Sold.*

. . . . . .

B. • • •

(4) The amount remaining in account 102 • • •

. . . . . .

F. When electric plant constituting an operating unit or system is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in account 114, Electric Plant Acquisition Adjustments. The amounts (estimated if not known) carried with respect thereto in the account for accumulated provision for depreciation and amortization and in account 252, Customer Advances for Construction, shall be charged to such accounts and the contra entries made to account 102, Electric Plant Purchased or Sold. • • •

. . . . . .

3. The chart of Balance Sheet Accounts is amended by:

a. Revoking subtitle "10. Contributions in Aid of Construction" and account title "271, Contributions in Aid of Construction."

b. Recodifying subtitle "11. Accumulated Deferred Income Taxes" as "10."

As so amended, the chart of Balance Sheet Accounts read:

BALANCE SHEET ACCOUNTS

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

10. Accumulated Deferred Income Taxes.

. . . . . .

V 38-167 AUG 29 73 XUM

4. The text of the Balance Sheet Accounts is amended as follows:

a. The last sentence of account "252, Customer Advances for Construction," is revised.

b. Subtitle "10. Contributions in Aid of Construction" and account "271, Contributions in Aid of Construction," are revoked.

c. Subtitle "11. Accumulated Deferred Income Taxes" is recodified as "10."

As so amended, these portions of the text of Balance Sheet Accounts read:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

8. DEFERRED CREDITS

. . . . . .

252 Customer advances for construction.

• • • When a customer is refunded the entire amount to which he is entitled, according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the respective plant account.

. . . . . .

10. Accumulated Deferred Income Taxes.

. . . . . .

PART 141—STATEMENTS AND REPORTS (SCHEDULES)

C. Paragraph (d) of § 141.1, Chapter I, Title 18 of the Code of Federal Regulations is amended by revoking the schedule "Contributions in Aid of Construction". As so amended, that portion of § 141.1(d) reads:

§ 141.1 **Form No. 1 Annual report for electric utilities, licensees and others (Class A and Class B).**

. . . . . .

(d) • • •

Contributions in Aid of Construction. [Revoked]

. . . . . .

PART 154—RATE SCHEDULES AND TARIFFS

D. Paragraph (f) in § 154.63, Chapter I, Title 18 of the Code of Federal Regulations is amended by revising the first sentence of *"Statement B—Rate base and return"* and deleting the reference to "Contributions in Aid of Construction." The amended portions of § 154.63(f) read:

§ 154.63 **Changes in a tariff, executed service agreement or part thereof.**

. . . . . .

(f) *Description of statements.* • • •

. . . . . .

Statement B—Rate base and return. This statement shall summarize the overall gas utility rate base from the figures contained in Statement C, D and E. • • •

PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES

E. The Commission's Uniform System of Accounts for Class A and Class B Natural Gas Companies, prescribed by Part 201, Title 18 of the Code of Federal Regulations is amended as follows:

1. The Gas Plant Instructions are amended by:

a. Revising the second and third sentences of subparagraph "C" of Instruction "1. *Classification of gas plant at effective date of system of accounts.*"

b. Revising paragraph D of Instruction "2. *Gas plant to be recorded at cost.*"

c. Revoking paragraph B(4) and recodifying present paragraph B(5) as B(4) of instruction "5. *Gas plant purchased or sold.*"

d. Revising the first sentence in paragraph F of instruction "5. *Gas plant purchased or sold.*"

As so amended, the revised portions of the Gas Plant Instructions read:

. . . . . .

Gas Plant Instructions

1. *Classification of gas plant at effective date of system of accounts.* • • •

C. • • • The difference between the original cost as above, and the cost to the utility of gas plant after giving effect to any accumulated provision for depreciation, depletion, or amortization shall be recorded in account 114, Gas Plant Acquisition Adjustments. The original cost of gas plant shall be determined by analysis of the utility's records or those of the predecessor or vendor companies with respect to gas plant previously acquired as operating units or systems and the differences between the original cost so determined, less accumulated provisions for depreciation, depletion and amortization, and the cost to the utility, with necessary adjustments for retirements from the date of acquisition, shall be entered in account 114, Gas Plant Acquisition Adjustments. • • •

2. *Gas plant to be recorded at cost.* • • •

D. The gas plant accounts shall not include the cost or other value of gas plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of gas plant shall be credited to the accounts charged with the cost of such construction. Plant constructed from contributions of cash or its equivalent shall be shown as a reduction to gross plant constructed when assembling cost data in work orders for posting to plant ledger of accounts. The accumulated gross costs of plant accumulated in the work order shall be recorded as a debit in the plant ledger of accounts along with the related amount of contributions concurrently being recorded as a credit.

. . . . . .

5. *Gas plant purchased or sold.* • • •

B. • • •

. . . . . .

(4) The amount remaining • • •

. . . . . .

F. When gas plant constituting an operating unit or system is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in account 114, Gas Plant Acquisition Adjustments. The amounts (estimated if not known) carried with respect thereto in the accounts for accumulated provision for depreciation, depletion, and amortization and in account 252, Customer Advances for Construction, shall be charged to such accounts and the contra entries made to account 102, Gas Plant Purchased or Sold. • • •

. . . . . .

2. The chart of Balance Sheet Accounts is amended by:

a. Revoking subtitle "10. Contributions in Aid of Construction" and account title "271, Contributions in Aid of Construction."

b. Recodifying subtitle "11. Accumulated Deferred Income Taxes" as "10."

As so amended, the chart of Balance Sheet Accounts read:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

10. ACCUMULATED DEFERRED INCOME TAXES

. . . . . .

3. The text of the Balance Sheet Accounts is amended as follows:

a. The last sentence of account "252, Customer Advances for Construction," is revised.

b. Subtitle "10. Contributions in Aid of Construction" and account "271, Contributions in Aid of Construction," are revoked.

c. Subtitle "11. Accumulated Deferred Income Taxes" is recodified as "10."

As so amended, these portions of the text of Balance Sheet Accounts read:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

8. DEFFERED CREDITS

. . . . . .

252 Customer advances for construction.

• • • When a customer is refunded the entire amount to which he is entitled, according to the agreement or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the respective plant account.

. . . . . .

10. ACCUMULATED DEFERRED INCOME TAXES

. . . . . .

PART 204—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C NATURAL GAS COMPANIES

F. The Commission's Uniform System of Accounts for Class C and Class D Natural Gas Companies, prescribed by Part 204, Title 18 of the Code of Federal Regulations is amended as follows:

1. The Gas Plant Instructions are amended by:

a. Revising paragraph "D" of instruction "1. *Gas Plant to be Recorded at Cost.*

b. Revoking paragraph B(4) and recodifying paragraph B(5) as B(4) of instruction "4. *Gas Plant Purchased or Sold.*"

c. Revising paragraph F of instruction "4. *Gas Plant Purchased or Sold.*"

As so revised, these portions of the Gas Plant Instructions read:

Gas Plant Instructions

. . . . . .

1. *Gas plant to be recorded at cost.*

. . . . . .

D. The gas plant accounts shall not include the cost or other value of gas plant contributed to the company. Contributions in the form of money or its equivalent toward the construction of gas plant shall be credited to the accounts charged with the cost of such construction. Plant constructed from Contributions of cash or its equivalent shall be shown as a reduction to gross plant constructed when assembling cost data in work orders for posting to plant ledger of accounts. The accumulated gross costs of plant accumulated in the work order shall be recorded as a debit in the plant ledger of accounts along with the related amount of contributions currently being recorded as a credit.

. . . . . .

4. *Gas plant purchased or sold.*

. . . . . .

B. • • •

. . . . . .

(4) The amount remaining in account 102 • • •

. . . . . .

F. When gas plant constituting an operating unit or system is sold, conveyed, or transferred to another by sale, merger, consolidation, or otherwise, the book cost of the property sold or transferred to another shall be credited to the appropriate utility plant accounts, including amounts carried in account 114, Gas Plant Acquisition Adjustments. The amounts (estimated if not known) carried with respect thereto in the account for accumulated provision for depreciation, depletion, and amortization and in account 252, Customer Advances for Construction, shall be charged to such accounts and the contra entries made to account 102, Gas Plant Purchased or Sold. • • •

. . . . . .

2. The chart of Balance Sheet Accounts is amended by:

a. Revoking subtitle "10. Contributions in Aid of Construction" and account title "271, Constributions if Aid of Construction."

b. Recodifying subtitle "11. Accumulated Deferred Income Taxes" as "10."

As so amended, the chart of Balance Sheet Accounts read:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

10. ACCUMULATED DEFERRED INCOME TAXES

. . . . . .

3. The text of the Balance Sheet Accounts is amended as follows:

a. The last sentence of account "252, Customer Advances for Construction," is revised.

b. Subtitle "10. Contributions in Aid of Construction" and account "271, Contributions in Aid of Construction," are revoked.

c. Subtitle "11. Accumulated Deferred Income Taxes" is recodified as "10."

As so amended, these portions of the Balance Sheet accounts will read:

Balance Sheet Accounts

. . . . . .

LIABILITIES AND OTHER CREDITS

. . . . . .

8. DEFERRED CREDITS

. . . . . .

252 Customer advances for construction.

• • • When a customer is refunded the entire amount to which he is entitled, according to the agreement, or rule under which the advance was made, the balance, if any, remaining in this account shall be credited to the respective plant account.

. . . . . .

10. ACCUMULATED DEFERRED INCOME TAXES

. . . . . .

PART 260—STATEMENTS AND REPORTS (SCHEDULES)

G. Paragraph (c) of § 260.1, Chapter I, Title 18 of the Code of Federal Regulations is amended by deleting schedule "Contributions in Aid of Construction." As so amended, that portion of § 260.1(c) reads:

§ 260.1 **Form No. 2, Annual report for natural gas companies (Class A and Class B).**

. . . . . .

(c) • • •

. . . . . .

Contributions in Aid of Construction. [Revoked]

. . . . . .

H. Schedule pages 111, Comparative Balance Sheet, and 226, Operating Reserves (Accounts 261, 262, 263, 264, 265), in F.P.C. Form No. 1, Annual Report for Public Utilities, Licensees and Others (Class A and Class B) prescribed by § 141.1, Chapter I, Title 18 of the Code of Federal Regulations, and F.P.C. Form No. 2, Annual Report for Natural Gas Companies (Class A and Class B) prescribed by § 260.1, Chapter I, Title 18 of the Code of Federal Regulations, are amended as set out in Attachment B hereto.

I. Schedule page 3, Comparative Balance Sheet, in F.P.C. Form No. 1–F, Annual Report for Public Utilities and Licensees (Class C and Class D) prescribed by § 141.2, Chapter I, Title 18 of the Code of Federal Regulations, is amended as set out in Attachment C hereto.[1]

J. Schedule page 3, Comparative Balance Sheet, in F.P.C. Form No. 2–A, Annual Report for Natural Gas Companies (Class C and Class D) prescribed by § 260.2, Chapter I, Title 18 of the Code of Federal Regulations, is amended as set out in Attachment D hereto.[1]

K. Schedule page 2, Balance Sheet, in F.P.C. Form No. 1–M, Annual Report for Municipal Electric Utilities Having Annual Electric Operating Revenues of $250,000 or More, prescribed by § 141.7, Chapter I, Title 18 of the Code of Federal Regulations, is amended as set out in Attachment E hereto.[1]

L. Schedule page 16, Project Cost—Account Totals, in F.P.C. Form of Initial Cost Statement for Licensed Projects (Form No. 6), prescribed in § 141.11, Chapter I, Title 18 of the Code of Federal Regulations, is amended as set out in Attachment F hereto.[1]

M. Schedule page 3, in F.P.C. Form No. 9, Annual Report Form for Licensees of Privately Owned Major Projects (Utility and Industrial), prescribed by § 141.13, Chapter I, Title 18 of the Code of Federal Regulations, is amended as set out in Attachment G hereto.[1]

N. The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By direction of the Commission.

[SEAL] KENNETH F. PLUMB, *Secretary.*

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social and Rehabilitation Service

[45 CFR Part 233]

FINANCIAL ASSISTANCE PROGRAMS

Limitation on Institutional Care

Notice is hereby given that the regulations set forth in tentative form below are proposed by the Administrator, Social and Rehabilitation Service, with the approval of the Secretary of Health, Education, and Welfare. The proposed regulations would implement section 249D of Public Law 92–603, the Social Security Amendments of 1972. They relate to the exclusion from Federal financial participation under the financial assistance titles of any payment for medical or remedial care to an inpatient in an institution if such care is or could be provided under an approved State plan under title XIX, in an institution certified under such title XIX.

Prior to the adoption of the proposed regulations, consideration will be given to any comments, suggestions, or objections thereto which are submitted in writing to the Administrator, Social and Rehabilitation Service, Department of Health, Education, and Welfare, 330 Independence Avenue SW., Washington, D.C. 20201, on or before September 28, 1973. Comments received will be available for public inspection in Room 5121 of the Department's offices at 301 C Street SW., Washington, D.C. on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202–963–7361).

(Sec. 1102, 49 Stat. 64 (42 U.S.C. 1302))

Dated: June 20, 1973.

FRANCIS D. DEGEORGE,
Acting Administrator, Social and Rehabilitation Service.

Approved: August 9, 1973.

FRANK CARLUCCI,
Acting Secretary.

Section 233.145 of Part 233, Chapter II, Title 45 of the Code of Federal Regulations is amended to add paragraph (c) as follows:

§ 233.145 Expiration of medical assistance programs under titles I, IV–A, X, XIV, and XVI of the Social Security Act.

* * * * *

(c) (1) Under the provisions of section 249D of Public Law 92–603, enacted October 30, 1972, Federal matching is not available for any portion of any payment by any State under titles I, IV–A, X, XIV, or XVI of the Social Security Act for or on account of any medical or any other type of remedial care provided by an institution to any individual as an inpatient thereof, in the case of any State which has a plan approved under title XIX of such Act, if such care is (or could be) provided, under a State plan approved under title XIX of such Act, by an institution certified under such title XIX. The effective date of this proposed provision will be the date of publication of the final regulation in the FEDERAL REGISTER.

(2) For purposes of this paragraph,

(i) An institution (see § 233.60(b) (1) of this chapter) is considered to provide medical or remedial care if it provides any care or service beyond room and board because of the physical or mental condition (or both) of its inpatients;

(ii) An inpatient is an individual who is living in an institution which provides medical or remedial care and who is receiving care or service beyond room and board because of his physical or mental condition (or both).

(iii) Federal financial participation is not available for any portion of the payment for care of an inpatient. It is immaterial whether such payment is made as a vendor payment or as a money payment or other cash assistance payment. It is also immaterial whether the payment is divided into components, such as separate amounts or payments for room and board, and for care or services beyond room and board, or whether the payment is considered to meet "basic" needs or "special" needs. If, however, a money payment (or protective payment) is made to an individual who is living in an institution, and such payment does not exceed a reasonable rate for room, board and laundry for individuals not living in their own homes, and no additional payment is made for such individual's care in the institution, Federal financial participation is available in the money payment (or protective payment) since the individual may spend the funds at his discretion and obtain room and board at the place of his choice.

(iv) Federal financial participation is available in cash assistance payments to meet the needs of an inpatient for specific medical services, such as dental care or prescription drugs, which generally are not delivered in an institutional setting and in fact are not provided by the institution to the inpatient.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 73–SO–58]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Lancaster, S.C., transition area.

Interested persons may submit such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before September 28, 1973, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 724, 3400 Whipple Street, East Point, Ga.

The Lancaster transition area described in § 71.181 (38 FR 435) would be amended as follows:

"* * * long. 80°51'18" W.) * * *" would be deleted and "* * * long. 80°-51'18" W.); within 3 miles each side of the 049° bearing from Lancaster RBN (Lat. 34°43'10" N, Long. 80°51'24" W), extending from the 5-mile radius area to 8.5 miles northeast of the RBN * * *" would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for IFR aircraft executing the proposed NDB RWY 24 Instrument Approach Procedure, utilizing the Lancaster (private) Nondirectional Radio Beacon, to Lancaster Airport.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

V 38-167 AUG 29 73 XUM

Issued in East Point, Ga., on August 20, 1973.

DUANE W. FREER,
Acting Director, Southern Region.

[FR Doc.73-18242 Filed 8-28-73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 73-CE-22]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at St. Louis, Missouri.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received on or before September 28, 1973, will be considered before action is taken on the the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

Since designation of controlled airspace at St. Louis, Missouri, a public use instrument approach procedure is being developed for Smartt Airfield, St. Charles, Missouri. Accordingly, it is necessary to alter the St. Louis, Missouri, transition area to provide adequate airspace protection for aircraft executing this new approach procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is amended to read:

ST. LOUIS, MISSOURI

That airspace extending upward from 700 feet above the surface within a 10-mile radius of Lambert St. Louis International Airport (latitude 38°44'50" N., longitude 90°21'55" W.); within 5 miles southeast and 8 miles northwest of the Lambert St. Louis International Airport runway 24 ILS localizer northeast course, extending from the 10-mile radius area to 12 miles northeast of the runway 24 OM; within 5 miles southwest and 9 miles northeast of the Lambert St. Louis International Airport runway 12R ILS localizer northwest course; extending from the runway 12R OM to 12 miles northwest of the OM; within a 7-mile radius of St. Charles Smartt Airport, St. Charles, Missouri (latitude 38°56'00" N., longitude 90°-26'00" W.); within an 8-mile radius of Civic Memorial Airport, Alton, Illinois (latitude 38°53'30" N., longitude 90°03'00" W.); and that airspace extending upward from 1,200 feet above the surface within a 33-mile radius of St. Louis International Airport; within 6 miles southwest and 9 miles northeast of the St. Louis VORTAC 328° radial, extending from the 33-mile radius area to 36 miles northwest of the VORTAC; within 5 miles northwest and 8 miles southeast of the Maryland Heights VORTAC 243° radial, extending from the 33-mile radius area to 19 miles southwest of the VORTAC; within the area bounded on the west and northwest by the east and southeast edge of V-14S, on the northeast by the 33-mile radius area, on the southeast by the northwest edge of V-238° and on the south by the north boundary of V-88; within a 40-mile radius of Scott AFB (latitude 38°32'30" N., longitude 89°51'05" W.); excluding the portion overlying the State of Illinois; that airspace extending upward from 2,500 feet MSL within the area bounded on the northeast by the southwest edge of V-335, on the east by the Missouri-Illinois boundary, on the south by the north edge of V-190 and on the west by the east edge of V-9; and that airspace extending upward from 4,500 feet MSL within the area bounded on the north by the south edge of V-88, on the northeast by the southwest edge of V-9W, on the south by the north edge of V-72, on the west by a line 5 miles west of and parallel to the St. Louis VORTAC 200° radial, and on the northwest by the southeast edge of V-238; within the area bounded on the north by the south edge of V-12, on the southeast by the northwest edge of V-14N, on the southwest by the northeast edge of V-175, and on the northwest by a line 5 miles southeast of and parallel to the Jefferson City, Missouri VOR 041° radial, and within the area bounded on the northeast by the southwest edge of V-52 and the Missouri-Illinois boundary, on the south by the north edge of V-4N, and on the northwest by the southeast edge of V-63.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Kansas City, Missouri, on August 10, 1973.

JOHN M. CYROCKI,
Director, Central Region.

[FR Doc.73-18241 Filed 8-28-73;8:45 am]

[14 CFR Part 93]

[Docket No. 9974; Notice No. 73-23]

HIGH DENSITY TRAFFIC AIRPORTS

Proposed Extension of Reservation Requirements

The Federal Aviation Administration is considering amending Subpart K of Part 93 of the Federal Aviation Regulations to continue, without a specific date of termination, the special air traffic rules for high density traffic airports that would otherwise expire on October 25, 1973.

Interested persons are invited to participate in the subject rulemaking process by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, AGC-24, 800 Independence Avenue SW., Washington, D.C. 20591. All communications received on or before September 28, 1973, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this Notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Rules to limit the hourly number of operations at certain high density airports were first proposed in Notice No. 68-20 on September 8, 1968. As stated therein, delays encountered in certain terminal areas had become critical, and regulatory action had to be taken to alleviate congestion at five of the largest terminal airports. Twelve notices of proposed rulemaking or withdrawals, and seven regulatory actions, have been issued in prescribing a regulatory solution to this problem. Since that time, the daily number of delays of 30 minutes or more have decreased from a maximum of nearly 650 to 165. The rules have, unquestionably, brought about a marked improvement in the situation at these airports. However, owing to the rising demand for airport use, and the increased use of heavy jet aircraft that require additional separation and handling, it is apparent that if the rules were allowed to terminate, congested conditions with long delays, both airborne and on the surface, would soon be prevalent at these airports. To achieve the most efficient use of the airspace and airport facilities, the FAA believes that it is essential to retain these rules on a continuing basis, and that repeated extensions of termination dates would serve no useful purpose.

However, airspace users are advised that monitoring the need for quotas at each airport would continue, and quotas adjusted where appropriate, to ensure that no unnecessary restrictions are allowed to develop.

Accordingly, it is proposed that § 93.133 providing a termination date for this subpart be deleted, thereby extending the rules in Subpart K indefinitely.

Previous amendments to this subpart have resulted in a need for making three nonsubstantive editorial changes. In § 93.121, reference to aircraft equipment would be deleted since the requirement for that equipment was stricken by Amendment No. 93-25. Similarly, reference to paragraphs (a) and (b) of § 93.125, which no longer exist, would be deleted from §§ 93.130 and 93.133.

AUTHORITY: Sections 103, 307, 313(a), and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1303, 1348, 1354(a) and 1421); section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and Section 1.4(c) of Part 1 of the Office of the Secretary (49 CFR 1.4(c)).

In consideration of the foregoing, it is proposed that Subpart K of Part 93 be amended as follows:

1. By amending § 93.121 by deleting the words "the aircraft equipment and" between the words "prescribes" and "air traffic rules."

2. By amending § 93.130 by deleting the phrase "§§ 93.125(a) and 93.125(b)" between the words "prescribed in" and "if he finds" and substituting "§ 93.125" therefor.

3. By deleting § 93.131.

4. By amending § 93.133 by deleting the phrase "§ 93.125 (a) and (b)" between the words "and" and "do" and substituting "§ 93.125" therefor.

Issued in Washington, D.C., on August 22, 1973.

ROBERT W. MARTIN,
Acting Director, Air Traffic Service.

ENERGY POLICY OFFICE

[32A CFR Chapter XIII]

ESTABLISHMENT OF PRIORITIES OF USE AND ALLOCATIONS OF SUPPLY FOR CERTAIN LOW SULFUR PETROLEUM PRODUCTS

Notice of Public Hearing and Proposed Rulemaking

On June 11-14, 1973, hearings were held concerning the operation of the voluntary allocation program for petroleum products and the need for a mandatory allocation program. These hearings indicated that the voluntary program had done significant good, but that difficulties were being experienced in certain parts of the country and in certain sectors of the industry.

In the Energy Policy Office statement of August 9, 1973, it was indicated that the current fuel situation had led the Administration to consider action which would temporarily prohibit utilities, industrial, and commercial firms from (a) switching from coal to petroleum or petroleum products, (b) switching from residual fuels to home heating fuels, or (c) increasing the quantity of distillates blended into residual fuel oil, except where such actions were absolutely necessary to meet primary (health related) ambient air quality standards.

As there may be insufficient supplies of petroleum products, especially home heating oils, to meet essential needs in certain parts of the country and to insure an adequate supply to the independent distributors and marketers, priorities for use and allocation of supplies for certain petroleum products are being established pursuant to section 203(a)(3) of the Economic Stabilization Act of 1970, as amended. Specifically, this regulation aims to prevent coal-to-oil fuel conversions and to delay shifts to lower sulfur content fuel oils than were in use as of the effective date of this regulation; except where such actions are required to achieve primary air quality standards.

Provisions to prohibit coal-to-oil switching except to achieve primary air quality standards are directly supportive of the Environmental Protection Agency's Clean Fuels Policy. That policy urges the States to delay attainment dates for secondary standards as they apply to coal-fired combustion sources and specifically discourages coal-to-oil switching, except to meet primary air quality standards. Under this proposal, coal burning sources will still be required to comply with State sulfur regulations except that they could not convert to oil unless such conversion is needed to meet primary air quality standards.

In view of the tight market for low sulfur fuel oil, the other provisions of the measure prohibit oil-burning sources from shifting to lower sulfur fuel oils than presently in use except to meet primary air quality standards. This measure does not roll back any gains already made in reducing the sulfur content of fuel oils under the Clean Air Act. It does impose a temporary halt in the trend toward lower sulfur content fuel oil wherever progress toward primary standards is not affected.

As required by section 203(a)(3) of the Economic Stabilization Act, a public hearing will be held on the proposed regulation. If the regulations are to become effective in time to significantly increase the supply of home heating oil available this winter, it is necessary to to shorten the notice period for the public hearing and comment. Therefore, the public hearing will be held in Washington, D.C., beginning at 9 a.m. (e.s.t.) Thursday, September 6, 1973, and continuing through Friday, September 7, 1973, in the auditorium of the United States Department of the Interior main building, 19th and E Streets, NW., Washington, D.C. 20240, for the purpose of receiving comments and testimony on all phases of the Proposed Program to Establish Priorities and Allocate Supply for Certain Low Sulfur Petroleum Products.

In addition, interested persons are invited to submit twenty (20) copies of any written comments on the proposal to the Office of Oil and Gas, Department of the Interior, Washington, D.C. 20240, Attention: Dr. Lisle Reed. Comments received no later than September 7th will be considered.

JOHN A. LOVE,
Director, Energy Policy Office.

AUGUST 24, 1973.

A new chapter XIII is added to Title 32A CFR consisting of the following EPO-Reg. 2:

EPO REG 2—PRIORITIES FOR USE OF CERTAIN LOW SULFUR PETROLEUM PRODUCTS

Sec.
1 Purpose and Intent.
2 Definitions.
3 Boilers not currently burning petroleum products.
4 Boilers currently burning petroleum products.
5 New boilers.
6 Exceptions to meet primary ambient air quality standards.
7 Other exceptions.
8 Termination.

AUTHORITY: Sec. 203(a)(3) of the Economic Stabilization Act as amended by PL 93-28; 12 U.S.C. 1904 (Note); EO 11695, 38 FR 1473; COLC Order 33, 38 FR 20960.

Section 1 Purpose and intent.

The purpose of the regulation is to assure the optimum use of the limited supplies of low sulfur petroleum products in a manner consistent with the provisions of the Clean Air Act, as amended, and the Clean Fuels Policy of the Environmental Protection Agency. This regulation is not intended to affect or preempt the development of individual source compliance schedules or other actions associated with implementation of the Clean Air Act, except with regard to the timing of actual shifts to burning lower sulfur oil during the period this regulation is in effect.

To the extent that provisions of applicable State implementation plans requiring changes in fuel usage are not consistent with this regulation, the provisions of this regulation shall take precedence.

Sec. 2 Definitions.

(a) "Boiler" means any boiler, burner, or other combustor of fuel in any electric power generating plant or industrial or commercial plant having a firing rate of 250 million BTU/hour in commercial operation on or prior to the effective date of this regulation.

(b) "Petroleum Product" means petroleum, distillate fuel, residual fuel oil, or any other petroleum product.

(c) "Primary Air Quality Standards" means the national primary ambient air quality standards provided for in the Clean Air Act, as amended. (42 U.S.C. 1857 *et seq.*)

Sec. 3 Boilers not currently burning petroleum products.

No petroleum product shall be sold or otherwise provided to or accepted by any person for burning under boilers that were not using petroleum products on the effective date of this regulation. Automatic exception is granted for boilers converting from natural gas, provided that alternative fuels, such as coal, cannot practically be utilized.

Sec. 4 Boilers currently burning petroleum products.

(a) Petroleum products may continue to be utilized by persons using them in boilers burning petroleum products on the effective date of this regulation except that:

(1) No petroleum product having a lower sulfur content, by weight, than any petroleum product in use in such a boiler during the month preceding the date hereof shall be sold or otherwise provided or accepted by any person or firm for use in such boiler;

(2) The aggregate quantity of petroleum product utilized by such person in any month subsequent to the date of

V 38-167 AUG 29 73 XUM

this regulation in any such boiler capable of burning coal and petroleum products shall not exceed the larger of the aggregate quantity of petroleum products consumed in the corresponding month of 1972 or in July 1973, except that the quantity of petroleum products burned may be increased in proportion to the increased output of steam.

(3) The quantity of distillate fuel oil utilized by such person in any month subsequent to the date of this regulation in any such plant shall not exceed the larger of the quantity of distillate fuel oil consumed in the corresponding month of 1972 or in July 1973, except that the quantity of distillate fuel oil burned may be increased in proportion to the increased output of steam.

(4) In order to discourage further increase in the indirect use of distillate fuels in the form of a mixture of distillate and residual fuel oils:

(i) No refiner, fuel dealer, or user, shall blend more distillate fuel oils into residual fuel oil than the greater of the quantities blended in the corresponding month of 1972, or in July 1973, except where essential to meeting primary standards.

(ii) No person shall use under a boiler a blended fuel containing a greater proportion of distillate fuels than the larger of

(A) the proportion included in the corresponding month of 1972, or

(B) the proportion included in July 1973, except where essential to meeting primary air standards.

(iii) Those quantities of fuels containing distillates that constitute plant or firm inventories as of the effective date of this regulation may be consumed by or sold for use in boilers until those quantities are depleted.

(b) This section is intended to preempt, in part, State Implementation Plans and associated individual source compliance schedules required under the Clean Air Act where these measures would:

(1) Cause existing oil burning sources to shift to a lower sulfur content fuel oil during the effective period of this regulation, and

(2) Where such actions are not required for the achievement of primary air quality standards.

Sec. 5 New Boilers.

(a) Any person with boilers which begin commercial operations after the effective date of this regulation shall not utilize any petroleum products with sulfur content by weight lower than that needed to meet primary ambient air quality standards or to comply with EPA new source standards. (b) This section is not intended to preempt the new source performance standards of the Clean Air Act, as amended. In the event this section conflicts with such standards, the provisions of the Clean Air Act prevail and the prohibitions in this section do not apply.

Sec. 6 Exceptions To Meet Primary Ambient Air Quality Standards.

(a) The Office of Oil and Gas in the Department of the Interior shall automatically grant exceptions to the prohibitions contained in these regulations when the use of petroleum products is properly certified by the appropriate State air pollution control agency to be essential to meeting the primary air quality standard of the air quality region in which the plant is located. (b) With respect to § 3, the Office of Oil and Gas shall grant exceptions pursuant to this section only when suitable alternative fuels are not available.

Sec. 7 Other Exceptions.

The Office of Oil and Gas may grant exceptions from the prohibitions of this regulation if:

(a) Any person subject to this regulation can demonstrate that compliance would cause an undue economic hardship; or

(b) Fuels necessary for compliance with this regulation are not available.

Sec. 8 Termination.

The provisions of this regulation shall be in effect for not longer than one year following its effective date, or until the expiration of Section 203(a)(3) of the Economic Stabilization Act of 1970, which ever occurs first.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

ALASKA

Public Hearing on Proposed Transportation and/or Land Use Control Strategies

Proposed transportation control plans for the Northern Alaska Intrastate Region were published in the FEDERAL REGISTER on July 16, 1973 (38 FR 18938). The Administrator intends that any Federal regulations be as responsive as possible to the needs of the Northern Alaska Intrastate Region. Therefore, a public hearing will be held on this and any alternative proposals in Fairbanks at 7 p.m. on Thursday, September 6, 1973. The hearing will be held at the Alaska Land Civic Center Theatre, Airport Road, Fairbanks.

It is preferred that persons desiring to testify notify Ms. Betty Weise, EPA Region X, 1200 Sixth Avenue, Seattle, Washington 98101.

Dated: August 23, 1973.

ROBERT L. SANSOM,
Assistant Administrator for Air and Water Programs.

[FR Doc.73-18247 Filed 8-28-73;8:45 am]

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

[Public Notice 397; Delegation of Authority No. 128]

INSPECTOR GENERAL, FOREIGN ASSISTANCE

Delegation of Authority

Pursuant to the authority vested in me by section 4 of the Act of May 26, 1949, as amended (22 U.S.C. 2658), I hereby delegate to the Inspector General, Foreign Assistance the authority successively to redelegate any of the functions vested in the Department of State, and not heretofore reserved to the Secretary of State, by section 624(d) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2384(d)).

This Delegation of Authority shall be effective August 29, 1973.

Dated August 21, 1973.

[SEAL] WILLIAM P. ROGERS,
Secretary of State.

DEPARTMENT OF THE TREASURY

Customs Service

[484.17]

STANDARD NEWSPRINT PAPER

Proposal To Change Minimum Basis Weight

AUGUST 23, 1973.

The purpose of this notice is to advise interested persons that the Customs Service has been requested that the minimum basis weight of standard newsprint paper, provided for in the free provision of item 252.65, Schedule 2, Subpart B, Tariff Schedules of the United States (TSUS), be revised downward to 24.5 pounds.

The test for determining whether a paper is classifiable as standard newsprint paper under item 252.65 is whether as of the time of its importation the paper is of a class or kind chiefly used in the printing of newspapers.

Chief use is determinable by the use in the United States at, or immediately prior to, the date of importation, in accordance with General Headnote 10(e)(i), TSUS, which provides:

10(e) In the absence of special language or context which otherwise requires—

(i) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of articles of that class or kind to which the imported articles belong, and the controlling use is the chief use, i.e., the use which exceeds all other uses (if any) combined.

Treasury Decision 56349, dated January 22, 1965, as amended by Treasury Decision 68-265(20), October 22, 1968, presently sets out that most papers which conform to the following descriptive specifications:

Weight.—500 sheets each 24 by 36 inches not less than 28½ pounds nor more than 35 pounds (per ream of 432,000 square inches).

Size.—Rolls not less than 13 inches wide and 28 inches in diameter. Sheets not less than 20 by 30 inches.

Thickness.—Not over 0.0042 inch.

Sizing.—Time of transudation of water shall be not more than 10 seconds by the ground glass method.

Ash Content.—Not more than 6.5 percent.

Color and Finish.—White; or tinted shades of pink, peach, or green in rolls; not more than 50 percent glare when tested with the Ingersoll glarimeter.

are classifiable as standard newsprint paper under item 252.65, TSUS, so long as the existing conditions of chief use prevail.

Written comments and proposals are requested from interested parties pertaining to chief use in the United States of paper which conforms to the foregoing descriptive specifications but with lower basis minimum weights within the range of 24½ pounds to 28½ pounds.

Consideration will be given to any relevant data, views, or arguments for or against the tariff classification of a paper with basis weight lower than 28½ pounds under the free provision for standard newsprint paper in item 252.65, TSUS, which are submitted to the Commissioner of Customs, Washington, D.C. 20229, in writing. To assure consideration, these communications must be received not later than Oct. 29, 1973. No hearings will be held.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Internal Revenue Service

ORGANIZATION AND FUNCTIONS

This material supersedes statements on organization and functions numbered 1118.8, published at 37 FR 20989.

Dated August 21, 1973.

[SEAL] DONALD C. ALEXANDER,
Commissioner.

1118.8 STABILIZATION DIVISION

(1) Directs and administers the District Economic Stabilization Program involving planning, organizing, coordinating, and evaluating District Stabilization activities which include: responding to inquiries from the public; disseminating information to the public; analyzing and issuing decisions upon application for exceptions and appeals; conducting investigations; resolving complaints of violations by obtaining compliance, where possible, and recommending enforcement action when necessary.

(2) Program management of District Stabilization activities is accomplished through twenty-nine Key Districts which are responsible for technical and managerial guidance to and which exercise functional supervision for Stabilization work performed in the related Associate Districts. The Key District/Associate District relationship is:

Key districts	*Associate Districts*
Boston	Augusta
	Burlington
	Portsmouth
Brooklyn	NONE
Buffalo	Albany
Hartford	Providence
Manhattan	NONE
Baltimore	Do.
Richmond	Do.
Newark	Do.
Philadelphia	Wilmington
Pittsburgh	NONE
Atlanta	Birmingham
Jacksonville	NONE
Greensboro	Columbia
Nashville	Jackson
Cincinnati	Louisville
Indianapolis	NONE
Cleveland	Parkersburg
Detroit	NONE
Chicago	NONE
St. Louis	Springfield
Des Moines	Omaha
St. Paul	Aberdeen
	Fargo
Milwaukee	NONE
Austin	New Orleans
Dallas	Albuquerque
Oklahoma City	Cheyenne
	Denver
	Little Rock
	Wichita
Los Angeles	Honolulu
	Phoenix
San Francisco	Reno
	Salt Lake City
Seattle	Anchorage
	Boise
	Helena
	Portland

(3) The Division structure conforms to one of three established organizational patterns which are:

(a) Two branches: the Compliance and Enforcement Branch and the Technical Services Branch;

(b) A Compliance and Enforcement Branch and a Technical Staff; or

(c) No branch structure—the organization is directly under the Division Chief.

V 38-167 AUG 29 73 XUM

(4) The particular organizational pattern authorized depends upon: the size of the Key District Office and any related Associate Districts over which functional supervision is exercised; the geographic area encompassed; and the volume and complexity of the workload of the Key District and any related Associate Districts.

(5) In Districts where a two-branch structure has been authorized for the Stabilization Division, the branches will be the Compliance and Enforcement Branch, as defined in 1118.81 below; and the Technical and Services Branch, as defined in 1118.82 below. In Districts where one branch and a staff group have been authorized for the Stabilization Division, the organization structure will be a Compliance and Enforcement Branch, as defined in 1118.81 below; and a Technical Staff which will perform these duties under the Technical and Services Branch in 1118.82 below, without the Branch supervisory structure. In the small Key Districts and all Associate Districts, the functional description of branches in 1118.81 and 1118.82 below, are performed by staff personnel. Associate Districts may use the organizational title of "Stabilization Officer" for the person who will be the primary representative of the District for Stabilization matters.

1118.81 COMPLIANCE AND ENFORCEMENT BRANCH

This branch is responsible for matters involving compliance and enforcement activities under the Economic Stabilization regulations. This branch has operational responsibility for local investigative and industry monitoring programs, and reports on National Office directed pay or price fact-finding investigations and surveys, local enforcement activities as authorized and directed by the National Office and other special projects deemed appropriate by the Regional and/or National Office.

1118.82 TECHNICAL AND SERVICES BRANCH

This branch has operational responsibility for providing technical and general information to the public; analyzing and issuing decisions upon applications for exceptions and appeals; furnishing interpretive support to other organizational components of Key and Associate Districts; assuring program uniformity; operating and maintaining the Stabilization reporting and information system; and other special projects deemed appropriate by the Regional and/or National Office.

1118.9 OFFICES BELOW THE DISTRICT HEADQUARTERS

(1) Offices below the district headquarters (Area, Zone, and Local offices as defined below) perform one or more of certain Collection, Taxpayer Service, Audit, and Intelligence functions such as: the collection of delinquent accounts and the securing of delinquent returns; the receiving and deposit of monies tendered in payment of taxes; conducting taxpayer service and related assistance activities to meet local taxpayer needs; the examination of returns to determine correct liability of taxpayers for tax and penalties; the holding of conferences with taxpayers and their representatives regarding the determination of liability for tax and penalties; and the investigation of alleged criminal violation of the tax statutes. They also contain, to a limited extent, other functions such as administrative support.

(2) Offices below the district headquarters are classified according to these types:

(a) *Area office.*—An Area office is a major subdivision of the District Office and usually contains all of its principal functional elements including one or more groups of Revenue Agents, one or more groups of Revenue Officers, an Office Group, and a Teller. Generally, it also contains one or more Special Agents.

(b) *Zone office.*—A Zone office is an intermediate size office which includes one or more groups of Revenue Agents or one or more groups of Revenue Officers. Generally, it also contains one or more Special Agents. Usually it does not have a Teller and if it has Office Group personnel, they are supervised from some other office.

(c) *Local office.*—All other offices below the district headquarters are classified as Local offices. Primarily, these are small posts of duty where the workload does not warrant the stationing of Revenue Agents and Revenue Officers in group strength.

(3) Program planning and functional supervision for personnel of an Area, Zone, or Local office are the responsibilities of the appropriate divisions of the District Office. However, administrative supervision of such an office may be assigned to an individual upon a determination by the District Director that such a position is needed in order to represent all IRS functions to the public, to coordinate functions, and to provide common administrative services. This position is to be assigned as an additional responsibility to one of the regular functional personnel of the office, usually the ranking or senior officer. Each person assigned this additional responsibility will be designated as the "(inserting name of city) representative" of the District Director.

(4) Generally, offices below the district headquarters do not contain Branch Chiefs in any of the functional activities. However, if the workload of an office (including nearby offices supervised by such office) is sufficient to justify five or more Audit groups, the District Director may determine that the needs for local supervision warrant the stationing of an Audit Branch Chief in the office. Similarly, if the workload justifies five or more Revenue Officer groups (counting less than ten Office Branch employees as the equivalent of a group; of ten or more Office Branch personnel as two groups), the District Director may establish a Field Branch Chief. Recommendations for establishing such positions shall be forwarded to the Regional Commissioner for approval in accordance with regular procedures for effecting changes in organization.

(5) When the personnel of an office below the district headquarters are supervised by Group Managers or Branch Chiefs, all of the functions in such offices will generally receive line supervision from the same city in order to foster functional coordination and efficient utilization of clerical and other manpower. However, when the District Director finds that the best interests of the Service require a different arrangement, he is authorized to make an exception. Exceptions may be particularly needed for those activities, such as Intelligence, which are more thinly represented than the Audit and Collection and Taxpayer Service functions; and for specialists, such as those trained in estate, gift, and excise tax work.

[FR Doc.73-18318 Filed 8-28-73;8:45 am]

Office of the Secretary

RUBBER THREAD FROM ITALY

Tentative Discontinuance of Antidumping Investigation

Information was received on January 22, 1973, that natural rubber thread from Italy was being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 *et seq.*) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of February 26, 1973 (38 FR 5195). An amendment to that notice was published in the FEDERAL REGISTER of July 10, 1973 (38 FR 18389). The purpose of the amendment was to expand the scope of the original notice to encompass all rubber thread, natural and synthetic.

I hereby announce a tentative discontinuance of the antidumping investigation concerning rubber thread from Italy.

Statement of Reasons on Which This Tentative Discontinuance of Antidumping Investigation Is Based:

The investigation revealed that the proper basis for comparison, for fair value purposes, is between purchase price and the adjusted home market price of such or similar merchandise.

Purchase price was calculated on the basis of the f.o.b. Genoa or the c.i.f. duty-paid delivered price, with deductions, as appropriate, for included U.S. inland freight and insurance, U.S. duty, ocean freight and marine insurance, and Italian inland freight and insurance. An adjustment was made for a special discount where it applied.

Home market price was calculated on the basis of the weighted-average delivered price with a deduction for inland freight. Adjustments were made for trade, quantity and cash discounts as well as for a packing cost differential.

Comparisons between purchase price and the adjusted home market price revealed some instances where purchase price was lower than the adjusted home market price of such or similar merchandise. However, these were determined to be minimal in terms of the volume of export sales involved.

In addition, formal assurances were received from the sole manufacturer investigated that it would make no future sales at less than fair value within the meaning of the Act. That manufacturer is believed to have been the only exporter of rubber thread to the United States during the period of investigation.

The facts recited above constitute evidence warranting the discontinuance of the investigation.

Interested persons may present written views or arguments, or request in writing that the Assistant Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Assistant Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street NW., Washington, D.C. 20229, in time to be received by his office by September 10, 1973. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than September 28, 1973.

Unless persuasive evidence or argument to the contrary is presented pursuant to the preceding paragraphs, a final notice will be published discontinuing the investigation.

This notice of tentative discontinuance of antidumping investigation is published pursuant to § 153.15(b) of the Customs Regulations (19 CFR 153.15(b)).

[SEAL] EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

Federal Bureau of Investigation

NATIONAL CRIME INFORMATION CENTER ADVISORY POLICY BOARD

Notice of Meeting

The National Crime Information Center Advisory Policy Board will meet on September 13 and 14, 1973, at the Prom Sheraton Hotel in Kansas City, Missouri. The meetings will begin at 9:30 a.m. and conclude at 4:30 p.m.

The purpose of this meeting will be to review the minutes of the previous meeting, to consider suggestions concerning NCIC and discuss matters presented as new business.

The meeting will be open to the public. Persons who wish to make statements and ask questions of the Board Members, must file written statements or questions at least twenty-four hours prior to the opening of each meeting. These statements or questions shall be delivered to the person of the Designated Federal Employee or the Assistant Director, Computer Systems Division of the FBI.

To the extent that time permits, public discussion is invited regarding agenda items.

A portion of the meeting dealing with the operational aspects of NCIC will be, of necessity, closed to the public.

The NCIC Advisory Policy Board is constituted according to Public Law 92-463 and its membership is composed of law-enforcement representatives from throughout the United States.

Further information may be obtained from Mr. Norman Stultz, Section Chief, Computer Systems Division, FBI HQ, Washington, D.C.

Minutes of those portions of the meeting which are open to the public will be available 30 days from the date following the adjournment on September 14, 1973, upon request of the above designated FBI Official.

WASON G. CAMPBELL,
Assistant Director, Computer Systems Division.

PROPOSED PROTOTYPE OIL SHALE LEASING PROGRAM

Notice of Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. §§ 4332(2)(C)) the Department of the Interior has prepared a final environmental statement for a Proposed Prototype Oil Shale Leasing Program which, if implemented, would make available for private development up to six oil shale tracts, two each in Colorado, Utah, and Wyoming. A decision concerning program implementation

V 38 167 AUG 29 73 XUM

will be reached no sooner than October 29, 1973.

The final statement represents over three years of intensive effort by a multidiscipline Task Force and considers nearly 3,000 pages of comments, oral testimony, and exhibits developed during public review following the Notice of Availability of the draft statement and Notice of Public Hearings which appeared in the FEDERAL REGISTER, on September 7, 1972, Vol. 37, No. 174, pg. 18098. The final statement is published in 6-volumes and may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Map Information Office, Geological Survey, U.S. Department of the Interior, Washington, D.C. 20240.

Bureau of Land Management State Offices at Colorado State Bank Building, 1600 Broadway, Denver, Colorado 80202; Federal Building, 124 South State, Salt Lake City, Utah; and Joseph C. O'Mahoney Federal Center, 2120 Capital Avenue, Cheyenne, Wyoming 82001.

The Cost for a complete set is $28.75; each volume may also be purchased individually. The content of each volume and price is as follows:

Volume I.—Assesses the current state of oil shale technology; describes regional environmental impact of mature oil shale development at a rate of 1-million b/d by 1985. Cost: $6.15.

Volume II.—Extends Volume I study with an examination of energy alternatives to the 1-million b/d level of oil shale production. Volumes I and II thus consider regional and cumulative aspects of a mature oil shale industry. Cost: $2.85.

Volume III.—Examines the specific action under consideration—the leasing and development of two prototype oil shale leases in each of the States of Colorado, Utah, and Wyoming. Its focus is on the specific environmental impacts of prototype development on public lands which, when combined, could support a production potential of around 250,000 barrels per day. Cost: $5.90.

Volume IV.—Describes the consultation and coordination with others in the preparation of the final statement and future plans of the Department. Includes analysis of comments received and the Department's responses. Cost: $2.85.

Volume V.—Contains letters received during the review process and describes review process. Cost: $7.25.

Volume VI.—Contains transcripts of the six public hearings held in October 1972. Cost: $3.75.

Inspection copies are available in the Library and the Office of the Oil Shale Coordinator, U.S. Department of the Interior, Washington, D.C., and at depository libraries throughout the Nation.

Inspection copies also are available in the Office of the Deputy Oil Shale Coordinator, Room 237E, Building 56, Denver Federal Center, Denver, Colorado 80225; in Bureau of Land Management State Offices listed above; and the following Bureau of Land Management District Offices: *Colorado*, Canon City, Craig, Glenwood Springs, Grand Junction, Montrose; *Utah*, Vernal, Price, Monticello, Kanab, Richfield; *Wyoming*, Rock Springs, Rawlins, Casper, Lander, Pinedale, and Worland.

Dated August 24, 1973.

JOHN M. SEIDL,
Deputy Assistant Secretary of the Interior.

GRAIN STANDARDS

North Carolina Inspection Point

Statement of considerations.—On July 6, 1973, there was published in the FEDERAL REGISTER (38 FR 18050) a notice announcing a request by the North Carolina Department of Agriculture, Raleigh, North Carolina, that its assignment at Elizabeth City, North Carolina, as a designated inspection point be revoked, in accordance with the provisions of § 26.99 of the regulations (7 CFR 26.99) issued under the U.S. Grain Standards Act (sec. 8, 39 Stat. 485, as amended 82 Stat. 768; 7 U.S.C. 87e). The request was made

V 38-167 AUG 29 73 XUM

because of the low volume of grain inspection work at Elizabeth City. Interested organizations and persons were given until August 6, 1973, to submit written data, views, comments and/or arguments with respect to the proposed revocation.

No comments were received with respect to the July 6, 1973, notice in the FEDERAL REGISTER. Therefore the assignment of Elizabeth City, North Carolina, as a designated inspection point is revoked without prejudice to the North Carolina Department of Agriculture.

Done in Washington, D.C., on August 23, 1973.

E. L. PETERSON,
Administrator,
Agricultural Marketing Service.

SHIPPERS ADVISORY COMMITTEE

Notice of Public Meeting

Pursuant to the provisions of § 10(a)(2) of Public Law 92-463, notice is hereby given of a meeting of the Shippers Advisory Committee established under Marketing Order No. 905 (7 CFR Part 905). This order regulates the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida and is effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The committee will meet in the auditorium of the Florida Citrus Mutual Building, 302 South Massachusetts Avenue, Lakeland, Florida, at 10:30 a.m., local time, on September 6, 1973.

The meeting will be open to the public and a brief period will be set aside for public comments and questions. The agenda of the committee includes consideration of a marketing policy for the 1973-74 shipping season, analysis of information concerning market supply and demand factors, and the need for regulation of shipments of any grade or size of such fruits, including export shipments, and the size, capacity, weight, dimensions or pack of the containers used in export shipments other than to Canada or Mexico.

The names of committee members, agenda, summary of the meeting, and other information pertaining to the meeting may be obtained from Frank D. Trovillion, Manager, Growers Administrative Committee, P.O. Box R, Lakeland, Florida, 33802; telephone 813-682-3103.

Dated August 23, 1973.

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S-385]

OPERATING-DIFFERENTIAL SUBSIDY FOR CARRIAGE OF BULK CARGO PRINCIPALLY BETWEEN THE U.S. AND U.S.S.R.

Notice of Intent To Extend Existing Agreements

Notice is hereby given that it is the intent of the Maritime Administration to extend, upon application, operating-differential subsidy contracts of operators listed in Appendix A with respect to bulk cargo carrying service in the U.S. foreign trade, principally between the United States and the Union of Soviet Socialist Republics, said extension to expire, unless extended, on December 31, 1973 (except for subsidized voyages in progress on that date). Inasmuch as the operators listed in Appendix A and/or related persons or firms, employ ships in the domestic, intercoastal or coastwise service, written permission of the Maritime Administration under section 805(a) of the Merchant Marine Act, 1936, as amended, will be required for each operator upon extension of its contract, notwithstanding that a voyage in the above-mentioned bulk carrier service would not be eligible for subsidy if the vessel carried domestic commerce of the United States on that voyage.

The operators listed in Appendix A have previously been granted written permission with respect to such services in fiscal year 1973.

Any person, firm or corporation having any interest (within the meaning of section 805(a)) concerning any operator listed in Appendix A and desiring to be heard on issues pertinent to section 805(a) or desiring to submit comments or views concerning any operator must, by close of business on August 31, 1973, file same with the Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled for 10 a.m., September 4, 1973, in Room 4896 Department of Commerce Building, Fourteenth & E Streets NW., Washington, D.C. 20230. The purpose of the hearing will be to receive evidence under section 805(a) relative to whether the proposed operation (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

Dated: August 24, 1973.

By Order of the Maritime Administration.

AARON SILVERMAN,
Assistant Secretary.

APPENDIX A

I. Name of company.—Globe Seaways, Inc. (Globe), Ocean Transportation Company, Inc. (Ocean), Overseas Oil Carriers, Inc. (Overseas), Overseas Bulktank Corporation (Bulktank), Intercontinental Bulktank Corporation, (Intercontinental), Ocean Tankships Corporation (Tankships), Interseas Bulk Carriers, Inc. (Interseas), Intercontinental Carriers, Inc. (Carriers), Ocean Clippers, Inc. (Clippers).

Description of domestic service and vessels.—Globe, Ocean, Overseas, Bulktank, Intercontinental, Tankships, Interseas, Carriers, and Clippers are subsidiaries of Overseas Shipholding Group, Inc. (Shipholding), whose subsidiaries have engaged in domestic coastwise, intercoastal, and noncontiguous petroleum trades with tanker vessels, and each company requires written permission for it and/or related companies to continue such operations. The following tanker vessels are owned by subsidiaries of Shipholding:

Ship	*Owner*
Overseas Alaska	Intercontinental Bulktank Corporation.
Overseas Alice	Intercontinental Bulktank Corporation.
Overseas Aleutian	Ocean Transportation Company, Inc.
Overseas Ulla	Ocean Transportation Company, Inc.
Overseas Arctic	Overseas Bulktank Corporation.
Overseas Valdez	Overseas Bulktank Corporation.
Overseas Joyce	Overseas Oil Carriers, Inc.
Overseas Anchorage	Globe Seaways, Inc.
Overseas Vivian	Ocean Tankships Corporation.
Alpha Reserve	Sea Tankers, Inc.
Beta Reserve	Sea Tankers, Inc.
Gamma Reserve	Sea Tankers, Inc.
Western Hunter	Ocean Tankships Corporation.

II. Name of company.—American Trading Transportation Company, Inc. (Attco).

Description of domestic service and vessels.—Attco is a subsidiary of American Trading and Production Corporation (Atapcorp), which company and other related companies operate in the domestic trades shown below, and requires written permission for the continuance of such services with the right to move any vessel from one domestic trade to another and/or from a foreign trade to a domestic trade.

The following U.S.-flag vessels of Attco, all having coastwise privileges, operate or may operate in various domestic trades, commercially, under charter to the Military Sealift Command (MSC) or others:

American Trader (MSC).
Texas Trader (MSC).
Maryland Trader (MSC).
Baltimore Trader.
Virginia Trader.
Washington Trader.

Atapcorp also has substantial stock interests in Standard Oil Company (Indiana) and Standard Oil Company (New Jersey) and is the largest stockholder of Crown Central Petroleum Corporation. The first two companies and their affiliates own and charter vessels for carriage of petroleum and its products in the domestic trade and the third occasionally charters vessels for domestic carriage of petroleum and its products. Atapcorp exercises no control over the ownership, operation or charter of any tankers by any of these three companies.

III. Name of company.—Texas City Tankers Corporation (Texas City).

Description of domestic service and vessels.—Texas City bareboat charters and operates a number of vessels, including those owned by affiliates and listed hereafter, which vessels have operated in U.S. domestic services. Texas City requires written approval to continue to operate Texas City bareboat chartered vessels in domestic coastwise and/or intercoastal (including Alaska, Hawaii, and Puerto Rico) service with free interchange between trades.

Ship

V. A. Fogg (ex-Four Lakes).
William T. Steele (ex-The Cabins).
William J. Fields (ex-Thalia).

IV. Name of company.—Mount Vernon Tanker Company (Mount Vernon), Mount Washington Tanker Company (Mount Washington).

Description of domestic service and vessels.—Mount Vernon and Mount Washington, subsidiaries of Victory Carriers, Inc., and affiliates of one another, own the Mount Vernon Victory and Mount Washington, respectively, and each requires written permission to, directly or indirectly, own, operate or charter one or more vessels in the domestic, intercoastal, or coastwise service, and to own a pecuniary interest, directly or indirectly, in any person or concern that owns, charters, or operates any vessels in the domestic, intercoastal, or coastwise service. The two companies are also affiliated with Monticello Tanker Company and Montpelier Tanker Company who each own and operate a tanker operating in worldwide trading.

V. Name of company.—Montpelier Tanker Company (Montpelier).

Description of domestic service and vessels.—Montpelier, a subsidiary of Victory Carriers, Inc., owns the Montpelier Victory and American Victory, and requires written permission to, directly or indirectly, own, operate, or charter one or more vessels in the domestic intercoastal or coastwise service, and to own a percuniary interest, directly or indirectly, in any person or concern that owns, charters, or operates any vessels in the domestic intercoastal or coastwise service. Montpelier is also affiliated with Monticello Tanker Company, Mount Vernon Tanker Company, and Mount Washington Tanker Company who each own and operate a tanker operating in worldwide trading.

VI. Name of company.—Monticello Tanker Company (Monticello).

Description of domestic service and vessels.—Monticello, a subsidiary of Victory Carriers, Inc., owns the Monticello Victory and requires written permission to directly or indirectly, own, operate, or charter one or more vessels in the domestic intercoastal or coastwise service, and to own a percuniary interest, directly or indirectly, in any person or concern that owns, charters, or operates any vessels in the domestic intercoastal or coastwise service Monticello is also affiliated with Mount Vernon Tanker Company, Mount Washington Tanker Company, and Montpelier Tanker Company.

VII. Name of company.—Rye Marine Corporation.

Description of domestic service and vessels.—Rye Marine Corporation owns the tanker Thetis and requires written permission for Rye Marine Corporation and affiliated companies to engage in the domestic service as well as the right to move any vessel from one domestic trade to another, and/or from a foreign trade(s) to a domestic trade(s).

VIII. Name of company.—Newport Tankers Corporation (Newport).

Description of domestic service and vessels.—Newport owns the Achilles and requires written permission to continue to engage in the domestic intercoastal or coastwise service as well as the right to move any vessel from one domestic trade to another, and/or from a foreign trade(s) to a domestic trade(s).

IX. Name of company.—Amerada Hess Corporation (Amerada Hess).

Description of domestic service and vessels.—Amerada Hess requires written permission for any of its vessels to operate in coastwise trade between the U.S. Gulf and Atlantic:

Hess Petrol.
Hess Trader.
Hess Bunker.
Hess Voyager.

X. Name of company.—Freighters, Inc. (Freighters).

Description of domestic service and vessels.—Freighters owns and operates the SS American Wheat, which vessel has from time to time tramped in the United States coastwise trade, particularly in the carriage of bulk sugar, from the State of Hawaii to the United States Gulf, and requires written permission to continue domestic coastwise service for that vessel.

XI. Name of company.—Mathiasen's Tanker Industries, Inc. (Mathiasen's).

Description of domestic service and vessels.—Mathiasen's owns or charters a total of five vessels which are eligible to participate in domestic coastwise and intercoastal trades. These vessels are operated in tramp services. Mathiasen's requires written permission for the following vessels owned or bareboat chartered by Mathiasen's:

Praire Grove	Owned.
Tampico	Owned.
Joseph D. Potts	Bareboat Chartered.
Sohio Intrepid	Bareboat Chartered.
Sohio Resolute	Bareboat Chartered.

XII. Name of company.—Cities Service Tankers Corporation (Cities Service Tankers).

Description of domestic service and vessels.—Cities Service Tankers owns and operates tanker vessels engaged in the domestic intercoastal and coastwise service and requires written permission to continue such operations. The following U.S.-flag tanker vessels are owned by Cities Service Tankers:

Cantigny.
Council Grove.
Fort Hoskins.
Cities Service Baltimore.
Cities Service Miami.
Cities Service Norfolk.
Bradford Island.

XIII. Name of company.—Keystone Tankship Corporation (Keystone Tank), Keystone Shipping Co. (Keystone Ship).

Description of domestic service and vessels.—On January 6, 1972, a related company of Keystone Tank and Keystone Ship, Margate Shipping Co. (Margate), was granted written permission for Margate's affiliates to own and operate a total of 31 U.S.-flag vessels to transport liquid bulk cargoes within or between the following coastal areas with free interchange of the vessels among these various domestic trades. The following list shows the maximum number of vessels to be employed in each Domestic Trade at any one time:

	Vessels
U.S. Gulf/Atlantic Coastwise	17
U.S. Gulf/Atlantic, Puerto Rico	2
U.S. Atlantic/Gulf Intercoastal (including Alaska and Hawaii)	5
Pacific Coast-Alaska and Hawaii	10

The following U.S.-flag tankers are owned, managed, or operated by Margate's affiliates:

Chancellorville.	Keystoner.
Perryville.	Keytrader.
Shenandoah.	Valley Forge.
Fort Fetterman.	Golden Gate.
Julesburg.	Edgar M. Queeny.
Gaines Mill.	P. C. Spencer (renamed Birch Coulie).
Mill Spring.	J. E. Dyer (renamed Santa Clara).
Northfield.	Sinclair Texas.
Tullahoma.	David E. Day.
Meadowbrook.	Mobile Gas.
Sandy Lake.	Mobile Power.
Monmouth.	Mobile Fuel.
Spirit of Liberty.	
Catawba Ford.	
Keytanker.	

Written permission is now required by Keystone Tank and Keystone Ship notwithstanding the previous grant to a related company (Margate). Keystone Tank and Keystone Ship are also related to Chas. Kurz & Co., Inc., whose section 805(a) application has been separately noticed.

XIV. Name of company.—Nautilus Petroleum Carriers Corp. (Nautilus).

Description of domestic service and vessels.—Nautilus, for the tanker vessel Sister Katingo which has coastwise privileges and has performed domestic coastwise and intercoastal service in the past, requires written permission to continue such operations as well as the right to move the vessel from one domestic trade to another and/or from a foreign trade(s) to domestic trade(s).

[Docket No. H-27]

National Oceanic and Atmospheric Administration

KONA COAST SEAFOOD CO., INC.

Notice of Loan Application

AUGUST 22, 1973.

Kona Coast Seafood Company, Inc., P.O. Box 2106, Kailua-Kona, Hawaii 96740, has applied for a loan from the Fisheries Loan Fund to aid in financing

V 38-167 AUG 29 73 XUM

the purchase of a new fiberglass vessel, about 48 foot in length, to engage in the fishery for tuna and tuna-like species, wahoo, dolphin (*Coryphaena hippurus*), bottomfish, marlin, mackerel, and Kona crab off the Hawaiian Islands.

Notice is hereby given, pursuant to the provisions of 16 U.S.C. 742c, Fisheries Loan Fund Procedures (50 CFR Part 250, as revised), and Reorganization Plan No. 5 of 1970, that the above-entitled application is being considered by the National Marine Fisheries Service, National Oceanic and Atmospheric Administration, Department of Commerce, Washington, D.C. 20235. Any person desiring to submit evidence that the contemplated operation of such vessel will cause economic hardship or injury to efficient vessel operators already operating in that fishery must submit such evidence in writing to the Director, National Marine Fisheries Service by September 28, 1973. If such evidence is received it will be evaluated along with such other evidence as may be available before making a determination that the contemplated operation of the vessel will or will not cause such economic hardship or injury.

JOSEPH W. SLAVIN,
Acting Director.

GOVERNMENT-OWNED INVENTIONS

Notice of Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for licensing in accordance with the GSA Patent Licensing Regulations.

Copies of patent applications, either paper copy (PC) or microfiche (MF), can be purchased from the National Technical Information Service (NTIS), Springfield, Virginia 22151, at the prices cited. Requests for copies of patent applications must include the PAT-APPL number and the title. Requests for licensing information should be directed to the address cited with each copy of the patent application.

Paper copies of patents cannot be purchased from NTIS but are available from the Commissioner of Patents, Washington, D.C. 20231, at $0.50 each. Requests for licensing information should be directed to the address cited below for each agency.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

Patent Office

PARIS CONVENTION FOR THE PROTECTION OF INDUSTRIAL PROPERTY

Entry Into Force of Articles 1–12

The Director General of the World Intellectual Property Organization announced on May 25, 1973, the deposit by the United States of letters of ratification of Articles 1–12 of the Paris Convention for the Protection of Industrial Property of 1883, as revised at Stockholm on July 14, 1967, with the declaration of applicability to all territories and possessions of the United States, including the Commonwealth of Puerto Rico. By operation of the Convention, Articles 1–12 will enter into force with respect to the United States on August 25, 1973, three months after the date of the above notification by the Director.

To carry into effect provisions of the Stockholm Revision of the Paris Convention, the United States has enacted Public Law 92–358, July 28, 1972, which in section (1) amends 35 U.S.C. 119 to accord under certain circumstances rights of priority to a U.S. patent application based on an earlier filed application for an inventor's certificate and in section (2) amends 35 U.S.C. 102(d) to provide that under certain circumstances an inventor's certificate becomes a statutory bar to the grant of a U.S. patent.

By the terms of this statutory enactment, Section (1) will enter into force with respect to the United States on the date when Articles 1–12 of the Stockholm Revision of the Paris Convention of March 20, 1883 come into force with respect to the United States, which will be August 25, 1973. A Patent Office rule change implementing this section of the public law by the addition of a new paragraph (c) to § 1.55 (37 CFR 1.55(c)) has been adopted and has been published in the FEDERAL REGISTER, Vol. 38, No. 71, on April 13, 1973.

This statutory enactment also provides that section (2) will take effect six months from the date when Articles 1–12 of the Stockholm Revision of the Paris Convention come into force with respect to the United States. Accordingly, this date will be February 25, 1974.

The full text of Public Law 92–358, dated July 28, 1972 together with the implementing Patent Office regulation, are reproduced below:

PUBLIC LAW 92-358, JULY 28, 1972

To carry into effect a provision of the Convention of Paris for the Protection of Industrial Property, as revised at Stockholm, Sweden, July 14, 1967.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 119 of title 35 of the United States Code, entitled "Patents," is amended by adding at the end thereof the following paragraph:

"Applications for inventors' certificates filed in a foreign country in which applicants have a right to apply, at their discretion, either for a patent or for an inventor's certificate shall be treated in this country in the same manner and have the same effect for purpose of the right of priority under this section as applications for patents, provided such applicants are entitled to the benefits of the Stockholm Revision of the Paris Convention at the time of such filing."

SEC. 2. Subsection 102(d) of title 35 of the United States Code is amended to read as follows:

"(d) the invention was first patented or caused to be patented; or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States, or."

SEC. 3. (a) Section 1 of this Act shall take effect on the date when Articles 1–12 of the Paris Convention of March 20, 1883, for the Protection of Industrial Property, as revised at Stockholm, July 14, 1967, come into force with respect to the United States and shall apply only to applications thereafter filed in the United States.

(b) Section 2 of this Act shall take effect six months from the date when Articles 1–12 of the Paris Convention of March 20, 1883, for the Protection of Industrial Property, as revised at Stockholm, July 14, 1967, come into force with respect to the United States and shall apply to applications thereafter filed in the United States.

Title 37—Patents, Trademarks and Copyrights

CHAPTER 1—PATENT OFFICE, DEPARTMENT OF COMMERCE

PART 1—RULES OF PRACTICE IN PATENT CASES

§ 1.55 *Serial number and filing date of application.* • • •

(c) An applicant may under certain circumstances claim priority on the basis of an application for an inventor's certificate in a country granting both inventor's certificates and patents. When an applicant wishes to claim the right of priority as to a claim or claims of the application on the basis of an application for an inventor's certificate in such a country under 35 U.S.C. 119, last paragraph (as amended July 28, 1972), the applicant or his attorney or agent, when submitting a claim for such right as specified

in paragraph (b) of this section, shall include an affidavit or declaration including a specific statement that, upon an investigation, he has satisfied himself that to the best of his knowledge the applicant, when filing his application for the inventor's certificate, had the option to file an application either for a patent or an inventor's certificate as to the subject matter of the identified claim or claims forming the basis for the claim of priority.

Dated: August 20, 1973.

RENE D. TEGTMEYER,
Acting Commissioner of Patents.

Approved: August 22, 1973.

BETSY ANCKER-JOHNSON,
Assistant Secretary for Science and Technology.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[DESI 1786 Docket No. FDC-D-643; NDA No. 4-353 etc.]

CERTAIN COMBINATION DRUGS CONTAINING ORGANIC NITRATES

Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Applications

In a notice (DESI 1786) published in the FEDERAL REGISTER of February 25, 1972 (37 FR 4001) the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the drugs described below stating that the drugs were regarded as possibly effective for their various labeled indications. The drugs have been reclassified as lacking substantial evidence of effectiveness in that no data have been submitted pursuant to the notice.

NDA No.	Drug	NDA holder
8-798...	Metamine with Butabarbital Tablets containing trolnitrate phosphate and butabarbital.	Pfizer Laboratories Division, Pfizer, Inc., 235 East 42d Street, New York, N.Y. 10017.
11-420..	Metamine with Butabarbital Sustained Tablets containing trolnitrate phosphate and butabarbital.	Pfizer Laboratories.
12-749..	Duotrate 45 with Phenobarbital Plateau Caps containing pentaerythritol tetranitrate and phenobarbital.	Marion Laboratories, Inc., 10236 Bunker Ridge Rd., Kansas City, Mo. 64137.
12-538..	Pentaerythritol tetranitrate and phenobarbital (sustained release capsules).	Nysco Laboratories, Inc., 34-24 Vernon Blvd., Long Island City, N.Y. 11106.
12-266..	Peritrate with Phenobarbital SA Tablets containing pentaerythritol tetranitrate and phenobarbital.	Warner Chilcott Laboratories, Division Warner Lambert Pharmaceutical Co., 201 Tabor Rd., Morris Plains, N.J. 07950.
8-852...	Those parts of NDA 8-852 pertaining to Pencard with Phenobarbital and Pencard No. 2 with Phenobarbital Tablets containing pentaerythritol tetranitrate and phenobarbital; and Pencard-A Capsules containing pentaerythritol tetranitrate and theophylline.	Cole Pharmacal Co., Inc., 3721 Leclede Ave., St. Louis, Mo. 63108.
10-072..	Pentraline Tablets containing pentaerythritol tetranitrate, sodium butabarbital, and reserpine.	McNeil Laboratories, Inc., Camp Hill Rd., Fort Washington, Pa. 19034.
4-353...	Nitranitol with Phenobarbital Tablets containing mannitol hexanitrate and phenobarbital.	Merrell-National Laboratories, Division of Richardson-Merrell, Inc., 110 East Amity Rd., Cincinnati, Ohio 45215.
2-779...	Maxitrate with Phenobarbital Tablets containing mannitol hexanitrate and phenobarbital.	Pennwalt Prescription Products Division, Pennwalt Corp., 755 Jefferson Rd., Rochester, N.Y. 14623.
12-093..	That part of NDA 12-093 pertaining to Isordil with Phenobarbital Tablets containing isosorbide dinitrate and phenobarbital.	Ives Laboratories, Inc., 685 Third Ave., New York N.Y. 10017.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the listed new drug application(s) or pertinent parts thereof and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Maryland 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before September 28, 1973 the applicant(s) and any other interested person is required to file with the Hearing Clerk, Food and Drug Administration, Room 6-86, 5600 Fishers Lane, Rockville, Maryland 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within the specified time will constitute an election by him not to avail himself of the opportunity for a hearing. No extension of time may be granted.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s) or pertinent parts thereof.

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before September 28, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after September 28, 1973, a

V 38-167 AUG 29 73 XUM

written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: August 21, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-18153 Filed 8-28-73;8:45 am]

USE OF IMPACT-RESISTANT LENSES IN EYEGLASSES AND SUNGLASSES

Notice of Public Meeting

In the FEDERAL REGISTER of February 2, 1972 (37 FR 2503) a final order was published on § 3.84 *Use of impact-resistant lenses in eyeglasses and sunglasses* (21 CFR 3.84). This order became effective on the date of publication in the FEDERAL REGISTER.

Since that time, the Food and Drug Administration has required that most eyeglass lenses be impact-resistant. This regulation applies to prescription lenses, sunglass lenses, and nonprescription lenses. Such lenses may be made impact-resistant by heat or chemical treatment of glass or by shatter-resistant materials such as transparent plastics.

In the course of enforcing these regulations, the Food and Drug Administration has gained experience which suggests that exchange of knowledge with respect to impact-resistant lenses should be promoted.

To encourage open discussion about consumer, professional, and industry interest in this subject, a conference has been scheduled for September 5, 1973, at 9:00 a.m. in Conference Room F, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20852.

Interested organizations and individuals are invited to attend and make oral or written presentations on the subject.

Dated: August 24, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

BEHAVIORAL SCIENCES RESEARCH CONTRACT REVIEW COMMITTEE

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Behavioral Sciences Research Contract Review Committee of the National Institute of Child Health and Human Development, September 13–14, 1973, at 9 a.m., National Institutes of Health, Landow Building, Conference Room C–418. This meeting will be open to the public from 9 a.m. to 5 p.m., September 13 and 14 to discuss orientation of this new committee to the contract program of the Behavioral Sciences Branch, Center for Population Research. Attendance by the public will be limited to space available.

Ms. Patricia Newman, Information Officer, NICHD, Landow Building, Room A–804B, National Institutes of Health, 496–5133, will furnish summaries of the meeting and rosters of the committee members. Substantive information may also be obtained from Dr. Jerry Combs, Executive Secretary of the Committee, Room C–719, Landow Building, National Institutes of Health, 496–1174.

Dated: August 21, 1973.

CANCER CONTROL ADVISORY COMMITTEE

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of a special meeting of the Cancer Control Advisory Committee, National Cancer Institute, September 24–26, 1973 from 9:00 a.m. to 5:00 p.m. each day in the Urban Life Center, American City Building, Columbia, Maryland 20014. This special meeting will be open to the public throughout the entire meeting and will consist of working conferences of the Cancer Control Advisory Committee to discuss, develop, and advise the National Cancer Institute on: (1) More definitive planning to assure the rapid and effective use of research results in the areas of cancer control; (2) establish specific cancer control programs for implementation during the rest of fiscal year 1974; (3) identify other programs to be initiated in subsequent years; (4) prepare an overall conference report for the Cancer Control Advisory Committee to use for advising the National Cancer Institute. Any member of the public wishing to make a statement on this meeting may do so in writing by filing a statement with the Committee's Executive Secretary within ten (10) days after the close of this meeting. Such statements will be provided to the Committee for consideration. Attendance by the public will be limited to space available.

Mr. Frank Karel, Associate Director for Public Affairs, NCI, Building 31, Room 10A31, National Institutes of Health, Bethesda, Maryland 20014 (301–496–1911), will furnish minutes of the open meeting and a roster of committee members.

Dr. Robert L. Woolridge, Executive Secretary, Building 31, Room 10A19, National Institutes of Health, Bethesda, Maryland 20014 (301–496–1946), will provide substantive program information.

Dated: August 21, 1973.

This meeting will be open to the public from 9 a.m. to 5 p.m., September 13 and 14 to discuss orientation of this new committee to the contract program of the Fertility Regulating Methods Evaluation Branch, Center for Population Research. Attendance by the public will be limited to space available.

Ms. Patricia Newman, Information Officer, NICHD, Landow Building, Room A–804B, National Institutes of Health, 496–5133, will furnish summaries of the meeting and rosters of the committee members. Substantive information may also be obtained from Dr. Heinz Berendes, Executive Secretary of the Committee, Room A–716, Landow Building, National Institutes of Health, 496–4924.

Dated: August 21, 1973.

ROBERT W. BERLINER,
Acting Deputy Director, National Institutes of Health.

LIPID METABOLISM ADVISORY COMMITTEE

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Lipid Metabolism Advisory Committee, National Heart and Lung Institute, September 21, 1973, 8:15 a.m., National Institutes of Health, Building 31, NHLI Conference Room 5A16. This meeting will be open to the public from 8:15 a.m. to 5 p.m., September 21, 1973, to review the status of the Lipid Research Clinic Program and to receive a report on nutritional facets of the Program. Attendance by the public will be limited to space available.

Mr. Hugh Jackson, Information Officer, NHLI, NIH Landow Building, Room C918, phone 496–4236, will furnish summaries of the meeting and rosters of the committee members. Substantive information may be obtained from Dr. Basil Rifkind, Deputy Chief, Lipid Metabolism Branch, NHLI, NIH Building 31, Room 4A19, phone 496–1681.

Dated: August 21, 1973.

ROBERT W. BERLINER,
Acting Deputy Director, National Institutes of Health.

NATIONAL ADVISORY CHILD HEALTH AND HUMAN DEVELOPMENT COUNCIL

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Subcommittee on Adolescence of the National Advisory Child Health and Human Development Council, National Institute of Child Health and Human Development, September 10, 1973, at 9:00 a.m., National Institutes of Health, Building 31, Conference Room 8. This meeting will be open to the public from 9 a.m. to 5 p.m., September 10 to discuss the expanded research program in adolescence of the National Institute of Child Health and Human Development. Attendance by the public will be limited to space available.

Ms. Patricia Newman, Information Officer, NICHD, Landow Building, Room A–804B, National Institutes of Health, 496–5133, will furnish summaries of the meeting and rosters of the committee members. Substantive information may also be obtained from Mrs. Marjorie Neff, Executive Secretary of the Council, Room C–633, Landow Building, National Institutes of Health, 496–1756.

Dated: August 21, 1973.

ROBERT W. BERLINER,
Acting Deputy Director, National Institutes of Health.

NATIONAL ADVISORY COUNCIL ON ALCOHOL ABUSE AND ALCOHOLISM

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Advisory Council on Alcohol Abuse and Alcoholism, National Institute of Mental Health, September 17 and 18, 1973, 9:30 a.m. to 5 p.m., RCA Building, National Center for Alcohol Education, 1901 North Lynn St., Rooms 102, 103, & 104 (Lower Lobby), Rosslyn, Arlington, Virginia 22209. This meeting will be open to the public from 9:30 a.m. to 5 p.m. on September 17 and 18, 1973, to discuss Institute policy, Legislative actions affecting the NIMH/NIAAA, budgetary matters, reorganization, and program developments.

Attendance by the public will be limited to space available.

The NIAAA Information Officer who will furnish summaries of the meeting and rosters of committee members is Mr. Harry C. Bell, Associate Director for Public Affairs, National Institute on Alcohol Abuse and Alcoholism, Room 6C 15 Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, telephone 443–3306.

The Acting Executive Secretary from whom substantive program information may be obtained is Mr. Martin K. Trusty, Acting Executive Officer, NIAAA, Room 16–105, 5600 Fishers Lane, Rockville, Maryland 20852, telephone number, 301–443–4373.

Dated: August 21, 1973.

ROBERT W. BERLINER,
Acting Deputy Director, National Institutes of Health.

NATIONAL HEART AND LUNG ADVISORY COUNCIL

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of a special meeting of the National Heart and Lung Advisory Council, September 17 and 18, 1973, at 9 a.m., Conference Room 6, Building 31, National Institutes of Health, Bethesda, Maryland. This meeting, which will be open to the public, is for discussion of the implementation of the National Heart, Blood Vessel, Lung, and Blood Diseases Program and the Council's Annual Report on the progress of the Program toward the accomplishment of its objectives. Attendance by the public will be limited to space available.

Mr. Hugh Jackson, Information Officer, NHLI, Landow Building, Room C–918, telephone 301–496–4236, will furnish summaries of the minutes and rosters of the National Heart and Lung Advisory Council members and Dr. Jerome G.

V 38-167 AUG 29 73 XUM

Green, Director of the Division of Extramural Affairs, NHLI, Westwood Building, Room 5A18, telephone 301–496–7416, will furnish substantive program information.

NATIONAL ADVISORY MENTAL HEALTH COUNCIL

Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the National Advisory Mental Health Council, National Institute of Mental Health, September 10 and 11, 1973, at the Parklawn Building, Room 14–105, 5600 Fishers Lane, Rockville, Maryland. This meeting will be open to the public from 9:30 a.m. September 10 until its adjournment on September 11. The agenda will include a discussion of administrative, legislative, and program developments. The Council will also discuss the law and mental health.

Attendance by the public will be limited to space available.

The NIMH Information Officer who will furnish summaries of the meeting and rosters of committee members is Mr. Ronald E. McMillen, Acting Director, Office of Communications, National Institute of Mental Health, Room 15–105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, telephone 443–3600.

The Executive Secretary from whom substantive program information may be obtained is Mr. David F. Kefauver, Assistant Director for Extramural Programs, National Institute of Mental Health, 5600 Fishers Lane, Rockville, Maryland 20852, telephone 443–4266.

Dated: August 21, 1973.

ROBERT W. BERLINER,
Acting Deputy Director,
National Institutes of Health.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. 12881; Reference Notice No. 73–16]

AIR TRANSPORTATION OF HANDICAPPED PERSONS

Notice of Public Hearing

The Federal Aviation Administration will hold a series of six public hearings in order to receive the views of all interested persons regarding the safety aspects of the air carriage of handicapped persons and, in particular, concerning Advance Notice of Proposed Rulemaking (ANPRM) No. 73–16 (38 FR 14757), which concerns the air carriage of handicapped persons. The hearings will be conducted in accordance with the following schedule of dates and at the indicated locations:

September 27, 1973:
Miami Springs Villas, 500 Deer Run, Miami Springs, Florida 33166, Phone: (305) 871–6000 (Florida Room).

October 2, 1973:
Mayo Civic Auditorium, P.O. 895, 30 SE 2nd Avenue, Rochester, Minnesota 55901, Phone: (509) 288–8475.

October 4, 1973:
JFK Federal Building, Government Center, New Cambridge Street, Boston, Massachusetts 02203, Phone: (617) 223–2906 (Room 2003A).

October 10, 1973:
Concord Motor Inn, 6565 Mannheim Road, Rosemont, Illinois 60018, Phone: (312) 827–6121.

October 16, 1973:
Rochelles Motel and Restaurant, 3333 Lakewood Boulevard, Long Beach, California 90808, Phone: (212) 421–9494.

October 18, 1973:
Federal Aviation Administration, Auditorium—3rd Floor, 800 Independence Avenue SW., Washington, D.C. 20591, Phone: (202) 426–8357.

Each meeting is to convene at 9 in the morning.

In the event that there is a response to this notice of public hearing that exceeds the time that has been allocated to any one hearing (each has been planned not to exceed one day in length), the overflow will be accommodated by extending the hearing scheduled for October 18, 1973, at Washington, D.C., to the following day, October 19, 1973.

The hearings will be informal in nature and will be conducted by a designated representative of the Administrator under 14 CFR 11.33. At each hearing an FAA spokesman will make a brief opening statement regarding ANPRM 73–16. Since the hearings will not be of the evidentiary or judicial type, there will be no cross-examination of those persons presenting statements. However, interested persons wishing to make rebuttal statements will be given an opportunity to do so in the same order in which initial statements were made.

All interested persons are invited to attend the hearings and each such person is invited to present oral or written statements concerning ANPRM 73–16 at one of the hearings. Such statements will be made a part of the record of the hearings. Any person who wishes to make an oral statement at one of the hearings must notify the FAA by stating the date and place of the hearing at which he desires to make such statement and stating the amount of time requested for his initial statement. In addition, any person may submit relevant written comments. Written comments must be received by the FAA by October 30, 1973, so that they may be made a part of the record of the hearings. Written comments and all other communications concerning these hearings should be addressed to the Office of General Counsel, Rules Docket, AGC–24, Federal Aviation Administration, Department of Transportation, 800 Independence Avenue SW., Washington, D.C. 20591, marked "Attention: Presiding Officer, Public Hearing on ANPRM 73–16."

ANPRM 73–16 was issued by the FAA on May 30, 1973, pursuant to the FAA's policy for the early institution of public participation in rulemaking proceedings. An "advance" notice is issued to invite public participation in the identification and selection of a course or alternate courses of action with respect to a particular rulemaking problem. In this instance, the FAA is seeking the comments and recommendations of the public in regard to possible amendments to the Federal Aviation Regulations to permit, to the maximum extent possible, air transportation of physically handicapped persons while maintaining an acceptable level of safety in air carrier and air taxi operations.

ANPRM 73–16 presented background information on the air carriage of handicapped persons and solicited the views of interested persons concerning the establishment of an acceptable level of safety commensurate with the carriage of the maximum number and types of handicapped persons. In that Notice, the FAA expressed a particular interest in receiving comments regarding the following questions:

(1) What types of physical/functional disabilities or limitations should be allowed consistent with present evacuation criteria?

(2) What types of handicapped persons or physical/functional disabilities should be allowed if a special attendant or assistance is provided to accomplish an emergency evacuation from an aircraft?

(3) Should a regulation be adopted which would permit (or limit) the carriage of a number and type of handicapped persons without the accommodation of that number and type in the criteria established for emergency evacuation demonstrations?

(4) How many unassisted handicapped persons may be accepted as passengers on an aircraft without requiring the use of a special attendant or able-bodied helper? Should this limit be a fixed number or should it be a number which is a percentage of the full passenger seating capacity?

(5) For large groups of handicapped passengers what means of emergency evacuation might be employed to provide as acceptable level of safety?

(6) Should the length of the planned flight be a consideration in determining the number and/or type of handicapped persons to be accepted as passengers?

(7) Would an identification card which certifies the ability of a handicapped person to perform certain physical tasks be useful in eliminating uncertainties regarding his acceptance as an unaccompanied passenger? If so, who should issue the card?

(8) If you are a handicapped person, have you considered how you might evacuate an aircraft unassisted by other persons? Would you care to describe your functional limitations and any method by which you could effect an evacuation? (This information may be helpful in developing evacuation procedures and/or evacuation devices.)

(9) If you are a handicapped person, considering the possibility of being involved in an emergency evacuation, does the notion that you could be the last passenger evacuated from an aircraft seriously concern you?

In addition to the foregoing questions, the FAA would appreciate comments regarding the additional questions set forth below as well as in any other areas regarding the safety aspects relating to transportation of handicapped persons by air carriers.

(1) How many persons who are handicapped may be accepted as passengers on an aircraft for any one flight?

(2) Is there any one portion of the aircraft that is more favorable for the seating of handicapped persons than any other?

(3) In case of an emergency evacuation, are there measures that can be taken to minimize the danger that might be created by appliances such as leg braces coming into contact with fiber emergency evacuation chutes?

(4) Is there special equipment available that could aid in the evacuation of handicapped persons in the event of an emergency?

(5) What problems exist in regard to persons who are immobile being accepted as passengers on a commercial flight?

(6) Where aboard the aircraft should handicapped persons be seated in relation to the locations of exits?

(7) The present regulations require that an emergency evacuation demonstration be conducted to show that the aircraft can be evacuated in 90 seconds. The passengers in the evacuation demonstration include a mixture of passengers (male, female, young, and elderly), but do not include handicapped persons. Considering this information, should the number of handicapped persons permitted on any passenger flight be based on a passenger load factor such that the final load, including handicapped persons, can be evacuated in 90 seconds? Should the 90 second evacuation criteria be adjusted upward and, if so, to what level?

The FAA will carefully consider all statements presented at the hearing and relevant written comments received and made a part of the record and, in the light of those statements and comments, may issue an appropriate notice of proposed rulemaking.

A transcript of the hearings will be made and anyone may purchase a copy of them from the reporter.

(Sections 313(a), 601, 603, 604, and 1005 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423, 1424, and 1485) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on August 24, 1973.

C. R. MELUGIN, Jr.,
Acting Director,
Flight Standards Service.

[FR Doc.73–18176 Filed 8–28–73;8:45 am]

ATOMIC ENERGY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS—GAS COOLED FAST BREEDER REACTOR SUBCOMMITTEE

Notice of Meeting

AUGUST 24, 1973

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the ACRS Subcommittee on Gas Cooled Fast Breeder Reactors will hold a meeting on September 11 and 12, 1973 at the La Jolla Village Inn, 3299 Holiday Court, La Jolla, California 92037. The purpose of this meeting will be to review various topics applicable to the conceptual design of a gas cooled fast breeder reactor.

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

Tuesday, September 11, 1973, 9:00 a.m.–5:00 p.m.

Review of various topics generic to gas cooled fast breeder reactors (presentations by the AEC Regulatory Staff and Gulf General Atomic will be made and discussion with these groups will be held).

Wednesday, September 12, 1973, 8:00 a.m.–12:00 Noon

Continued review of topics relating to the conceptual design of the gas cooled fast breeded reactor (continued discussions with the AEC Regulatory Staff and Gulf General Atomic).

In connection with the above agenda item, the Subcommitte will hold an executive session at 8:00 a.m. on September 11, which will involve a discussion of its preliminary views and an exchange of opinions of the Subcommittee members. At the conclusion of the discussions on September 12, the Subcommittee may hold an executive session to formulate a recommendation to the ACRS.

I have determined, in accordance with subsection 10(d) of Public Law 92–463, that the executive sessions at the beginning and end of the meeting will consist of an exchange of opinions and formulation of recommendations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close such portions of the meeting to protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda item may do so by mailing 25 copies thereof, postmarked no later than September 4, 1973, to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such comments shall be based upon Gulf General Atomic reports and various other documents on file and available for public inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statement and its usefulness to the Subcommittee. To the extent that the time available for the meeting permits, the Subcommittee will receive oral statements during a period of no more than 30 minutes at an appropriate time, chosen by the Chairman of the Subcommittee, between the hours of 1:30 p.m. and 3 p.m. on September 11, 1973.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Subcommittee who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been canceled or rescheduled and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on September 10, 1973 to the office of the Executive Secretary of the Committee (telephone 301–973–5651) between 8:30 a.m. and 5:15 p.m., Eastern Daylight Time.

(e) Questions may be propounded only by members of the Subcommittee and its consultants.

(f) Seating for the public will be available on a first-come, first-served basis.

(g) A copy of the transcript of the open portions of the meeting will be available for inspection on and after September 17, 1973 at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545. On request, copies of the minutes of the meeting will be made available for inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, on or after November 12, 1973. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Advisory Committee
Management Officer.

[FR Doc.73–18313 Filed 8–28–73;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS—SUBCOMMITTEE ON D. C. COOK NUCLEAR PLANT, UNITS 1 & 2

Notice of Meeting

AUGUST 24, 1973.

In accordance with the purposes of sections 29 and 182 b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Subcommittee on D. C. Cook Nuclear Plant, Units 1 & 2, will hold a meeting on September 12, 1973, in the Santa Maria Room at the Holiday Inn, 100 Main Street, St. Joseph, Michigan 49085. The purpose of the meeting will be to commence the Operating License review of this project, which is located in Lake Township near Benton Harbor, Michigan.

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

V 38-167 AUG 29 73 XUM

WEDNESDAY, SEPTEMBER 12, 1973,
9:30 a.m.-3:30 p.m.

Presentations by representatives of Indiana Michigan Electric Company and the AEC Regulatory Staff and discussions with these groups.

In connection with the above agenda item, the Subcommittee will hold an executive session beginning at 8:30 a.m. which will involve a discussion of its preliminary views, and an executive session at the end of the day, consisting of an exchange of opinions of the Subcommittee members present and internal deliberations and formulation of recommendations to the ACRS. I have determined, in accordance with subsection 10(d) of Public Law 92-463, that the executive session at the beginning and end of the meeting will consist of an exchange of opinions and formulation of recommendations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close such portions of the meeting to protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda items may do so by mailing 25 copies thereof, postmarked no later than September 5, 1973 to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such comments shall be based upon the Final Safety Analysis Report for the D. C. Cook Nuclear Plant and related documents on file and available for public inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, and the St. Joseph Public Library, 500 Market Street, St. Joseph, Michigan 49085.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statements and its usefulness to the Subcommittee. To the extent that the time available for the meeting permits, the Subcommittee will receive oral statements during a period of not more than 30 minutes at an appropriate time, chosen by the Chairman of the Subcommittee, between the hours of 1:30 p.m. and 3 p.m. on the day of the meeting.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Subcommittee, who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been canceled or rescheduled and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on September 11, 1973, to the Office of the Executive Secretary of the Committee (telephone: 301-973-5651) between 8:30 a.m. and 5:15 p.m., Eastern Daylight Time.

(e) Questions may be propounded only by members of the Subcommittee and its consultants.

(f) Seating for the public will be available on a first-come, first-served basis.

(g) A copy of the transcript of the open portions of the meeting will be available for inspection during the following workday at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545, and within approximately nine days at the St. Joseph Public Library, 500 Market Street, St. Joseph, Michigan 49085. On request, copies of the minutes of the meeting will be made available for inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20545 on or after November 12, 1973. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Advisory Committee Management Officer.

[FR Doc.73-18310 Filed 8-28-73;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS—SUBCOMMITTEE ON REACTOR PRESSURE VESSELS

Notice of Meeting

AUGUST 24, 1973.

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the Advisory Committee on Reactor Safeguards' Subcommittee on Reactor Pressure Vessels will hold a meeting on September 5, 1973, in Room 1062, at 1717 H Street NW., Washington, D.C. The subject scheduled for discussion is a draft report to the full Committee on light water reactor pressure vessel integrity.

The Subcommittee is meeting with their consultants and a Regulatory Staff participant to formulate recommendations in the form of a report to the full ACRS regarding the above subject.

I have determined, in accordance with subsection 10(d) of Public Law 92-463, that the meeting will be to discuss a document which falls within exemption (5) of 5 U.S.C. 552(b) and will consist of an exchange of opinions, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close this meeting to protect the free interchange of internal views and to avoid undue interference with Committee operation.

JOHN C. RYAN,
Advisory Committee Management Officer.

[FR Doc.73-18312 Filed 8-28-73;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS—SUBCOMMITTEE ON REGULATORY GUIDES

Notice of Meeting

AUGUST 24, 1973.

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards Subcommittee on Regulatory Guides will hold a meeting on September 4, 1973, in Room 1062, at 1717 H Street NW., Washington, D.C. The subjects scheduled for discussion are drafts of proposed Regulatory Guides.

The Subcommittee is meeting to formulate recommendations to the ACRS regarding the above subjects.

I have determined, in accordance with subsection 10(d) of Public Law 92-463, that the purpose of the meeting will be to discuss draft documents which fall within exemption (5) of 5 U.S.C. 552(b) and will consist of an exchange of opinions, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b). It is essential to close such meetings to protect the free interchange of internal views and to avoid undue interference with agency and Committee operation.

JOHN C. RYAN,
Advisory Committee Management Officer.

[FR Doc.73-18311 Filed 8-28-73;8:45 am]

REGULATORY GUIDES

Notice of Issuance and Availability

The Atomic Energy Commission has issued one revised and two new guides in its Regulatory Guide series. This series has been developed to describe and make available to the public methods acceptable to the AEC Regulatory staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The new guides are in Division 1, "Power Reactor Guides." Regulatory Guide 1.58, "Qualification of Nuclear Power Plant Inspection, Examination, and Testing Personnel," describes an acceptable method of complying with the Commission's regulations with regard to qualification of nuclear power plant inspection, examination, and testing personnel. Regulatory Guide 1.59, "Design Basis Floods for Nuclear Power Plans," describes an acceptable method of determining for sites along streams or rivers the design basis floods that nuclear power plants must be designed to withstand without loss of safety-related functions. It further discusses the phenomena producing comparable design basis floods for coastal, estuary, and Great Lakes sites. Regulatory Guide 1.29 (Revision 1) "Seismic Design Classification," describes an acceptable method of complying with the Commission's regulations with regard to identifying and classifying those plant features that should be designed to withstand the effects of the Safe Shutdown Earthquake.

Regulatory Guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Comments and suggestions in connection with improvements in the guides are encouraged and should be sent to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff. Requests for single copies of issued guides or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director of Regulatory Standards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Telephone requests cannot be accommodated. Regulatory Guides are not copyrighted and Commission approval is not required to reproduce them.

Other Division 1 Regulatory Guides currently being developed include the following:

Availability of Electric Power Sources
Requirements for Instrumentation to Assess Nuclear Powerplant
Conditions During and Following an Accident for Water-Cooled Reactors
Shared Emergency and Shutdown Power Systems at Multiunit Sites
Physical Independence of Safety Related Electric Systems
Isolating Low Pressure Systems Connected to the Reactor Coolant Pressure Boundary
Assumptions for Evaluating a Control Rod Ejection Accident for Pressurized Water Reactors
Assumptions for Evaluating a Control Rod Drop Accident for Boiling Water Reactors
Requirements for Collection, Storage, and Maintenance of Quality Assurance Records for Nuclear Power Plants
Requirements for Assessing Ability of Material Underneath Nuclear Powerplant Foundations to Withstand Safe Shutdown Earthquake
Design Phase Quality Assurance Requirements for Nuclear Powerplants
Qualification Tests of Electric Valve Operators for Use in Nuclear Powerplants
Fire Protection Criteria for Nuclear Powerplants
Protective Coatings for Nuclear Reactor Containment Facilities
Additional Material Requirements for Bolting
Inservice Surveillance of Grouted Prestressing Tendons
Design Response Spectra for Seismic Design of Nuclear Power plants
Seismic Input Motion to Uncoupled Structural Model

CONSUMER PRODUCT SAFETY COMMISSION

CERTAIN ADDITIONAL SPRAY ADHESIVES

Banning as Imminent Hazard

By order published in the FEDERAL REGISTER of August 22, 1973 (38 FR 22569), the Consumer Product Safety Commission found that the distribution for household use of certain spray adhesives presents an imminent hazard to the public health and that such products are therefore deemed to be "banned hazardous substances" pending the completion of proceedings relating to the issuance of regulations for such products under section 2(q)(1)(B) of the Federal Hazardous Substances Act (15 U.S.C. 1261(q)(1)(B)). The products thus banned are as follows:

(1) "Foil Art Adhesive" manufactured by the Minnesota Minning and Manufacturing Company, St. Paul, Minnesota (distributed by Decorator Crafts, Inc., Oklahoma City, Oklahoma).

(2) "Scotch Brand Spra-Ment Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(3) "Krylon Spray Adhesive" manufactured by Borden, Inc., Columbus, Ohio, and New York, New York.

(4) "3M Brand Spray Adhesive 77" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

The conclusion by the Commission that the distribution of certain spray adhesive products for household use presents an imminent hazard to the public health was based on research indicating a strong causal connection between exposure to such products and the potential for serious personal injury or illness to the subsequent children of a parent or parents so exposed. Such exposure may cause chromosome damage leading to severe genetic birth defects.

Although the particular chemical component or components, or combination thereof, believed to be responsible for the chromosome damage has not been identified, the Commission has determined that certain additional spray adhesive products, which have the same or similar chemical formulations as those spray adhesives heretofore banned, may also cause chromosome damage and resultant genetic birth defects in the children of a parent or parents so exposed.

The Commission finds that available evidence is sufficient to show that the spray adhesives listed below pose a significant threat of danger to health and create a public health situation (1) that should be corrected immediately to prevent injury and (2) that should not be permitted to continue while a hearing or other formal proceeding is being held. The Commission considers the number of possible injuries from these products and the nature, severity, and duration of anticipated injuries to be significant.

Proceedings to issue regulations under section 2(q)(1)(B) of the Federal Hazardous Substances Act (15 U.S.C. 1261(q)(1)(B)) have been initiated by the commencement of an investigation to determine the precise causative agent or agents. As soon as practicable, the Commission will publish proposed regulations and afford all interested persons an opportunity to present their views in accordance with section 701(e) of the Food, Drug, and Cosmetic Act (21 U.S.C. 371(e)) as prescribed by section 2(q)(2) of the Federal Hazardous Substances Act (15 U.S.C. 1261(q)(2)).

The finding by the Commission that the spray adhesive products listed below present an imminent hazard to the public health results in their being deemed to be "banned hazardous substances" under the Federal Hazardous Substances Act. As such, the act prohibits their introduction or delivery for introduction into interstate commerce and the sale, holding

V38-167 AUG 29 73 XUM

for sale, delivery, or proffered delivery thereof for pay or otherwise. Violation of any of these prohibitions is criminally punishable under section 5 of the act (15 U.S.C. 1264).

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sec. 2(q)(2), 74 Stat. 374, as amended 80 Stat. 1305; 15 U.S.C. 1261(q)(2)) and under authority vested in the Consumer Product Safety Commission by the Consumer Product Safety Act (sec. 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission hereby finds that the distribution for household use of the following products presents an imminent hazard to the public health and that such products are therefore deemed to be "banned hazardous substances" pending the completion of proceedings relating to the issuance of regulations for such products under section 2(q)(1)(B) of the Federal Hazardous Substances Act:

(1) "Marshall's Photo-Mount Spray Adhesive" manufactured by Borden, Inc., Columbus, Ohio and New York, New York (distributed by the John G. Marshall Manufacturing Company, Brooklyn, New York).

(2) "Sears Multi-Purpose Spray Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota (Sold by Sears, Roebuck and Company, Chicago, Illinois).

(3) "Scotch Brand Multipurpose Spray Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(4) "Scotch-Grip Brand Floral Adhesive 77" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(5) "3M Brand Shipping Mate Palletizing Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(6) "3M Brand Spray Trim Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota.

(7) "Tuf-Bond Spray-Hesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota (distributed by Goodloe E. Moore, Incorporated, Danville, Illinois).

(8) "Bear Brand Spray Trim Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota (distributed by the Norton Company, Troy, New York).

(9) "Tri Chem Spray Mist Adhesive" manufactured by the Minnesota Mining and Manufacturing Company, St. Paul, Minnesota (distributed by Tri Chem, Incorporated, Distributors, Belleville, New Jersey).

Dated: August 27, 1973.

SAMUEL M. HART,
Acting Secretary, Consumer Product Safety Commission.

CIVIL SERVICE COMMISSION

MEDICAL TECHNOLOGIST, INDIANAPOLIS, INDIANA

Notice of Establishment of Minimum Rates and Rate Ranges

Under authority of 5 U.S.C. 5303 and Executive Order 11721, the Civil Service Commission has increased special minimum salary rates and rate ranges as follows:

GS-644 MEDICAL TECHNOLOGIST SERIES

Geographic Coverage: Indianapolis, Indiana.
Effective Date: First day of the first pay period beginning on or after September 2, 1973.

	(PER ANNUM RATES) [1]									
Grade	1	2	3	4	5	6	7	8	9	10
GS 5	$8,722	$8,979	$9,236	$9,493	$9,750	$10,007	$10,264	$10,521	$10,778	$11,035

[1] This special rate schedule for computer purposes is designated as Table No. 348.

All new employees in the specified occupational level will be hired at the minimum rates.

As of the effective date, all agencies will process a pay adjustment to increase the pay of employees on the roles in the affected occupational level. An employee who immediately prior to the effective date was receiving basic compensation at one of the statutory rates shall receive basic compensation at the corresponding numbered rate authorized by this notice on or after such date. The pay adjustment will not be considered an equivalent increase within the meaning of 5 U.S.C. 5335.

Under the provisions of section 3-2b, Chapter 571, FPM, agencies may pay the travel and transportation expenses to first post of duty under 5 U.S.C. 5723, of new appointees to positions cited.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

Notice of Committee Meetings

Pursuant to the provisions of sec. 10 of Public Law 92-463, effective January 5, 1973, notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, September 13, 1973.
Thursday, September 20, 1973.
Thursday, September 27, 1973.

The meetings will convene at 10 a.m. and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street NW., Washington, D.C.

The committee's primary responsibility is to study the prevailing rate system and from time to time advise the Civil Service Commission thereon.

At these scheduled meetings, the committee will consider proposed plans for implementation of Public Law 92-392, which law establishes pay systems for Federal prevailing rate employees.

The meetings will be closed to the public under a determination to do so, made under the provisions of sec. 10(d) of Public Law 92-463.

However, members of the public who wish to do so, are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the committee's attention. Additional information concerning these meetings may be obtained by contacting the Chairman, Federal Prevailing Rate Advisory Committee, Room 5451, 1900 E Street NW., Washington, D.C.

DAVID T. ROADLEY,
Chairman, Federal Prevailing Rate Advisory Committee.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN PAKISTAN

Entry or Withdrawal From Warehouse for Consumption

AUGUST 22, 1973.

On May 30, 1973, there was published in the FEDERAL REGISTER (38 FR 14184) a letter dated May 16, 1973, from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs establishing an administrative mechanism to exempt from the limitations of the Bilateral Cotton Textile Agreement of May 6, 1970, as amended, between the Governments of the United States and Pakistan, certain traditional Pakistan Items, produced or manufactured in Pakistan and exported to the United States, which had been certified for exemption by the Government of Pakistan. One of the requirements is that each certification for exempt items must include the signature of an official authorized to issue such certifications. The Government of Pakistan has requested that Mr. Shamsuddin Ansari be so authorized, in addition to the eight officials previously designated.

Accordingly, there is published below a letter of August 22, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that Mr. Shamsuddin Ansari be authorized to issue certifications for exempt Pakistan Items. A facsimile of Mr. Ansari's signature is published as an enclosure to that letter.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

AUGUST 22, 1973.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive of May 16, 1973, from the Chairman, Committee for the Implementation of Textile Agreements that directed you, effective as soon as possible and until further notice, to exempt from the levels of restraint applicable to the Bilateral Cotton Textile Agreement of May 6, 1970, as amended, between the United States and Pakistan certain traditional Pakistan Items. One of the requirements is that each certification for exempt items must include the signature of an official authorized to issue such certifications.

Pursuant to the aforementioned authority and in accordance with the procedures of Executive Order 11651 of March 3, 1972, the directive of May 16, 1973, is hereby amended to authorize Mr. Shamsuddin Ansari to issue certifications for exempt items, in addition to the eight officials previously designated. A facsimile of Mr. Ansari's signature is enclosed.

The actions taken with respect to the Government of Pakistan and with respect to imports of cotton textiles and cotton textile products from Pakistan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.73-18438 Filed 8-28-73;8:45 am]

CERTAIN WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF KOREA

Entry or Withdrawal From Warehouse for Consumption

AUGUST 22, 1973.

Under the Bilateral Wool and Man-Made Fiber Textile Agreement of January 4, 1972, as amended, between the Governments of the United States and the Republic of Korea, the Government of the Republic of Korea has undertaken to limit its exports of wool and man-made fiber textile products to the United States to certain designated levels. On May 29, 1973, the Governments of the United States and the Republic of Korea established an administrative mechanism to exempt from the limitations of the aforementioned bilateral agreement certain traditional Korean Items comprising Annex C of the agreement, produced or manufactured in the Republic of Korea and exported to the United States, which have been certified for exemption by the Government of the Republic of Korea. The purpose of this notice is to announce the implementation of this administrative mechanism.

Accordingly, there is published below a letter of August 22, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that certain traditional Korean Items, certified exempt by the Government of the Republic of Korea, shall henceforth and until further notice not be subject to the levels of restraint established by the Bilateral Wool and Man-Made Fiber Textile Agreement of January 4, 1972, as amended.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20009.

AUGUST 24, 1973.

DEAR MR. COMMISSIONER: This directive amends but does not cancel the directive issued to you on September 28, 1972 by the Chairman of the Committee for the Implementation of Textile Agreements which designated levels of restraint for certain wool and man-made fiber textile products produced or manufactured in the Republic of Korea which may be entered or withdrawn from warehouse for consumption in the United States during the twelve-month period which began on October 1, 1972. It also amends but does not cancel the directive of May 19, 1972 which established an export visa requirement for entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products produced or manufactured in the Republic of Korea.

Pursuant to paragraph 11(a) of the Bilateral Wool and Man-Made Fiber Textile Agreement of January 4, 1972, as amended, between the Governments of the United States and the Republic of Korea, and in accordance with the procedures of Executive Order 11651 of March 3, 1972; effective as soon as possible and until further notice, the traditional Korean Items listed below, produced or manufactured in the Republic of Korea and entered into the United States in accordance with the provisions of this directive shall neither be subject to nor counted in any level of restraint now or hereafter put into effect pursuant to this agreement:

1. Chima—The long, formless and ample skirt portion of the traditional Korean Chima-Chogori dress set;

2. Chogori—The short halter type blouse or top portion of the traditional Korean Chima-Chogori dress set;

3. Bosun—An ankle boot-type article, wholly of cloth, worn by Korean women indoors;

4. Fabrics, not exceeding 24x48 inches in size, containing hand embroidered or hand-painted Korean scenes and used primarily as decorations or art objects;

5. Handmade carpets, i.e., in which the pile was inserted or knotted by hand and classified by the U.S. Customs under TSUSA numbers 360.0500, 360.1000, 360.1500, or 360.7540.

To qualify for exemption from the designated levels of restraint, each shipment of the Korean Items listed above shall be accompanied by a certification issued by the Government of the Republic of Korea. The certification shall be a stamped marking in blue ink on the front of the invoice (Special Customs Invoice Form 5515, successor document, or other commercial invoice when such form is used). Each certification will consist of the authorized signature and title of the official issuing the certification; identify the items exempted; indicate the date the certification was signed and certified; and carry the certificate number. A facsimile of the stamp, along with the signature of the official authorized to issue the exempt certification is enclosed.

All merchandise covered by an invoice which has an exempt certification but contains both exempt and non-exempt textile items will be prohibited entry.

In addition to the certification stamp, each shipment of Korean Items will be accompanied by a visa in accordance with the

V 38-167 AUG 29 73 XUM

visa arrangement agreed to by the Governments of the United States and the Republic of Korea on April 27, 1972, as amended.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of wool and man-made fiber textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

FEDERAL MARITIME COMMISSION

NORTH EUROPE-U.S. PACIFIC FREIGHT CONFERENCE
Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street NW., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before September 18, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

NORTH EUROPE-U.S. PACIFIC FREIGHT CONFERENCE

MODIFICATION OF AGREEMENT

Notice of agreement filed by:

H. G. Brandt, Secretary, North Europe-U.S. Pacific Freight Conference, Diergaardesingel 73-A, P.O. Box 341, Rotterdam 3, Holland.

Agreement No. 93-9, among the member lines of the above-named conference, expands the scope of the Agreement to include cargo moving from (1) Ports in Eire and (2) Interior points in Sweden, Norway, Denmark, Finland, East Germany, West Germany, The Netherlands, Belgium, Luxemburg, France, Switzerland, Austria, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, and Yugoslavia when moving via conference ports.

By Order of the Federal Maritime Commission.

Dated August 24, 1973.

JOSEPH C. POLKING,
Assistant Secretary.

[Docket No. 73-54]

WINDJAMMER CRUISES, INC. AND WINDJAMMER CRUISES, LTD.
Order of Investigation and Hearing

Windjammer Cruises, Inc. and/or Windjammer Cruises, Ltd d/b/a "Windjammer Cruises" P.O. Box 120, Miami Beach, Florida 33139, with offices at 120 McArthur Causeway, Miami Beach, Florida 33139, is/are the owners and/or operators of the Schooners Yankee Clipper and Yankee Trader and Barquentine Flying Cloud, each having passenger accommodations for more than 50 passengers.

Based upon information and belief, "Windjammer Cruises" is alleged to have embarked passengers on the Flying Cloud at Mayaguez, Puerto Rico on or about December 18, 1972 and to have embarked a passenger or passengers on the Yankee Trader at Miami Beach, Florida on or about February 16, 1973.

Section 2 of Public Law 89-777 requires owners or charterers of American or foreign vessels having berth or stateroom accommodations for 50 or more passengers, and embarking passengers at United States ports, to establish financial responsibility to meet any liability incurred for death or injury to passengers or other persons on voyages to or from United States ports.

Section 3 of Public Law 89-777 provides that no person in the United States shall arrange, offer, advertise, or provide passage on a vessel having berth or stateroom accommodations for 50 or more passengers and which is to embark passengers at United States ports without first establishing financial responsibility for indemnification of passengers for nonperformance of transportation.

Section 540.3 of this Commission's General Order 20 provides as follows:

No person in the United States may arrange, offer, advertise, or provide passage on a vessel unless a Certificate (Performance) has been issued to or covers such person.

Section 540.22 of this Commission's General Order 20 provides as follows:

No vessel shall embark passengers at U.S. ports unless a Certificate (Casualty) has been issued to or covers the owner or charterer of such vessel.

Now, Therefore, It Is Ordered, That, pursuant to Section 22 of the Shipping Act, 1916 (46 U.S.C. 821), Section 2 of Public Law 89-777 (46 U.S.C. 817d) and Section 3 of Public Law 89-777 (46 U.S.C. 817e) the Commission on its own motion enter upon an investigation and hearing to determine whether Windjammer Cruises has violated:

1. Section 2, Public Law 89-777, by embarking passengers, or having embarked passengers, at United States ports without having complied with the financial responsibility requirements of Section 2 of Public Law 89-777, and/or

2. Section 3, Public Law 89-777, by arranging, offering, advertising or providing passage, or having arranged, offered, advertised or provided passage on a vessel without having complied with the financial responsibility requirements of Section 3 of Public Law 89-777, and/or

3. Section 540.3 and/or 540.22 Federal Maritime Commission General Order 20 (46 C.F.R. 540.3 and 540.22) promulgated to implement Sections 2 and 3 of Public Law 89-777.

It Is Further Ordered, That Windjammer Cruises are hereby named respondents in this proceeding and that the matter be assigned for hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges, and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge; and

It Is Further Ordered, That notice of this Order and notice of hearing be published in the FEDERAL REGISTER and that a copy of such Order and notice of hearing be served upon respondents and upon the Commission's Bureau of Hearing Counsel; and

It Is Further Ordered, That any person (including individuals, corporations, associations, firms, partnerships and public bodies) having an interest in this proceeding, and desiring to intervene herein, shall file a petition to intervene in accordance with Rule 5(1) (46 C.F.R. 502.72) of the Commission's rules of practice and procedure, with a copy to all parties; and

It Is Further Ordered, That all future notices, orders and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of time and place of hearing or prehearing conference, shall be mailed directly to all parties of record.

By the Commission.

[SEAL] JOSEPH C. POLKING,
Assistant Secretary.

[FR Doc.73-18315 Filed 8-28-73;8:45 am]

FEDERAL POWER COMMISSION

[Docket No. RP72-110]

ALGONQUIN GAS TRANSMISSION CO.
Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

AUGUST 22, 1973.

Take notice that Algonquin Gas Transmission Company (Algonquin Gas), on July 24, 1973, tendered for filing Second Substitute Second Revised Sheet No. 3-A and Third Substitute Second Revised Sheet No. 3-A to its FPC Gas Tariff, Original Volume No. 1, pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision (PGAC) set forth in sec. 22 of the General Terms and Conditions of its FPC Gas Tariff, Original Volume No. 1. The Company maintains that Second Substitute Second Revised Sheet No. 3-A, proposed to become effective August 1, 1973, is being filed to reflect an increase in purchased gas cost to be paid by Algonquin Gas to its supplier, Texas Eastern Transmission Corporation (Texas Eastern), effective August 1, 1973, as a result of a rate increase filed by Texas Eastern on July 13, 1973, in Docket No. RP72-98. Algonquin Gas states that the proposed changes would increase revenues from jurisdictional sales and service by $305,055, based on the 12 months ended June 30, 1973.

Algonquin Gas states that Third Substitute Second Revised Sheet No. 3-A proposed to become effective September 1, 1973, is necessary because of the filing of Second Substitute Second Revised Sheet No. 3-A. On July 17, 1973, Algonquin Gas filed Substitute Second Revised Sheet No. 3-A, a 0.02 cents per Mcf rate reduction effective September 1, 1973, to reflect application of the amortization of deferred gas account provision of Algonquin Gas' PGAC. Since the July 17, 1973 filing did not reflect higher cumulative adjustment to the base rate, which is the subject of Second Substitute Second Revised Sheet No. 3-A, the new tariff sheet, designated Third Substitute Second Revised Sheet No. 3-A, is being filed to show such higher cumulative adjustment, according to Algonquin Gas' statement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 5, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-307]

BROCKTON TAUNTON GAS CO.
Notice of Petition

AUGUST 22, 1973.

Take notice that on August 10, 1973, Brockton Taunton Gas Company (Petitioner), 125 High Street, Boston, Massachusetts 02110, filed in Docket No. CP73-307, a petition to amend the order authorizing the importation of liquefied natural gas (LNG) pursuant to Section 3 of the Natural Gas Act by extending the time in which Petitioner may import LNG purchases from Gaz Metropolitain, Inc., Montreal, P.Q., Canada, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner was authorized by order issued July 31, 1973, in the instant docket to import 4,583,440 U.S. gallons of LNG at 12.742 cents per U.S. gallon, equivalent to approximately 400 billion Btu at a price of $1.46 per million Btu between June 15, 1973, and September 15, 1973.

As a result of a delay in commencement of deliveries Petitioner now proposes to complete the authorized importation and to transport said quantities of LNG to its storage facilities at Easton, Massachusetts, by October 31, 1973, in lieu of the September 15, 1973.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene

V 38-167 AUG 29 73 XUM

in accordance with the Commission's Rules.

[Docket No. RP73-86]

COLUMBIA GAS TRANSMISSION CORP.

Notice of Amended Rate Filing

AUGUST 23, 1973.

On August 14, 1973, Columbia Gas Transmission Corporation (Columbia) tendered for filing proposed alternative revised tariff sheets to Columbia's FPC Gas Tariff, Original Volume No. 1. The filing is described in the company's letter of transmittal as follows:

(Substitute Eighth Revised Tariff Sheet No. 16) • • • bears an issue date of August 14, 1973, and an effective date of September 14, 1973.

In its "Order Accepting for Filing and Suspending Proposed Revised Tariff Sheets, Providing for Hearing, Permitting Intervention, and Consolidating Proceedings," issued herein on April 13, 1973, the Commission stated, "In accepting the proposed rates for filing, we note that the entire rate increase had been applied to the commodity rate level. However, comparison of Columbia's cost of service classified on unmodified *Seaboard* to the revenues generated by such increased commodity rate indicates that these rates fail to recover the classified commodity rates by some $72 million. To the extent that these rates as filed do not recover fully allocated *Seaboard* costs, as may be determined herein, Columbia may be required to absorb the impact of any undercollections under these rates as may occur.

As a result of the Commission's statement, the aforementioned tariff sheet contains rates which give effect to the originally filed for rate increase in this proceeding, but redesigned to recover Columbia's commodity cost of service on the basis of costs classified on the unmodified *Seaboard* method.

In addition to the redesign of the suspended rates to reflect the unmodified *Seaboard* cost classification, the proposed tariff sheet reflects the Purchased Gas Adjustment increase filed by Columbia on July 16, 1973, as revised on August 2, 1973, which is to become effective on September 1, 1973.

As an alternative, Columbia herewith submits for filing the following revised tariff sheets to its FPC Gas Tariff, Original Volume No. 1:

Alternate Substitute Eighth Revised Sheet No. 16.

Such alternate tariff sheet reflects the rates as originally filed in this docket, adjusted only for the Purchased Gas Adjustment filing to become effective September 1, 1973, and is being submitted in the event the Commission determines that the proposed *Seaboard* redesigned rates cannot replace the suspended rates without an additional suspension period beyond that prescribed by the Commission's Order of April 13, 1973.

Columbia states that it has served a copy of this filing on its jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 7, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

KENNETH F. PLUMB,
Secretary.

EL PASO NATURAL GAS CO.

Notice Deferring Procedural Dates

AUGUST 23, 1973.

On August 17, 1973, El Paso Natural Gas Company filed a motion for further postponement of procedural dates fixed by notice issued June 25, 1973. By letter dated August 21, 1973, El Paso Natural Gas Company stated that no party objected to the motion.

Upon consideration, notice is hereby given that the procedural dates in the above-designated matters relating to the Southern Division System are deferred pending further order of the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-334]

EL PASO NATURAL GAS CO.

Notice of Extension of Time

AUGUST 23, 1973.

On August 17, 1973, El Paso Natural Gas Company filed a motion for an extension of time to file its case-in-chief as required by the order issued August 7, 1973, in the above-designated matter. The motion states that staff counsel, Tucson Gas and Electric Company, Salt River Project Agricultural Improvement and Power District have no objection to the request.

Upon consideration, notice is hereby given that the date is extended to and including August 31, 1973, within which El Paso may file its case-in-chief in the above-designated matter. The hearing date is unchanged.

[Docket No. E-7740]

INDIANA & MICHIGAN ELECTRIC CO.

Order Rejecting Tariff Sheets and Providing for Refunds

AUGUST 8, 1973.

On June 13, 1972, Indiana & Michigan Electric Company (I&M) tendered for filing revised tariff sheets which reflected a proposed increase in its wholesale electric rates to, among others, Richmond Power and Light of the City of Richmond, Indiana (Richmond) and Anderson Power and Light of the City of Anderson, Indiana (Anderson). By order issued August 11, 1972, the Commission accepted the tariff sheets for filing, suspended the effective date for five months, until January 13, 1973, and ordered a hearing. Richmond and Anderson applied for rehearing which was denied by Commission order on October 6, 1972.

As a result of the Petition for Review filed by Richmond and Anderson, the United States Court of Appeals for the District of Columbia Circuit reversed the Commission's orders accepting I&M's filing as to Richmond and Anderson and ordered refunds. *Richmond Power & Light of the City of Richmond, Indiana, et al.* v. *F.P.C.*, —— F2d —— (CADC 1973). In compliance with this decision, we will reject I&M's filing in this docket as it relates to Richmnod and Anderson and order refunds with interest of the incremental amounts collected by I&M from Richmond and Anderson from January 13, 1973, the date the rate schedules for Richmond and Anderson became effective.

The Commission orders:

(A) The tariff sheets filed in this docket by I&M are rejected as to Richmond and Anderson.

(B) I&M shall refund to Richmond and Anderson, respectively, the incremental amounts collected since January 13, 1973, the date the rate schedule became effective, with interest at seven percent per annum.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.73-18331 Filed 8-28-73;8:45 am]

[Docket No. E-8365]

KANSAS CITY POWER AND LIGHT CO.

Notice of Increased Schedules of Rates and Charges

AUGUST 23, 1973.

Take notice that on August 17, 1973, Kansas City Power and Light Company (Company) tendered for filing new increased Schedules of Rates and Charges for Wholesale Firm Power Service to supersede and replace those rate provisions of the Company's contract rate schedules for Wholesale Firm Power Service with the following:

(1) City of Prescott, Kansas (Prescott) FPC No. 30.
(2) Missouri Public Service Company (MPSC) FPC No. 49.
(3) Missouri Power and Light Company (MPLC) FPC No. 51.
(4) City of Higginsville, Missouri Higginsville) FPC No. 60.
(5) City of Salisbury, Missouri (Salisbury) FPC No. 61.
(6) City of Armstrong, Missouri (Armstrong) FPC No. 62.
(7) City of Slater, Missouri (Slater) FPC No. 64.
(8) City of Gardner, Kansas (Gardner) FPC No. 66.
(9) Sugar Valley Electric Cooperative Association, Inc. (Sugar Valley) FPC No. 68.
(10) Coffey County Rural Electric Cooperative Association, Inc. (Coffey County) FPC No. 69.
(11) City of Pomona, Kansas (Pomona) FPC No. 71.

The Company states that the proposed effective date for each new increased Schedule of Rates and Charges is October 17, 1973, or the earliest date thereafter in accordance with the Company's existing contract with the wholesale customer.

According to the Company, the new Schedules of Rates and Charges reflect an increase of $743,773 in annual revenues to the Company based on its cost of service and sales to the wholesale customers during the 12-month test period ending on December 31, 1972. Further, the Company states that the changes embodied in the new Schedules of Rates and Charges include (1) increased rates for Demand and Energy Charges, and (2) a related pricing of the base "fuel cost" in the Fuel Adjustment Clause at 30.0¢ per million Btu to reflect the appropriate average fuel cost to the Company in 1972.

Moreover, the Company states that the new Schedules of Rates and Charges are designed to increase the Company's rate of return to 8.10% on its wholesale service to each class of customers based on its 1972 costs of service and sales to them.

According to the Company, the Company has experienced substantial increases in all elements of its costs, including fuel, labor, interest, taxes and construction to provide additional capacity and meet environmental requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 18, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8354]

LOUISVILLE GAS AND ELECTRIC CO.

Notice of Proposed Cancellation

AUGUST 23, 1973.

Take notice that on August 10, 1973, Louisville Gas and Electric Company (LG&E) tendered for filing the proposed cancellation of its Rate Schedule FPC No. 22, dated August 14, 1968, between LG&E and Salt River Rural Electric Cooperative Corporation (Salt River). According to LG&E, Salt River has contracted with East Kentucky Rural Electric Cooperative Corporation (East Kentucky) to purchase from it beginning September 13, 1973, the requirements heretofore served by LG&E.

LG&E requests that the proposed cancellation become effective September 12, 1973, and states that notice of the proposed cancellation has been served upon Salt River and East Kentucky.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 7, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-18340 Filed 8-28-73;8:45 am]

[Docket No. RP73-91]

McCULLOCH INTERSTATE GAS CORP.

Notice of Proposed Purchase Gas Adjustment Clause

AUGUST 23, 1973.

Take notice that McCulloch Interstate Gas Corporation (McCulloch) on August 1, 1973, tendered for filing copies of each of the following revised tariff sheet Nos. 28–31 to its FPC Gas Tariff, Original Volume No. 1, Sheet Nos. 28–31. McCulloch states that the present filing is a *refiling* under the Commission's letter of July 2, 1973.

McCulloch further states that these revised tariff sheets are designed to establish purchased gas cost adjustment provisions (PGAC) in McCulloch's FPC Gas Tariff, Original Volume No. 1, applicable to natural gas service rendered by the McCulloch Wyoming pipeline system. McCulloch requests that the proposed effective date for the tendered revised tariff sheets be September 1, 1973.

McCulloch contends that in view of the increasing natural gas shortage, and a general increase in the prices of natural gas, McCulloch, and its affiliated supplier, McCulloch Gas Processing Corporation, are being forced to pay premium prices in excess of the 22.18¢ per Mcf area price specified in the Commission's Rocky Mountain Area Rate order to continue McCulloch's jurisdictional natural gas service. McCulloch maintains that these natural gas contracts have also required increased prices for extraction and liquids, and will require above ceiling BTU adjustments and limited-term premium priced natural gas purchases. McCulloch further argues that if it, and its affiliated supplier, are to continue to make such purchases, the cost must be passed on as part of McCulloch Interstate's reasonable and prudent cost of continuing its jurisdictional natural gas service.

On August 10, 1973, McCulloch tendered for filing as supplements to the PGAC which was filed on August 1, 1973, the following:

1. A "Cost of Service Study", pursuant to § 154.38(d)(4)(i), for the 12-month period ended December 31, 1972.

2. A copy of McCulloch Interstate's recent rate increase request, filed in Docket No. RP73–103, on April 30, 1973. This filing contains a cost of service study with a test period (1973) ending less than 12 months prior to submission of the PGA clause, as set forth in § 154.38 (d)(4)(i). McCulloch's recent rate increase request in Docket No. RP73–103 is incorporated herein by reference.

3. An Original Sheet No. 32, which supplements Original Sheet Nos. 28 through 32, refiled on August 1, 1973.

4. In connection with Sheet No. 32, McCulloch states that the following amendments should be made to the proposed PGA clause:

(a) The words "Sheet No. 32" should be inserted in lieu of the words "Sheet No. 11" in Paragraph 1.2 of the PGA clause;

(b) The words "Sheet No. 32" should be inserted in lieu of "Sheet No. 11" in Paragraph 1.7;

(c) The words "and a Revised Sheet No. 32" should be inserted after the words "Revised Sheet No. 11" in Paragraph 1.8 of Original Sheet No. 32.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 11, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-18332 Filed 8-28-73;8:45 am]

[Docket No. CP72-114]

TENNESSEE GAS PIPELINE CO.

Notice of Proposed Changes Gas Tariff

AUGUST 23, 1973.

Take notice that Tennessee Gas Pipeline Company, a Division of Tenneco

V38-167 AUG 29 73 XUM

Inc. (Tennessee), on August 6, 1973, tendered for filing proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 2, to be effective June 7, 1973.

Tennessee states that the proposed changes reflect an amendatory letter agreement between Columbia Gulf Transmission Company (Columbia) and Tennessee dated August 15, 1972. On September 13, 1972, Tennessee and Columbia filed application in Docket CP72–114 to amend the Commission's order of April 17, 1972, so that Tennessee would be able to utilize its full share of the Western Shore capacity (192,400 Mcf per day). This amendment, approved by Commission order dated June 7, 1973, provides for Columbia's delivery of between 70,000 Mcf and 120,000 Mcf per day to Tennessee at the Cameron delivery point and the redelivery of equivalent volumes by Tennessee to Columbia at the Garden City and/or Erath delivery points, according to the Company's statement.

Tennessee further states that a copy of the filing was served upon Columbia Gulf Transmission Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 10, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–18333 Filed 8–28–73;8:45 am]

[Docket No. RP72–128]

TRANSWESTERN PIPELINE CO.

Notice of Proposed Changes Gas Tariff

AUGUST 23, 1973.

Take notice that Transwestern Pipeline Company (Transwestern) on August 15, 1973, tendered for filing as part of its FPC Gas Tariff, First Revised Volume No. 1 the following sheets:

Third Revised Sheet PGA–1.
Thirty-second Revised Sheet No. 4.
Twenty-seventh Revised Sheet No. 6–A.
Eleventh Revised Sheet No. 6–D.
Twenty-first Revised Sheet No. 7.

These sheets are issued pursuant to Transwestern's Purchased Gas Cost Adjustment provision set forth in Section 19 of the General Terms and Conditions of its FPC Gas Tariff, First Revised Volume No. 1. According to Transwestern, this provision was approved by order of the Federal Power Commission dated September 19, 1972, in Docket No. RP72–128. This change in Transwestern's rates reflects a cost of gas adjustment to track increased purchased gas costs and a surcharge adjustment to clear the balance of the Gas Cost Adjustment Account.

Transwestern proposes that these tariff sheets become effective on October 1, 1973.

The Company states that copies of the filing were served upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8, 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 20, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file wtih the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73–18334 Filed 8–28–73;8:45 am]

[Docket No. RP72–23]

TRUNKLINE GAS CO.

Change in Tariff

AUGUST 22, 1973.

Take notice that on June 15, 1973, Trunkline Gas Company (Trunkline) tendered for filing Eighth Revised Sheet No. 3–A to its FPC Gas Tariff, Original Volume No. 1. Trunkline states that the filing is in accordance with the provisions of Article V of the Stipulation and Agreement in Docket No. RP72–23, *et al.*, approved by the Commssion's Order of April 11, 1972, and pursuant to § 18 of the General Terms and Conditions of Trunkline's FPC Gas Tariff, Original Volume No. 1. The company submits that the foregoing tariff sheet reflects an increase of 0.24¢ per Mcf for advance payment tracking pursuant to the abovementioned Article V and also reflects a decrease in the current cost of gas and recovery of amounts in the deferred purchased gas account pursuant to § 18 of the General Terms and Conditions of Trunkline's FPC Gas Tariff, Original Volume No. 1. An effective date of August 1, 1973, is proposed.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 5, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Rate Schedule Nos. 43, *et al.*]

WARREN PETROLEUM CO., ET AL.

Rate Change Filings Pursuant to Commission's Opinion No. 639

AUGUST 23, 1973.

Take notice that the producers listed in the Appendix attached hereto have filed proposed increased rates to the applicable area new gas ceiling based on the interpretation of vintaging concepts set forth by the Commission in its Opinion No. 639, issued December 12, 1972.

The information relevant to each of these sales is listed in the Appendix.

Any person desiring to be heard or to make any protest with reference to said filings should on or before September 4, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

FLORIDA NATIONAL BANKS OF FLORIDA, INC.

Acquisition of Bank

Florida National Banks of Florida, Inc., Jacksonville, Florida, has applied for the Board's approval under Section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of Northside Bank of Miami, Miami, Florida. The factors that are considered in acting on the application are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

NCNB CORP.

Proposed Continuation of Certain Insurance Sales Activities

NCNB Corporation, Charlotte, North Carolina, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to continue to engage in insurance sales activities related to extensions of credit by its wholly-owned subsidiary, C. Douglas Wilson & Co., Greenville, South Carolina. Notice of the application was published on:

Date	Newspaper	City and State
Mar. 19, 1973	The State	Columbia, S.C.
Mar. 21, 1973	The Greenville News	Greenville, S.C.
Mar. 18, 1973	The Spartanburg Herald. The Spartanburg Journal and/or Spartanburg Herald-Journal.	Spartanburg, S.C.
Mar. 20, 1973	The News and Courier.	Charleston, S.C.
Do	Anderson Independent Daily.	Anderson, S.C.
Mar. 23, 1973	Florence Morning News.	Florence, S.C.

Applicant proposes to continue to engage in such insurance sales activities at an office located in each of these communities. Applicant proposes to continue to engage, indirectly through C. Douglas Wilson & Co., its wholly-owned subsidiary, in the sale, as agent, of credit life and credit health and accident insurance to mortgage customers of C. Douglas Wilson & Co. Such activity has been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 17, 1973.

Board of Governors of the Federal Reserve System, August 21, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.73–18254 Filed 8–28–73;8:45 am]

V 38-167 AUG 29 73 XUM

TENNESSEE NATIONAL BANCSHARES, INC.

Order Denying Acquisition of Maryville Savings and Loan Corporation

Tennessee National Bancshares, Inc., Maryville, Tennessee, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act and § 225.4(b)(2) of the Board's Regulation Y, to acquire 90 percent or more of the voting shares of Maryville Savings and Loan Corporation (an industrial loan and thrift company), Maryville, Tennessee (Company), a company that engages in the activities of an industrial loan company, including the making of loans, the sale of credit life insurance and credit accident and health insurance in connection therewith, the sale of comprehensive physical damage insurance on certain personal property taken as security in connection with loans, and the borrowing of funds at interest as provided by the applicable law. Such activities have been determined by the Board to be closely related to banking (12 CFR 225.4(a)(2) and (9)(ii)(a)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (38 FR 10679). The time for filing comments and views has expired, and none has been timely received.

Applicant controls two banks with aggregate deposits of $56.3 million, representing 0.5 percent of total commercial bank deposits in the State.[1] Applicant's lead bank, The Blount National Bank of Maryville (Bank), Maryville, Tennessee (deposits of $50.9 million), is the smaller of two banks in Blount County and controls 45.5 percent of bank deposits therein. Both of the banks in Blount County are located in Maryville, a town of approximately 14,000 persons, situated 15 miles south of Knoxville, Tennessee and falling within the Knoxville SMSA. Bank had outstanding consumer instalment loans of the types made by consumer finance companies of $1.6 million as of June 30, 1972, representing 12.2 percent of outstanding consumer loans held by banks and consumer finance companies located in Blount County as of that date.

Contrary to the implications contained in its corporate title, Company (assets of $1.6 million) does not operate as a savings and loan association. It is an industrial loan and thrift company and has so served the Maryville area for over 40 years. Company issues "certificates of indebtedness" and with funds derived thereby makes signature, personal property, co-signor, and second mortgage loans. Company operates out of a single office in Maryville and had outstanding consumer loans of $939 thousand as of December 31, 1972. Company is the third largest of 10 consumer finance companies in Blount County with 12.7 percent of the outstanding loans of the consumer finance companies. As Company's sole office is located only several blocks from the main office of Bank, both offices draw customers from the same local service area. Approval of this transaction would increase Applicant's share of outstanding consumer loans made in the Maryville area from approximately 12 percent to approximately 19 percent, remove an alternative source of consumer credit, and eliminate direct competition for consumer loans between Applicant's lead bank and Company. Accordingly, the Board finds that the proposed acquisition would have adverse effects on competition.

Section 4(c)(8) of the Bank Holding Company Act requires the Board to find that performance by Company as an affiliate of Applicant "can reasonably be expected to produce benefits to the public such as greater convenience, increased competition, or gains in efficiency that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest or unsound banking practices." The basic balancing test of section 4(c)(8) requires a showing of positive public benefits that outweigh the adverse effects of the proposed acquisition described above. Applicant has the burden of demonstrating that the proposed acquisition will be in the public interest. In seeking to meet this burden, Applicant indicates that affiliation would increase the financial resources available to Company. Also, Applicant anticipates establishing additional offices for Company. However, upon consideration of the aforementioned anticompetitive factors, the Board finds that the public benefits to be derived from this affiliation do not outweigh the adverse competitive effects of the proposal.

Based on the foregoing and other considerations reflected in the record, the Board has determined that public interest benefits which the Board is required to consider under section 4(c)(8) of the Act do not outweigh the adverse effects. Accordingly, the acquisition is hereby denied.

By order of the Board of Governors,[2] effective August 21, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc. 73-18253 Filed 8-28-73;8:45 am]

UNITED FIRST FLORIDA BANKS, INC.

Order Approving Acquisition of Bank

United First Florida Banks, Inc., Tampa, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of the First State Bank of Lutz, Lutz, Florida (Bank).

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the fifth largest banking organization in Florida, controls 31 banks with aggregate deposits of $971.5 million, representing 5.69 percent of total deposits in commercial banks in Florida.[1] Approval of the proposed acquisition would not result in a significant increase in concentration of banking resources in Florida.

Bank is located in the town of Lutz, in the northern part of Hillsborough County, which along with the community of Land O' Lakes in Pasco County comprises the relevant banking market. Bank has total deposits of $6.8 million, less than 1 percent of the deposits in the market. While Applicant ranks as the third largest banking organization in the market, with 12.4 percent of aggregate deposits, its three banking subsidiaries are in the southern portion of the market, more than 15 miles away from Bank. Direct competition between Bank and Applicant's subsidiary banks in Tampa is nominal; Bank derives loans and time deposits from Tampa. Bank also competes in making conventional residential loans with Applicant's nonbanking subsidiaries, Marine Mortgage Corporation. The extent of this competition is not regarded as significant. The small size of Bank, the number of intervening banks and the distance between Bank and Applicant's subsidiaries make it unlikely that future competition would develop between them. Applicant will not gain sufficient assets by this acquisition to dominate the market or to foreclose future entry.

Considerations relating to the convenience and needs of the community to be served lend weight toward approval. Applicant proposes to expand Bank's loan portfolio by making instalment loans to consumers and also to offer trust services. The financial and managerial resources of Applicant, its existing subsidiary banks, and Bank are consistent with approval, particularly in view of Applicant's commitment to improve the capital position of several of its other subsidiary banks.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order, or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[2] effective August 21, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

[FR Doc.73-18255 Filed 8-28-73;8:45 am]

[1] All banking data and data pertaining to Company are as of December 31, 1972, unless otherwise indicated.

[2] Voting for this action: Chairman Burns and Governors Mitchell, Brimmer, Sheehan, and Bucher. Absent and not voting: Governors Daane and Holland.

[1] All banking data are as of June 30, 1972, unless otherwise noted, and include formations and acquisitions approved by the Board through June 12, 1973.

UNITED VIRGINIA BANKSHARES INC.

Acquisition of Bank

United Virginia Bankshares Incorporated, Richmond, Virginia, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of the proposed successor by merger to the Bank of Spotsylvania, Spotsylvania, Virginia. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Richmond. Any person wishing to comment on the application should submit his views in writing to the Reserve Bank to be received not later than September 17, 1973.

Board of Governors of the Federal Reserve System, August 21, 1973.

NATIONAL SCIENCE FOUNDATION

ADVISORY COMMITTEE ON ETHICAL AND HUMAN VALUE IMPLICATIONS OF SCIENCE AND TECHNOLOGY

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (P.L. 92-463) notice is hereby given that a meeting of the Advisory Committee on Ethical and Human Value Implications of Science and Technology will be held at 9 a.m. on September 13, 1973, in room 540 at 1800 G Street NW., Washington, D.C. 20550.

The purpose of this Committee is to provide advice and recommendations concerning support of scholarly activities in the field of ethical and human value implications of scientific and technological progress, in conjunction with cooperative programs of the National Endowment for the Humanities and the National Science Foundation.

The agenda for this meeting shall include:

MORNING

Opening Remarks—Director, National Science Foundation.
Introduction of Committee members and selection of interim Chairman.
Background of the program and charge to the Committee.
General discussion of scope of program and areas of emphasis.
Recess for lunch.

AFTERNOON

General discussion of priorities.
Prime target areas of encouragement of proposals.
Typical problem areas in which ethical and human value questions may be raised.
Priorities for typical problem areas for joint funding with NEH
Summary and recommendations of the Committee
Suggestions and consensus for date of next meeting
Adjournment

This meeting shall be open to the public on a space available basis. Individuals who plan to attend should notify Mr. Charles Maechling, Jr., Special Assistant to the Director, by telephone (202/632-5700) or by mail (room 251, 1800 G Street NW., Washington, D.C. 20550) not later than close of business on September 11, 1973.

For further information concerning this Committee, contact Mr. Charles Maechling, Jr., Special Assistant to the Director, room 251, 1800 G Street NW., Washington, D.C. 20550. Summary minutes of this meeting may be obtained from the Management Analysis Office, room K-720, 1800 G Street NW., Washington, D.C. 20550.

ELDON D. TAYLOR,
Acting Assistant Director for Administration.

ADVISORY PANEL FOR EXPERIMENTAL R&D INCENTIVES PRIVATE SECTOR SUBCOMMITTEE

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (P.L. 92-463) notice is hereby given that a meeting of the Private Sector Subcommittee of the Advisory Panel for Experimental R&D Incentives will be held at 9:30 a.m. on September 13, 1973, and at 9:00 a.m. on September 14, 1973, at the Faculty Club, Massachusetts Institute of Technology, 50 Memorial Drive, Cambridge, Massachusetts 02139. The purpose of this Subcommittee is to provide advice and recommendations as part of the review and evaluation process of major experiments, projects, and studies sponsored by the Experimental R&D Incentives Program.

The agenda for this meeting shall include:

SEPTEMBER 13

MORNING

9:30—Welcome—MIT hosts
9:40—Briefing on Experimental R&D Incentives Program with specifics on Experiment #3—Innovation Center Activities—Experimental R&D Incentives Staff
10:15—Description of goals, plans, and implementation procedure for center program—Principal Investigators of Innovation Center
12:00—Recess for lunch

[2] Voting for this action: Chairman Burns and Governors Daane, Brimmer, Sheehan, Bucher, and Holland. Absent and not voting: Governor Mitchell.

V 38-167 AUG 29 73 XUM

AFTERNOON

1:30—Discussion of plans and programs of Innovation Centers—Principal Investigators, Experimental R&D Incentives Staff, Advisory Panel for Experimental R&D Incentives
4:00—Adjournment

SEPTEMBER 14

MORNING

9:00—Briefing of current activities and plans for FY 1974 of Experimental R&D Incentives Program—Experimental R&D Incentives Staff
10:00—Discussion of potential incentive areas for investigation during FY 1974, especially relating to "start-up" problem
12:00—Recess for lunch

AFTERNOON

1:30—Continuation of discussion of potential incentive areas for FY 1974
2:30—Summary of discussions and plans for next meeting
3:00—Adjournment

The meeting shall be open to the public on a space available basis. Individuals who plan to attend should notify Mr. Robert Colton, Project Officer, Private Sector Office, Office of Experimental R&D Incentives, by telephone (202/632–7724) or by mail (room 543, 1800 G Street NW., Washington, D.C. 20550) not later than close of business on September 11, 1973.

For further information concerning this Subcommittee, contact Mr. Robert Colton, Project Officer, Private Sector Office, Office of Experimental R&D Incentives, room 543, 1800 G Street NW., Washington, D.C. 20550. Summary minutes of this meeting may be obtained by contacting the Management Analysis Office, room K–720, 1800 G Street NW., Washington, D.C. 20550.

ELDON D. TAYLOR,
Acting Assistant Director for Administration.

POSTAL RATE COMMISSION

ARTHUR D. LITTLE, INC.

Notice of Commencement of Contract Study

Pursuant to the Commission's request for proposals on the classification study announced in the FEDERAL REGISTER of June 7, 1973, the Commission has entered into a contract with the firm of Arthur D. Little, Inc., to perform the planned study. Members of the staff of the Commission will serve as contracting officers or administrators in monitoring the execution of the contract to ensure that work progress and cost incurrence are in accord with the requirements of the government as set forth in the schedule of work and other provisions of the contract. All conclusions reached by the contractor will reflect the contractor's own independent judgments; such judgments ultimately might or might not be in consonance with the views of or positions takenk by the Commission or its staff. The contractor will visit postal facilities to observe postal operations and to confer with knowledgeable postal personnel. Members of the staff of the Commission may sit in on these meetings or join in the field trips in their capacity as contract monitors or for the purpose of increasing their knowledge of postal operations. Such visits by the contractor and Commission employees to postal facilities will be bound by the prohibitions on *ex parte* communications contained in § 3001.7 of the Commission's rules of practice and procedure and by §§ 3000.735–501 and 502 of the Commission's standards of conduct. A tentative schedule of contractor contacts with the Postal Service is set forth below. Although this schedule reflects present plans, actual timing of meetings and field trips will be subject to the availability of personnel and the evolutionary nature of the work effort.

TENTATIVE SCHEDULE

Location	*Date*
Boston area postal facilities.	August 30–31
USPS Headquarters	September 5–7
New York area facilities	September 10–21

INTERSTATE COMMERCE COMMISSION

[Notice No. 330]

ASSIGNMENT OF HEARINGS

AUGUST 24, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

No. 35791 sub 1, General Increase, August 1973, Bulk Carrier Conference, now being assigned hearing October 9, 1973, at the Offices of the Interstate Commerce Commission, Washington, D.C.

MC–C–8096, The Squaw Transit Company—Investigation and revocation of Certificates—now assigned September 11, 1973, at Dallas, Tex., is postponed indefinitely.

Finance Docket No. 27438, National Railroad Passenger Corporation Discontinuance of Trains Nos. 98 & 99 Between Norfolk/Newport News and Richmond, Virginia now assigned September 24, 1973, at Newport News, Virginia, will be held in U.S. Post Office & Courthouse Building, Judge Hoffman's Courtroom, 101 25th Street; now assigned September 26, 1973 at Richmond, Va., will be held in Room 1035, 400 N. 8th Street.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73–18355 Filed 8–28–73;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 24, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit Common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed by September 13, 1973.

FSA No. 42738—*Compressed Gases (Sulphur Dioxide) from Tacoma, Washington.* Filed by Trans-Continental Freight Bureau, Agent (No. 484), for interested rail carriers. Rates on gases, compressed, viz.: Sulphur Dioxide, in tank carloads, as described in the application, from Tacoma, Washington, to West Norfolk, Virginia.

Grounds for relief—Water competition.

Tariff—Supplement 55 to Trans-Continental Freight Bureau, Agent, tariff 2–K, ICC No. 1852. Rates are published

V 38-167 AUG 29 73 XUM

to become effective on September 25, 1973.

By the Commission.

[SEAL] JOSEPH M. HARRINGTON, *Acting Secretary.*

[FR Doc.73-18352 Filed 8-28-73;8:45 am]

[Exception No. 6]

ILLINOIS CENTRAL GULF RAILROAD CO.

Exception to Car Service Rules

It appearing, that there will be a large shipment of concrete pipe originating at Price, Mississippi, on the Illinois Central Gulf Railroad Company requiring the use of plain flat cars of 140,000 lbs. or greater capacity; that assembly of the necessary cars cannot be accomplished without the holding of a portion of the cars in excess of the time periods authorized by the provisions of Service Order No. 1112, Section (a), Paragraph (2).

It is ordered, That, pursuant to the authority vested in the Railroad Service Board by Service Order No. 1112, Section (a), Paragraph (1), Part (xiv), the Illinois Central Gulf Railroad Company is hereby authorized to assemble and hold for pipe loading at Price, Mississippi, a maximum of thirty-seven (37) empty plain flat cars of mechanical designation FM regardless of the provisions of section (a), paragraph (2) of Service Order No. 1112.

Effective August 24, 1973.

Expires September 6, 1973.

Issued at Washington, D.C., August 22, 1973.

[SEAL] RAILROAD SERVICE BOARD, R. D. PFAHLER, *Agent.*

[FR Doc.73-18356 Filed 8-28-73;8:45 am]

[EX PARTE NO. 241; Exemption No. 48]

ILLINOIS CENTRAL GULF RAILROAD CO.

Exemption Under the Mandatory Car Service Rules

It appearing, that there is an emergency movement of two trainloads of concrete pipe from Price, Mississippi, to Spring City, Tennessee, requiring the use of 37 70-ton flat cars capable of handling concentrated loads; that these shipments will move in two consecutive train-lot movements; that the carriers involved are unable to supply sufficient cars of their own ownerships capable of handling these shipments; and that suitable cars of other ownerships can be made available to transport these shipments.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the Illinois Central Gulf Railroad Company be, and it is hereby, authorized to accept from shipper at Price, Mississippi, and transport to Spring City, Tennessee, routed via its line thence Southern Railway Company; and the Southern Railway Company is authorized to return empty cars to Price, Mississippi, via reverse of loaded route, two trains of 37 flat cars of various ownership without regard to the provisions of Car Service Rules 1 and 2.

Effective September 6, 1973.

Expires September 30, 1973.

Issued at Washington, D.C., August 22, 1973.

[SEAL] INTERSTATE COMMERCE COMMISSION, R. D. PFAHLER, *Agent.*

[Notice No. 19]

MOTOR CARRIER ALTERNATE ROUTE DEVIATION NOTICES

AUGUST 24, 1973.

The following letter-notices of proposals (except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application), to operate over deviation routes for operating convenience only have been filed with the Interstate Commerce Commission under the Commission's Revised Deviation Rules—Motor Carriers of Passengers, 1969 (49 CFR 1042.2(c)(9)) and notice thereof to all interested persons is hereby given as provided in such rules (49 CFR 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Interstate Commerce Commission in the manner and form provided in such rules (49 CFR 1042.2(c)(9)) at any time, but will not operate to stay commencement of the proposed operations unless filed by September 28, 1973.

Successively filed letter-notices of the same carrier under the Commission's Revised Deviation Rules—Motor Carriers of Property, 1969, will be numbered consecutively for convenience in identification and protests, if any, should refer to such letter-notices by number.

MOTOR CARRIERS OF PASSENGERS

No. MC-29910 (Deviation No. 25), ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 S. 11th Street, Fort Smith, Arkansas 72901, filed August 17, 1973. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Dallas, Tex., over Interstate Highway 30 to junction Interstate Highway 40 at Little Rock, Ark., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over pertinent service routes as follows: (1) From St. Louis, Mo., over U.S. Highway 66 to Vinita, Okla., thence over U.S. Highway 69 to junction U.S. Highway 75, thence over U.S. Highway 75 to Dallas, Tex., serving the intermediate points of Springfield, Mo., and Muskogee and McAlester, Okla., (2) From Wagoner, Okla., over U.S. Highway 69 to Muskogee, Okla., thence over U.S. Highway 64 to Sallisaw, Okla., serving the intermediate point of Muskogee, Okla., (3) From Muskogee, Okla., over U.S. Highway 62 to Westville, Okla., thence over U.S. Highway 59 to Sallisaw, Okla., thence over U.S. Highway 64 to Fort Smith, Ark., serving all intermediate points, (4) From Fort Smith, Ark., over Arkansas Highway 22 to Dardanelle, Ark., thence over Arkansas Highway 7 to Russellville, Ark., thence over U.S. Highway 64 to Conway, Ark., and thence over U.S. Highway 65 to Pine Bluff, Ark., serving all intermediate points, and (5) From St. Louis, Mo., over U.S. Highway 67 to junction U.S. Highway 61, thence over U.S. Highway 61 via Crystal City, Perryville, and Jackson, Mo., to junction Missouri Highway 34, thence over Missouri Highway 34 to Cape Girardeau, Mo., thence over Missouri Highway 74 to junction U.S. Highway 61, thence over U.S. Highway 61 to junction unnumbered highway near Sikeston, Mo., thence over unnumbered highway via Sikeston to junction U.S. Highway 61, thence over U.S. Highway 61 to Blytheville, Ark., thence over U.S. Highway 61 to junction Arkansas Highway 77, thence over Arkansas Highway 77 via Turrell, Clarkedale, Jericho, and Marion, Ark., to W. Memphis, Ark., thence over U.S. Highway 70 to junction U.S. Highway 61, thence over U.S. Highway 61 to Memphis, Tenn., thence over U.S. Highway 70 to Little Rock, Ark., serving the intermediate points of Cape Girardeau and Sikeston, Mo.; Memphis, Tenn.; and Blytheville, West Memphis, Forrest City, Brinkley, Carlisle, Hazen, Lonoke, and North Little Rock, Ark.; and the off-route points of Caruthersville, Ferguson, and Robertson, Mo., points within two miles of Robertson, Mo.; Stuttgart and Camp Joseph T. Robinson, Ark.; Alton, East Alton, and Belleville, Ill.; and points in the St. Louis, Mo.-East St. Louis, Ill., commercial zone, and return over the same routes.

No. MC-109780 (Deviation No. 45), CONTINENTAL TRAILWAYS, INC., 1501 South Central Avenue, Los Angeles, Calif. 90021, filed June 27, 1973. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express* and *newspapers* in the same vehicle with passengers, over a deviation route as follows: From Brenda Junction, Ariz., over Interstate Highway 10 to Tonopah, Ariz., thence over unnumbered Maricopa County road to junction U.S. Highway 80 south and east of Buckeye, Ariz., thence over U.S. Highway 80 to Phoenix, Ariz., and return over the same route, for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Los Angeles, Calif., over U.S. Highway 66 to San Bernardino, Calif., thence over unnumbered highway to junction U.S. Highway 99, thence over U.S. Highway 99 to Beaumont, Calif., thence over U.S. Highway 60 via Aguila, Ariz., to Phoenix, Ariz., and return over the same route.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[FR Doc.73-18353 Filed 8-28-73;8:45 am]

[Notice No. 67]

MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

AUGUST 24, 1973.

The following publications (except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application), are governed by the new Special Rule 1100.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

The publications hereinafter set forth reflect the scope of the applications as filed by applicant, and may include descriptions, restrictions, or limitations which are not in a form acceptable to the Commission. Authority which ultimately may be granted as a result of the applications here noticed will not necessarily reflect the phraseology set forth in the application as filed, but also will eliminate any restrictions which are not acceptable by the Commission.

MOTOR CARRIERS OF PROPERTY

APPLICATION ASSIGNED FOR ORAL HEARING

No. MC 125996 (sub-No. 38), filed August 6, 1973. Applicant: ROAD RUNNER TRUCKING, INC., P.O. Box 37491, Omaha, Nebr. 68137. Applicant's representative: Arnold L. Burke, 127 North Dearborn Street, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Carpet and rugs, carpet and rug padding, and materials and supplies* used in the installation thereof, from the plantsite and warehouse facilities of General Felt Industries, Inc., at Philadelphia, Pa., to points in Minnesota, Missouri, Michigan, Ohio, Indiana, Illinois, Wisconsin, and Iowa, restricted to traffic originating at the above-named origin and destined to points in the above named destination territory.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority.

HEARING.—October 10, 1973 (2 days) at 9:30 a.m. Daylight Saving Time, (or 9:30 a.m. United States Standard Time, if that time is observed), at Chicago, Ill. Location of hearing room will be by subsequent notice.

No. MC 135535 (sub-No. 4) (republication), filed November 24, 1972, published in the FEDERAL REGISTER issue of January 26, 1973, and republished this issue. Applicant: EL DORADO TRANSPORTATION, INC., 206 North Concord, Minneapolis, Kans. 67467. Applicant's representative: Clyde N. Christey, 641 Harrison Street, Topeka, Kans. 66603. An Order of the Commission, Operating Rights Board, dated August 3, 1973, and served August 15, 1973, finds that operation by applicant, in interstate or foreign commerce, as a *contract carrier* by motor vehicle, over irregular routes, of (1)(a) *fifth wheel travel trailers*, in truckaway service, and (b) *pickup trucks*, when moving in combination with fifth wheel travel trailers, between the plantsite and storage facilities of El Dorado Industries, Inc., at or near Minneapolis, Kans., on the one hand, and, on the other, points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, Wyoming and the District of Columbia and (2) *motor homes*, in driveaway service, between the plantsite and storage facilities of El Dorado Industries, Inc., at or near Salina, Kans., on the one hand, and, on the other, points in the United States (except Alaska, Hawaii, and Kansas), under a continuing contract or contracts in both (1) and (2) above with El Dorado Industries, Inc., of Minneapolis, Kans., will be consistent with the public interest and the national transportation policy; that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. Because it is possible that other parties who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described above, issuance of a permit in this proceeding will be withheld for a period of 30 days from the date of this publication of the authority actually granted, during which period any proper party in interest may file an appropriate petition for intervention or other relief in this proceeding setting forth in detail the precise manner in which it has been so prejudiced.

No. MC 108057 (sub-Nos. 3 and 5) (Notice of filing of petition to modify permit), filed August 16, 1973. Petitioner: McDONNELL BROS., INC., 759 Riverside Avenue, Lyndhurst, N.J. 07071. Petitioner's representative: Robert B. Pepper, 168 Woodbridge Avenue, Highland Park, N.J. 08904. Petitioner presently holds *contract carrier* permits in No. MC 108057 (sub-Nos. 3 and 5) issued August 9, 1966 and March 30, 1967 respectively, authorizing transportation, over irregular routes, of *nonferrous scrap metal*, (1) in sub-No. 3 between Newark, N.J. on the one hand, and, on the other, Baltimore, Md., New York, N.Y., and points in Connecticut, Ohio, Pennsylvania, and Rhode Island, under a continuing contract or contracts with Calumet Sales Company, Ben Hirsch, Thomas Coleman, Emil Schroth, Inc., and Maxnor Metal Co., all of Newark, N.J.; (2) in sub-No. 5 between Elizabeth and Newark, N.J., on the one hand, and, on the other, Wilmington, Del., and points in New York, under a continuing contract or contracts with Maxnor Metal Co. of Newark, N.J., Berson Metals Co. and Ben Hirsch, both of Elizabeth, N.J. By the instant petition, petitioner seeks to delete Ben Hirsch as a contracting shipper from each of the permits listed in (1) and (2) above, and substitute in lieu thereof the name of Interstate Metals Separating Corp. of Kearny, N.J., as a contracting shipper. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views, or arguments in support of or against the petition by September 28, 1973.

No. MC 124770 and (sub-Nos. 8, 10, and 12) (Notice of filing of petition to modify permits), filed July 23, 1973. Petitioner: TELLERI TRUCKING CO., a corporation, 301 Allen Street, Elizabeth, N.J. 07202. Petitioner's representative: Charles J. Williams, 47 Lincoln Park, Newark, N.J. 07102. Petitioner presently holds motor *contract carrier* permits in No. MC-124770 and (sub-Nos. 8, 10, and 12) issued October 12, 1966, October 23, 1968, November 24, 1969, and February 3, 1971, respectively, authorizing transportation, over irregular routes of various meats and meat products, and in the lead permit, returned shipments of meats and meat products from or between specified points in New Jersey, New York, Pennsylvania, to points in Connecticut, New York, Rhode Island, Massachusetts, Maryland, and the District of Columbia, and in the lead permit, returned shipments of meats and meat products from points in New York, Pennsylvania, Connecticut, and Massachusetts to points in New Jersey and New York, restricted to a transportation service to be performed under a continuing contract or contracts (1) in the lead permit with Allen Packing Company of Linden, N.J., Jefferson Packing Company of Hoboken, N.J., and Bronx Independent Meat Co. of Bronx, N.Y.; (2) in sub-No. 8, with Food Fair Stores, Inc., and its subsidiaries, Allen Packing Co., and Midtown Veal & Mutton, Co., Inc.; (3) in sub-No. 10 with the same shippers as listed in (2) above; and (4) in sub-No. 12, with Allen Packing Co. and Midtown Veal & Mutton Co., Inc. By the instant petition petitioner seeks to (A) delete: Jefferson Packing Company, Bronx Independent Meat Co., Food Fair Stores, Inc., and Berliner & Marx, Inc., as contracting shippers in MC-124770; Food Fair Stores, Inc., in sub-Nos. 8 and 10; and (B) add Atalanta Products Corp. of New York, N.Y.; Celebrity Food Products, Inc., of New York, N.Y.; South East Food Products, Inc., of New York, N.Y.; Economy Hotel & Restaurant Purveyors, Inc., of Elizabeth, N.J.; and Linden Packing Co., Inc., of Newark, N.J., as additional contracting shippers to the

V38-167 AUG 29 73 XUM

authority in MC–124770 and (sub-Nos. 8, 10, and 12) as described above. Any interested person or persons desiring to participate may file an original and six copies of his written representations, views or arguments in support of or against the petition by September 28, 1973.

No. MC 135033 (Correction of two notices of filings of petition to add additional contracting shippers) filed May 13 and 16, 1973, published in the FEDERAL REGISTER issue of August 15, 1973, and annotated this issue. Petitioner: SILVEY & COMPANY, a corporation, Highway 275 and Gifford Road, Council Bluffs, Iowa 51501. Petitioner's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, Nebr. 68106.

NOTE.—The notice previously published August 15, 1973 in these petitions incorrectly listed the assigned docket number in the proceedings as No. MC–130533. The correct number should be No. MC–135033. The rest of the notices remain as previously published.

NOTICE FOR FILING OF PETITION

No. MC–135062 (Sub-No. 1), (notice of filing of petition for cancellation of permit and reinstatement of certificate of registration), filed July 12, 1973. Petitioner: M & T TRUCKING, INC. (successor in interest to Mike Mercure Trucking, Inc.), R.F.D. No. 1, New Waterford, Ohio 44445. Petitioner's representative: Arthur J. Diskin, 806 Frick Building, Pittsburgh, Pa. 15219. Petitioner holds Permit No. MC–135062 (Sub-No. 1), issued November 15, 1972, authorizing operation as a contract carrier by motor vehicle, over irregular routes, of coal, in bulk, in dump vehicles, from points in Elkrun and Middleton Township (Columbiana County), Ohio, to points in Beaver County, Pa., under a continuing contract, or contracts, with Ferris Coal Company, Inc., of East Palestine, Ohio. Petitioner also holds Ohio Intrastate Certificate No. 5383–I authorizing motor transportation service, on call of the public, in instrastate commerce, over irregular routes, (1) of property from and to Rogers, Ohio, and (2) of crushed limestone, gravel, stone, sand, aggregates, ashes, brick, tile, coal, and clay, in dump trucks, from and to any point in Columbiana County, Ohio. Both the permit and the intrastate certificate were obtained by transfer from petitioner's predecessor in interest, Mike Mercure Trucking, Inc., which formerly held Certificate of Registration No. MC–96995 (Sub-No. 1) authorizing operation in interstate commerce identical to that authorized in Certificate No. 5383–I. The Certificate of Registration was revoked at the request of Mike Mercure Trucking, Inc., to enable it to apply for the permanent contract carrier authority subsequently issued in Permit No. MC–135062 (sub-No. 1). By the instant petition, petitioner seeks to cancel its Permit No. MC–135062 (sub-No. 1), stating that it has become inoperative, and to reinstate the Certificate of Registration No. MC–96995 (sub-No. 1). Any interested person desiring to participate may file an original and six copies of his written representations, views, or arguments in support of or against the petition by September 28, 1973.

APPLICATION FOR CERTIFICATE OR PERMIT WHICH IS TO BE PROCESSED CONCURRENTLY WITH APPLICATION UNDER SECTION 5 GOVERNED BY SPECIAL RULE 240 TO THE EXTENT APPLICABLE

No. MC 17470 (sub-No. 1) (correction), filed June 7, 1973, published in the FEDERAL REGISTER issue of August 15, 1973, and republished, as corrected, this issue. Applicant: NEW YORK MASSACHUSETTS MOTOR SERVICE, INC., 83 Progress Street, Springfield, Mass. 01103. Applicant's representative: Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, Mass. 02043. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in Massachusetts.

NOTE.—The purpose of this republication is to indicate the correct assigned number and date of publication of the finance proceeding related to this application. This application is a matter directly related to a Section 5 purchase proceeding in No. MC–F–11907, published in the FEDERAL REGISTER issue of June 20, 1973. Applicant states that the requested authority can be tacked at New York City with its existing authority to serve points in Massachusetts at Springfield, Mass. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. If a hearing is deemed necessary, applicant requests it be held at Springfield or Boston, Mass.

No. MC 30508 (sub-No.3), filed July 3, 1973. Applicant: DEARBORN'S MOTOR EXPRESS, INC., 140 Epping Street, Exeter, N.H. 03833. Applicant's representative: Mary E. Kelley, 11 Riverside Avenue, Medford, Mass. 02155. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Portsmouth, N.H., and Portland, Maine: From Portsmouth over U.S. Highway 1 to Portland and return over the same route, serving all intermediate points between Portsmouth and Biddeford, restricted to traffic moving to or from points in Massachusetts; and the intermediate and off-route points of Saco, Ocean Park, Pine Point, Dunstan, Scarboro, Thornton Heights, Cash Corner, Old Orchard Beach, Oak Hill, and South Portland, without restrictions.

NOTE.—Common control may be involved. The instant application is a matter directly related to MC–F–11928 published in the FEDERAL REGISTER issue of July 19, 1973. If a hearing is deemed necessary, applicant requests it be held at Portland, Maine, or Boston, Mass.

No. MC 107515 (sub-No. 859), filed July 6, 1973. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 30050. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Baked goods, coffee whiteners, dessert base, dessert toppings, dry coffee rich, and dry whipped topping*, in mechanically refrigerated vehicles, from Buffalo, N.Y., to points in Arizona, California, Colorado, Idaho, Iowa, Kansas, Montana, Nebraska, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming, (2) *baked goods, coffee whiteners, dessert base, dessert toppings, dry coffee rich, and dry whipped topping*, in vehicles equipped with mechanical refrigeration, from Buffalo, N.Y., to points in Texas, Missouri, Minnesota, and Nevada, (3) *frozen foods*, from Appleton, Wis., to points in North Dakota, South Dakota, Wyoming, Montana, Idaho, Oregon, Ohio, Indiana, Pennsylvania, New York, New Jersey, Vermont, Rhode Island, Connecticut, Massachusetts, New Hampshire, and Maine, and (4) *meats, meat products and meat byproducts* as described in Section A and B of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from Denison, Des Moines, Fort Dodge, Glenwood, Iowa Falls, Sioux City, Sioux Center, Waterloo, and Spencer, Iowa, Omaha and West Point, Nebr., and Luverne, Minn., to New York, N.Y., and points in its commercial zone, restricted in part (1), (2), and (3) above to traffic originating at the plant sites of Rich Products Corporation and destined to the states named, and in part (4) to traffic originating at and destined to the points named.

NOTE.—The instant application is a matter directly related to MC–F–11932 published in the FEDERAL REGISTER issue of July 19, 1973. Common control and dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138958, filed June 27, 1973. Applicant: D'AGATA TRANSPORTATION, INC., 1104 York Road, Cherry Hill, N.J. 19153. Applicant's representative: Leonard A. Jaskiewicz, 1730 M Street, NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages*, from Latrobe, Pa., to points in New Jersey; (2) *malt beverages*, in cans, bottles, and kegs, from Reading, Pa., to points in Connecticut, Massachusetts, New Hampshire, Rhode Island, and Vermont; and (3) *malt beverage containers*, from points in Connecticut, Massachusetts, New Hampshire, Rhode Island, and Vermont, to Reading, Pa.

NOTE.—Common control may be involved. The purpose of this application is to convert

applicant's Permit into a Certificate of Public Convenience and Necessity. The instant proceeding is a matter directly related to the Section 5 purchase application in MC–F 11924, published in the FEDERAL REGISTER issue of July 11, 1973. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto. (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–11959. Authority sought for purchase by CONTINENTAL VAN LINES, INC., 891 Broadway Street, Seaside, Calif., of a portion of the operating rights of BESTWAY VAN LINES, INC., 400 North Vine Street, North Little Rock, Ark., and for acquisition by NORMAN E. WILEY, 325 Elder Ave., Seaside, Calif., and J. VERNON MYRES, 779 Anita St., Chula Vista, Calif., of control of such rights through the purchase. Applicants' attorney: James W. Hightower, 136 Wynnewood Prof. Bldg., Dallas, Texas. Operating rights sought to be transferred: *Household goods* as defined by the Commission, and *emigrant movables*, as a *common carrier* over irregular routes. Between Hobart, Okla., and points within 20 miles thereof, on the one hand, and, on the other, points in Kansas, Oklahoma, and Texas. Between points in Kiowa County, Okla., and points within 50 miles of Kiowa County (except points on and East of U.S. Highway 281), on the one hand, and, on the other, points in Kansas and Texas. Vendee is authorized to operate as a *common carrier* in Nevada, California, Oregon, Washington, Utah, Idaho, Wyoming, Colorado, Montana, and Arizona. Application has been filed for temporary authority under section 210a(b).

No. MC–F–11960. Authority sought for purchase by MOTOR SERVICE COMPANY, INC., P.O. Box 448, Coshocton, Ohio 43812, of the operating rights and property of RIVER VIEW MARINE SERVICE, INC., 1605 Utica Pike, Jeffersonville, Indiana 47130, and for acquisition by JOHN R. HAFNER, P.O. Box 448, Coshocton, Ohio 43812, of control of such rights through the purchase. Applicants' Attorney: CARL U. HURST, P.O. Box E, Bowling Green, Kentucky 42101. Operating rights sought to be transferred: *Boats*, as a *common carrier* over irregular routes from Louisville, Ky. (except points in the Louisville, Ky., commercial zone, as defined by the Commission, in Floyd County, Ind.), to points in Alabama, Arkansas, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, West Virginia, and Wisconsin. *Houseboats*, from Algonac, Mich., to Louisville, Ky. (except points in the Louisville, Ky., commercial zone, as defined by the Commission, in Floyd County, Ind.) Vendee is authorized to operate as a *common carrier* in all states in the United States (except Alaska and Hawaii). Application has been filed for temporary authority under section 210a(b).

No. MC–F–11961. Authority sought for purchase by BRADA MILLER FREIGHT SYSTEM, INC., 1210 South Union Street, Kokomo, Indiana 46901, of a portion of the operating rights of SIMS MOTOR TRANSPORT LINES, INC., 610 West 138th Street, Chicago (Riverdale), Illinois 60627, and for acquisition by MOHIO LEASING CORPORATION, 1210 South Union Street, Kokomo, Indiana 46901, of control of such rights through the purchase. Applicants' attorneys: JACK GOODMAN, 39 South La Salle Street, Chicago, 60603 and SEYMOUR GOLDGEHN, 69 West Washington St., Chicago, Ill. 60602. [Notice No. 342]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before September 18, 1973, pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC–74446. By order of August 21, 1973, the Motor Carrier Board, on reconsideration, approved the transfer to Trecho Transport, Inc., Hornell, N.Y., of the operating rights in Certificate No. MC–126109 issued September 3, 1964, to L. E. Hilton Trucking Co., Inc., Geneva, N.Y., authorizing the transportation of fertilizer, in bulk, in dump vehicles, in bags, from points in Livingston and Wayne Counties, N.Y., to points in Bradford, Lackawanna, Potter, Susquehanna, Tioga, Wayne, and Wyoming Counties, Pa. S. Michael Richard, Registered Practitioner, 44 North Avenue, Webster, N.Y. 14580 representative for applicants.

No. MC–FC–74609. By order of August 21, 1973, the Motor Carrier Board approved the transfer to Leon Ledbetter Trucking, Inc., Amarillo, Tex., of Certificates Nos. MC–125000 (sub-No. 3), and MC–125000 (sub-No. 6), issued to Leon Ledbetter, Vega, Tex., authorizing the transportation of: Sand, gravel, stone, rock, dirt, etc., between specified points and areas in Texas, Oklahoma, and Colorado. John S. Fessenden, 618 Perpetual Bldg., Washington, D.C. 20004, attorney for applicants.

No. MC–FC–74643. By order of August 22, 1973, the Motor Carrier Board approved the transfer to Beverage Distributor's, Inc., Yakima, Wash. 98902, of Permit No. MC–135680 (sub-No. 2), issued March 30, 1973, to Fred C. Williams, Yakima, Washington 98902, authorizing the transportation of malt beverages, from Los Angeles and San Francisco, Calif., and Portland, Oreg., to Wenatchee and Ephrata, Wash., under contract with Columbia Distributing Company of Ephrata and Wenatchee, Wash. Philip G. Skofstad, 3076 E. Burnside, Portland, Oreg. 97214, attorney for applicants.

No. MC–FC–74666. By order entered August 21, 1973, the Motor Carrier Board approved the transfer to P L Truck Service, Inc., Vancouver, Wash., of the operating rights set forth in Certificates Nos. MC–133333 (sub-No. 1), MC–133333 (sub-No. 4), and MC–133333 (sub-No. 5), issued by the Commission March 16, 1970, March 23, 1973, and November 5, 1971, respectively, to Jack A. Hart, doing business as Parts Locator Service, Vancouver, Wash., authorizing the transportation of used automobile and truck parts, between points in Washington and Oregon; uncrated used automobile and truck parts (except rebuilt parts), between points in Idaho, on the one hand, and, on the other, points in Oregon and Washington; and used automobile and truck parts, uncrated, between points in California, on the one hand, and, on the other, points in Oregon, Washington, and Idaho. Lawrence V. Smart, Jr., 419 Northwest 23d Ave., Portland, Oreg., attorney for applicants.

MOTOR CARRIER INTRASTATE APPLICATIONS

AUGUST 24, 1973.

The following applications for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to section 206(a)(6) of the Interstate Commerce Act, as amended October 15, 1962. These applications are governed by Special Rule 1.245 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of April 11, 1963, page 3533, which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

California Docket No. 54205, filed July 26, 1973. Applicant: PENINSULA AIR DELIVERY, 2443 Wyandotte St., Mountain View, Calif. 94040. Applicant's representative: Dennis D. Kendall, 3801 Magnolia Dr., Palo Alto, Calif. 94306. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *general commodities*, except as hereinafter provided, between all points and places in and within 5 miles of points in the San Francisco Territory, which is described as follows: San Francisco Territory includes all the City of San Jose and that area embraced by the following boundary: Beginning at the point the San Francisco-San Mateo County boundary line meets the Pacific Ocean, thence easterly along said boundary line to a point 1 mile west of U.S. Highway 101, southerly along an imaginary line 1 mile west of and paralleling U.S. Highway 101 to its intersection with Southern Pacific Company right of way at Arastradero Road; southeasterly along the Southern Pacific Company right of way to Pollard Road, including industries served by the Southern Pacific Company spur line extending approximately 2 miles southwest from Simla to Permanente; easterly along Pollard Road to W. Parr Avenue; easterly along W. Parr Avenue to Capri Drive, southerly along Capri Drive to E. Parr Avenue; easterly along E. Parr Avenue to the Southern Pacific Company right of way; southerly along the Southern Pacific Company right of way to the Campbell-Los Gatos city limits; easterly along said limits and the prolongation thereof to the San Jose-Los Gatos Road; northeasterly along San Jose-Los Gatos Road to Foxworthy Avenue; easterly along Foxworthy Avenue to Almaden Road; southerly along Almaden Road to Hillsdale Avenue; easterly along Hillsdale Avenue to U.S. Highway 101; northwesterly along U.S. Highway 101 to Tully Road; northeasterly along Tully Road to White Road; northwesterly along White Road to McKee Road; southwesterly along McKee Road to Capitol Avenue; northwesterly along Capitol Avenue to State Highway 17 (Oakland Road); northerly along State Highway 17 to Warm Springs; northerly along the unnumbered highway via Mission San Jose and Niles to Hayward; northerly along Foothill Boulevard to Seminary Avenue; easterly along Seminary Avenue to Mountain Boulevard; northerly along Mountain Boulevard and Moraga Avenue to Estates Drive; westerly along Estates Drive, Harbord Drive and Broadway Terrace to College Avenue; northerly along College Avenue to Dwight Way; easterly along Dwight Way to the Berkeley-Oakland boundary line; northerly along said boundary line to the campus boundary of the University of California; northerly and westerly along the campus boundary of the University of California to Euclid Avenue; northerly along Euclid Avenue to Marin Avenue; westerly along Marin Avenue to Arlington Avenue; northerly along Arlington Avenue to U.S. Highway 40 (San Pablo Avenue); northerly along U.S. Highway 40 to and including the City of Richmond; southwesterly along the highway extending from the City of Richmond to Point Richmond; southerly along an imaginary line from Point Richmond to the San Francisco Waterfront at the foot of Market Street; westerly along said waterfront and shore line to the Pacific Ocean; southerly along the shore line of the Pacific Ocean to point of beginning. Except that applicant shall not transport any shipments of: (1) Used household goods and personal effects not packed in accordance with the crated property requirements set forth in Paragraph (d) of Item No. 10–C of Minimum Rate Tariff No. 4–A; (2) Automobiles, trucks and buses, viz.: new and used, finished or unfinished passenger automobiles (including jeeps), ambulances, hearses, and taxis, freight automobiles, automobile chassis, trucks, truck chassis, truck trailers, trucks and trailers combined, buses and bus chassis; (3) Livestock, viz.: bucks, bulls, calves, cattle, cows, dairy cattle, ewes, goats, hogs, horses, kids, lambs, oxen, pigs, sheep, sheep camp outfits, sows, steers, stags or swine; (4) Liquids, compressed gases, commodities in semiplastic form and commodities in suspension in liquids, in bulk, in tank trucks, tank trailers, tank seimtrailers, or a combination of such highway vehicles; (5) Commodities when transported in bulk in dump trucks or in hopper-type trucks; (6) Commodities when transported in motor vehicles equipped for mechanical mixing in transit; (7) Cement; (8) Logs; and (9) Commodities of unusual or extraordinary value. Intrastate, interstate and foreign commerce authority sought.

HEARING.—Date, time and place not shown. Requests for procedural information should be addressed to the California Public Utilities Commission, State Bldg., Civic Center, 455 Golden Gate Avenue, San Francisco, Calif. 94102, and should *not* be directed to the Interstate Commerce Commission.

Tennessee Docket No. MC 104 (sub-No. 2), filed August 15, 1973. Applicant: MURFREESBORO FREIGHT LINE CO., INC., P.O. Box 1113, Murfreesboro, Tenn. 37130. Applicant's representative: Val Sanford, 23rd Floor, Life and Casualty Tower, Nashville, Tenn. 37219. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *general commodities*, except household goods, classes A and B explosives, commodities in bulk and those requiring special equipment, between Memphis, Tenn., and Nashville, Tenn., over Interstate Highway 40 and return over the same route serving no intermediate points; to be used in conjunction with applicant's existing authority; but restricted against the transportation of freight originating at, or destined to, or interchanged at Nashville, the latter point being a point for tacking only. For operating convenience only, the following alternate route: From Murfreesboro, Tenn., via Tennessee Highway 96 to its junction with Tennessee Highway Highway 100, thence by Tennessee Highway 100 to its junction with U.S. Highway 64, thence over U.S. Highway 64 to Memphis and return over the same route, serving no intermediate points. Intrastate, interstate and foreign commerce authority sought.

HEARING.—November 13, 1973, at the Commission's Court Room, C–1 Cordell Hull Building, Nashville, Tenn., at 9:30 a.m. Requests for procedural information should be addressed to the Tennessee Public Service Commission, Cordell Hull Building, Nashville, Tenn. 37219, and should not be directed to the Interstate Commerce Commission.

V 38-167 AUG 29 73 XUM

Tennessee Docket No. MC 4978 (sub-No. 2), filed August 9, 1973. Applicant: S & W FREIGHT LINES, INC., 1136 Haley Road, Murfreesboro, Tenn. 37130. Applicant's representative: A. O. Buck, 500 Court Square Building, Nashville, Tenn. 37201. Certificate of public convenience and necessity sought to operate a freight service as follows: Transportation of *general commodities*, except household goods, classes A and B explosives, commodities in bulk and those requiring special equipment, between Murfreesboro, Tenn., and Memphis, Tenn., as follows: (1) From Murfreesboro over Interstate Highway 24 to its junction with Interstate Highway 40, thence over Interstate Highway 40 to Memphis, and return over the same route, serving no intermediate points, and (2) From Murfreesboro over Tennessee Highway 96 to its junction with Tennessee Highway 100 thence over Tennessee Highway 100 to its junction with U.S. Highway 64, thence over U.S. Highway 64 to Memphis, and return over the same route, serving no intermediate points. Said authority to be used in conjunction with applicant's existing authority subject only to the following restriction: "Restricted against the handling of any traffic which originates at, is destined to, or interchanged at any point in Davidson County, Tenn." Intrastate, interstate and foreign commerce authority sought.

HEARING.—October 17, 1973, at the Commission's Court Room, C-1 Cordell Hull Building, Nashville, Tenn., at 9:30 A.M. Requests for procedural information should be addressed to the Tennessee Public Service Commission, Cordell Hull Building, Nashville, Tenn. 37219, and should *not* be directed to the Interstate Commerce Commission.

By The Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

METAL AND NONMETALLIC MINE SAFETY

Health and Safety Standards

No. 167—Pt. II——1

V 38-167 AUG 29 73 XUM

Title 30—Mineral Resources

CHAPTER I—BUREAU OF MINES, DEPARTMENT OF THE INTERIOR

SUBCHAPTER N—METAL AND NONMETALLIC MINE SAFETY

PART 55—HEALTH AND SAFETY STANDARDS—METAL AND NONMETALLIC OPEN PIT MINES

Miscellaneous Amendments

Pursuant to the authority vested in the Secretary of the Interior under section 6 of the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 725) to develop, revise, and promulgate health and safety standards for metal and nonmetal mines, there was published on Saturday, December 9, 1972, a notice of proposed rulemaking in Part II of the FEDERAL REGISTER (37 FR 26378), to amend Part 55, Subchapter N, Chapter I, Title 30, Code of Federal Regulations, by revising and revoking certain standards currently in force and by adding a new standard. Each of the standards contained in the notice was developed or revised after consultation with the Federal Metal and Nonmetal Mine Safety Advisory Committee appointed pursuant to section 7 of the Act (30 U.S.C. 726).

The notice further provided that each proposed standard which is to be a mandatory standard was so designated by the word "Mandatory" which appeared at the beginning of the standard and if a standard had been recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee, such standard was identified by the letters "MNM SAC." Under the provisions of subsection 6(e) of the Act (30 U.S.C. 725(e)) a standard recommended by the Advisory Committee was not subject to hearings.

Subject to the provisions of subsection 6(e) of the Act and in accordance with the provisions of subsection 6(d) (30 U.S.C. 725(d)) on or before the last day of the period fixed for the submission of written data, views, or arguments, any person who may be adversely affected by a proposed standard, which had not been recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee, was afforded an opportunity to file with the Secretary of the Interior written objections thereto stating the grounds for such objection and requesting a public hearing (subject to the Administrative Procedure Act) on such objection.

Interested persons were afforded a period of 30 days from the date of publication of the proposed amendments in which to submit written data, views, arguments and requests for a hearing. Such period was subsequently extended to January 31, 1973, by a notice published in the FEDERAL REGISTER on January 23, 1973 (38 FR 2219).

There were no hearings requested on the standards which are promulgated below. All of the data, views or arguments received concerning these standards were given careful consideration by the Department.

In response to a recommendation that proposed mandatory standard 55.4–48 specify the length of time that records are to be kept of employee instruction on fire alarm signals and applicable procedures to be followed in case of fire or other disaster, the proposed standard has been revised to provide that these records shall be retained for two years. In addition, an editorial change substituting "emergency" for "disaster" has been made in the proposed standard. The intention of this standard is to avert disasters by having pre-planned and disciplined response by employees to fires and other emergencies.

In order that the Secretary may carry out his responsibilities under the Federal Metal and Nonmetallic Mine Safety Act, and enforce mandatory health and safety standards by the systematic inspection and investigation of conditions and practices at each open pit mine covered by the Act, it is essential that the Secretary be notified of the approximate or actual date on which operations will commence at new mines or at reactivated mines and the closing of mines so that the Mining Enforcement and Safety Administration may efficiently schedule and conduct inspections and investigations which are required under the Act, and it is for these reasons § 55.26–1 has been proposed. In response to a suggestion received § 55.26–1 has been revised to provide that if an open pit mine is located in a State where a State Plan Agreement, approved by the Secretary under section 16 of the Act (30 U.S.C. 735), is in effect, the owner, operator or person in charge shall notify the appropriate State agency of the opening and closing of the mine.

Part 55 of Chapter I of Title 30 of the Code of Federal Regulations is amended as set forth below:

Effective dates.—The effective dates of the new standards, and amendments, revisions, and revocation of standards are as follows:

1. Standards 55.4–48 and 55.26–1 shall become effective on August 29, 1973.

2. Standard 55.4–32 is revoked effective August 29, 1973.

3. The amendment and revision of standard 55.18–10 shall become effective on October 1, 1973.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

AUGUST 23, 1973.

Part 55, Title 30, Code of Federal Regulations is amended and revised as follows:

§ 55.4 [Amended]

1. Standard 55.4–32, promulgated on July 31, 1969 (34 FR 12505), is revoked.

2. New standard 55.4–48 is added to read as follows:

55.4–48 *Mandatory.*—All employees shall be instructed at least once each calendar year on fire alarm signals and applicable procedures to be followed in case of fire or other emergency. Records of instruction shall be kept for two years.

§ 55.18 [Amended]

3. Standard 55.18–10, promulgated on July 31, 1969 (34 FR 13509), is revised to read as follows:

55.18–10 *Mandatory.*—Selected supervisors shall be trained in first aid. First aid training shall be made available to all interested employees.

4. A new § 55.26, Procedures, and new standard 55.26–1 are added to read as follows:

§ 55.26 Procedures.

NOTIFICATION OF COMMENCEMENT OF OPERATIONS AND CLOSING OF MINES

55.26–1 *Mandatory.*—The owner, operator, or person in charge of any metal or nonmetal mine shall notify the nearest Mining Enforcement and Safety Administration Metal and Nonmetal Mine Health and Safety subdistrict office or the State agency if the mine is located in a State which has a State Plan Agreement in effect, before starting operations, of the approximate or actual date mine operation will commence. The notification shall include the mine name, location, the company name, mailing address, person in charge, and whether operations will be continuous or intermittent.

When any mine is closed, the person in charge shall notify the nearest subdistrict office or State agency as provided above, and indicate whether the closure is temporary or permanent.

[FR Doc.73-18228 Filed 8-28-73;8:45 am]

PART 56—HEALTH AND SAFETY STANDARDS—SAND, GRAVEL, AND CRUSHED STONE OPERATIONS

Miscellaneous Amendments

Pursuant to the authority vested in the Secretary of the Interior under section 6 of the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 725) to develop, revise and promulgate health and safety standards for metal and nonmetal mines, there was published on Saturday, December 9, 1972 a notice of proposed rulemaking in Part II of the FEDERAL REGISTER (37 FR 26378), to amend Part 56, Subchapter N, Chapter I, Title 30, Code of Federal Regulations, by revising and revoking certain standards currently in force and by adding a new standard. Each of the standards contained in the notice was developed or revised after consultation with the Federal Metal and Nonmetal Mine Safety Advisory Committee appointed pursuant to section 7 of the Act (30 U.S.C. 726).

The notice further provided that each proposed standard which is to be a mandatory standard was so designated by the word "Mandatory" which appeared at the beginning of the standard and if a standard has been recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee, such standard was identified by the letters "MNMSAC." Under the provisions of subsection 6(e) of the Act (30 U.S.C. 725(e)) the standard recommended by the Advisory Committee was not subject to hearings.

Subject to the provisions of subsection 6(e) of the Act and in accordance with the provisions of subsection 6(d) (30 U.S.C. 725(d)) on or before the last day of the period fixed for the submission of written data, views, or arguments, any person who may be adversely affected by a proposed standard, which had not been recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee, was afforded an opportunity to file with the Secretary of the Interior written objections thereto stating the grounds for such objection and requesting a public hearing (subject to the Administrative Procedure Act) on such objection.

Interested persons were afforded a period of 30 days from the date of publication of the proposed amendments in which to submit written data, views, arguments and requests for a hearing. Such period was subsequently extended to January 31, 1973, by a notice published in the FEDERAL REGISTER on January 23, 1973 (38 FR 2219).

There were no hearings requested on the standards which are promulgated below. All of the data, views, or arguments received concerning these standards were given careful consideration by the Department. In response to a recommendation that proposed mandatory standard 56.4–48 specify the length of time that records are to be kept of employee instruction on fire alarm signals and applicable procedures to be followed in case of fire or other disaster, the proposed standard has been revised to provide that these records shall be retained for 2 years. In addition, an editorial change substituting "emergency" for "disaster" has been made in the proposed standard. The intention of this standard is to avert disasters by having pre-planned and disciplined response by employees to fires and other emergencies.

In order that the Secretary may carry out his responsibilities under the Federal Metal and Nonmetallic Mine Safety Act, and enforce mandatory health and safety standards by the systematic inspection and investigation of conditions and practices at each sand, gravel, or crushed stone operation covered by the Act, it is essential that the Secretary be notified of the approximate or actual date on which operations will commence at new mines or at reactivated mines and the closing of mines so that the Mining Enforcement and Safety Administration may efficiently schedule and conduct inspections and investigations which are required under the Act, and it is for these reasons § 56.26–1 has been proposed. In response to a suggestion received § 56.26–1 has been revised to provide that if a sand, gravel, or crushed stone operation is located in a state where a State Plan Agreement, approved by the Secretary under section 16 of the Act (30 U.S.C. 735), is in effect, the owner, operator or person in charge shall notify the appropriate State agency of the opening and closing of the sand, gravel or crushed stone operation.

Part 56 of Chapter I of Title 30 of the Code of Federal Regulations is amended as set forth below:

Effective dates.—The effective dates of the new standards, and amendments, revisions and revocations of standards are as follows:

1. Standards 56.4–48 and 56.26–1 shall become effective upon August 29, 1973.

2. Standard 56.4–32 is revoked effective August 29, 1973.

3. The amendment and revisions of standard 56.18–10 shall become effective on October 1, 1973.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

AUGUST 23, 1973.

Part 56, Title 30, Code of Federal Regulations is amended and revised as follows:

§ 56.4 [Amended]

1. Standard 56.4–32, promulgated on July 31, 1969 (34 FR 12512), is revoked.

2. New standard 56.4–48 is added to read as follows:

56.4–48 *Mandatory.*—All employees shall be instructed at least once each calendar year on fire alarm signals and applicable procedures to be followed in case of fire or other emergency. Records of instruction shall be kept for 2 years.

§ 56.18 [Amended]

3. Standard 56.18–10, promulgated on July 31, 1969 (34 FR 12515), is revised to read as follows:

56.18–10 *Mandatory.* — Selected supervisors shall be trained in first aid. First aid training shall be made available to all interested employees.

4. A new § 56.26, Procedures, and a new standard 56.26–1 are added to read as follows:

§ 56.26 Procedures.

NOTIFICATION OF COMMENCEMENT OF OPERATIONS AND CLOSING OF MINES

56.26–1 *Mandatory.*—The owner, operator, or person in charge of any metal and nonmetal mine shall notify the nearest Mining Enforcement in Safety Administration Metal and Nonmetal Mine Health and Safety subdistrict office or the State agency if the mine is located in a State which has a State Plan Agreement in effect, before starting operations, of the approximate or actual date mine operation will commence. The notification shall include the mine name, location, the company name, mailing address, person in charge, and whether operations will be continuous or intermittent.

When any mine is closed, the person in charge shall notify the nearest subdistrict office or State agency as provided above and indicate whether the closure is temporary or permanent.

[FR Doc.73-18227 Filed 8-28-73; 8:45 am]

PART 57—HEALTH AND SAFETY STANDARDS; METAL AND NONMETALLIC UNDERGROUND MINES

Miscellaneous Amendments

Pursuant to the authority vested in the Secretary of the Interior under section 6 of the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 725) to develop, revise, and promulgate health and safety standards for metal and nonmetal mines, there was published in the FEDERAL REGISTER on Saturday, December 9, 1972, a notice of proposed rulemaking in Part II of the FEDERAL REGISTER (37 FR 26379–16380), to amend Part 57, Subchapter N, Chapter I, Title 30, Code of Federal Regulations, by revising and revoking certain standards currently in force and by adding new standards. Each of the standards contained in the notice was developed or revised after consultation with the Federal Metal and Nonmetal Mine Safety Advisory Committee appointed pursuant to section 7 of the Act (30 U.S.C. 726).

The notice further provided that each proposed standard which is to be a mandatory standard was so designated by the word "Mandatory" which appeared at the beginning of the standard and if a standard had been recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee, such standard was identified by the letters "MNM SAC." On Friday, December 17, 1971, there was published a notice of proposed rulemaking in the FEDERAL REGISTER (36 FR 24044–24046) proposing to renumber § 57.4–34 to § 57.4–47 and applicable to surface only and to add a new § 57.4–75 which applies to underground only. These revisions were recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee. Under the provisions of subsection 6(e) of the Act (30 U.S.C. 725(e)), standards recommended by the Advisory Committee are not subject to hearings.

Subject to the provisions of subsection 6(e) of the Act and in accordance with the provisions of subsection 6(d) (30 U.S.C. 725(d)) on or before the last day of the period fixed for the submission of written data, views, or arguments, any person who may be adversely affected by a proposed standard, which had not been recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee, was afforded an opportunity to file with the Secretary of the Interior written objections thereto stating the grounds for such objection and requesting a public hearing (subject to the Administrative Procedure Act) on such objection.

Interested persons were afforded a period of 45 days from the date of publication of the proposed amendments on December 17, 1971, and a period of 30 days from the date of publication of the proposed amendments on December 9, 1972 in which to submit written data, views, arguments, and requests for a hearing (only for those proposed mandatory standards which were not recommended by the Federal Metal and Nonmetal Mine Safety Advisory Committee which were published on December 9, 1972). The 30 day period provided in the notice of December 9, 1972, was subsequently extended to January 31, 1973, by a notice published in the FEDERAL REGISTER on January 23, 1973 (38 FR 2219).

There were no hearings requested on the standards which are promulgated below. All of the data, views, or arguments received concerning these standards were given careful consideration by the Department. In response to the data, views, and arguments received, the following changes in the proposed standards have been made:

A. It was recommended that proposed mandatory standard 57.4–48 specify the length of time that records are to be kept of employee instructions on fire alarm

V38-167 AUG 29 73 XUM

signals and applicable procedures to be followed in case of fire or other disaster. The proposed standard has been revised to provide that these records shall be retained for 2 years. In addition, an editorial change substituting "emergency" for "disaster" has been made in the proposed standard. The intention of this standard is to avert disasters by having pre-planned and disciplined response by employees to fires and other emergencies.

B. It was recommended that proposed mandatory standard 57.4–74 be clarified. Since the standard applies only to persons working underground and to those surface personnel who are involved in escape and evacuation plans, the phrase "at an underground operation" has been clarified to specify that all employees "involved in the escape and evacuation plans for an underground operation" will be instructed on the plans. In response to a recommendation the proposed standard has been expanded to apply to employees who normally work in more than one area of an underground mine such as maintenance men, electricians, carpenters, laborers, supervisors and others by adding, "However, employees who normally work in more than one area of the underground mine shall be instructed at least once each calendar year in the location of escapeways for all areas of the mine in which they normally work or travel." The proposed standard has also been revised to provide that these records are to be retained for a period of two years.

C. Proposed mandatory standard 57.4–73 is also revised to provide that records of underground mine evacuation drills are to be retained for 2 years.

In order that the Secretary may carry out his responsibilities under the Federal Metal and Nonmetallic Mine Safety Act, and enforce mandatory health and safety by systematic inspection and investigation of conditions and practices at each underground mine covered by the Act, it is essential that the Secretary be notified of the approximate or actual date on which operations will commence at new mines or at reactivated mines and the closing of mines so that the Mining Enforcement and Safety Administration may efficiently schedule and conduct inspections and investigations which are required under the Act, and it is for these reasons § 55.26–1 has been proposed. In response to a suggestion received, § 57.26–1 has been revised to provide that if an underground mine is located in a State where a State Plan Agreement, approved by the Secretary under section 16 of the Act (30 U.S.C. 735), is in effect, the owner, operator, or person in charge shall notify the appropriate State agency of the opening and closing of the mine.

Part 57 of Chapter I of Title 30 of the Code of Federal Regulations is amended as set forth below:

Effective dates.—The effective dates of the new standards, and amendments, revisions, and revocations of standards are as follows:

1. Standards 57.4–48, 57.4–73, 57.4–74, and 57.26–1 shall become effective on August 29, 1978.

2. Standard 57.4–32 is revoked effective on August 29, 1978.

3. Standards 57.11–58, 57.18–10, the renumbering of standard 57.4–34 to 57.4–47, 57.4–76, and the revocation of standard 57.18–27 shall become effective on October 1, 1973.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

AUGUST 23, 1973.

Part 57, Title 30, Code of Federal Regulations, is amended and revised as follows:

§ 57.4 [Amended]

1. Standard 57.4–32, promulgated on July 31, 1969 (34 FR 12519), is revoked.

2. Standard 57.4–34, promulgated on July 31, 1969 (34 FR 12519), which applies to surface and underground operations, is renumbered 57.4–47, and applies to surface operations only.

3. New standard 57.4–48, which applies to surface operations only, is added to read as follows:

57.4–48 *Mandatory.*—All employees shall be instructed at least once each calendar year on fire-alarm signals and applicable procedures to be followed in case of fire or other emergency. Records of instruction shall be kept for 2 years.

4. New standard 57.4–73, which applies to underground operations only, is added to read as follows:

57.4–73 *Mandatory.*—Mine evacuation drills shall be held for each shift once every 6 months. These evacuation drills shall involve all employees on each shift and shall include:

(a) Activation of the fire-alarm system.

(b) Evacuation of all men from their work areas to the surface or to designated central evacuation points at some time other than a shift change.

Records of such drills, showing the time and date, shall be kept for at least 2 years after each drill.

5. New standard 57.4–74, which applies to underground operations only, is added to read as follows:

57.4–74 *Mandatory.*—All employees involved in the escape and evaluation plan for an underground operation shall be instructed at least once each calendar year on current escape and evaluation plans, fire-alarm signals, and applicable procedures to be followed in case of fire or other emergency. New employees shall receive such instructions before going underground. Whenever an employee is assigned to work in another area of the mine he shall be instructed on the escapeway for that area at the time of such assignment. However, employees who normally work in more than one area of the mine shall be instructed at least once each calendar year in the location of escapeways for all areas of the mine in which they normally work or travel. Whenever a change is made in escape and evaluation plans and procedures for any area of the mine, all affected employees shall be instructed of such change. Records of instruction shall be kept for 2 years.

6. New standard 57.4–75, which applies to underground operations only, is added to read as follows:

57.4–75 *Mandatory.*—Belt conveyors shall be equipped with slippage and sequence switches.

§ 57.11 [Amended]

7. New standard 57.11–58, which applies to underground operations only, is added to read as follows:

57.11–58 *Mandatory.*—Each operator of an underground mine shall establish a check-in and check-out system which shall provide an accurate record of persons in the mine. These records shall be kept on the surface in a place chosen to minimize the danger of destruction by fire or other hazards. Every person underground shall carry a positive means of being identified.

§ 57.18 [Amended]

8. Standard 57.18–10, promulgated on July 31, 1969 (34 FR 12524), is revised to read as follows:

57.18–10 *Mandatory.*—Selected supervisors shall be trained in first aid. First aid training shall be made available to all interested employees.

9. Standard 57.18–27, promulgated on July 31, 1969 (34 FR 12524), is revoked.

10. A new § 57.26, *Procedures,* and a new standard 57.26–1 are added to read as follows:

§ 57.26 Procedures.

NOTIFICATION OF COMMENCEMENT OF OPERATIONS AND CLOSING OF MINES

57.26–1 *Mandatory.*—The owner, operator, or person in charge of any metal and nonmetal mine shall notify the nearest Mining Enforcement and Safety Administration Metal and Nonmetal Mine Health and Safety subdistrict office or the State agency if the mine is located in a State which has a State Plan Agreement in effect, before starting operations, of the approximate or actual date mine operation will commence. The notification shall include the mine name, location, the company name, mailing address, person in charge, and whether operations will be continuous or intermittent.

When any mine is closed, the person in charge shall notify the nearest subdistrict office or State agency as provided above and indicate whether the closure is temporary or permanent.

METAL AND NONMETALLIC OPEN PIT MINES

Proposed Health and Safety Standards

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 721–740) to promulgate health and safety standards for metal and nonmetal mines, it is proposed to amend Part 55, Subchapter N, Chapter I, Title 30, Code of Federal Regulations, by adding, revoking, and revising certain standards pertaining to air quality and physical agents, explosives, rotary jet piercing, electricity, personal protection, and man hoisting as set forth below. These standards have been developed after consultation with the Metal and Nonmetal Mine Safety Advisory Committee appointed pursuant to section 7 of the Act (30 U.S.C. 726).

Each standard which is to be a mandatory standard is so designated by the word "Mandatory" which appears at the beginning of the section in which the standard is prescribed. If the Metal and Nonmetal Mine Safety Advisory Committee has recommended a mandatory standard, the standard will be preceded by the word "Mandatory" and the letters "MNMSAC" in this manner *"Mandatory—MNMSAC."*

Subject to the provisions of subsection (e) of section 6 (30 U.S.C. 725 (e)) and in accordance with the provisions of subsection (d) of section 6 of the Act (30 U.S.C. 725 (d)) on or before the last day of the period fixed for the submission of written data, views, or arguments, any person who may be adversely affected by a proposed health and safety standard which is designated as a mandatory standard and which has not been recommended as a mandatory standard by the Metal and Nonmetal Mine Safety Advisory Committee may file with the Secretary of the Interior written objections thereto stating the grounds for such objection and requesting a public hearing (subject to the provisions of the Administrative Procedure Act) on such objections.

Pursuant to the provisions of subsection (e) of section 6 of the Act (30 U.S.C. 725 (e)) proposed mandatory standards which have been recommended by the Advisory Committee, are not subject to hearings.

Interested persons may on or before October 15, 1973, submit written data, views, arguments, or objections to the proposals. All communications should be addressed to the Administrator, Mining Enforcement and Safety Administration, Department of the Interior, Washington, D.C. 20240.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

AUGUST 23, 1973.

§ 55.5 [Amended]

1. It is proposed to revise mandatory standard 55.5–1, promulgated on December 8, 1970 (35 FR 18587), as follows:

55.5–1 *Mandatory—MNMSAC.*—Except as permitted by § 55.5–5:

(a) The exposure to airborne contaminants, excluding asbestos, shall not exceed, on the basis of a time weighted average, the threshold limit values adopted by the American Conference of Governmental Industrial Hygienists, as set forth and explained in the 1972 edition of the Conference's publication, entitled "TLV's Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment with Intended Changes for 1972," pages 1 through 52, which are hereby incorporated by reference and made a part hereof. This publication may be obtained from the American Conference of Governmental Industrial Hygienists by writing to the Secretary-Treasurer, P.O. Box 1937, Cincinnati, Ohio 45201, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration. Excursions above the listed thresholds shall not be of a greater magnitude than is characterized as permissible by the Conference.

(b) The time weighted average airborne concentration of asbestos dust to which employees are exposed shall not exceed 5 fibers per milliliter greater than 5 microns in length, as determined by the membrane filter method at 400–450 x magnification (4 millimeter objective) phase contrast illumination, as set forth in the 1972 edition of the Conference's publication, entitled "TLV's Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment with Intended Changes for 1972," pages 1 through 52, as incorporated in subsection (a) of this section except that the intended change in TLV's for asbestos (all types) on page 37 shall be the threshold limit value for the purposes of this section. Concentrations above 5 fibers per milliliter, but not to exceed 10 fibers per milliliter, may be permitted up to a total of 15 minutes in an hour for up to 5 hours in an 8-hour day.

(c) Employees shall be withdrawn from areas where there is present an airborne contaminant given a "C" designation by the Conference and the concentration exceeds the threshold limit value listed for that contaminant.

2. It is proposed to revise mandatory standard 55.5–5, promulgated on December 8, 1970 (35 FR 18587), as follows:

55.5–5 *Mandatory.*—Control of employee exposure to harmful airborne contaminants shall be, insofar as feasible, by prevention of contamination, removal by exhaust ventilation, or by dilution with uncontaminated air. However, where accepted engineering control measures have not been developed or when necessary by the nature of work involved (for example, while establishing controls or occasional entry into hazardous atmospheres to perform maintenance or investigation), employees may work for reasonable periods of time in concentrations of airborne contaminants exceeding permissible levels if they are protected by appropriate respiratory protective equipment. Whenever respiratory protective equipment is used a program for selection, maintenance, training, fitting, supervision, cleaning, and use shall meet the following minimum requirements:

(a) Mining Enforcement and Safety Administration approved respirators which are applicable and suitable for the purpose intended shall be furnished, and employees shall use the protective equipment in accordance with training and instruction.

(b) A respirator program consistent with the requirements of ANSI Z88.2–1969, published by the American National Standards Institute and entitled "American National Standards Practices for Respiratory Protection ANSI Z88.2–1969," approved August 11, 1969, which is hereby incorporated by reference and made a part hereof. This publication may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration.

(c) When respiratory protection is used in atmospheres immediately harmful to life, the presence of at least one other person with backup equipment and rescue capability shall be required in the event of failure of the respiratory equipment.

3. It is proposed to revise the heading of § 55.5 to read § 55.5 *Air quality and physical agents* and to add a new mandatory standard 55.5–50, as follows:

55.5–50 *Mandatory—MNMSAC.*—(a) No employee shall be permitted an exposure to noise in excess of that specified in the table below. Noise level measurements shall be made using a sound level meter meeting the specifications contained in ANSI S1.4–1971, published by the American National Standards Institute and entitled "American National Standard Specification for Sound Level Meters, ANSI S1.4–1971," approved April 27, 1971, which is hereby incorporated by reference and made a part hereof, or by a dosimeter with similar accuracy. This publication may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration.

PERMISSIBLE NOISE EXPOSURES

Duration per day, hours of exposure	*Sound level dBA, slow response*
8	90
6	92
4	95
3	97
2	100
1½	102
1	105
½	110
¼ or less	115

NOTE.—When the daily noise exposure is composed of two or more periods of noise exposure at different levels, their combined effect shall be considered rather than the individual effect of each.

If the sum $\frac{C_1}{T_1}+\frac{C_2}{T_2}+\ldots\frac{C_n}{T_n}$ exceeds unity, then the mixed exposure shall be considered to exceed the permissible exposure. C_n indicates the total time of exposure at a specified noise level, T_n indicates the total time of exposure permitted at that level.

No exposure shall exceed 115 dBA. Impact or impulsive noises shall not exceed 140 dB, peak sound pressure level.

(b) When employees' exposure exceeds that listed in the above table, feasible administrative or engineering controls shall be utilized. If such controls fail to reduce exposure to within permissible levels, personal protective equipment shall be provided and used to reduce personnel sound-level exposures to within the values of the table.

V 38-167 AUG 29 73 XUM

§ 55.6 [Amended]

4. It is proposed to revise mandatory standard 55.6–5, promulgated on December 8, 1970 (35 FR 18587), as follows:

55.6–5 *Mandatory—MNMSAC.*—Areas surrounding magazines and facilities for the storage of blasting agents shall be kept clear of rubbish, brush, dry grass, or trees (other than live trees 10 or more feet tall), for a distance not less than 25 feet in all directions, and other unnecessary combustible materials for a distance of not less than 50 feet.

5. It is proposed to add a new mandatory standard 55.6–12, as follows:

55.6–12 *Mandatory—MNMSAC.*—Prior to interior repair of facilities for storage of explosives, including blasting agents, all materials stored within the facility shall be removed and the interior cleaned. Prior to the exterior repair of such facilities, all materials stored within the facility shall be removed if there exists a possibility that such repairs may produce a spark or flame. The explosives removed from storage facilities to be repaired shall be placed either in other storage facilities appropriate for the storage of such materials under this section or a safe distance from the facilities under repair where they shall be properly guarded and protected until the repairs have been completed and the materials have been returned to storage within the facilities.

§ 55.8 [Amended]

6. It is proposed to add a new mandatory standard 55.8–6, as follows:

55.8–6 *Mandatory—MNMSAC.*—The oxygen intake coupling on jet-piercing drills shall be constructed so that only the oxygen hose can be coupled to it.

7. It is proposed to add a new mandatory standard 55.8–7, as follows:

55.8–7 *Mandatory—MNMSAC.*—The combustion chamber of a jet drill stem which has been sitting unoperated in a drill hole shall be flushed with a suitable solvent after the stem is pulled up.

§ 55.12 [Amended]

8. It is proposed to revise advisory standard 55.12–32, promulgated on July 31, 1969 (34 FR 12507) and to make it mandatory, as follows:

55.12–32 *Mandatory—MNMSAC.*—Inspection and cover plates on electrical equipment and junction boxes shall be kept in place at all times except during testing or repairs.

§ 55.15 [Amended]

9. It is proposed to revoke advisory standard 55.15–12, promulgated on February 25, 1970 (35 FR 3664).

§ 55.19 [Amended]

10. It is proposed to revise mandatory standard 55.19–17, promulgated on July 31, 1969 (34 FR 12509) as follows:

55.19–7 *Mandatory—MNMSAC.*—All man hoists shall be provided with devices to prevent overtravel. When utilized in shafts exceeding 100 feet in depth, such hoists shall also be provided with overspeed devices.

11. It is proposed to add a new mandatory standard 55.19–13, as follows:

55.19–13 *Mandatory — MNMSAC.*—Where any diesel or similar fuel-injection engine is used to power a hoist, the engine shall be equipped with a damper or other cutoff in its air intake system. The control handle shall be clearly labeled to indicate that its intended function is for emergency stopping only.

12. It is proposed to revise mandatory standard 55.19–24, promulgated on February 25, 1970 (35 FR 3665), as follows:

55.19–24 *Mandatory — MNMSAC.* — The rope shall be attached to the load by the thimble-and-clip method, the socketing method, or other approved method. If the socketing method is employed, zinc or its equivalent shall be used. The use of Babbitt metal or lead for socketing wire ropes is prohibited. If the thimble-and-clip method is used, the following shall be observed:

(a) The rope shall be attached to the load by passing one end around an oval thimble that is attached to the load bending the end back so that it is parallel to the long or "live" end of the rope and fastening the two parts of the rope together with clips.

(b) The U-bolt of each clip shall encircle the short or "dead-end" of the rope, and the distance between clips shall comply with the figures in the accompanying table.

(c) The following number of clips and clip nut torques shall be used for right regular or lang lay wire rope, 6 x 19 class or 6 x 37 class, fiber core or independent wire rope core (1WRC):

(Follow manufacturer's recommendation for other kinds of wire rope and clips.)

Wire rope diameter (inches)	Minimum number of clips	Spacing of clips (inches)	Torque required (ft.-lbs.)	
			U-bolt	Flat grip
1/4	3	2	6	30
5/16	3	2 1/4	12	20
3/8	3	2 1/2	20	35
7/16	3	2 3/4	40	65
1/2	3	3	40	65
9/16	3	3 1/2	75	125
5/8	4	3 3/4	75	125
3/4	4	4 1/2	120	220
7/8	4	5 1/4	220	220
1	5	6	220	220
1 1/8	6	6 3/4	220	360
1 1/4	6	7 1/2	360	360
1 3/8	7	8 1/4	360	500
1 1/2	7	9	360	500
1 5/8	7	9 3/4	430	
1 3/4	7	10 1/2	590	
1 7/8	8	11 1/4	750	
2	8	12	750	
2 1/8	8	13	750	
2 1/4	8	14	750	

(d) Apply the initial load and retighten clip nuts to the recommended torque.

(e) When special conditions require the attachment of a sling to the hoisting cable to handle equipment in the shaft, the sling shall be attached by clips or equivalent in accordance with the table in paragraph (c) of this standard.

13. It is proposed to revise advisory standard 55.19–26, promulgated on July 31, 1969 (34 FR 12509) and make it mandatory, as follows:

• • • • •

55.19–26 *Mandatory—MNMAC.*—Safety device attachments to hoist ropes shall be selected, installed, and maintained according to manufacturers' specifications to minimize internal corrosion and weakening of the hoist rope.

14. It is proposed to add a new standard 55.19–109, as follows:

• • • • •

55.19–109 *Mandatory—MNMSAC.*—Shaft inspection and repair work in vertical shafts shall be performed from substantial platforms equipped with bonnets or equivalent overhead protection.

15. It is proposed to add a new standard 55.19–129, as follows:

55.19–129 *Mandatory—MNMSAC.*—Hoistmen shall examine their hoists and shall test overtravel, deadman controls, position indicators, and braking mechanisms at the beginning of each shift.

[30 CFR Part 56]

SAND, GRAVEL AND CRUSHED STONE OPERATIONS

Proposed Health and Safety Standards

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 721–740) to promulgate health and safety standards for metal and nonmetal mines it is proposed to amend Part 56, Subchapter H, Chapter I, Title 30, Code of Federal Regulations, by adding, revoking, and revising certain standards pertaining to air quality and physical agents, explosives, rotary jet piercing, electricity, personal protection and man hoisting, as set forth below. These standards have been developed after consultation with the Metal and Nonmetal Mine Safety Advisory Committee appointed pursuant to section 7 of the Act (30 U.S.C. 726).

Each standard which is to be a mandatory standard is so designated by the word "Mandatory" which appears at the beginning of the section in which the standard is prescribed. If the Metal and Nonmetal Mine Safety Advisory Committee has recommended a mandatory standard, the standard will be preceded by the word "Mandatory" and the letters "MNMSAC" in this manner "*Mandatory—MNMSAC.*"

Subject to the provisions of subsection (e) of section 6 (30 U.S.C. 725(e)) and in accordance with the provisions of subsection (d) of section 6 of the Act (30 U.S.C. 725(d)) on or before the last day of the period fixed for the submission of written data, views, or arguments, any person who may be adversely affected by a proposed health and safety standard which is designated as a mandatory standard and which has not been recommended as a mandatory standard by the Metal and Nonmetal Mine Safety Advisory Committee may file with the Secretary of the Interior written objections thereto stating the grounds for such objection and requesting a public hearing (subject to the provisions of the Administrative Procedure Act) on such objections.

Pursuant to the provisions of section (e) of section 6 of the Act (30 U.S.C. 725(e)) proposed mandatory standards which have been recommended by the Advisory Committee, are not subject to hearings.

Interested persons may, on or before October 15, 1973, submit written data, views, arguments or objections to the proposals. All communications should be addressed to the Administrator, Mining Enforcement and Safety Administration, Department of the Interior, Washington, D.C. 20240.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

AUGUST 23, 1973.

§ 56.5 [Amended]

1. It is proposed to revise mandatory standard 56.5–1 promulgated on December 8, 1970 (35 FR 18589), as follows:

56.5–1 *Mandatory—MNMSAC.*—Except as permitted by § 56.5–5:

(a) The exposure to airborne contaminants, excluding asbestos, shall not exceed, on the basis of a time weighted average, the threshold limit values adopted by the American Conference of Governmental Industrial Hygienists, as set forth and explained in the 1972 edition of the Conference's publication, entitled "TLVs Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment with Intended Changes for 1972," pages 1 through 52, which are hereby incorporated by reference and made a part hereof. This publictaion may be obtained from the American Conference of Governmental Industrial Hygienists by writing to the Secretary-Treasurer, P.O. Box 1937, Cincinnati, Ohio 45201, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration. Excursions above the listed thresholds shall not be of a greater magnitude than is characterized as permissible by the Conference.

(b) The time weighted average airborne concentration of asbestos dust to which employees are exposed shall not exceed 5 fibers per milliliter greater than 5 microns in length, as determined by the membrane filter method at 400–450 x magnification (4 millimeter objective) phase contrast illumination, as set forth in the 1972 edition of the Conference's publication, entitled "TLVs Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment with Intended Changes for 1972," pages 1 through 52, as incorporated in subsection (a) of this section, except that the intended change in TLV's for asbestos (all types) on page 37 shall be the threshold limit value for the purposes of this section. Concentrations above 5 fibers per milliliter, but not to exceed 10 fibers per milliliter, may be permitted up to a total of 15 minutes in an hour for up to 5 hours in an 8-hour day.

(c) Employees shall be withdrawn from areas where there is present an airborne contaminant given a "C" designation by the Conference and the concentration exceeds the threshold limit value listed for that contaminant.

2. It is proposed to revise mandatory standard 56.5–5, promulgated on December 8, 1970 (35 FR 18589), as follows:

• • • • • •

56.5–5 *Mandatory.*—Control of employee exposure to harmful airborne contaminants, shall be, insofar as feasible, by prevention of contamination, removal by exhaust ventilation, or by dilution with uncontaminated air. However, where accepted engineering control measures have not been developed or when necessary by the nature of the work involved (for example, while establishing controls or occasional entry into hazardous atmospheres to perform maintenance or investigation), employees may work for reasonable periods of time in concentrations of airborne contaminants exceeding permissible levels if they are protected by appropriate respiratory protective equipment. Whenever respiratory protective equipment is used a program for selection, maintenance, training, fitting, supervision, cleaning, and use shall meet the following minimum requirements:

(a) Mining Enforcement and Safety Administration approved respirators which are applicable and suitable for the purpose intended shall be furnished, and employees shall use the protective respiratory equipment in accordance with training and instruction.

(b) A respirator program consistent with the requirements of ANSI Z88.2–1969, published by the American National Standards Institute and entitled "American National Standard Practices for Respirator Protection, ANSI Z88.2–1969," approved August 11, 1969, which is hereby incorporated by reference and made a part hereof. This publication may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration.

(c) When respiratory protection is used in atmospheres immediately harmful to life, the presence of at least one other person with backup equipment and rescue capability shall be required in the event of failure of the respiratory equipment.

• • • • •

3. It is proposed to revise the heading of § 56.5 to read § 56.5 *Air quality and physical agents* and to add a new mandatory standard 56.5–50, as follows:

56.5–50 *Mandatory—MNMSAC.*—(a) No employee shall be permitted an exposure to noise in excess of that specified in the table below. Noise level measurements shall be made using a sound level meter meeting the specifications contained in ANSI S1.4–1971, published by the American National Standards Institute and entitled "American National Standard Specifications for Sound Level Meters, ANSI S1.4–1971," approved April 27, 1971, which is hereby incorporated by reference and made a part hereof, or by a dosimeter with similar accuracy. This publication may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration.

PERMISSIBLE NOISE EXPOSURES

Duration per day, hours of exposure	*Sound level dBA, slow response*
8	90
6	92
4	95
3	97
2	100
1½	102
1	105
½	110
¼ or less	115

NOTE.—When the daily noise exposure is composed of two or more periods of noise exposure at different levels, their combined effect shall be considered rather than the individual effect of each.

If the sum $C_1/T_1+C_2/T_2+\cdots C_n/T_n$

exceeds unity, then the mixed exposure shall be considered to exceed the permissible exposure. C_n indicates the total times of exposure at a specified noise level, and T_n indicates the total time of exposure permitted at that level.

No exposure shall exceed 115 dBA. Impact or impulsive noises shall not exceed 140 dB, peak sound pressure level.

(b) When employees' exposure exceeds that listed in the above table, feasible administrative or engineering controls shall be utilized. If such controls fail to reduce exposure to permissible levels, personal protective equipment shall be provided and used to reduce personnel sound-level exposures to within the values of the table.

§ 56.6 [Amended]

4. It is proposed to revise advisory standard 56.6–5, promulgated on February 25, 1970 (35 FR 3667), and make it mandatory, as follows:

56.6–5 *Mandatory—MNMSAC.*—Areas surrounding magazines and facilities for the storage of blasting agents shall be kept clear of rubbish, brush, dry grass, or trees (other than live trees 10 or more feet tall), for a distance not less than 25 feet in all directions, and other unnecessary combustible materials for a distance of not less than 50 feet.

5. It is proposed to add a new mandatory standard 56.6–12, as follows:

56.6–12 *Mandatory—MNMSAC.*—Prior to interior repair of facilities for storage of explosives, including blasting agents all materials stored within the facility shall be removed and the interior cleaned. Prior to the exterior repair of such facilities, all materials stored within the facility shall be removed, if there exists a possibility that such repairs may produce a spark or flame. The explosives removed from storage facilities to be repaired shall be placed either in other storage facilities appropriate for the storage of such materials under this section or a safe distance from the facilities under repair where they shall be properly guarded and protected until the repairs have been completed and the materials have been returned to storage within the facilities.

§ 56.8 [Amended]

6. It is proposed to add a new mandatory standard 56.8–6, as follows:

56.8–6 *Mandatory—MNMSAC.*—The oxygen intake coupling on jet-piercing drills shall be constructed so that only the oxygen hose can be coupled to it.

7. It is proposed to add a new mandatory standard 56.8–7, as follows:

56.8–7 *Mandatory—MNMSAC.*—The combustion chamber of a jet drill stem which has been sitting unoperated in a drill hole shall be flushed with a suitable solvent after the stem is pulled up.

§ 56.12 [Amended]

8. It is proposed to revise advisory standard 56.12–32, promulgated on July 31, 1969 (34 FR 12513), and to make it mandatory, as follows:

56.12–32 *Mandatory—MNMSAC.*—Inspection and cover plates on electrical equipment and junction boxes shall be kept in place at all times except during testing or repairs.

§ 56.15 [Amended]

9. It is proposed to revoke advisory standard 56.15–12, promulgated on February 25, 1970 (35 FR 3670).

§ 56.19 [Amended]

10. It is proposed to revise mandatory standard 56.19–7, promulgated on July 31,

V 38-167 AUG 29 73 XUM

56.19-7 *Mandatory—MNMSAC.*—All man hoists shall be provided with devices to prevent overtravel. When utilized in shafts exceeding 100 feet in depth, such hoists shall also be provided with overspeed devices.

11. It is proposed to add a new mandatory standard 56.19-13, as follows:

56.19-13 *Mandatory—MNMSAC.* — Where any diesel or similar fuel-injection engine is used to power a hoist, the engine shall be equipped with a damper or other cutoff in its air intake system. The control handle shall be clearly labeled to indicate that its intended function is for emergency stopping only.

12. It is proposed to revise mandatory standard 56.19-24, promulgated on February 25, 1970 (35 FR 3670), as follows:

56.19-24 *Mandatory — MNMSAC.* — The rope shall be attached to the load by the thimble-and-clip method, the socketing method, or other approved method. If the socketing method is employed, zinc or its equivalent shall be used. The use of Babbitt metal or lead for socketing wire ropes is prohibited. If the thimble-and-clip method is used, the following shall be observed:

(a) The rope shall be attached to the load by passing one end around an oval thimble that is attached to the load bending the end back so that it is parallel to the long or "live" end of the rope and fastening the two parts of the rope together with clips.

(b) The U-bolt of each clip shall encircle the short or "dead-end" of the rope, and the distance between clips shall comply with the figures in the accompanying table.

(c) The following number of clips and clip nut torques shall be used for right regular or lang lay wire rope, 6 x 19 class or 6 x 37 class, fiber core or independent wire rope core (IWRC):

(Follow manufacturer's recommendations for other kinds of wire rope and clips.)

Wire rope diameter (inches)	Minimum number of clips	Spacing of clips (inches)	Torque required (ft.-lbs.)	
			U-bolt	Fist grip

2	8	12	750	----------
2 1/8	8	13	750	----------
2 1/4	8	14	750	----------

(d) Apply the initial load and retighten clip nuts to the recommended torque.

(e) When special conditions require the attachment of a sling to the hoisting cable to handle equipment in the shaft, the sling shall be attached by clips or equivalent in accordance with the table in paragraph (c) of this standard.

13. It is proposed to revise advisory standard 56.19-26, promulgated on July 31, 1969 (34 FR 12516), and to make it mandatory, as follows:

56.19-26 *Mandatory—MNMSAC.*—Safety device attachments to hoist ropes shall be selected, installed, and maintained according to manufacturers' specifications to minimize internal corrosion and weakening of the hoist rope.

14. It is proposed to add a new standard 56.19-109, as follows:

56.19-109 *Mandatory—MNMSAC.*—Shaft inspection and repair work in vertical shafts shall be performed from substantial platforms equipped with bonnets or equivalent overhead protection.

15. It is proposed to add a new standard 56.19-129, as follows:

56.19-129 *Mandatory—MNMSAC.*—Hoistmen shall examine their hoists and shall test overtravel, deadman controls, position indicators, and braking mechanisms at the beginning of each shaft.

[FR Doc.73-18230 Filed 8-28-73;8:45 am]

[30 CFR Part 57]

HEALTH AND SAFETY STANDARDS—METAL AND NONMETALLIC UNDERGROUND MINES

Proposed Health and Safety Standards

Notice is hereby given that pursuant to the authority vested in the Secretary of the Interior under the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 721–740) to promulgate health and safety standards for metal and nonmetal mines it is proposed to amend Part 57, Subchapter N, Chapter I, Title 30, Code of Federal Regulations, by revising the definition of "working level," and by adding, revoking, and revising certain standards pertaining to ground control, air quality, ventilation, radiation, and physical agents, explosives, rotary jet piercing, electricity, personal protection and man hoisting, as set forth below. These standards have been developed after consultation with the Federal Metal and Nonmetal Mine Safety Advisory Committee appointed pursuant to section 7 of the Act (30 U.S.C. 726).

Each standard which is to be a mandatory standard is so designated by the word "Mandatory" which appears at the beginning of the section in which the standard is prescribed. If the Federal Metal and Nonmetal Mine Safety Advisory Committee has recommended a mandatory standard, the standard will be preceded by the word "Mandatory" and the letters "MNMSAC" in this manner "*Mandatory—MNMSAC.*"

Subject to te provisions of subsection (e) of section 6 (30 U.S.C. 725 (e)) and in accordance with the provisions of subsection (d) of section 6 of the Act (30 U.S.C. 725 (d)) on or before the last day of the period fixed for the submission of written data, views, or arguments, any person who may be adversely affected by a proposed health and safety standard which is designated as a mandatory standard and which has not been recommended as a mandatory standard by the Federal Metal and Nonmetal Mine Safety Advisory Committee may file with the Secretary of the Interior written objections thereto stating the grounds for such objection and requesting a public hearing (subject to the provisions of the Administrative Procedure Act) on such objection.

Pursuant to the provisions of subsection (e) of section 6 of the Act (30 U.S.C. 725 (e)) proposed mandatory standards which have been recommended by the Advisory Committee, are not subject to hearings.

Interested persons may, on or before October 15, 1973, submit written data, views, arguments, or objections to the proposals. All communications should be addressed to the Administrator, Mining Enforcement and Safety Administration, Department of the Interior, Washington, D.C. 20240.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

AUGUST 23, 1973.

1. It is proposed to transfer the prefatory statement defining the term "working level" before mandatory standard 57.5–37 and under the headling "Radiation," promulgated on February 25, 1970 (35 FR 3672), to § 57.2 "Definitions" and revised the definition as follows:

§ 57.2 Definitions, MNMSAC.

* * * * *

"Working level" (WL) means any combination of the short-lived radon daughters in one liter of air that will result in ultimate emission of 1.3×10^5 MeV (million electron volts) of potential alpha energy, and exposure to these radon daughters over a period of time is expressed in terms of "working level months" (WLM). Inhalation of air containing a radon daughter concentration of 1 WL for 173 hours results in an exposure of 1 WLM.

* * * * *

§ 57.3 [Amended]

2. It is proposed to revoke advisory standard 57.3–27, promulgated on July 31, 1969 (34 FR 12519).

§ 57.5 [Amended]

3. It is proposed to revise mandatory standard 57.5–1, promulgated on December 8, 1970 (35 FR 18591) which applies to surface and underground, as follows:

57.5–1 *Mandatory—MNMSAC.*—Except as permitted by § 57.5–5:

(a) The exposure to airborne contaminants, excluding asbestos, shall not exceed, on the basis of a time weighted average, the threshold limit values adopted by the American Conference of Governmental Industrial Hygienists, as set forth and explained in the 1972 edition of the Conference's publication, entitled "TLVs Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment with Intended Changes for 1972," pages 1 through 52, which are hereby incorporated by reference and made a part hereof. This publication may be obtained from the American Conference of Governmental Industrial Hygienists by writing to the Secretary-Treasurer, P.O. Box 1937, Cincinnati, Ohio 45201, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration. Excursions above the listed thresholds shall not be of a greater magnitude than is characterized as permissible by the Conference.

(b) The time weighted average airborne concentration of asbestos dust to which employees are exposed shall not exceed 5 fibers per milliliter greater than 5 microns in length, as determined by the membrane filter method at 400–450 x magnification (4 millimeter objective) phase contrast illumination, as set forth is the 1972 edition of the Conference's publication, entitled "TLVs Threshold Limit Values for Chemical Substances and Physical Agents in the Workroom Environment with Intended Changes for 1972," pages 1 through 52, as incorporated in subsection (a) of this section except that the intended change in TLVs for asbestos (all types) on page 37 shall be the threshold limit value for the purpose of this section. Concentrations above 5 fibers per milliliter, but not to exceed 10 fibers per milliliter, may be permitted up to a total of 15 minutes in an hour for up to 5 hours in an 8-hour day.

(c) Employees shall be withdrawn from areas where there is present an airborne contaminant given a "C" designation by the Conference and the concentration exceeds the threshold limit value listed for that contaminant.

4. It is proposed to revise mandatory standard 57.5–5, promulgated on December 8, 1970 (35 FR 18591), which applies to surface and underground, as follows:

57.5–5 Mandatory.—Control of employee exposure to harmful airborne contaminants shall be, insofar as feasible, by prevention of contamination, removal by exhaust ventilation, or by dilution with uncontaminated air. However, where accepted engineering control measures have not been developed or when necessary by the nature of the work involved (for example, while establishing controls or occasional entry into hazardous atmospheres to perform maintenance or investigation), employees may work for reasonable periods of time in concentrations of airborne contaminants exceeding permissible levels if they are protected by appropriate respiratory protective equipment. Whenever respiratory protective equipment is used a program for selection, maintenance, training, fitting, supervision, cleaning, and use shall meet the following minimum requirements:

(a) Mining Enforcement and Safety Administration approved respirators which are applicable and suitable for the purpose intended shall be furnished, and employees shall use the protective respiratory equipment in accordance with training and instruction.

(b) A respirator program consistent with the requirements of ANSI Z88.2–1969, published by the American National Standards Institute entitled "American National Standard Practices for Respiratory Protection, ANSI Z88.2–1969," approved August 11, 1969, which is hereby incorporated by reference and made a part hereof. This publication may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration.

(c) When respiratory protection is used in atmospheres immediately harmful to life, the presence of at least one other person with backup equipment and rescue capability shall be required in the event of failure of the respiratory equipment.

5. It is proposed to revise the heading of § 57.5 to read § 57.5 *Air quality; ventilation, radiation and physical agents,* and to add a new mandatory standard 57.5–50 which applies to surface and underground, as follows:

57.5 *Mandatory—MNMSAC.*—(a) No employee shall be permitted an exposure to noise in excess of that specified in the table below. Noise level measurements shall be made using a sound level meter meeting the specifications contained in ANSI S1.4–1971, published by the American National Standards Institute and entitled "American National Standard Specifications for Sound Level Meters, ANSI S1.4–1971", approved April 27, 1971, which is hereby incorporated by reference and made a part hereof, or by a dosimeter with similar accuracy. This publication may be obtained from the American National Standards Institute, Inc., 1430 Broadway, New York, New York 10018, or may be examined in any Metal and Nonmetal Mine Health and Safety District or Subdistrict Office of the Mining Enforcement and Safety Administration.

PERMISSIBLE NOISE EXPOSURES

Duration per day, hours of exposure	*Sound level dBA, slow response*
8	90
6	92
4	95
3	97
2	100
1½	102
1	105
½	110
¼ or less	115

NOTE.—When the daily noise exposure is composed of two or more periods of noise exposure at different levels, their combined effect shall be considered rather than the individual effect of each.

If the sum $C_1/T_1+C_2/T_2+ \cdots C_n/T_n$

exceeds unity, then the mixed exposure shall be considered to exceed the permissible exposure. C_n indicates the total time of exposure at a specified noise level, and T_n indicates the total time of exposure permitted at that level.

No exposure shall exceed 115 dBA. Impact or impulsive noises shall not exceed 140 dB, peak sound pressure level.

(b) When employees' exposure exceeds that listed in the above table, feasible administrative or engineering controls shall be utilized. If such controls fail to reduce exposure to permissible levels, personal protective equipment shall be provided and used to reduce personnel sound-level exposures to within the values of the table.

§ 57.6 [Amended]

6. It is proposed to revise mandatory standard 57.6–5, promulgated on December 8, 1970 (35 FR 18591), which applies to surface and underground, as follows:

57.6–5 *Mandatory—MNMSAC.*—Areas surrounding magazines and facilities for the storage of blasting agents shall be kept clear of rubbish, brush, dry grass, or trees (other than live trees 10 or more feet tall), for a distance not less than 25 feet in all directions, and other unnecessary combustible materials for a distance of not less than 50 feet.

7. It is proposed to add a new mandatory standard 57.6–12 which applies to surface and underground, as follows:

57.6–12 *Mandatory—MNMSAC.*—Prior to interior repair of facilities for storage of explosives, including blasting agents, all materials stored within the facility shall be removed and the interior cleaned. Prior to the exterior repair of such facilities, all materials stored within the facility shall be removed, if there exists a possibility that such repairs may produce a spark or flame. The explosives removed from storage facilities to be repaired shall be placed either in other storage facilities appropriate for the storage of such materials under this section or a safe distance from the facilities under repair where they shall be properly guarded and protected until the repairs have been completed and the materials have been returned to storage within the facilities.

§ 57.8 [Amended]

8. It is proposed to add a new mandatory standard 57.8–6 which applies to surface only, as follows:

57.8–6 Mandatory—MNMSAC.—The oxygen intake coupling on jet-piercing drills shall be constructed so that only the oxygen hose can be coupled to it.

9. It is proposed to add a new mandatory standard 57.8–7 which applies to surface only, as follows:

57.8–7 Mandatory—MNMSAC.—The combustion chamber of a jet drill stem which has been sitting unoperated in a drill hole shall be flushed with a suitable solvent after the stem is pulled up.

§ 57.12 [Amended]

10. It is proposed to revise advisory standard 57.12–32, promulgated on July 31, 1969 (34 FR 12522) which applies to surface and underground, and to make it mandatory, as follows:

57.12–32 Mandatory—MNMSAC.—Inspection and cover plates on electrical equipment and junction boxes shall be kept in place at all times except during testing or repairs.

§ 57.15 [Amended]

11. It is proposed to revoke advisory standard 57.15–12, promulgated on February 25, 1970 (35 FR 3676) which is applicable to surface and underground.

§ 57.19 [Amended]

12. It is proposed to revise mandatory standard 57.19–7, promulgated on July 31, 1969 (34 FR 12524), as follows:

57.19–7 Mandatory—MNMSAC.—All man hoists shall be provided with devices to prevent overtravel. When utilized in shafts exceeding 100 feet in depth, such hoists shall also be provided with overspeed devices.

13. It is proposed to add a new mandatory standard 57.19–13, as follows:

57.19–13 *Mandatory—MNMSAC.*—Where any diesel or similar fuel-injection engine is used to power a hoist, the engine shall be equipped with a damper or other cutoff in its air intake system. The control handle shall be clearly labeled to indicate that its intended function is for emergency stopping only.

14. It is proposed to revise mandatory standard 57.19–24, promulgated on February 25, 1970 (35 FR 3676), as follows:

57.19–24 *Mandatory—MNMSAC.*—The rope shall be attached to the load by the thimble-and-clip method, the socketing method, or other approved method. If the socketing method is employed, zinc or its equivalent shall be used. The use of Babbit metal or lead for socketing wire rope is prohibited. If the thimble-and-clip method is used, the following shall be observed:

(a) The rope shall be attached to the load by passing one end around an oval thimble

V 38-167 AUG 29 73 XUM

that is attached to the load bending the end back so that it is parallel to the long or "live" end of the rope and fastening the two parts of the rope together with clips.

(b) The U-bolt of each clip shall encircle the short or "deadend" of the rope, and the distance between clips shall comply with the figures in the accompanying table.

(c) The following number of clips and clip nut torques shall be used for right regular or lang lay wire rope, 6 x 19 class or 6 x 37 class, fiber core or independent wire rope core (IWRC):

(Follow manufacturer's recommendations for other kinds of wire rope and clips.)

Wire rope diameter (inches)	Minimum number of clips	Spacing of clips (inches)	Torque required (ft-lbs)	
			U-bolt	Fist grip
1/4	3	2	6	20
5/16	3	2 1/4	12	20
3/8	3	2 1/2	20	35
7/16	3	2 3/4	30	65
1/2	3	3	50	65
9/16	3	3 1/2	75	125
5/8	4	3 1/4	75	125
3/4	4	4 1/2	130	220
7/8	4	5 1/4	225	220
1	5	6	250	220
1 1/8	6	6 3/4	250	300
1 1/4	6	7 1/2	300	360
1 3/8	7	8 1/4	300	500
1 1/2	7	9	300	500
1 5/8	7	9 3/4	430	
1 3/4	7	10 1/2	490	
1 7/8	8	11 1/4	750	
2	8	12	750	
2 1/8	8	13	750	
2 1/4	8	14	750	

(d) Apply the initial load and retighten clip nuts to the recommended torque.

(e) When special conditions require the attachment of a sling to the hoisting cable to handle equipment in the shaft, the sling shall be attached by clips or equivalent in accordance with the table in paragraph (c) of this standard.

15. It is proposed to revise advisory standard 57.19–26, promulgated on July 31, 1969 (34 FR 12524), and to make it mandatory, as follows:

57.19–26 *Mandatory — MNMSAC.*—Safety device attachments to hoist ropes shall be selected, installed, and maintained according to manufacturers' specifications to minimize internal corrosion and weakening of the hoist rope.

16. It is proposed to add a new standard 57.19–109 as follows:

57.19–109 *Mandatory — MNMSAC.*—Shaft inspection and repair work in vertical shafts shall be performed from substantial platforms equipped with bonnets or equivalent overhead protection.

17. It is proposed to add a new standard 57.19–129 as follows:

57.19–29 *Mandatory — MNMSAC.*—Hoistmen shall examine their hoists and shall test overtravel, deadman controls, position indicators, and braking mechanisms at the beginning of each shift.

Would you like to know WHAT CHANGES HAVE BEEN MADE IN CERTAIN TITLES OF THE CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "List of CFR Sections Affected."

?

List of CFR Sections Affected — $5.00 per year

The "List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Also available on a subscription basis . . .

The Federal Register Subject Index — $3.00 per year

Subject Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies, with the most significant subjects additionally carried in appropriate alphabetical position.

A finding aid is included at the end of each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Order from: Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

Note to FR Subscribers: FR Subject Indexes and the "List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

FOREST PROTECTION—USDA makes environmental violations grounds for cancellation of timber contracts; effective 9–10–73 23403

PESTICIDES—
EPA approves tolerances for chemicals to be used on agricultural commodities (3 documents); effective 8–30–73 ..... 23403, 23404
EPA reextends temporary tolerance for methomyl .. 23437

PUBLIC DISCLOSURE OF INFORMATION—
SBA proposal on release of agency records and information; comments by 10–1–73 23422
Labor Dept. proposes release of safety inspection results; comments by 10–1–73 23413

FARMERS HOME INSURANCE—USDA proposes procedures for loss, theft, mutilation, destruction or defacement of documents; comments by 9–7–73 23412

RAILROAD SAFETY—DoT conditions for speeds over 110 m.p.h.; effective 10–1–73 23405

CARGO SECURITY—DoT proposes procedures on shipper accountability for goods in transit; comments by 10–19–73 23419

NURSING STUDENT LOANS—HEW proposes guidelines; comments by 10–1–73 23414

(Continued inside)

PART II:

INDUSTRIAL SLINGS—Labor Dept. proposes revised safety standards and inspection procedures; comments by 10–26–73 23489

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Consumer Product Safety Commission

Part 213 is amended to show that one position of Special Assistant for External Affairs and one position of Special Assistant for Internal Affairs to each member of the Commission are excepted under Schedule C.

Effective on Aug. 30, 1973, paragraphs (b) and (c) are added to § 213.3360 as set out below.

§ 213.3360 Consumer Product Safety Commission.

* * * * *

(b) One Special Assistant for External Affairs to each member of the Commission.

(c) One Special Assistant for Internal Affairs to each member of the Commission.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Regulation 447]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation fixes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period Aug. 31–Sept. 6, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 908. The quantity of Valencia oranges so fixed was arrived at after consideration of the total available supply of Valencia oranges, the quantity of Valencia oranges currently available for market, the fresh market demand for Valencia oranges, Valencia orange prices, and the relationship of season average returns to the parity price for Valencia oranges.

§ 908.747 Valencia Orange Regulation 447.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Valencia oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the respective quantities of Valencia oranges that may be marketed from District 1, District 2, and District 3 during the ensuing week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation with respect to the quantities of Valencia oranges that should be marketed during the next succeeding week. Such recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors enumerated in the order. The committee further reports that the fresh market demand for Valencia oranges is weak. Prices f.o.b. averaged $3.28 per carton on a sales volume of 464 carlots during the week ended August 23, 1973, compared with $3.41 per carton on sales of 517 carlots a week earlier. Track and rolling supplies at 327 cars were up 32 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the respective quantities of Valencia oranges which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Valencia oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Valencia oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the ef-

V 38-168 AUG 30 73 XUM

fective date hereof. Such committee meeting was held on August 28, 1973.

(b) *Order.* (1) The respective quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period August 31, 1973, through September 6, 1973, are hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 450,000 cartons;

(iii) District 3: Unlimited movement.

(2) As used in this section,"handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 29, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73–18618 Filed 8–28–73;11:19 am]

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regs., 1973-Crop Rice Supplement, Amendment 2]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1973-Crop Rice Loan and Purchase Program

Correction

In FR Doc. 73–17315 appearing on page 22466 of the issue of Tuesday, August 21, 1973, in the third line of the authority citation to § 1421.328 the reference to "61 Stat. 1051" should be "62 Stat. 1051."

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Airspace Docket No. 73–SO–32]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of VOR Federal Airways

On June 26, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 16786) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 71 of the Federal Aviation Regulations that would realign V–198 between Brookley, Ala., and Crestview, Fla., and extend V–241 from Mobile, Ala., to Crestview, Fla.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., November 8, 1973, as hereinafter set forth.

Section 71.123 (38 FR 307, 9488) is amended as follows:

1. In V–198 "Brookley; 6 miles wide Navy Saufley, Fla.; 6 miles wide INT Navy Saufley 047° and Crestview, Fla., 251° radials; 6 miles wide Crestview;" is deleted and "Brookley; INT Brookley 056° and Crestview 266° radials; Crestview;" is substituted therefor.

2. In V–241 "From Crestview, Fla.," is deleted and "From Mobile, Ala., via Crestview, Fla.;" is substituted therefor.

(Sec. 307(a); Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c); Department of Transportation Act (49 U.S.C. 1655(c).)

Issued in Washington, D.C., on August 23, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc 73–18373 Filed 8–29–73;8:45 am]

[Airspace Docket No. 73–GL–26]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On Page 16239 of the FEDERAL REGISTER dated June 21, 1973, the FAA published a notice of proposed rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation regulations so as to alter the transition area at Madison, Wisconsin.

Interested persons were given 30 days to submit written comments, objections, and data concerning the proposed amendment. Two comments were received. The Air Transport Association concurred with the proposal. The Wisconsin Division of Aeronautics objected to the circular description of the transition area. An eleven-mile radius of the airport and four extensions in the direction of the final approach courses are required to protect the procedure. The Wisconsin Division of Aeronautics believes it would be advantageous to designate only the required extensions which would delete a few small airports from the transition area. Accordingly, the proposed amendment is hereby adopted subject to the paragraph change enclosed.

This amendment shall be effective October 11, 1973.

In § 71.181 (38 FR 435), the following transition area is amended to read:

MADISON, WISC.

That airspace extending upward from 700 feet above the surface within an 11-mile radius of the Truax Airport (latitude 43°08'21" N., longitude 89°20'17" W.); within 3 miles each side of the 181° bearing from the airport extending from the 11-mile radius area to 16 miles south of the airport; within 3 miles each side of the 315° bearing from the airport extending from the 11-mile radius area to 15.5 miles NW of the airport; within 3 miles each side of the 001° bearing from the airport extending from the 11-mile radius area to 17 miles N of the airport; and within 3.5 miles each side of the 135° bearing from the airport extending from the 11-mile radius area to 17.5 miles SE of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Des Plaines, Illinois, on August 6, 1973.

R. O. ZIEGLER,
Acting Director, Great Lakes Region.

[FR Doc.73–18360 Filed 8–29–73;8:45 am]

[Airspace Docket No. 73–EA–72]

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

The purpose of this amendment to Part 73 of the Federal Aviation regulations is to change the times and dates for Restricted Area R–5802, Indianatown Gap, Pa.

A review was made of the utilization of R–5802 and it was found that the number of hours designated for its use could be reduced. The revised times and dates represent an overall reduction in hours of approximately 2,500 hours annually.

Since this amendment releases airspace back to the aviation user and it is a minor amendment upon which the public would have no particular reason to comment, notice and public procedure thereon are deemed unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective on November 8, 1973.

In consideration of the foregoing, Part 73 of the Federal Aviation regulations is amended, effective 0901 G.m.t., November 8, 1973, as hereinafter set forth.

In § 73.58 (38 FR 667) the time of designation for Restricted Area R–5802, Indiantown Gap, Pa., is amended to read as follows:

Time of designation. 0800–2300 hours local time, Saturdays, February 15 through May 10; 0800–1200 hours local time, Sundays, February 15 through May 10; 0800–2000 hours local time, May 11 through August 31; 0800–2300 hours local time, Saturdays, September 1 through December 15; 0800–1200 hours local time, Sundays, September 1 through December 15. Other times by Notice to Airmen, issued at least 48 hours in advance.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Washington, D.C., on August 23, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73–18371 Filed 8–29–73;8:45 am]

[Airspace Docket No. 73–EA–44]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of Jet Routes

On July 2, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 17510) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 75 of the Federal Aviation Regulations that would redesignate a segment of J–55 between Sea Isle, N.J., and Kennebunk, Maine, and would also redesignate the segment of J–581 southwest of Kennebunk to extend from Kennedy, N.Y., rather than Hampton, N.Y.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 75 of the Federal Aviation regulations is amended, effective 0901 G.m.t., November 8, 1973, as hereinafter set forth.

Section 75.100 (38 FR 681) is amended as follows:

a. In J–55 "Sea Isle; INT Sea Isle 040° and Putnam, Conn., 217° radials; Putnam; Kennebunk, Maine;" is deleted and "Sea Isle; INT Sea Isle 050° and Hampton, N.Y., 223° radials; Hampton; Providence, R.I.; Boston, Mass.; Kennebunk, Maine;" is substituted therefor.

b. J–581 is amended to read as follows:

Jet Route No. 581 From Kennedy, N.Y., via INT of Kennedy 042° and Putnam, Conn., 236° radials; Putnam; Kennebunk, Maine; Bangor, Maine, to the INT of the Bangor 058° radial and the United States/Canadian border.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)))

Issued in Washington, D.C., on August 23, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73–18372 Filed 8–29–73;8:45 am]

[Airspace Docket No. 73–WA–19]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Alteration of RNAV Routes and Waypoints

On June 13, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 15525) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 75 of the Federal Aviation Regulations that would alter several RNAV routes and waypoints and revoke those routes and waypoints deemed unnecessary.

Interested persons were afforded an opportunity to participate in the proposed rulemaking through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 75 of the Federal Aviation Regulations is amended, effective 0901 G.M.T., November 8, 1973, as hereinafter set forth.

Section 75.400 (38 FR 700, 1635, 3589, and 37 FR 26003) is amended as follows:

1. In J–800R (New York, N.Y., to Los Angelcs, Calif.), "Kansas City, Mo, VORTAC, 39°16'46" N., 94°35'28" W., Kansas City, MO, Culver, Kans., 38°51'-00" N., 97°43'31" W., Wichita, Kans." is deleted and "Walcott, Kans., 39°13'06" N., 94°59'28" W., Butler, Mo.; Enterprise, Kans., 38°58'04" N., 96°59'46" W., Wichita, Kans.; Cedar Bluff, Kans., 38°-29'43" N., 100°00'41" W., Garden City, Kans." is substituted therefor.

2. In J–801R (Los Angeles, Calif., to New York, N.Y.), "Rosemont, Colo., 38°-46'01" N., 104°51'03" W., Pueblo, Colo." is deleted and "Goldfield, Colo., 38°42'-44" N., 105°05'24" W., Pueblo, Colo." is substituted therefor.

3. In J–815R (Washington, D.C., to Atlanta, Ga.), J–815R is amended as follows: Casanova, Va., 38°38'28" N., 77°-51'57" W., Gordonsville, Va.; Copper Valley, Va., 36°52'22" N., 80°35'26" W., Greensboro, N.C.; Shining Rock, S.C., 35°18'05" N., 83°02'00" W., Spartanburg, S.C.; Lanier, Ga., 34°19'21" N., 83°40'53" W., Spartanburg, S.C.

4. J–825R (Chicago, Ill., to St. Louis, Mo.) is deleted.

5. In J–842R (Dallas, Tex., to New York, N.Y.), "Watertown, TN., 36°13'-46' N., 86°06'27" W., Bowling Green, KY." is deleted and "Elmwood, Tenn., 36°19'34" N., 85°50'29" W., Nashville, Tenn." is substituted therefor.

6. In J–863R (New York, N.Y., to Atlanta, Ga.), "Rapidan, Va., 38°08'14" N., 77°50'37" W., Richmond, Va." is deleted and "Gordonsville, Va., 38°00'48" N., 78°09'12" W., Richmond, Va.; Galax, Va., 36°28'30" N., 80°34'05" W., Greensboro, N.C." is substituted therefor.

7. J–868R (Kansas City, Mo., to St. Louis, Mo.), is deleted.

8. In J–879R (Cleveland, Ohio, to Atlanta, Ga.), "Crabtree, N.C., 35°54'52" N., 82°58'18" W., Spartanburg, S.C." is deleted and "Rader, Tenn., 36°06'51" N., 82°59'07" W., Knoxville, Tenn." is substituted therefor.

9. In J–885R (St. Louis, Mo., to Memphis, Tenn.), "St. Louis, MO., 38°51'38" N., 90°28'56" W., Centralia, IL." is deleted and "Festus, MO., 38°12'05" N., 90°21'00" W., Centralia, Ill." is substituted therefor.

10. J–895R (Atlanta, Ga., to New York, N.Y.) is deleted.

11. In J–923R (Albuquerque, N. Mex., to Denver, Colo.), "Terryal, CO., 38°32'-20" N., 105°10'50" W., Pueblo, CO." is deleted and "Goldfield, Colo., 38°42'44" N., 105°05'24" W., Pueblo, Colo." is substituted therefor.

12. In J–927R (Chicago, Ill., to Dallas, Tex.), "Roberts, IL., 40°34'54" N., 88°-09'51" W., Capital, IL." is deleted and "Roberts, Ill., 40°34'54" N., 88°09'51" W., Capital, Ill.; Marine, Ill., 38°43'46" N., 89°51'54" W., Capital, Ill." is substituted therefor.

13. In J–929R (Atlanta, Ga., to Houston, Tex.), "Birmingham, AL., 33°40'12" N., 86°53'59" W., Montgomery, AL." is deleted.

14. In J–936R (Phoenix, Ariz., to Chicago, Ill.), "Holcomb, KS., 38°08'16" N., 100°52'42" W., Garden City, KS." is deleted and "Cedar Bluff, Kans., 38°29'43" N., 100°10'41" W., Garden City, Kans." is substituted therefor.

15. In J–952R (New York, N.Y., to Houston, Tex.), "Mt. Mitchell, N.C., 35°-52'49" N., 82°34'35" W., Spartanburg, S.C." is deleted and "Beech Mountain, N.C., 36°05'30" N., 82°04'58" W., Spartanburg, S.C." is substituted therefor.

16. In J–953R (New Orleans, La., to New York, N.Y.), "Texas, Ga., 33°02'35" N., 85°12'27" W., Montgomery, AL.; Kenwood, Ga., 33°32'59" N., 84°28'37" W., Macon, Ga.; Gramling, Ga., 35°04'-19" N., 82°11'18" W., Columbia, S.C.; Sand River, Va., 36°42'42" N., 79°32'36" W., Raleigh-Durham, N.C." is deleted and "Stone Mountain, Ga., 33°39'00" N., 84°01'00" W., Macon, Ga.; Gramling, S.C., 34°57'15" N., 82°06'05" W., Columbia, S.C.; Semora, N.C., 36°31'24" N., 79°25'48" W., Raleigh-Durham, N.C." is substituted therefor.

17. In J–956 (Memphis, Tenn., to Chicago, Ill.), "Memphis, TN., 34°56'34" N., 89°57'35" W., Walnut Ridge, AZ." is deleted and "Memphis, Tenn., 34°56'34" N., 89°57'35" W., Walnut Ridge, Ariz.; Marine, Ill., 38°43'46" N., 89°51'54" W., Capital, Ill." is substituted therefor.

18. In J–958R (Washington, D.C., to Jacksonville, Fla.), "Gordonsville, Va., 38°00'48" N., 78°09'12" W., Richmond, Va." is deleted and "Flat Rock, Va., 37°-31'42" N., 77°49'43" W., Richmond, Va." is substituted therefor.

19. In J–991R (Minneapolis, Minn., to Greater Southwest, Tex.), "Woolstock, IA., 42°34'21" N., 93°42'55" W., Fort Dodge, IA.; Lawson, Mo., 39°30'13" N., 94°05'16" W., Lamoni, IA.; Redfield, MO., 37°53'19" N., 94°56'19" W., Springfield, MO." is deleted and "Kamrar, Iowa, 42°25'45" N., 93°43'56" W., Fort Dodge, Iowa; Kansas City, Mo., 39°16'-46" N., 94°35'28" W., Kansas City, Mo." is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on August 22, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[Docket No. 1316; Amdt. 879]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

This amendment to Part 97 of the Federal Aviation regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAP's) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAP's for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260–3, 8260–4, or 8260–5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97–696 (35 FR 5609).

SIAP's are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation

V 38-168 AUG 30 73 XUM

Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Copies of SIAP's adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAP's may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue SW., Washington, D.C. 20591, or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending or canceling the following VOR-VOR/DME SIAPs *effective October 11, 1973.*

Chattanooga, Tenn.—Lovell Field, VOR Runway 32, Amdt. 10.
Crestview, Fla.—Bob Sikes Airport, VOR-A (TAC), Amdt. 5.
Durango, Colo.—Durango-La Plata County Airport, VOR-A, Amdt. 1.
Durango, Colo.—Durango-La Plata County Airport, VOR Runway 2, Amdt. 2.
East St. Louis, Ill.—Bi-State Parks Airport, VOR/DME-A, Amdt. 1.
Elko, Nev.—Elko Municipal Airport, VOR/DME A, Original, canceled.
Elko, Nev.—Elko Municipal Airport, VOR/DME B, Original.
Forest City, Iowa—Forest City Municipal Airport, VOR/DME-A, Original.

CHAPTER II—CIVIL AERONAUTICS BOARD

PART 241—UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Deletion of Schedule D–1 and Elimination of Paid Positioning Flight Data on Schedule P–2 of CAB Form 41

As part of our policy of continuous review of recurrent reports and specific data required of air carriers, the Board has determined that the data currently reported on Schedule D–1—Services Performed for the Defense Establishment and certain information relating the paid positioning flights reflected on Schedule P–2—Notes to Income Statement are no longer necessary to meet our regulatory needs. Accordingly, it is believed desirable to reduce the carrier reporting requirements in the following respects:

1. Schedule D–1, containing information concerning services performed for the defense establishment, will be eliminated. This Schedule is no longer needed since all necessary information concerning operations for the defense establishment is reported under Part 243 of the Board's Economic Regulations which adequately accommodates our needs.

2. The requirement of reporting information relating to paid positioning flights, which includes the airborne hours, aircraft departures and miles of civilian and military charters, will be eliminated from Schedule P–2. Data on paid positioning flights are included in the revenue traffic statistics on the CAB Form 41 traffic schedules, and shall continue to be separately disclosed on Schedule T–41. If it is later determined that there is a need for additional details concerning paid positioning flights, the Board can request the data on an ad hoc basis.

Since this amendment reduces present reporting requirements, the Board finds that notice and public procedure hereon are not required and the rule may be made effective immediately.

Accordingly, the Civil Aeronautics Board hereby amends Part 241 of its Economic Regulations (14 CFR Part 241), effective August 24, 1973, as follows:

1. By revising section 21—Introduction to System of Reports by amending paragraphs (b), (d), and (k) to read as set forth below:

Section 21 Introduction to System of Report.

• • • • • •

(b) The system prescribed provides for the submission by each air carrier of five classes of financial and operating statistics, on individual schedules of the CAB Form 41 report, grouped as follows:

A. Certification.
B. Balance Sheet Elements.
P. Profit and Loss Elements.
T. Traffic and Capacity Elements.
G. General Corporate Elements.

• • • • • •

(d) Each schedule of the prescribed CAB Form 41 report has been assigned a specific code. The prefix alphabetical codes A, B, P, T, and G, respectively, have been employed to denote certification, balance sheet, profit and loss, traffic and capacity, and general corporate elements. The digits immediately following the alphabetical prefix designate the particular schedule.

• • • • • •

(k) Generally, nonscheduled services shall be treated as an integral part of the reporting entity to which most closely related without regard to the geographic area in which such nonscheduled services may actually be performed. However, supplemental reports shall be made of nonscheduled services (including service for the Department of Defense) in areas not encompassed by the prescribed reporting entity in any month in which the available ton-miles of such nonscheduled services exceed 5 percent of the available ton-miles of the reporting entity. Such supplemental reports shall continue until waived by the Board upon a showing that such nonscheduled operations will not in the subsequent 12-month period exceed the 5-percent limit. The supplemental reports to be filed each month or calendar quarter, as applicable, shall be comprised of report Schedules P–5, T–1, and T–2. Transport and nontransport revenues pertaining to such separately reported nonscheduled services shall be reflected on Schedule P–2 each quarter with appropriate cross-references inserted on Schedules P–3 and P–4, as applicable.

• • • • • •

2. By amending paragraph (a) of section 22—General Reporting Instructions as follows:

A. By deleting from the list of schedules in paragraph (a) the following line:

Section 22 General Reporting Instructions.

(a) • • •

D–1	Services Performed for the Defense Establishment---------- Quarterly

• • • • • •

B. By deleting Schedule D–1 under the due dates of February 10, May 10, August 10, and November 10 from the due date list of schedules.

Section 24 [Amended]

3. By deleting paragraph (g) to Schedule P–2 from section 24—Profit and Loss Elements.

Section 27 [Deleted]

4. By deleting section 27—National Defense Elements.

(Secs. 204(a) and 407 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 766; 49 U.S.C. 1324, 1377.)

By the Civil Aeronautics Board.

Effective August 24, 1973.

Adopted August 24, 1973.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—PROCEDURES AND RULES OF PRACTICE

PART 4—MISCELLANEOUS RULES

Service

The Commission announces the following amendments to Chapter I of Title 16 of the Code of Federal Regulations: These amendments are effective on August 30, 1973.

Section 4.4(a)(1)(i), (a)(3) and (c)(4) are revised to read as follows:

§ 4.4 Service.

(a)(1) • • •

(i) *By registered or certified mail.*—A copy of the document shall be addressed to the person, partnership, corporation or unincorporated association to be served at his, her or its residence or principal office or place of business, registered or certified, and mailed; or

• • • • • •

(3) All other documents may be similarly served, or they may be served by ordinary first-class mail.

• • • • • •

(c) • • •

(4) The return post office receipt for a document registered or certified and mailed, or the verified return or certificate by the person serving the document by personal delivery or ordinary mail, setting forth the manner of said service, shall be proof of the service of the document.

(Sec. 6, 38 Stat. 721, 74 Stat. 200; 15 U.S.C. 45(f).)

By direction of the Commission dated August 23, 1973.

[SEAL] CHARLES A. TOBIN,
Secretary.

To enforce or bring about resale price maintenance; § 13.450 *To limit distribution or dealing to regular, established or acceptable channels or classes;* Subpart—Cutting off access to customers or market: § 13.535 *Contracts restricting customers' handling of competing products;* § 13.560 *Interfering with distributive outlets;* Subpart—Cutting off supplies or service: § 13.610 *Cutting off supplies or service;* § 13.655 *Threatening disciplinary action or otherwise;* Subpart—Maintaining resale prices: § 13.1025 *Maintaining resale prices;* § 13.1130 *Contracts and agreements;* § 13.1140 *Cutting off supplies;* § 13.1145 *Discrimination;* 13.1145–5 Against price cutters 13.1145–20 Distributive channels and outlets generally; § 13.1155 *Price schedules and announcements;* 13.1160 Refusal to sell.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46); Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45).) [Cease and desist order, Adolph Coors Company, Golden, Colorado, Docket 8845, July 24, 1973.]

In the matter of Adolph Coors Company, a corporation.

Order requiring a Golden, Colorado, brewery, among other things to cease illegally restraining competition by fixing prices, imposing territorial and customer restriction upon its distributors, and using unfair short-term termination provisions in its contracts with distributors.

The order to cease and desist, including further order requiring report of compliance therewith, is as follows:

It is ordered, That respondent Adolph Coors Company and its subsidiaries, successors, assigns, officers, directors, agents, representatives and employees, individually or in concert with others, directly or indirectly, or through any corporate or other device, in connection with the brewing, distribution, offering for sale or sale of beer in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Entering into, maintaining or enforcing any contract, agreement, combination, understanding or course of conduct which has as its purpose or effect the fixing, maintaining, establishing or setting of the prices at which distributors sell Coors beer to retailers or the prices at which retailers sell Coors beer to consumers.

2. Publishing, disseminating or providing any price list or other document indicating suggested or mandatory prices for the sale of Coors beer by any distributor to any retailer or any price list or other document indicating suggested or mandatory prices for the sale of Coors beer by any retailer to any consumer.

Provided, however, That nothing contained in this paragraph of the Order shall prohibit respondent from complying with the requirements of any state law, provided that when respondent purports to be complying with the state law regarding price suggestions, respondent will specifically advise the Commission of the statute and all court decisions and administrative agency decisions and rulings interpreting said statute pursuant to which it is purporting to act.

3. Publishing, disseminating or providing to any distributor or any retailer any information or suggestions concerning what Coors may believe to be an appropriate or proper mark-up or profit for Coors beer when the distributor sells to the retailer or when the retailer sells to the consumer or a mark-up or profit below which the distributor or retailer is advised not to sell Coors beer.

Provided, however, That nothing contained in paragraphs two (2) and three (3) of the Order shall prohibit respondent from publishing, disseminating, or providing any price list or other document indicating suggested prices for the sale of Coors beer or suggested markups or profits for Coors beer after three years from the effective date of this Order. Two years following the effective date of this Order respondent may petition the Commission, upon a showing that competition in the resale of its products has been restored, to be permitted to publish, disseminate or provide suggested prices, markups, and profits as set forth in this proviso.

4. Refusing to sell beer to any Coors distributor or terminating or threatening to terminate any Coors distributor because:

A. the distributor has in the past or might in the future sell Coors beer at prices, markups, or profits different from those approved or recommended by respondent;

B. one or more of the distributor's customers sold Coors beer or advertised Coors beer for sale at prices, markups, or profits different from those approved or recommended by respondent;

C. the Coors distributor sold Coors beer to another distributor or to a retailer whose business is located outside of the territory granted to the distributor; or

D. the Coors distributor distributes, has distributed, or proposes to distribute in the future the product of another brewer.

5. Entering into, maintaining or enforcing any contract, agreement, combination, understanding or course of conduct to fix, establish, limit or restrict the territory in which or the persons to whom a distributor may sell Coors beer.

Provided, however, That nothing contained in this paragraph of the Order shall prohibit respondent from complying with the requirements of any state law, provided that when respondent purports to be complying with a state law requiring the restriction of territories or customers, respondent will specifically advise the Commission of the statute and all court decisions and administrative agency decisions and rulings interpreting said statute pursuant to which it is purporting to act.

6. Allocating Coors beer among its distributors in times of beer shortage at the Coors brewery, by any means other than by allocating shares to distributors equal to their proportionate purchases of Coors beer from the brewery during the last three months before the allocation or when the distributor has not been in business for more than a year as a Coors distributor, on some other equitable basis.

7. Refusing to deliver all of a distributor's order because the distributor has made sales to customers outside of the territory granted the distributor or because the distributor or the distributor's customer is selling Coors beer at prices, markups or profits lower than those approved by respondent.

8. Prohibiting its distributors from selling for central warehouse delivery; provided, however, that respondent can establish refrigeration standards for the central warehouse which are substantially similar to those established for distributors and can require its distributors to be responsible, directly or indirectly, for maintenance of such refrigeration standards and for rotation of Coors beer in the central warehouse and at the retail delivery locations where the beer is redelivered from the central warehouse, if respondent changes its container dating system so that the retailer and the consumer will recognize the date without reference to a code or measuring stick.

9. Entering into, maintaining or enforcing any contract, agreement, combination, understanding or course of conduct with its distributors which has as its purpose or effect requiring that retailers serve Coors draft beer as their only light-colored draft beer.

10. Entering into, maintaining, or enforcing any contract, agreement or understanding, or taking any action or course of conduct with any of its distributors which has as its purpose or effect the requirement that the distributor eliminate, or refrain from obtaining and handling rival brands of beer in order to become or remain a Coors distributor.

11. Hindering, suppressing or eliminating competition or attempting to hinder, suppress or eliminate competition between or among distributors or between or among retailers handling Coors beer.

12. Canceling any distributor agreement unless and until the respondent has pursued the following procedure:

A. Cancellation With Cause

(a) Respondent has given the distributor sixty days' notice of respondent's intention to cancel its agreement with the distributor;

(b) Said notice, referred to in (a) above, will include in writing an assurance that the contract is being terminated in good faith and for material violation of one or more contract provisions which are relevant to the effective operation of the franchise. Said notice shall further provide a list of the specific reasons for which the franchise is being terminated;

(c) Said notice will include the assurance that the distributor may sell his interest to a third party during the sixty days, subject to the respondent's approval of the buyer as a satisfactory distributor of respondent's products and the further assurance that approval will not be unreasonably withheld;

(d) Said notice will also include the statement that the distributor has the right to have the contract cancellation reviewed in an arbitration proceeding as hereinafter provided, to ascertain whether the termination has been made otherwise than in good faith and otherwise than for material violation of one or more contract provisions which are relevant to the effective operation of the franchise.

B. Cancellation Without Cause

(a) Respondent has given the distributor one hundred and eighty days' notice of respondent's intention to cancel its agreement with the distributor;

(b) Said notice, referred to in (a) above, will include in writing an assurance that the contract is being terminated in good faith. Said notice shall further provide a list of the specific reasons for which the franchise is being terminated.

(c) Said notice will include the assurance that the distributor may sell his interest to a third party during the one hundred and eighty days subject to the respondent's approval of the buyer as a satisfactory distributor of respondent's products, and the further assurance that approval will not be unreasonably withheld;

(d) Said notice will also include the statement that the distributor has the right to have the contract cancellation reviewed in an arbitration proceeding as hereinafter provided to ascertain whether the termination has been made otherwise than in good faith.

13. *It is further ordered,* That respondent, within three (3) months from the date this Order becomes final, shall provide for arbitration, in the city in which a distributor resides, by an independent and neutral arbitrator, to determine in the case of any announced termination, and upon the request of a distributor, whether or not said termination is made in good faith (in the case of termination without cause) or whether or not said termination is made in good faith and for material violation of one or more contract provisions which are relevant to the effective operation of the franchise (in the case of termination with cause). The arbitrator shall find that a cancellation of any distributor agreement is not made in good faith if the arbitrator finds that the termination would constitute a violation of the antitrust laws or this Order.

Said arbitration shall be initiated by respondent within fifteen (15) days from the date of a request by the distributor, which request shall be made not later than fifteen (15) days after notice of proposed cancellation. If respondent fails to provide for arbitration within the time limit, or if the arbitrator finds that cancellation is not proposed in good faith (and for material violation of one or more contract provisions relevant to the effective operation of the franchise in the case of termination for cause), respondent shall reinstate the distributor at the location he held prior to cancellation and shall allow the distributor to reenter into a distributor agreement.

All costs of arbitration, except for the distributor's attorney's fees, shall be borne by respondent, provided, however, that if in the course of the arbitration proceeding it is determined by the arbitrator that the distributor's claims are not brought in good faith, the distributor shall bear the costs of arbitration other than respondent's attorney's fees. The distributor's right to arbitration shall be conspicuously noted in all present and future distributor agreements.

It is further ordered, That respondent corporation shall forthwith distribute a copy of this Order to each of its operating divisions, to its present and future sales representatives, to its present and future distributors.

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the Order.

In the event that respondent proposes a change in the corporate respondent, as set forth above, respondent shall require said successor or transferee to file, with the Commission, at the time of respondent's notification, a written agreement to be bound by the terms of this Order; *Provided,* that if respondent wishes to present to the Commission any reasons why said Order should not apply in its present form to said successor or transferee, respondent shall submit to the Commission a written statement setting forth said reasons at least sixty (60) days prior to the consummation of said succession or transfer.

It is further ordered, That respondent herein shall, within sixty (60) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

By the Commission. The matter was argued before Commissioner Thompson was sworn in. Therefore, he elected not to participate.

Issued July 24, 1973.

PART 13—PROHIBITED TRADE PRACTICES

Resort Car Rental System, Inc., et al.

Subpart—Advertising falsely or misleadingly: § 13.155 Prices; 13.155–5 Additional charges unmentioned; 13.155–95 Terms and conditions; Subpart—Misrepresenting oneself and goods—Prices: § 13.1778 *Additional charges unmentioned;* § 13.1823 *Terms and conditions;* Subpart—Securing signatures wrongfully: § 13.2176 Written agreements and/or contract [1] Subpart—Using misleading name—Vendor: § 13.2425 Nature, in general.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46); Interprets or applies sec. 5, 38 Stat. 719, as amended, (15 U.S.C. 45).) [Cease and desist order, Resort Car Rental System, Inc., et al., Las Vegas, Nevada, Docket 8862, July 31, 1973.]

In the matter of Resort Car Rental System, Inc., Brooks Rent-A-Car, Inc., Brooks Dollar-A-Day Rent-A-Car, Inc., Metropolitan Leasing, Inc., Bell Rent-A-Car, Inc., and Irving Bell, individually and as an officer of said corporations.

Order requiring a Las Vegas, Nevada, automobile rental agency and several other agencies located in the Southwest, among other things to cease misrepresenting any price, fee, or amount imposed for rental of a motor vehicle; misrepresenting any method of computation of such charges; and using any misleading trade or corporate name. Order also dismisses complaint as to one corporate respondent.

The order to cease and desist, including further order requiring report of compliance therewith, is as follow:

It is ordered:

(1) That the initial decision be, and it hereby is, adopted as the decision of the Commission;

(2) That the appeal of respondents be, and it hereby is, denied; and that the appeal of complaint counsel be, and it hereby is, denied;

(3) That the following order be and hereby is entered:

It is ordered, That the respondents Resort Car Rental System, Inc., Brooks Rent-A-Car, Inc., Brooks Dollar-A-Day Rent-A-Car, Inc., and Metropolitan Leasing, Inc., corporations, trading under the above trade or corporate names or under any other trade or corporate name or names, their respective successors and assigns and their respective officers, and Irvin Bell, individually and as an officer of said corporations (hereinafter referred to as "respondents") and respondents' agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, renting, or offering for rent of motor vehicles, in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication, any price, fee, or amount which is imposed for rental of a motor vehicle unless such price, fee, or amount includes all charges or conditions which are imposed for or on rental of such vehicle at such price, fee, or amount.

The term "charges or conditions" means any charge or condition necessary to the rental of a motor vehicle, which

[1] New.

V 38-168 AUG 30 73 XUM

is not strictly at the option of the person renting the vehicle. Examples of such charges and conditions are:

a. A daily or other periodic charge;

b. A cents per mile charge;

c. A minimum charge at the cents-per-mile charge, whether or not the miles are actually driven;

d. A charge for gasoline, oil, and repairs if such are not included in (a) or (b) above;

e. Any charge for insurance.

Provided, however, That

(i) (a) and (b) above may be stated separately from each other if there is no other charge or condition, and if (a) and (b) are in equally large type and in close proximity to each other;

(ii) Any charge made for collision insurance must be included in said representation if such insurance charge is not strictly at the option of the person renting the vehicle; a charge for collision insurance shall not be deemed to be "strictly at the option of the person renting the vehicle" if any evidence of other insurance must be provided to respondents in order not to purchase said collision insurance;

(iii) The coverage of collision insurance, whether optional, mandatory, or included in the rental agreement price, shall be clearly described in the rental agreement.

2. Misrepresenting, in any manner, any method of computation of a charge, charge, or condition imposed for rental of a motor vehicle.

3. Using any title, corporate name, trade name, or other designation (including but not limited to "Dollar-A-Day") which represents, directly or by implication, any price, fee, or amount which is imposed for rental of a motor vehicle, unless such representation includes all charges or conditions which are imposed for rental of such vehicle, in conformity with the requirements of Paragraph One of this order.

4. Executing or causing to be executed, any written agreement purporting to obligate a consumer to pay at that or any future time any consideration for the rental of a motor vehicle, where the language and format of the written agreement does not conform with the requirements of Paragraphs One through Three of this order. If any minimum mileage charge is imposed at the cents-per-mile charge pursuant to said agreement, said agreement shall contain the following statement in capital letters in at least eight point bold type, next to and clearly associated with that place on said agreement which provides for entry of the cents per mile rate: "NOTICE: A MINIMUM CHARGE OF (e.g., 50) MILES PER (e.g., DAY), AT THE CENTS-PER-MILE CHARGE WILL BE IMPOSED, WHETHER OR NOT THE MILES ARE ACTUALLY DRIVEN."

It is further ordered, That respondents notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondents, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That respondents shall forthwith distribute a copy of this order to each of their respective operating subsidiaries, divisions, and offices, and to each employee, present or future.

It is further ordered, That the individual respondent named herein promptly notify the Commission of the discontinuance of any of his present businesses or employment and of his affiliation with a new business or employment. Such notice shall include said respondent's current business address and a statement as to the nature of the business or employment in which he is engaged as well as a description of his duties and responsibilities.

It is further ordered, That the complaint is dismissed as to the respondent Bell Rent-A-Car, Inc., pursuant to complaint counsel's Proposed Finding 25 which has been adopted herein.

It is further ordered, That respondents Resort Car Rental System, Inc., Brooks Rent-A-Car, Inc., Brooks Dollar-A-Day Rent-A-Car, Inc., Metropolitan Leasing, Inc., and Irving Bell shall, within sixty (60) days after service of this Order upon them, file a written report with the Commission, signed by said respondents, setting forth in detail the manner and form of their compliance with the Order to Cease and Desist hereby adopted by the Commission.

By the Commission.

Issued July 31, 1973.

[SEAL] CHARLES A. TOBIN, *Secretary.*

Title 29—Labor

CHAPTER V—WAGE AND HOUR DIVISION; DEPARTMENT OF LABOR

PART 608—HANDKERCHIEF, SCARF, AND ART LINEN INDUSTRY IN PUERTO RICO

Wage Order

Pursuant to sections 5, 6, and 8 of the Fair Labor Standards Act of 1938 (52 Stat. 1062, 1064, as amended; 29 U.S.C. 205, 206, 208) and Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and by means of Administrative Order No. 625 (38 FR 9031), the Secretary of Labor appointed and convened Industry Committee No. 113–E for the Handkerchief, Scarf, and Art Linen Industry in Puerto Rico, referred to the Committee the question of the minimum rate or rates of wages to be paid under section 6(c) of the Act to employees in the industry, and gave notice of a hearing to be held by the Committee.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee has filed with the Administrator of the Wage and Hour Division of the Department of Labor a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, and 29 CFR 511.18, the recommendations of Industry Committee No. 113–E are hereby published, amending § 608.2 by revising the various classifications in the pre-1961 coverage in paragraph (a) and increasing the wage rates in paragraphs (b) and (c).

As amended § 608.2 reads as follows:

§ 608.2 Wage rates.

• • • • •

(a) *Pre-1961 coverage classifications:* The classifications for pre-1961 coverage apply to all activities in the industry to which section 6 of the Fair Labor Standards Act would have applied prior to the Fair Labor Standards Amendments of 1961.

(1) *Oblong scarves classification.* (i) The minimum wage for this classification is $1.60 an hour.

(ii) This classification is defined as all work in the handkerchief, scarf, and art linen industry in Puerto Rico on oblong scarves.

(2) *Hand-sewing on products other than oblong scarves classification.* (i) The minimum wage for this classification is 78 cents an hour.

(ii) This classification is defined as hand-sewing, hand-embroidering, hand-embellishing, ornamental stitching, and similar decorative operations on all products of the handkerchief, scarf, and art linen industry in Puerto Rico, except oblong scarves: *Provided, however,* That mending, repairing, sewing of labels, tacking, and similar operations in the industry on articles which are otherwise wholly machine-sewn shall not be included.

(3) *Other operations on products other than oblong scarves classification.* (i) The minimum wage for this classification is 85 cents an hour.

(ii) This classification is defined as all work in the handkerchief, scarf, and art linen industry in Puerto Rico, other than work described in the other classifications of the industry.

(b) *1961 coverage classification.* (1) The minimum rate for this classification is $1.60 an hour.

(2) This classification is defined as all activities in the industry which were brought within the purview of section 6 of the Fair Labor Standards Act solely by reason of the Fair Labor Standards Amendments of 1961.

(c) *1966 coverage classification.* (1) The minimum rate for this classification is $1.60 an hour.

(2) This classification is defined as all activities in the industry which were brought within the purview of section 6 of the Fair Labor Standards Act solely by reason of the Fair Labor Standards Amendments of 1966.

(Secs. 5, 6, 8, 52 Stat. 1062, 1064 as amended (29 U.S.C. 205, 206, 208))

Effective date.—This amendment shall become effective September 15, 1973.

Signed at Washington, D.C., this 23rd day of August, 1973.

WARREN D. LANDIS,
Acting Administrator, Wage and Hour Division, U.S. Department of Labor.

[FR Doc.73-18366 Filed 8-29-73;8:45 am]

PART 609—WOMEN'S AND CHILDREN'S UNDERWEAR AND WOMEN'S BLOUSE INDUSTRY IN PUERTO RICO

Wage Order

Pursuant to sections 5, 6, and 8 of the Fair Labor Standards Act of 1938 (52 Stat. 1062, 1064, as amended; 29 U.S.C. 205, 206, 208) and Reorganization Plan No. 6 of 1950 (3 CFR 1949–53 Comp., p. 1004), and by means of Administrative Order No. 625 (38 FR 9031), the Secretary of Labor appointed and convened Industry Committee No. 113–D for the Women's and Children's Underwear and Women's Blouse Industry in Puerto Rico, referred to the Committee the question of the minimum rate or rates of wages to be paid under section 6(c) of the Act to employees in the industry, and gave notice of a hearing to be held by the Committee.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee has filed with the Administrator of the Wage and Hour Division of the Department of Labor a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938, Reorganization Plan No. 6 of 1950, and 29 CFR 511.18, the recommendations of Industry Committee No. 113–D are hereby published, amending § 609.2 by combining all activities in the pre-1961 coverage classification into a single classification thereby deleting subparagraphs (1) and (2) of paragraph (a).

As amended § 609.2 reads as follows:

§ 609.2 Wage rates.

• • • • •

(a) *Pre-1961 coverage classification.* (1) The minimum rate for this classification is $1.54 an hour.

(2) This classification is defined as all activities in the industry to which section 6 of the Fair Labor Standards Act would have applied prior to the Fair Labor Standards Amendments of 1961.

• • • • •

(Secs. 5, 6, 8, 52 Stat. 1062, 1064, as amended; 29 U.S.C. 205, 206, 208).

Effective date.—This amendment shall become effective September 15, 1973.

Signed at Washington, D.C., this 23rd day of August, 1973.

WARREN D. LANDIS,
Acting Administrator, Wage and Hour Division, U.S. Department of Labor.

[FR Doc.73-18367 Filed 8-29-73;8:45 am]

Title 36—Parks, Forests, and Memorials

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 221—TIMBER

Cancellation of Contracts

On April 23, 1973, the FEDERAL REGISTER (38 FR 10010) contained a notice that the Department of Agriculture proposed to amend Part 221 of Title 36, Code of Federal Regulations by amending § 221.17, Cancellation of Contracts.

Interested parties were given 60 days to submit written comments on the proposed amendment.

Fifteen written comments were received. Based on the information available, the proposed amendment will be changed as set forth below:

1. § 221.117(a)(4) will read:

§ 221.17 Cancellation of contracts.

(a) • • •

(4) For conviction of violation of criminal statutes or for violation of civil standards, orders, permits, or other regulations for the protection of environmental quality issued by a Federal agency, state agency, or political subdivision thereof, in the conduct of operations thereunder, on National Forest land, unless compliance with such laws or regulations would preclude performance of other contractual requirements.

• • • • •

2. Add the following citation of authority:

(30 Stat. .34, 35 as amended; 16 U.S.C. 476, 551).

Accordingly, with these changes and additions, the proposed revision is adopted as set forth below.

Effective date.—This amended regulation is effective on September 10, 1973.

PAUL A. VANDER MYDE,
Assistant Secretary for Conservation, Research, and Education.

AUGUST 27, 1973.

[FR Doc.73-18435 Filed 8-29-73;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Isobutyric Acid

Two petitions (PP 3F1356 and PP 3F1371) were filed in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a).

Pesticide Petition No. 3F1356 was filed by W. R. Grace & Co., Washington Research Center, Clarksville, MD 21029, proposing establishment of a tolerance for residues of the fungicide ammonium isobutyrate in or on the raw agricultural commodity sorghum grain (intended for use as animal feed feed only) at 20,000 parts per million. Subsequently, the petitioner amended the petition to propose establishment of a tolerance for residues of isobutyric acid in sorghum grain at 17,000 parts per million resulting from postharvest application of ammonium isobutyrate; the treated grain is for use only as animal feed.

Pesticide Petition No. 3F1371 was filed by Eastman Chemical Products, Inc., subsidiary of Eastman Kodak Co., Kingsport, TN 37662, proposing establishment of (a) an exemption from the requirement of a tolerance or (b) tolerances of 15,000 parts per million for residues of the fungicide isobutyric acid in or on the raw agricultural commodities grains of barley, corn, oats, sorghum, and wheat resulting from postharvest application of isobutyric acid; the treated grain is for use only as animal feed.

Based on consideration given the data submitted in the petitions and other relevant material, it is concluded that:

1. The fungicides are useful for the purposes for which the tolerances and exemptions are proposed.

2. Levels of isobutyric acid normally occurring in eggs, meat, milk, and poultry will not be increased by the proposed uses.

3. Tolerances of 17,000 parts per million are more appropriate than either an exemption or tolerances of 15,000 parts per million for residues of isobutyric acid in or on the grains of barley, corn, oats, sorghum, and wheat from postharvest application of isobutyric acid.

4. The tolerances established by this order will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.320 is revised to read as follows:

§ 180.320 Isobutyric acid; tolerances for residues.

Tolerances are established for residues of isobutyric acid in or on raw agricultural commodities (the treated raw agricultural commodities are for use only as animal feed) from postharvest application of the fungicides ammonium isobutyrate and isobutyric acid as follows:

17,000 parts per million in or on alfalfa, Bermuda grass, brome grass, clover, fescue, lespedeza, orchard grass, sorghum grain, and timothy from postharvest application of ammonium isobutyrate.

17,000 parts per million in or on grains of barley, oats, sorghum, and wheat from postharvest application of isobutyric acid.

17,000 parts per million in or on corn grain from postharvest application of ammonium isobutyrate and/or isobutyric acid.

Any person who will be adversely affected by the foregoing order may at any

V 38-168 AUG 30 73 XUM

time on or before Oct. 1, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th and M Streets, SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on Aug. 30, 1973.

(Sec. 408(d)(2), 68 Stat. 512, (21 U.S.C. 346a(d)(2)).)

Dated August 23, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.73-18389 Filed 8-29-73;8:45 am]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Methidathion

A petition (PP 2F1229) was filed by Geigy Agricultural Chemicals (now CIBA-GEIGY Corp.), Ardsley, NY 10502, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing establishment of tolerances for residues of the insecticide *O,O*-dimethyl phosphorodithioate, *S*-ester with 4-(mercaptomethyl)-2-methoxy-Δ^2-1,3,4-thiadiazolin-5-one in or on the raw agricultural commodities grapefruit and oranges at 2 parts per million.

Based on consideration given the data submitted in the petition and other relevant material, it is concluded that:

1. The insecticide is useful for the purpose for which the tolerances are being established.

2. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

3. The tolerances established by this order will protect the public health.

4. The name methidathion is the accepted common name for the insecticide *O,O*-dimethyl phosphorodithioate, *S*-ester with 4-(mercaptomethyl)-2-methoxy-Δ^2-1,3,4-thiadiazolin-5-one.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), 68 Stat. 512; 21 U.S.C. 346a(d)(2)), the authority transferred to the Administrator of the Environmental Protection Agency (36 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.298 is amended by revising the heading and introductory paragraph and by inserting the new paragraph "2 parts per million • • •" after the paragraph "6 parts per million • • •", as follows:

§ 180.298 Methidathion; tolerances for residues.

Tolerances for residues of the insecticide methidathion (*O,O*-dimethyl phosphorodithioate, *S*-ester with 4-(mercaptomethyl) - 2 - methoxy - Δ^2 - 1,3,4 - thiadiazolin-5-one) are established in or on raw agricultural commodities as follows:

• • • • • •

2 parts per million in or on grapefruit and oranges.

• • • • • •

Any person who will be adversely affected by the foregoing order may at any time on or before Oct. 1, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th and M Streets SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particuarity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on Aug. 30, 1973.

(Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2)).)

Dated August 23, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.73-18388 Filed 8-29-73;8:45 am]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

2,6-Dichloro-4-Nitroaniline

A petition (PP 3F1365) was filed by the Upjohn Co., Kalamazoo, MI 49001, in accordance with provisions of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a), proposing (a) to increase the established tolerance for residues of the fungicide 2,6-dichloro-4-nitroaniline in or on the raw agricultural commodity plums (fresh prunes) from 1 part per million to 15 parts per million to allow postharvest as well as preharvest use and (b) to revoke the established tolerance for residues of this fungicide in or on the raw agricultural commodity strawberries at 15 parts per million.

Based on consideration given data submitted in the petition and other relevant material, it is concluded that:

1. The fungicide is useful for the purpose for which the tolerance is being established.

2. The tolerance of 15 parts per million for residues of the fungicide in or on plums (fresh prunes) is adequate to cover residues resulting from postharvest use as well as the existing preharvest use.

3. There is no reasonable expectation of residues in eggs, meat, milk, or poultry, and § 180.6(a)(3) applies.

4. The established tolerance of 15 parts per million for residues of 2,6-dichloro-4-nitroaniline in or on strawberries is not pertinent since the fungicide is no longer registered for use on this commodity.

5. The tolerance established by this order and the revocation will protect the public health.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(2), (m), 68 Stat. 512, 517; 21 U.S.C. 346a(d)(2), (m)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.200 is amended by revising the paragraph "15 parts per million • • •" to read as follows and by deleting the paragraph "1 part per million • • •":

§ 180.200 2,6-Dichloro-4-nitroaniline; tolerances for residues.

• • • • • •

15 parts per million in or on blackberries, boysenberries, celery, plums (fresh prunes) (from preharvest and postharvest application), and raspberries.

• • • • • •

Any person who will be adversely affected by the foregoing order may at any time on or before Oct. 1, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 1019E, 4th & M Streets, SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on Aug. 30, 1973.

(Sec. 408(d)(2), (m), 68 Stat. 512, 517 (21 U.S.C. 346a(d)(2), (m)).)

Dated August 23, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.73-18387 Filed 8-29-73;8:45 am]

Title 49—Transportation

CHAPTER II—FEDERAL RAILROAD ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. RST-1B]

PART 213—TRACK SAFETY STANDARDS

Classes of Track; Operating Speed Limits

On July 16, 1973, the Federal Railroad Administration published in the FEDERAL REGISTER a notice of proposed rule-making to amend paragraph (a) and add a new paragraph (c) in § 213.9 of Title 49 of the Code of Federal Regulations (38 FR 18905). The proposal set forth the kinds of information which a railroad must furnish in seeking approval from the Administrator to operate a freight or passenger train more than 110 m.p.h. Speeds up to 110 m.p.h. are presently permitted by § 213.9, depending on the class of track involved, without prior authorization.

Interested persons were invited to participate in the rulemaking by submitting written comments before August 16, 1973, and by presenting oral or written statements at a public hearing on August 16, 1973. However, no oral or written comments were received.

There being no objection to the proposed amendment, § 213.9 of Title 49 of the Code of Federal Regulations is amended to read as follows, effective October 1, 1973.

Issued in Washington, D.C., on August 24, 1973.

JOHN W. INGRAM,
Administrator.

The introductory clause in paragraph (a) is amended and a new paragraph (c) is added as follows:

§ 213.9 Classes of track: operating speed limits.

(a) Except as provided in paragraphs (b) and (c) of this section and §§ 213.57 (b), 213.59(a), 213.105, 213.113 (a) and (b), and 213.137 (b) and (c), the following maximum allowable operating speeds apply:

• • • • •

(c) Maximum operating speed may not exceed 110 m.p.h. without prior approval of the Federal Railroad Administrator. Petitions for approval must be filed in the manner and contain the information required by § 211.11 of this chapter. Each petition must provide sufficient information concerning the performance characteristics of the track, signaling, grade crossing protection, trespasser control where appropriate, and equipment involved and also concerning maintenance and inspection practices and procedures to be followed, to establish that the proposed speed can be sustained in safety.

(Sec. 202, 84 Stat. 971 (45 U.S.C. 431); § 1.49(n), regulations of the Office of the Secretary of Transportation 49 CFR 1.49(n))

[FR Doc.73-18434 Filed 8-29-73;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Certain National Wildlife Refuges in Ariz., Calif., Texas, N. Mex.

The following special regulations are issued and are effective August 30, 1973.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

ARIZONA AND CALIFORNIA

HAVASU NATIONAL WILDLIFE REFUGE

Public hunting of doves on the Havasu National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 24,200 acres, is delineated on maps available at refuge headquarters, Needles, California, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: Arizona—mourning doves, from September 1 through September 23, 1973, inclusive; and from December 1 through December 27, 1973, inclusive. California—mourning and white-winged doves, from September 1 through September 30, 1973, inclusive; and from November 24 through December 9, 1973, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves subject to the following special condition:

(1) Hunting is prohibited within one-fourth mile of any occupied dwelling or concession operation.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 27, 1973.

IMPERIAL NATIONAL WILDLIFE REFUGE

Public hunting of doves on the Imperial National Wildlife Refuge, Arizona and California, is permitted only on the area designated by signs as open to hunting. This open area, comprising 10,500 acres, is delineated on maps available at refuge headquarters, Yuma, Arizona, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: Arizona—mourning doves only, from December 1 through December 27, 1973, inclusive. California—mourning and white-winged doves, from November 24 through December 9, 1973, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 27, 1973.

NEW MEXICO

BITTER LAKE NATIONAL WILDLIFE REFUGE

Public hunting of mourning and white-winged doves on the Bitter Lake National Wildlife Refuge, New Mexico, is permitted from September 1 through September 30, 1973, inclusive; and from November 24 through December 23, 1973, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,220 acres more or less, is delineated on maps available at refuge headquarters, Roswell, New Mexico, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of doves.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 23, 1973.

BITTER LAKE NATIONAL WILDLIFE REFUGE

Public hunting of teal ducks on the Bitter Lake National Wildlife Refuge, New Mexico, is permitted from September 22 through September 30, 1973, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,220 acres more or less, is delineated on maps available at refuge headquarters, Roswell, New Mexico, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of teal ducks.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1973.

BOSQUE DEL APACHE NATIONAL WILDLIFE REFUGE

Public hunting of mourning and white-winged doves on the Bosque del Apache National Wildlife Refuge, New Mexico, is permitted from September 1 through September 30, 1973, inclusive, and from November 24 through December 23, 1973, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 19,020 acres, is delineated on maps available at refuge headquarters, 7 miles south of San Antonio, New Mexico, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations

V 38-168 AUG 30 73 XUM

covering the hunting of doves subject to the following special conditions:

(1) Vehicles are permitted only on established roads.

(2) Hunters shall leave the refuge by one-half hour after sunset.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 23, 1973.

OKLAHOMA

SEQUOYAH NATIONAL WILDLIFE REFUGE

Public hunting of doves, teal, woodcock, rails, and snipe on the Sequoyah National Wildlife Refuge, Oklahoma, is permitted on three areas designated by signs as open to hunting. These open areas, comprising 10,500 acres, are delineated on maps available at refuge headquarters, Sallisaw, Oklahoma, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting seasons are as follows: doves, from September 1 through October 30, 1973, inclusive; teal, from September 15 through September 23, 1973, inclusive; rails, from September 1 through November 9, 1973, inclusive; woodcock, from November 20 through the last day of the regular 1973–74 duck season, inclusive; and snipe, from October 20 through December 23, 1973, inclusive. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of doves, teal, woodcock, rails and snipe subject to the following special conditions:

(1) Hunting weapons of any kind are prohibited in areas not posted as open to public hunting, except the Kerr-McClellan Navigation Channel where weapons must be cased or broken down.

(2) Only longbow and arrow or shotguns without slug ammunition are permitted.

(3) Camping or possession of firearms on the refuge at night is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through the last day of the regular 1973–74 duck season.

TISHOMINGO NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves on the Tishomingo National Wildlife Refuge, Oklahoma, is permitted only on the area designated by signs as open to hunting. This open area, comprising 3,170 acres, is delineated on maps available at refuge headquarters, Tishomingo, Oklahoma, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations governing the hunting of mourning doves subject to the following special conditions:

(1) The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1973, inclusive.

(2) Dogs may be used for the purpose of hunting and retrieving.

(3) A Federal permit is not required to enter the public hunting area, but hunters, upon entering and leaving, shall report at designated checking stations as may be established for the regulations of the hunting activity and shall furnish information pertaining to their hunting, as requested.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1973.

TISHOMINGO NATIONAL WILDLIFE REFUGE

Public hunting of teal ducks on the Tishomingo National Wildlife Refuge, Oklahoma, is permitted from September 15 through September 23, 1973, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,170 acres, is delineated on maps available at refuge headquarters, Tishomingo, Oklahoma, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of teal ducks.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 23, 1973.

TEXAS

BRAZORIA NATIONAL WILDLIFE REFUGE

Public hunting of teal ducks on the Brazoria National Wildlife Refuge, Texas, is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,000 acres of Rattlesnake Island on the southeast side of the Intracoastal Waterway and adjacent to Drum, Christmas, and Bastrop Bays, is delineated on maps available at refuge headquarters, Angleton, Texas, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations subject to the following special conditions:

(1) The open season for hunting teal ducks on the refuge extends from September 15 through September 23, 1973, inclusive.

(2) Access to the hunting area is entirely over public water routes. Travel across the refuge mainland to and from the area open to hunting is not permitted.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 23, 1973.

HAGERMAN NATIONAL WILDLIFE REFUGE

Public hunting of mourning doves on the Hagerman National Wildlife Refuge, Texas, is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,644 acres, is delineated on maps available at refuge headquarters, 15 miles northwest of Sherman, Texas, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, Post Office Box 1306, Albuquerque, New Mexico 87103. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves subject to the following special condition:

(1) The open season for hunting mourning doves on the refuge extends from September 1 through September 30, 1973, inclusive.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through September 30, 1973.

AUGUST 21, 1973.

WILLIAM M. WHITE,
Acting Regional Director.

PART 32—HUNTING

Bombay Hook National Wildlife Refuge; Delaware

The following special regulation is issued and is effective during the period September 1, 1973, through January 31, 1974.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public hunting of rails and gallinules, mourning doves, woodcock, and common snipe on Bombay Hook National Wildlife Refuge, Delaware, is permitted during the regular State seasons on the South Upland Hunting Area. This open area, comprising 141 acres, is delineated on a map available at the refuge headquarters, Smyrna, Delaware 19977, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable Federal and State regulations covering the hunting of rails and gallinules, mourning doves, woodcock, and common snipe.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1974.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 23, 1973.

PART 32—HUNTING

Iroquois National Wildlife Refuge; New York

The following special regulation is issued and is effective during the period September 1, 1973 through December 31, 1973.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

NEW YORK

IROQUOIS NATIONAL WILDLIFE REFUGE

The public hunting of woodcock on the Iroquois National Wildlife Refuge, New York, is permitted on the area designated by signs as open to hunting. This open area is delineated on maps available at the refuge headquarters, Basom, New York, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, John W. McCormack Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of woodcock.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

WILLARD M. SPAULDING, JR.
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 22, 1973.

[FR Doc.73-18402 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Erie National Wildlife Refuge, Penn.

The following special regulation is issued and is effective during the period September 1, 1973 through January 30, 1974.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

PENNSYLVANIA

ERIE NATIONAL WILDLIFE REFUGE

Public hunting of migratory game birds on the Erie National Wildlife Refuge is permitted in accordance with all applicable State and Federal regulations. Such hunting is permitted only on the designated area, as delineated on maps available at refuge headquarters, Guys Mills, Pennsylvania, or from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109.

The provisions of this special regulation supplement the regulations governing hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 30, 1974.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

PART 32—HUNTING

Pocasse National Wildlife Refuge, South Dakota

The following special regulation is issued and is effective August 30, 1973.

§ 32.12 Special regulations; big game; for individual wildlife refuge areas.

SOUTH DAKOTA

POCASSE NATIONAL WILDLIFE REFUGE

Public hunting of big game on the Pocasse National Wildlife Refuge, South Dakota, is permitted only on the area designated by signs as open to hunting. This open area, comprising 2,400 acres, is delineated on a map available at the refuge headquarters and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer, subject to the following conditions:

(1) Firearms season—November 24, 1973 through December 2, 1973, both dates inclusive.

(2) All hunters must exhibit their hunting license, deer tag and vehicle contents to Federal and State officers upon request.

(3) Hunters will not be allowed to drive on refuge maintained trails, but may park their vehicles outside the refuge and hunt on foot.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

LOUIS S. SWENSON,
Refuge Manager, Sand Lake National Wildlife Refuge.

AUGUST 22, 1973.

PART 32—HUNTING

Certain National Wildlife Refuges in Washington

The following regulations are issued and are effective August 30, 1973. These regulations apply to public hunting on portions of certain National Wildlife Refuges in Washington.

General Conditions.—Hunting shall be in accordance with applicable State regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on maintained roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1500 Northeast Irving, Portland, Oregon 97208.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Migratory game birds except doves and pigeons may be hunted on the following refuge areas:

Columbia National Wildlife Refuge, P.O. Drawer F, Othello, Washington 99344.

McNary National Wildlife Refuge, P.O. Box 19, Burbank, Washington 99383.

Special Conditions: (1) Hunters are required to park vehicles in designated parking areas.

(2) Hunting will be permitted on Wednesdays, Saturdays, Sundays, and November 22, 1973.

Ridgefield National Wildlife Refuge, P.O. Box 467, Ridgefield, Washington 98642.

Special Conditions: (1) Hunting will be permitted on Wednesdays, Saturdays, and Sundays, October 22, 1973, November 22, 1973, and January 1, 1974.

(2) A Federal permit, available from the refuge office, is required to enter the public hunting area. Permits will be issued by mail in advance on a first-come, first-served basis. Only one permit may be held by a hunter at any one time.

(3) Hunters must shoot from assigned blinds drawn at the checking station.

(4) Iron shot only may be possessed or used on the refuge hunting area.

Toppenish National Wildlife Refuge, Route 1, Box 210–BB, Toppenish, Washington 98948.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882.

Willapa National Wildlife Refuge, Ilwaco, Washington 98624.

Special Condition: (1) Hunting on Riekkola Tract is permitted on Wednesdays, Saturdays, and Sundays and Federal holidays.

Migratory game birds may be hunted on the following refuge area:

Conboy Lake National Wildlife Refuge, Glenwood, Washington. (Headquarters: Toppenish National Wildlife Refuge, Route 1, Box 210–BB, Toppenish, Washington 98948.)

Special Condition: No goose hunting permitted on the refuge.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Upland game birds may be hunted on the following refuge areas:

Columbia National Wildlife Refuge, P.O. Drawer F, Othello, Washington 99344.

V 38-168 AUG 30 73 XUM

Special Conditions: (1) Open to hunting of rabbits in addition to game birds.

(2) Upland game birds may be hunted during State seasons running concurrently with the waterfowl season.

McNary National Wildlife Refuge, P.O. Box 19, Burbank, Washington 99323.

Special Conditions: (1) Hunting will be restricted to pheasants only.

(2) Pheasant hunting will be restricted to Wednesdays, Saturdays, Sundays, and Federal holidays.

(3) Hunters are required to park vehicles in designated parking areas.

Toppenish National Wildlife Refuge, Route 1, Box 210–BB, Toppenish, Washington 98948.

Special Condition: (1) Rabbits may be hunted in addition to game birds during the State season concurrent with the waterfowl season.

Conboy Lake National Wildlife Refuge, Glenwood, Washington. (Headquarters: Toppenish National Wildlife Refuge, Route 1, Box 210–BB, Toppenish, Washington 98948.)

Special Condition: (1) Cottontail rabbit and snowshoe hare may also be hunted during the State season concurrent with the waterfowl season.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882.

Willapa National Wildlife Refuge, Ilwaco, Washington 98624.

Special Condition: (1) Archery hunting only is permitted on the Long Island unit.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Deer hunting is permitted on the following refuge areas:

Columbia National Wildlife Refuge, P.O. Drawer F, Othello, Washington 99344.

Conboy Lake National Wildlife Refuge, Glenwood, Washington. (Headquarters: Toppenish National Wildlife Refuge, Route 1, Box 210–BB, Toppenish, Washington 98948.)

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882.

Bear, deer and elk may be hunted on the following refuge area:

Willapa National Wildlife Refuge, Ilwaco, Washington 98624.

Special Conditions: (1) Archery hunting only is permitted.

(2) Hunters shall possess hunting permits available at refuge headquarters and at the Nahcotta Dock.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through June 30, 1974.

DONALD J. HANKLA,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

PART 32—HUNTING

Alamosa National Wildlife Refuge; Colorado

The following special regulation is issued and is effective August 30, 1973.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

COLORADO

ALAMOSA NATIONAL WILDLIFE REFUGE

The public hunting of rabbits, skunk, badger, raccoon, coyote, bobcat, and feral cat on the Alamosa National Wildlife Refuge, Colorado, is permitted from September 29, through October 9, 1973, inclusive, and from November 1, 1973, through January 13, 1974, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,267 acres, is delineated on maps available at refuge headquarters, Alamosa, Colorado and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215.

Hunting shall be in accordance with all applicable State regulations governing the hunting of rabbits, skunk, badger, raccoon, coyote, bobcat, and feral cat subject to the following conditions:

(1) Hunting Hours—Shooting hours shall coincide with the most restrictive hours set by Federal or State proclamation for pheasant or migratory waterfowl.

(2) Dogs—Not to exceed two dogs per hunter, may be used in the hunting of the above species.

(3) Admittance—Entrance to the area open to hunting and parking of vehicles will be restricted to designated parking areas.

(4) Hunting with rifles and handguns is prohibited.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 13, 1974.

AUGUST 23, 1973.

ROBERT L. DARNELL,
Refuge Manager, Alamosa National Wildlife Refuge, Alamosa, Colorado.

[FR Doc.73-18440 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Bombay Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period September 1, 1973 through November 30, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public archery hunting of deer on Bombay Hook National Wildlife Refuge, Delaware, is permitted only on the Deer Hunting Area and South Upland Hunting Area designated by signs as open to hunting. These open deer hunting areas are delineated on maps available at refuge headquarters, Smyrna, Delaware 19977, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State regulations covering archery hunting of deer subject to the following special conditions:

(1) Hunting by bow and arrow on the Deer Hunting Area is permitted only on Saturdays from September 1 through October 31, excluding October 13.

(2) The number of hunters admitted to the Deer Hunting Area at any one time will be restricted to 80.

(3) Permits are required for the Deer Hunting Area and will be issued on a first-come, first-served basis one hour before shooting time.

(4) Hunters using the Deer Hunting Area and the South Upland Hunting Area must show proof of completion of a weapons qualification test. This test will consist of placing two out of five arrows in the 9 x 14 inch chest area of a standard size deer target at 25 yards.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 30, 1973.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 23, 1973.

[FR Doc.73-18399 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Bombay Hook National Wildlife Refuge; Delaware

The following special regulation is issued and is effective during the period September 20, 1973 through April 30, 1974.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public hunting of upland game on Bombay Hook National Wildlife Refuge, Delaware, is permitted during the regular State seasons on the South Upland Hunting Area designated by signs as open to hunting. This open area, comprising 141 acres, is delineated on maps available at refuge headquarters, Smyrna, Delaware 19977, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through April 30, 1974.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 22, 1973.

[FR Doc. 73-18395 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Bombay Hook National Wildlife Refuge; Delaware

The following special regulation is issued and is effective during the period September 20, 1973, through November 30, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

DELAWARE

BOMBAY HOOK NATIONAL WILDLIFE REFUGE

Public hunting of deer with primitive weapons on the Bombay Hook National Wildlife Refuge, Delaware, is permitted only on the Deer Hunting Area and South Upland Hunting Area designated by signs as open to hunting. These open deer hunting areas are delineated on maps available at refuge headquarters, Smyrna, Delaware 19977, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of deer with firearms subject to the following special conditions:

(1) Hunting with primitive weapons on the Deer Hunting Area is permitted only on October 8 through October 16.

(2) The number of hunters admitted to the Deer Hunting Area at any one time will be restricted to 50.

(3) Permits are required for the Deer Hunting Area and will be issued on a first-come, first-served basis one hour before shooting time.

(4) Hunters using the Deer Hunting Area and the South Upland Hunting Area must show proof of completion of a weapons qualification test. This test will consist of placing three consecutive rounds in a 12-inch circle at 50 yards, firing from the offhand position. The type of weapon used for the qualification test must be the same type that is to be used for the hunt—percussion or flintlock.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 30, 1973.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 23, 1973.

[FR Doc.73-18396 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Prime Hook National Wildlife Refuge, Delaware

The following special regulation is issued and is effective during the period September 1, 1973, through April 30, 1974.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

DELAWARE

PRIME HOOK NATIONAL WILDLIFE REFUGE

Public hunting of upland game on Prime Hook National Wildlife Refuge, Delaware, is permitted on Hunting Areas A and B within the regularly established 1973–74 hunting seasons of the State of Delaware. This open upland game hunting area, comprising approximately 6,100 acres, is delineated on maps available at refuge headquarters, Rural Delivery No. 1, Box 195, Milton, Delaware 19968, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State regulations covering the hunting of upland game.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through April 30, 1974.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 22, 1973.

[FR Doc.73-18441 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Tamarac National Wildlife Refuge; Minnesota

The following special regulation is issued and is effective August 30, 1973.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

MINNESOTA

TAMARAC NATIONAL WILDLIFE REFUGE

Public hunting of ruffed grouse, gray and fox squirrels, cottontail, jack, and snowshoe rabbits on the Tamarac National Wildlife Refuge, Rochert, Minnesota, is permitted in the area designated by signs as open to hunting. This open area comprising 12,500 acres is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

An additional area of 18,000 acres will be open for public hunting of ruffed grouse only. This ruffed grouse only public hunting area is delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

Hunting shall be in accordance with all applicable State regulations during the seasons specified below. The hunting of other upland game species as may be authorized by Minnesota State regulations is prohibited.

Open seasons: Ruffed grouse—September 15, 1973, through October 29, 1973, and the second season opens November 1, 1973, through November 30, 1973, inclusive with shooting hours from sunrise to sunset. Gray and fox squirrels—September 15, 1973, through December 31, 1973, inclusive with shooting hours from sunrise to sunset. Cottontail, jack and snowshoe rabbits—September 15, 1973, through March 1, 1974, inclusive with shooting hours from sunrise to sunset.

No person shall trap on Tamarac National Wildlife Refuge without first obtaining such permits and trap tags as may be required and issued by the Refuge Manager. Portions of Tamarac refuge open to hunting will be posted "Public Hunting Area" except as described in refuge hunting maps for ruffed grouse. In addition, no persons shall, for the purpose of hunting or trapping, enter or leave a refuge except by access roads which may be so designated; and all hunters and trappers shall comply with further regulations which the Refuge Manager may prescribe.

AUGUST 24, 1973.

OMER N. SWENSON,
Refuge Manager, Tamarac National Wildlife Refuge, Rochert, Minnesota.

[FR Doc.73-18442 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Tamarac National Wildlife Refuge; Minnesota

The following special regulation is issued and is effective August 30, 1973.

§ 32.22 Special regulations; big game; for individual refuge areas.

MINNESOTA

TAMARAC NATIONAL WILDLIFE REFUGE

Public hunting of white-tailed deer with legal firearms on the Tamarac National Wildlife Refuge is permitted over the entire refuge with exception of those areas posted as "Area Beyond This Sign Closed". The open area comprises 40,200 acres. Areas open for deer hunting are

V 38-168 AUG 30 73 XUM

delineated on maps available at refuge headquarters, Rochert, Minnesota 56578, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer subject to the following conditions.

(1) The open season for hunting deer with legal firearms is from sunrise to sunset, November 1, 1973, through November 30, 1973. Hunters have the choice of any 2 consecutive days November 1, 1973, through November 4, 1973; or any 3 consecutive days, November 5 through November 15, 1973, or any 5 consecutive days, November 16, 1973, through November 30, 1973.

(2) Hunting deer with legal bow and arrow is permitted from sunrise to sunset, November 1, 1973, through November 30, 1973.

Portions of Tamarac refuge open to hunting is delineated on refuge hunting maps. In addition, no persons shall, for the purpose of hunting, enter or leave a refuge except by access roads which may be so designated; and all hunters shall comply with further regulations which the Refuge Manager may prescribe.

AUGUST 24, 1973.

OMER N. SWENSON,
Refuge Manager, Tamarac National Wildlife Refuge, Rochert, Minnesota.

[FR Doc.73-18443 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Erie National Wildlife Refuge, Penn.

The following special regulation is issued and is effective during the period September 20, 1973, through January 13, 1974.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

PENNSYLVANIA

ERIE NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Erie National Wildlife Refuge, Pennsylvania, is permitted. The open hunting area is delineated on maps available at refuge headquarters, Guys Mills, Pennsylvania, and the Regional Director, Bureau of Sport Fisheries and Wildlife, U.S. Post Office and Courthouse, Boston, Massachusetts 02109.

Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of deer.

The provisions of this special regulation supplement the regulations governing hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 13, 1974.

AUGUST 23, 1973.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

[FR Doc.73-18404 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Iroquois National Wildlife Refuge; New York

The following special regulation is issued and is effective during the period September 20, 1973, through December 31, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

NEW YORK

IROQUOIS NATIONAL WILDLIFE REFUGE

Public hunting of deer on the Iroquois National Wildlife Refuge, New York, is permitted during the regular State open seasons in 1973, except on areas designated by signs as closed. This open area is delineated on maps available at refuge headquarters, Basom, New York, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, John W. McCormack, Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, as are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 23, 1973.

[FR Doc.73-18401 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Iroquois National Wildlife Refuge; New York

The following special regulation is issued and is effective during the period October 1, 1973, through February 28, 1974.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

NEW YORK

IROQUOIS NATIONAL WILDLIFE REFUGE

Public hunting of upland game birds and small game mammals, including foxes, opossums, red squirrels, and woodchucks is permitted from October 1, 1973, through February 28, 1974, during the respective State seasons except on areas designated by signs as closed. This open area comprising 10,383 acres is delineated on maps available at refuge headquarters, Basom, New York, and from the Regional Director, Bureau of Sport Fisheries and Wildlife, John W. McCormack Post Office and Courthouse, Boston, Massachusetts 02109. Hunting shall be in accordance with all applicable State regulations subject to the following special condition.

(1) A seasonal permit is required for the night-time hunting of raccoon. Permits may be obtained by applying in person at the refuge office.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, as are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through February 28, 1974.

WILLARD M. SPAULDING, JR.,
Acting Regional Director, Bureau of Sport Fisheries and Wildlife.

AUGUST 23, 1973.

PART 32—HUNTING

Sand Lake National Wildlife Refuge; South Dakota

The following special regulation is issued and is effective August 30, 1973.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

SOUTH DAKOTA

SAND LAKE NATIONAL WILDLIFE RUFUGE

Public hunting of pheasants on the Sand Lake National Wildlife Refuge, South Dakota, is permitted only on the area designated by signs as open to hunting. This open area, comprising 20,000 acres, is delineated on a map available at the refuge headquarters and from the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215. Hunting shall be in accordance with all applicable State regulations covering the hunting of pheasants subject to the following conditions:

(1) The open season for hunting pheasants on the refuge is from December 3, 1973, through December 31, 1973, both dates inclusive.

(2) Hunters will not be allowed to drive on refuge maintained trails, but may park their vehicles outside of the refuge and hunt on foot.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

LOUIS S. SWENSON,
Refuge Manager, Sand Lake National Wildlife Refuge.

AUGUST 22, 1973.

[FR Doc.73-18446 Filed 8-29-73;8:45 am]

PART 32—HUNTING

Seedskadee National Wildlife Refuge, Wyo.; Rescission

This emergency rescission is herewith issued because public hunting was authorized in error. This activity was not intended for this refuge. Therefore, it is necessary to publish this recission on short notice.

§ 32.12 Special Regulations; migratory game birds; for individual wildlife refuge areas.

WYOMING

In the FEDERAL REGISTER on August 16, 1973, page 22126, (FR Doc. 73-17206) there appeared an announcement of regulations which provide for the hunting of mourning doves on the Seedskadee National Wildlife Refuge from September 1 to September 16, 1973. That announcement is hereby rescinded.

CHARLES M. LOVELACE,
Acting Director, Bureau of Sports Fisheries and Wildlife.

PART 33—SPORT FISHING

Sand Lake National Wildlife Refuge, S. Dak.

The following special regulation is issued and is effctive on August 17, 1973.

§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.

SOUTH DAKOTA

SAND LAKE NATIONAL WILDLIFE REFUGE

Sport fishing on the Sand Lake National Wildlife Refuge, South Dakota, is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 150 acres, are delineated on a map available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, Colorado 80215. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from January 1 through December 31, 1974, inclusive.

(2) The use of boats is not permitted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through December 31, 1974.

LOUIS S. SWENSON,
Refuge Manager, Sand Lake National Wildlife Refuge, Columbia, S. Dak. 57433.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[7 CFR Part 1875]

[FHA Instruction 471.4]

SECURITY SERVICING AND LIQUIDATIONS

Loss, Theft, Destruction, Mutilation or Defacement of Insured Notes and Insurance Contracts

Notice is hereby given that the Farmers Home Administration has under consideration the amendment of Subchapter F, Security Servicing and Liquidations by adding a new Part 1875, "Loss, Theft, Destruction, Mutilation or Defacement of Insured Notes and Insurance Contracts." This new Part 1875 provides the policies and procedures to be followed when an insured note or insurance contract is lost, stolen, destroyed, mutilated, or defaced while owned by an insured investor.

Interested persons are invited to submit written comments, suggestions, or objections regarding this proposed amendment to the Deputy Administrator, Comptroller, Farmers Home Administration, U.S. Department of Agriculture, Room 5007, South Building, Washington, D.C. 20250. Comments will be received through September 7, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Deputy Administrator, Comptroller, during regular business hours 8:15 a.m. to 4:45 p.m.

As proposed, the addition will read as follows:

PART 1875—LOSS, THEFT, DESTRUCTION, MUTILATION OR DEFACEMENT OF INSURED NOTES AND INSURANCE CONTRACTS

Sec.
1875.1 General.
1875.2 Authorization.
1875.3 Policies.

AUTHORITY: 7 U.S.C. 1989, (42 U.S.C. 1480); (40 U.S.C. 442); Order of the Secretary of Agriculture, 38 FR 14944, 14948, 7 CFR 2.23; Order of the Assistant Secretary of Agriculture for Rural Development, 38 FR 14944, 14952, 7 CFR 2.70.

§ 1875.1 General.

This part prescribes the authorities, policies, and procedures to be followed when an insured note or insurance contract is lost, stolen, destroyed, mutilated, or defaced while owned by an insured investor.

§ 1875.2 Authorization.

(a) The Director, Finance Office, 1520 Market Street, St. Louis, Missouri 63103, is authorized on behalf of the Government, in connection with insured notes sold through the Farmers Home Administration (FHA) Finance Office to require indemnity bonds from a note holder when a note is lost, stolen, destroyed, mutilated, or defaced while in the custody of the holder or his designee.

(b) The Deputy Administrator, Comptroller, is authorized in connection with block sale insurance contracts to authorize the FHA's fiscal agent to establish requirements for issuance of a replacement insurance contract when the original issued by the Federal Reserve Bank of New York (FHA's fiscal agent) is lost, stolen, destroyed, mutilated, or defaced.

§ 1875.3 Policies.

(a) When a block sale insurance contract is lost, stolen, or destroyed, a duplicate may be issued to the registered holder upon receipt of an acceptable certificate of loss and an indemnity bond without surety. The certificate of loss should include the legal name and present address of the owner and address when issued; the capacity of person certifying, if other than owner; the identity of the insurance contract, including series number, contract number, denomination, issue date, and form of inscription of registry; the full statement of circumstances of the loss. All available portions of an insurance contract that is mutilated, defaced, or partially destroyed should be submitted to the Federal Reserve Bank of New York (FHA's fiscal agent) for determination whether a duplicate insurance contract can be issued without a certificate of loss and posting of an indemnity bond. In the event the holder of a block sales insurance contract obtains possession of the underlying notes, the requirements of paragraph (b) of this section apply.

(b) Notes sold by FHA County Office and Finance Office. When a note is lost, stolen, or destroyed while in the custody of the holder or his designee, the following will apply:

(1) A certificate of loss should be filed with FHA Finance Office. The certificate should include:

(i) Legal name and present address of owner and address of owner when issued, if different from present address.

(ii) Capacity of person certifying, if other than the owner.

(iii) Identity of the note including the name and FHA case number of the maker thereof, issue date, interest rate of obligation, face amount of note, and a full description of any assignment, endorsement, or any other writing.

(iv) A full statement of circumstances of the loss, theft, or destruction of the note.

(2) An indemnity bond in the amount of the unpaid principal and interest will be required except in the following instances:

(i) Substantially the entire note is presented and surrendered by the owner or holder, and the Director of the Finance Office is satisfied as to the identity of the instruments and that any missing portions are not sufficient to form the basis of a valid claim against the United States, or the borrower; or

(ii) The owner or holder is the United States, a Federal Reserve Bank, a Federal Government Corporation, a State or territory, or the District of Columbia.

(3) An indemnity bond without surety will be provided in the following cases:

(i) Cases involving registered unassigned obligations held by banks, trust companies, savings and loan associations, or companies holding certificates of authority from the Secretary of Treasury as acceptable sureties on Federal Bonds (companies listed on Treasury Circular 570) where the financial responsibilities of such claimants are well known or readily ascertainable.

(ii) Cases involving registered unassigned obligations where the evidence reasonably justifies a conclusion that the obligations were destroyed and the unpaid principal and interest amount does not exceed $1,000.

(4) An indemnity bond posted with a qualified surety is required in all cases involving registered unassigned obligations other than those cited in paragraphs (b)(2)(i), (b)(2)(ii), (b)(3)(i), and (b)(3)(ii) of this section. A qualified surety is a company holding a certificate of authority from the Secretary of Treasury as acceptable sureties on Federal Bonds, and listed in Treasury Circular 570.

(5) All indemnity bonds must be payable to both the borrower and FHA. The bond may be posted at the time the note is lost, stolen, destroyed, mutilated, or defaced, or may be posted when the note becomes eligible for repurchase by FHA. If the holder desires to continue to hold the note for the life of the note, an indemnity bond will not be required.

(c) Cases involving bearer obligations and other cases not discussed in this section will be forwarded to the Director, Finance Officer for requirements.

(d) FHA will not attempt to obtain replacement notes from borrowers. If a replacement note is desired the holder may make a request directly to the borrower.

Dated: August 24, 1973.

FRANK B. ELLIOTT,
Administrator,
Farmers Home Administration.

[FR Doc.73-18393 Filed 8-29-73;8:45 am]

Rural Electrification Administration

[7 CFR Part 1701]

REA SPECIFICATIONS FOR RURAL TELEPHONE FACILITIES

Equipment for Automatic Number Identification—CAMA, and for Equipment for Direct Distance Dialing

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), including the amendment thereto enacted by P.L. 93-32, REA proposes to issue REA Bulletin 384-3 to announce the revisions in REA Form 537, Specification for Equipment for Automatic Number Identification—CAMA, and REA Form 538, Specification for Equipment for Direct Distance Dialing. On issuance of REA Bulletin 384-3, Appendix A to Part 1701 will be modified accordingly.

Persons interested in the revisions of REA Forms 537 and 538 may submit written data, views or comments to the Director, Telephone Operations and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, on or before October 1, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Telephone Operations and Standards Division during regular business hours.

A copy of the revised REA Forms 537 and 538 may be secured in person or by written request from the Director, Telephone Operations and Standards Division.

The text of REA Bulletin 384-3 announcing the issuance of the revised forms is as follows:

REA BULLETIN 384-3

SUBJECT: Central Office Equipment Contracts and Specifications

I. *Purpose.*—To announce the revisions of REA Form 537, REA Specification for Equipment for Automatic Number Identification—CAMA and REA Form 538, REA Specification for Equipment for Direct Distance Dialing and list current editions of central office equipment contracts and specifications.

II. *General.*—The standard forms and specifications are to be used by borrowers for all purchases of central office equipment for the initial system. For further detail, see REA Bulletin 344-1, Methods of Purchasing Materials and Equipment Used in Telephone Borrower's Facilities, and REA Bulletin 384-1, Procedure in Connection with Central Office Equipment Contracts.

III. *Contracts and Amendment.*—A. *REA Form 525 (9-66), Central Office Equipment Contract (Including Installation),* for use when the equipment is installed by the supplier.

B. *REA Form 545 (9-66), Central Office Equipment Contract (Excluding Installation),* for use when the equipment is installed by the borrower's own forces or by others under a separate contract.

C. *REA Form 400 (10-65), Telephone Equipment Contract (Installation Only),* for use when the equipment is to be installed by others than the supplier under a separate contract.

D. *REA Form 238 (4-72), Construction or Equipment Contract Amendment,* for use in amending the contracts to provide for any necessary changes in the equipment and materials or specifications and for any additional equipment and materials required in connection with the central offices included in the contract.

IV. *Specifications.*—A. REA Form 524 (2-72), General Specification for Common Control Central Office Equipment.

B. REA Form 528 (2-72), Specification for Private Automatic Branch Exchange.

C. REA Form 537 (9-73), Specification for Equipment for Automatic Number Identification—CAMA.

D. REA Form 538 (9-73). Specification for Equipment for Direct Distance Dialing.

E. REA Form 542 (4-63), Specification for Toll Office Equipment.

F. REA Form 558 (9-66), Specification for Dial Central Office Equipment.

V. *Revision of REA Form 537, Specification for Equipment for Automatic Number Identification—CAMA.*—The principal reasons for the reissue are:

A. To recognize and refer to REA Form 524, General Specification for Common Control Central Office Switching Equipment, (See Application Guide, REA TE & CM-335, which points out ANI equipment required for a new common control central office would be specified in Parts III and IV of REA Form 524 instead of in Part III of Form 537).

B. To rearrange the subject matter.

C. To revise some of the requirements to conform with the latest improvements in system design and changes in working limits.

D. To recognize that new ANI systems may be designed to use electronic circuitry.

VI. *Revision of REA Form 538, Specification for Equipment for Direct Distance Dialing.*—The principal reasons for the reissue are:

A. To call for compliance with the latest issue of "Notes on Distance Dialing."

B. To include reference to Centralized Automatic Message Accounting (CAMA), and Class 4 and Class 5 offices, as defined in "Notes on Distance Dialing."

C. To eliminate use of the specific term "Toll Ticketer" and substitute the more general term "equipment for recording", in order to recognize the possibility of new and improved equipment.

D. To recognize the possibility of tandem operation, where a Class 4 toll office is provided without local dial equipment in the same building.

E. To recognize the possibility of Local Automatic Message Accounting (LAMA) equipment being provided in connecting common control tributary offices, thereby eliminating the need for Automatic Number Identification (ANI) equipment in such offices.

F. To remove requirements for ANI equipment from this specification, and to refer to the revised REA Form 537 for requirements for such equipment.

G. To add reference to REA Form 524, General Specification for Common Control Central Office Equipment, and to define the conditions under which DDD equipment will be specified in Parts III and IV of Form 524, rather than in this specification.

H. To add a Part IV to this specification to cover equipment engineered by the Bidder, and to revise in general the method of specifying DDD equipment.

VII. *Source of Central Office Equipment Contracts, Specifications, Amendment, and Contractor's Bonds.*—A. REA Form 525, Central Office Equipment Contract (A copy of REA Form 558, Specification for Dial Central Office Equipment is attached to each copy of the Form 525 Contract) is to be purchased for $1.50 per copy from the Superintendent of Documents, Public Documents Distribution Center, Pueblo Industrial Park, Pueblo, Colorado 81008. Orders for the purchase of Form 525 should be prepared on REA Form 33. Copies of Form 33 are available from REA upon request.

B. All other forms referred to in this bulletin are available from REA upon request. Each contract Form 400 and 525 contains one copy of the Contractor's Bond, REA Forms 400a and 525a, respectively. Additional copies of these bond forms are available from REA upon request.

C. Questions concerning the revised specifications may be referred to the Chief, Central Office Equipment Branch, Telephone Operations and Standards Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202 447-5773.

Dated August 27, 1973.

C. R. BALLARD,
Acting Assistant Administrator.

[FR Doc.73-18483 Filed 8-29-73;8:45 am]

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1913]

GUIDELINES CONCERNING PUBLIC DISCLOSURE

Monitoring of Certain Hazards

Pursuant to authority in section 8(g) of the Williams-Steiger Occupational Safety and Health Act of 1970 (29 U.S.C. 657), 5 U.S.C. 552, and Secretary of Labor's Order No. 12-71 (36 FR 8754), it is proposed to add a new paragraph (c) to 29 CFR 1913.33 to authorize disclosure of the results of monitoring by inspectors in the course of inspections made under section 8 of the Act to determine compliance with standards relating to such subjects as noise, ionizing radiation, and asbestos and other air contaminants. Our purpose in offering this proposal is to permit the public to be better informed as to monitoring of noise, ionizing radiation, asbestos, and other air contaminants, carried on in the course of inspections conducted by the Occupational Safety and Health Administration.

Interested persons are invited to submit written data, views, or arguments concerning this proposal not later than October 1, 1973, to Mr. Benjamin W. Mintz, Office of the Solicitor, U.S. Department of Labor, Washington, D.C. 20210.

As amended, § 1913.33(c) would read as follows:

§ 1913.33 Information which is partially disclosable.

• • • • •

(c) When a safety and health inspection includes monitoring to determine

V 38-168 AUG 30 73 XUM

compliance with standards relating to such subjects as noise, ionizing radiation and asbestos, and other air contaminants, the results of the monitoring shall be available for public inspection and copying (see §§ 1910.93, 1910.93a, 1910.95, and 1910.96 of this chapter).

(Sec. 8, Pub. L. 91-596, 84 Stat. 1598 (29 U.S.C. 657); 5 U.S.C. 552.)

Signed at Washington, D.C., this 27th day of August 1973.

JOHN STENDER,
Assistant Secretary of Labor.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

[42 CFR Part 57]

NURSING STUDENT LOANS

Notice of Proposed Rule Making

Sections 822 and 827 of the Public Health Service Act authorize the Secretary of Health, Education, and Welfare to enter into agreements with schools of nursing for the establishment of student loan funds from which loans are to be made to their students.

Notice is hereby given that the Director, National Institutes of Health, with the approval of the Secretary of Health, Education, and Welfare, proposes to adopt the following regulations set forth in tentative form below, which will revise Subpart D of Part 57.

The proposed regulations would implement four major statutory changes made by the Nurse Training Act of 1971 (P.L. 92-158): (1) an increase in the maximum student loan available to a student for any academic year to $2,500; (2) an expansion of eligibility to include half-time students; (3) a provision whereby an individual is eligible for repayment by the Secretary of a percentage of his educational loans if he signs an agreement with the Secretary to serve for at least two years as a registered nurse in an area designated by the Secretary to have a shortage of and need for nurses; and (4) a new provision whereby the Secretary may repay all or a portion of an individual's educational loans where he determines that the individual has failed his studies leading to the first professional degree and is not expected to resume studies within two years, is in exceptionally needy circumstances and comes from a low income or disadvantaged family. There are also several technical and clarifying changes.

Written comments concerning the proposed regulations are invited from interested persons. Inquiries may be addressed and data, views and arguments may be presented in writing, in triplicate, to Associate Director (Program Implementation), Bureau of Health Manpower Education, National Institutes of Health, Building 31, Room 5 C 12, 9000 Rockville Pike, Bethesda, Md. 20014. All comments received in response to this notice will be available for public inspection at the Office of Grants Policy, Bureau of Health Manpower Education, National Institutes of Health, Building 31, Room 5 B 36, 9000 Rockville Pike, Bethesda, Md. 20014, on weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m. All relevant material received on or before Oct. 1, 1973.

It is therefore proposed to repeal Subpart D of Part 57 to substitute in lieu thereof a new Subpart D as set forth below.

Dated January 31, 1973.

JOHN F. SHERMAN,
Acting Director,
National Institutes of Health.

Approved August 24, 1973.

CASPAR W. WEINBERGER,
Secretary.

Part 57 would be amended as follows:

(1) Subpart D of the table of contents would read as follows:

Subpart D—Nursing Student Loans

Sec.
57.301 Applicability.
57.302 Definitions.
57.303 Eligibility of schools.
57.304 Application by school.
57.305 Agreements for Federal Capital Contributions and Federal Capital Loans.
57.306 Allotment and payment of Federal Capital Contributions and Federal Capital Loans.
57.307 Federal Capital Loan promissory note.
57.308 Nursing Student Loan Funds.
57.309 Nondiscrimination.
57.310 Eligibility and selection of nursing student loan recipients.
57.311 Maximum amount of nursing student loan.
57.312 Evidence of student indebtedness—promissory note; security.
57.313 Payment of nursing student loans.
57.314 Repayment and collection of nursing student loans.
57.315 Cancellation of nursing student loans for disability and death.
57.316 Loan cancellation or repayment for service.
57.317 Repayment of loans made subsequent to November 17, 1971, for failure to complete course of study.
57.318 Records, reports, inspection and audit.
57.319 Additional conditions.
57.320 Noncompliance.

AUTHORITY: Sec. 215, 58 Stat. 170, as amended (42 U.S.C. 216).

(2) Subpart D would be revised to read as follows:

Subpart D—Nursing Student Loans

§ 57.301 Applicability.

The regulations in this subpart are applicable to Federal Capital Contributions and Federal Capital Loans made by the Secretary to public or other nonprofit schools of nursing under sections 822 and 827 of the Public Health Service Act and to loans made to students by such schools pursuant thereto.

§ 57.302 Definitions.

All terms not defined herein shall have the same meaning as given them under title VIII of the Act. As used in this subpart, the following terms shall have the following meanings:

(a) "Act" means the Public Health Service Act, as amended.

(b) "Secretary" means the Secretary of Health, Education, and Welfare, and any other officer or employee to whom the authority involved has been delegated.

(c) "School" means a public or other nonprofit school of nursing as defined in section 843 of the Act.

(d) "Nursing Student Loan Fund or Funds" means a Fund established at a school pursuant to part B of title VIII of the Act, either with Federal Capital Contributions together with Institutional Capital Contributions, or with Federal Capital Loans. Where a school received monies from both sources of payment, reference is made to Funds.

(e) "Federal Capital Contribution" means the capital portion allotted by the Secretary to a school for deposit in a Nursing Student Loan Fund pursuant to section 824 of the Act.

(f) "Institutional Capital Contribution" means the money provided by a school, in an amount not less than one-ninth of the Federal Capital Contribution, and deposited in a Nursing Student Loan Fund.

(g) "Federal Capital Loan" means a loan made by the Secretary to a school pursuant to section 827(a) of the Act; the proceeds of which are to be deposited in a Nursing Student Loan Fund.

(h) "Nursing student loan" means the amount of money advanced to a student by a school from a Nursing Student Loan Fund as defined in paragraph (d) of this section, under a properly executed promissory note.

(i) "Educational loan" means a nursing student loan as defined in paragraph (h) of this section or the amount of money provided to a student under any other bona fide loan which the Secretary determines was reasonably necessary for meeting the student's costs of attending a school of nursing, taking into account the tuition, fees, books, equipment, living expenses, and such other expenses as the Secretary determines were reasonably necessary to enable an individual to attend such school.

(j) "Full-time student" means a student who is enrolled in a school and pursuing a course of study which constitutes a full-time academic workload, as determined by the school, leading to a diploma in nursing, an associate degree in nursing or an equivalent degree, a baccalaureate degree in nursing or an equivalent degree, or an advanced degree in nursing.

(k) "Half-time student" means a student who is enrolled in a school and pursuing a course of study which constitutes at least one-half of a full-time academic workload but less than a full-time academic workload, as determined by the school, leading to a diploma in nursing, an associate degree in nursing, a baccalaureate degree in nursing or an equivalent degree, or a graduate degree in nursing.

(l) "Good standing" means the eligibility of a student to continue in attendance at the school where he is enrolled as a student in accordance with the school's standards and practices.

(m) "Date upon which a student ceases to be a full-time or half-time student" means the first day of the month which is nearest to the date upon which he ceases to be a full-time or half-time student as defined in paragraphs (j) and (k) of this section, respectively.

(n) "Academic year" means the traditional, approximately 9-month September to June annual session. For the purpose of computing academic year equivalents for students who, during a 12-month period, attend for a longer period than the traditional academic year, the academic year will be considered to be of 9 months' duration.

(o) "Fiscal year" means the Federal fiscal year commencing on the first day of July and ending on the 30th day of June.

(p) "Permanently and totally disabled" means the inability to engage in any substantial gainful activity because of medically determinable impairment, which impairment is expected to continue for a long and indefinite period of time, or to result in death.

(q) "Uniformed service" means the Army, Navy, Air Force, Marine Corps, Coast Guard, National Ocean Survey, and the U.S. Public Health Service.

(r) "National of the United States" means (1) a citizen of the United States or (2) a person who, though not a citizen of the United States, owes permanent allegiance to the United States (8 U.S.C. 1101(a)(22)).

(s) "State health authority" means the Director of the agency responsible for administering or supervising the administration of the State plan for health services under section 314(d) of the Act.

(t) "Registered nurse" means an individual who has been licensed by a State Board of Nursing to practice professional nursing pursuant to State licensing laws requiring as a minimum one of the degrees or diplomas specified in paragraph (j) of this section.

§ 57.303 Eligibility of schools.

To be eligible for a Federal Capital Contribution or a Federal Capital Loan under this subpart, the applicant shall meet the applicable requirements of sections 822(a) and 827(a) of the Act.

§ 57.304 Application by school.

(a) Each school desiring a Federal Capital Contribution or a Federal Capital Loan under Title VIII of the Act shall submit an application in such form and at such time as the Secretary may require.[1] The application shall be executed by an official authorized to act for the applicant school and to assume on behalf of the applicant school the obligations imposed by the terms and conditions of any Federal Capital Contribution or Federal Capital Loan, including the regulations of this subpart.

(b) Each application shall be reviewed to determine institutional eligibility and the reasonableness of the amount requested. When necessary to these ends, the Secretary may require the submission of additional data.

§ 57.305 Agreements for Federal Capital Contributions and Federal Capital Loans.

(a) *Federal Capital Contribution agreements.*—No application for a Federal Capital Contribution shall be approved unless there is in effect an Agreement between the Secretary and the applicant school for Federal Capital Contributions pursuant to section 822 of the Act.

(b) *Federal Capital Loan agreements.*—No application for a Federal Capital Loan shall be approved unless there is in effect an Agreement between the Secretary and the applicant school for Federal Capital Loans containing the terms required by section 827(b) of the Act and such additional terms and conditions, consistent with the applicable provisions of section 822 of the Act, as the Secretary deems appropriate.

§ 57.306 Allotment and payment of Federal Capital Contributions and Federal Capital Loans.

(a) *Annual allotment.*—At a time determined by him, the Secretary shall make allotments to each school with which he has entered into an agreement pursuant to § 57.305. The allotment to each school, whether in the form of Federal Capital Contributions or Federal Capital Loans or a combination of both, shall be an amount which bears the same ratio to the total amount of Federal funds determined by the Secretary at the time of such allotment to be available for such fiscal year for the Nursing Student Loan Program as the number of full-time students in such schools bears to the estimated total number of full-time students in all such schools in all the States during such year.

(b) *Supplementary allotment from revolving fund only.*—From funds which become available during any fiscal year for payment to schools from the revolving fund established by section 827(a) of the Act after the allotments pursuant to paragraph (a) of this section for such fiscal year have been made, the Secretary may, in his discretion and at such time as he shall determine, make supplementary allotments to schools with which he has Federal Capital Loan Agreements and who request funds for such fiscal year in excess of the amounts allotted to them pursuant to paragraph (a) of this section. If the total need for supplementary funds exceeds the amount determined by the Secretary to be available for supplementary allotments, the supplementary allotment to each school shall be reduced to whichever of the following is the smaller: (1) The supplementary amount requested or (2) an amount which bears the same ratio to the amount determined by the Secretary to be available for supplementary allotment as the number of full-time students estimated by the Secretary to be enrolled in such school bears to the estimated total number of full-time students enrolled for such year in all schools which request supplementary allotments. Any amounts remaining after such supplementary allotment may be allotted among schools in such manner as the Secretary determines will best carry out the purposes of the Act.

(c) *Payment.*—The allotment of Federal Capital Contributions and/or Federal Capital Loans to a school shall be paid in such amounts, at such times, and in such installments as will not result in unnecessary accumulation of money in any Nursing Student Loan Fund.

§ 57.307 Federal Capital Loan Promissory note.

Each Federal Capital Loan shall be made subject to the terms of a promissory note which shall be executed by an authorized official on behalf of the borrowing school. Each such note shall include such terms with respect to the payment of interest and the repayment of principal as are consistent with the provisions of seciton 827 of the Act, and shall include such other terms as the Secretary finds reasonably necessary to protect the financial interests of the United States and to promote the purposes of the Act.

§ 57.308 Nursing Student Loan Funds.

(a) *Funds established with Federal Capital Contributions.*—Any fund established by a school with Federal Capital Contributions shall be deposited and carried in a special account of such school. There shall be in such fund at all times monies representing the Institutional Capital Contribution, equal to at least one-ninth of the amount of the balance of the Federal Capial Contributions in such fund.

(1) Except for funds transferred as provided for in paragraph (a)(2) of this section, such fund shall be used by such school only for (i) nursing student loans to students; (ii) capital distribution as provided in section 826 of the Act or as agreed to by the school and the Secretary; and (iii) costs of litigation and, to the extent specifically approved by the Secretary, other collection costs that are in excess of the usual expenses incurred in the collection of nursing student loans.

(2) Not to exceed 20 percent of the amount paid to any such school from the appropriation for any fiscal year ending after June 30, 1969, for Federal Capital Contributions may be transferred to the sums available to the school for scholarship awards under section 860 of the Act, to be used for the same purpose as such sums; *Provided, however,* That where the Secretary finds in a particular case that a school has demonstrated an unusual need for scholarship funds, he may approve the transfer of any amount in excess of 20 percent of the amount so paid.

[1] Applications and instructions are available from the Division of Nursing, Bureau of Health Manpower Education, National Institutes of Health, 9000 Rockville Pike, Building 31, Bethesda, Md. 20014.

V 38-168 AUG 30 73 XUM

In the case of any transfer pursuant to this subparagraph, the proportionate amount of the Institutional Capital Contribution (i.e., one-ninth of the amount so transferred) may be withdrawn by the school from such fund.

(b) *Funds established with Federal Capital Loans.*—Any fund established by a school with Federal Capital Loans shall be deposited and carried in a special account of such school, and shall be used by such school only for (1) nursing student loans to students; (2) repayments of principal and interest on Federal Capital Loans; and (3) costs of litigation and, to the extent specifically approved by the Secretary, other collection costs that are in excess of the usual expenses incurred in the collection of nursing student loans.

§ 57.309 Nondiscrimination.

(a) No eligible applicant shall be denied a nursing student loan on the grounds of sex or creed.

(b) Attention is called to the requirements of section 845 of the Act and 45 CFR Part 83 which together provide that the Secretary may not enter into a contract under title VIII of the Act with any entity unless he receives satisfactory assurances that the entity will not discriminate on the basis of sex in the admission of individuals to its training programs.

(c) Attention is called to the requirements of Title VI of the Civil Rights Act of 1964 (78 Stat. 252; 42 U.S.C. 2000d et seq.), which provides that no person in the United States shall, on the grounds of race, color or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. A regulation implementing such title VI, which is applicable to Federal Capital Contributions and Federal Capital Loans made under Title VIII of the Act, has been issued by the Secretary with the approval of the President (45 CFR Part 80).

§ 57.310 Eligibility and selection of nursing student loan recipients.

(a) *Eligibility.*—Nursing student loans from any fund may be made only to students who are:

(1) Nationals of the United States or who are in a State for other than temporary purposes and intend to become permanent residents of a State;

(2) Enrolled, or accepted for enrollment, in the school as full-time or half-time students, as defined in § 57.302 (j) and (k) respectively;

(3) In need of the amount of the loan to pursue the course of study at the school; and

(4) Capable, in the opinion of the school, of maintaining good standing in such course of study.

(b) *Selection of nursing student loan recipients and determination of need.*—It shall be the responsibility of the school to select qualified applicants and to make reasonable determinations of need.

(1) In selecting nursing student loan recipients, the school shall give preference to licensed practical nurses.

(2) In determining whether a student is in need of a nursing student loan to pursue a full-time or half-time course of study at the school, the school shall take into consideration:

(i) The financial resources available to the student, and

(ii) The costs reasonably necessary for the student's attendance at the school, including any special needs and obligations which directly affect the student's financial ability to attend the school on a full-time or half-time basis.

(c) *Records of approval or disapproval.*—The records of the school shall indicate the basis for approval or disapproval of all or any part of each student application for a nursing student loan.

§ 57.311 Maximum amount of nursing student loan.

(a) *Maximum per academic year.*—Effective on November 18, 1971, the total of the nursing student loans made from a Fund or Funds to any student for an academic year may not exceed $2,500. The maximum amount loaned during a 12-month period to any student enrolled in a school which provides a course of study longer than the 9-month academic year may be proportionately increased.

(b) *Aggregate maximum.*—Effective on November 18, 1971, the aggregate of nursing student loans for all years from a Fund or Funds may not exceed $10,000 in the case of any student.

§ 57.312 Evidence of student indebtedness—promissory note; security.

(a) *Evidence of indebtedness—promissory note.*—Each nursing student loan to a student from any Fund or Funds shall be evidenced by a promissory note executed by the student borrower, in such form as shall be approved by the Secretary.

(1) Any substantive deviations from the promissory note form so approved shall be made only pursuant to approval by the Secretary prior to the making of any nursing student loan evidenced thereby, except that a school which elects to require security or endorsement in cases permitted under paragraph (b) of this section may include a provision reflecting such election without prior approval.

(2) Each promissory note executed subsequent to June 30, 1969, shall include a provision stating that the nursing student loan evidenced thereby shall bear interest, on the unpaid balance of such loan, computed only for periods during which repayment of the loan is required, at the rate of 3 percent per year.

(3) A copy of each executed note shall be supplied by the school to the student maker thereof.

(b) *Security.*—Neither security nor endorsement shall be required except that if the borrower is a minor and if under the applicable State law the note executed by him would not create a binding obligation, then the school is permitted to require security or endorsement.

§ 57.313 Payment of nursing student loans.

(a) Nursing student loans from any Fund or Funds shall be paid to or on behalf of student borrowers in such installments as are deemed appropriate by the school, except that no school shall pay to or on behalf of any borrower more during any given installment period (e.g., semester, term, or quarter) than the school determines that he needs for such period.

(b) No payment shall be made from any Fund to or on behalf of any student borrower if at the time of such payment such borrower is not a full-time or half-time student as defined in § 57.302(j) and (k), respectively.

§ 57.314 Repayment and collection of nursing student loans.

(a) *Repayment of nursing student loans.*—Subject to the provisions of this paragraph, any nursing student loan including interest accrued thereon, shall be repayable in equal or graduated periodic installments in amounts calculated on the basis of a 10-year repayment period. Except as otherwise provided in this paragraph, repayment of any nursing student loan made after June 30, 1969 shall begin 9 months after the student ceases to be a full-time or half-time student: *Provided, however,* That in the case of students who received nursing student loans subsequent to June 30, 1969, but prior to November 18, 1971, repayment shall begin 9 months after the student ceases to be a full-time student.

(1) When a borrower, within such 9-month period, reenters the same or another school of nursing as a full-time or half-time student, the date upon which interest accrual and the repayment period begin shall be related to and determined by the date on which he last ceases to be a full-time or half-time student at any such school: *Provided, however,* That in the case of students who received loans subsequent to June 30, 1969, but prior to November 18, 1971, this provision will apply only if the student reentered such school as a full-time student.

(2) The following periods shall be excluded from the 10-year repayment period:

(i) All periods of up to 3 years of active duty performed by the borrower as a member of a uniformed service;

(ii) All periods of up to a total of 3 years of service as a volunteer under the Peace Corps Act; and

(iii) All periods up to a total of 5 years during which the borrower is pursuing a full-time course of study at a school leading to a baccalaureate degree in nursing or an equivalent degree, or to a graduate degree in nursing, or is otherwise pursuing advanced professional training in nursing. For purposes of this paragraph, "otherwise pursuing advanced professional training in nursing" shall include only full-time training, beyond the first diploma or degree in nursing received by the particular borrower, of at least one academic year which will advance the borrower's knowledge of and strengthen his skills in the provision of nursing services.

(3) With respect to nursing student loans made before July 1, 1969, all periods specified in paragraph (a)(2) of this section after June 30, 1968, may be excluded from such repayment period where so agreed by the school which made such loan and the borrower; *Provided, however,*

(i) That in no such case may the total of the periods excluded from the repayment period pursuant to paragraphs (a)(2)(i) or (a)(2)(ii) of this section and the period between the date on which the borrower ceases to be a full-time student and the date on which, under the terms of the promissory note evidencing such loan, the repayment period is to begin, exceed 3 years and 9 months; and

(ii) That in any such case all periods during which the borrower is pursuing a full-time course of study at a school leading to a baccalaureate degree in nursing or an equivalent degree, or to a graduate degree in nursing, shall be excluded from the repayment period, without limitation; and

(iii) That in no such case may the total of the periods excluded from the repayment period because the borrower is otherwise pursuing advanced professional training in nursing and the period between the date on which the borrower ceases to be a full-time student and the date on which, under the terms of the promissory note evidencing such loan, the repayment period is to begin, exceed 5 years and 9 months.

(4) Each student borrower may (subject to the provisions of paragraph (b)(3) of this section) choose the repayment schedule which he prefers from those in use by the school and approved by the Secretary, but a student borrower may, at his option and without penalty, prepay all or part of the principal and accrued interest at any time.

(b) *Collection of nursing student loans.*—(1) Each school at which a Fund is established shall exercise due diligence in the collection of all nursing student loans due the Fund. The school shall use such collection practices as are generally accepted among institutions of higher education and which are at least as extensive and effective as those used in the collection of other student loan accounts due the school.

(2) With respect to any nursing student loan made after June 30, 1969, the school may assess a charge for failure of the borrower to pay all or part of an installment when it is due, and, in the case of a borrower who is entitled to deferment benefits under section 823(b)(2) of the Act or concellation benefits under section 823(b)(3) of the Act, for any failure to file timely and satisfactory evidence of such entitlement. The amount of such charge may not exceed $1.00 for the first month or part of a month by which such installment or evidence is late and $2.00 for each such month or part of a month thereafter. The school may elect to add the amount of such charge to the principal amount of the nursing student loan as of the first day after the day on which such installment or evidence was due or to make the amount of the charge payable to the school not later than the due date of the next installment after receipt by the borrower of notice of the assessment of the charge.

(3) With respect to any nursing student loan made after June 30, 1969, the school may provide that during the repayment period of such loan, payments of principal and interest by the borrower with respect to all the outstanding nursing student loans made to him from any Nursing Student Loan Fund shall be at a rate equal to not less than $15.00 per month.

§ 57.315 Cancellation of nursing student loans for disability and death.

(a) *Permanent and total disability.*—Determinations as to whether or not a student borrower is entitled to cancellation of indebtedness in accordance with section 823(b)(4) of the Act on the basis of permanent and total disability shall be made by the Secretary on the recommendation of the school to whose fund the borrower is indebted, supported by such medical certifications as the Secretary may require relating to the borrower's disability.

(b) *Death.*—The determination as to whether or not a student borrower is entitled to cancellation of indebtedness in accordance with section 823(b)(4) of the Act because of the death of the borrower shall be made by the school to which the borrower is indebted on the basis of a certification of death or such other official proof as is conclusive under State law.

§ 57.316 Loan cancellation or repayment for service.

(a) *Cancellation for full-time employment as a registered nurse.*—(1) Any person who obtained one or more nursing student loans from a loan Fund or Funds established under Title VIII of the Act and who engages in full-time employment as a registered nurse (including teaching in any of the fields of nurse training or service as an administrator, supervisor, or consultant in any of the fields of nursing) in any public or nonprofit private agency, institution, or organization (including neighborhood health centers) shall be entitled upon compliance with the statute, the regulations of this subpart and instructions issued pursuant thereto, to have a portion of such nursing student loans canceled as follows: Fifteen percent of the total of such loans (plus accrued interest thereon) which is unpaid on the first day of such service, for each of the first, second, and third year of such service, and 20 percent of the total of such loans (plus accrued interest thereon) for each complete fourth and fifth year of such service thereafter, up to 85 percent of the total of such loans, plus accrued interest thereon; *Provided, however,* That with respect to nursing student loans made prior to November 18, 1971 a borrower shall only be entitled to cancellation of an amount not to exceed 50 per centum of any such loan at the rate of 10 per centum of the amount of such loan plus interest thereon, which was unpaid on the first day of such service, for each complete year of such service.

(2) The determination of whether a borrower is entitled to have any portion of his nursing student loan canceled for such full-time employment as a registered nurse shall be made by the institution to whose fund such loan is payable, upon receipt and evaluation of an application for cancellation from such borrower.

(b) *Repayment and cancellation for service in shortage area.*—(1) Subject to the provisions of section 823(h) of the Act and of this paragraph, any person who has obtained the degree or diploma specified in § 57.302(j) and who has obtained an educational loan as defined in § 57.302(l) of this subpart and who enters into an agreement with the Secretary to serve as a full-time registered nurse for a period of at least two consecutive years in an area in a State determined by the Secretary, after consultation with the State health authority, to have a shortage of and need for nurses, is entitled to have the principal, and interest on, such loans repaid by the Secretary as follows:

(i) Upon completion by the borrower of the first year of service as specified in the agreement, the Secretary shall pay 30 percent of the principal of, and the interest on, each such loan which is unpaid as of the date the borrower began service.

(ii) Upon completion by the borrower of the second year of such service, the Secretary shall pay another 30 percent of the principal of, and the interest on, each such loan which was unpaid as of the date the borrower began such service.

(iii) Upon completion by the borrower of the third year of service, the Secretary shall pay another 25 percent of the principal of, and interest on, each such loan which was unpaid as of the date the borrower began such service.

(2) Notwithstanding the requirement in paragraph (b)(1) of completion of such service, the Secretary shall on or before the due date thereof, pay any loan or loan installment which may fall due within the period of service for which the borrower is eligible to receive such payments. Such payments will be made contingent upon a declaration by the borrower, at such times and in such manner as the Secretary may prescribe, that the borrower is then engaged in service eligible for such payments and will continue to be so engaged for the period required (in the absence of this subparagraph) to entitle the borrower to have such payments made, except that no more than 85 percent of the principal of any such loan shall be paid by the Secretary pursuant to this subparagraph.

V 38-168 AUG 30 73 XUM

(3) A borrower who fails to complete two years of service pursuant to the agreement entered into with the Secretary shall be liable to reimburse the Secretary for any payments made pursuant to such agreement.

(4) A borrower who fails to complete a third year of service shall be liable to reimburse the Secretary for any payments made pursuant to paragraph (b)(2) of this section in consideration of such service.

(5) In accordance with section 823(h) of the Act, an area in a State shall be determined by the Secretary, after consultation with the State health authority, to have a shortage of and need for nurses, based upon consideration of, among other pertinent factors: (i) The latest reliable statistical data available to him regarding the number of registered nurses in an area and the population to be served by such nurses; (ii) the availability of health services to the residents of the area; (iii) particular local health problems; and (iv) designation of an area under section 329(b) of the Act as one with a critical health manpower shortage. A listing of such areas in which service as a registered nurse would qualify a borrower for repayment under paragraph (b)(1) of this section will be promulgated periodically by the Secretary and published in the FEDERAL REGISTER together with an explanation of the methodology used in determining such areas.

(6) Notwithstanding the above, any person who obtained one or more nursing student loans prior to November 18, 1971, and who engages in full-time employment as a registered nurse in a public or other nonprofit hospital in an area which has been determined by the Secretary pursuant to this subparagraph to have a substantial shortage of nurses at such hospitals shall be entitled, upon compliance with the applicable statute, regulations, and instructions, to have a portion of such loans canceled as follows: Fifteen per centum of the total of such loans (plus accrued interest thereon) which is unpaid on the first day of such service, for each year of such service beginning after August 16, 1968, up to 100 percent of the total of such loans, plus accrued interest thereon.

(i) An area shall be determined to have a substantial shortage of nurses if the number of registered nurse hours of service per patient day in the public or other nonprofit hospital serving such area is lower than the median number of registered nurse hours of service per patient day for all public or other nonprofit hospitals of its category in all States. For purposes of this subparagraph, all public or other nonprofit hospitals in all States shall be grouped by the Secretary according to the following categories:

(A) Short-term general and allied special hospitals,

(B) Psychiatric hospitals,

(C) Tuberculosis hospitals,

(D) Chronic and convalescent hospitals, and

(E) All other hospitals.

(ii) For purposes of this subparagraph, a year of service in a public or other nonprofit hospital means any 12-month period of continuous service (A) after the date the person begins service in such hospital if the area primarily served by the hospital is at that time designated as an area in which there is a substantial shortage of nurses, or (B) after the date as of which the area is designated an area with a substantial shortage of nurses if the area was so designated subsequent to the date that such person began service in the hospital: *Provided*, That, when an area's designation is changed, after a borrower would otherwise be eligible for cancellation of a portion of his loan by serving in the hospital in such area, so that such area no longer has a substantial shortage of nurses, such change in designation shall not affect the eligibility of such borrower to have a portion of his loan cancelled for any year in which he continues to serve as a nurse in the hospital in such area.

(iii) The determination of whether a borrower is entitled to have a portion of his loan cancelled in accordance with this subparagraph shall be made by the institution to whose fund such loan is payable, upon receipt and evaluation of an application for cancellation from such borrower.

(iv) All determinations of the Secretary pursuant to this subparagraph shall be made on the basis of the latest reliable statistical data available to him.

(v) Hospitals in which employment will qualify borrowers for cancellation under the provisions of this subparagraph shall be identified in a list promulgated periodically by the Secretary in the FEDERAL REGISTER.

(7) Nothing in paragraph (b)(6) of this section or paragraph (a) of this section shall be construed to prevent any person from entering into an agreement with the Secretary pursuant to section 823(h) of the Act.

§ 57.317 Repayment of loans made subsequent to November 17, 1971 for failure to complete program of study.

In the event the Secretary undertakes to repay educational loans pursuant to section 830 of the Act, he shall utilize the following criteria in making his determination as to each applicant's eligibility:

(1) An applicant will be considered to have failed to complete the course of study in nursing for which an eligible educational loan was made up certification by a school of nursing that the individual ceased to be enrolled in such school subsequent to November 17, 1971;

(2) An applicant will be considered to be inexceptionally needy circumstances if, upon comparison of the income and other financial resources of the applicant with his expenses and financial obligations, the Secretary determines that repayment of such loan would constitute a serious economic burden on the applicant. In making such determination the Secretary shall take into consideration the net financial assets of the applicant and the relationship of the income available to the applicant to the low-income levels published annually by the Secretary pursuant to paragraph (3) of this section;

(3) An applicant will be considered to be from a low-income family if the applicant comes from a family with an annual income below a level based on low-income thresholds by family size published by the U.S. Bureau of the Census, adjusted annually for changes in the Consumer Price Index and multiplied by a factor to be determined by the Secretary for adaptation to this program, and the family has no substantial net financial assets. Such factor and income levels as adjusted will be published annually by the Secretary in the Federal Register;

(4) An applicant will be considered to be from a disadvantaged family if the individual comes from a family in which the annual income minus unusual expenses which contribute to the economic burdens borne by the family does not exceed the low-income levels published by the Secretary pursuant to paragraph (3) of this section and the family has no substantial net financial assets;

(5) An applicant will be considered as not having resumed his nursing studies within two years following the date the individual ceased to be a student upon a certification so stating from the applicant; and

(6) An applicant will be considered as not reasonably expected to resume his nursing studies within two years following the date upon which he terminated such studies based upon consideration of the reasons for the applicant's failure to complete these studies, taking into account such factors as academic, medical, or financial difficulties. *Provided, however*, That the Secretary shall only repay educational loans made subsequent to November 17, 1971.

§ 57.318 Records, reports, inspection and audit.

(a) *Records and reports.*—(1) Each Federal Capital Contribution and Federal Capital Loan shall be subject to the condition that the school shall maintain such records, and file with the Secretary such reports relating to the operation of the Nursing Student Loan Fund or Funds, as the Secretary may find necessary to carry out the purposes of the Act and the regulations. Where any school has both a Fund established with Federal Capital Contributions and a Fund established with Federal Capital Loans, records shall be kept separately for each Fund. All such records shall be retained until such time as agreed upon with the Secretary that there is no further need for retention and must not be destroyed regardless of completion of a Federal audit.

(2) The following individual student records not related to the operation of the Fund must be retained for five years after the individual student has ceased to be at least a half-time student;

(i) Approved or disapproved student applications for assistance;

(ii) Documentation of the financial need of applicants;

(iii) Reasons for approval or disapproval of applications, and

(iv) Such other records as the Secretary may prescribe.

Such individual student records may be destroyed at the end of such five-year period except that in all cases where questions have arisen as a result of Federal audit, such records shall be retained until resolution of all such questions.

(b) *Inspection and audit.*—Any application for a Federal Capital Contribution or a Federal Capital Loan shall constitute the consent of the applicant school to inspection and fiscal audit, by the Secretary and the Comptroller General of the United States or any of their duly authorized representatives, of the fiscal and other records of the applicant school which relate to such Contribution or Loan.

§ 57.319 Additional conditions.

The Secretary may with respect to any agreement entered into with any school pursuant to § 57.305 of this subpart, impose additional conditions prior to or at the time of any award when in his judgment such conditions are necessary to assure or protect advancement of the purposes of the agreement, the interest of the public health or the conservation of funds awarded.

§ 57.320 Noncompliance.

Whenever the Secretary finds that a participating school has failed in a material respect to comply with the applicable provisions of the Act or the regulations of this subpart he may, on reasonable notice to the school, withhold further payments of Federal Capital Contributions or Federal Capital Loans, and take such other action, including the termination of any agreement, as he finds appropriate to carry out the purposes of the applicable provisions of the Act and regulations. In such case no further expenditures shall be made from the Nursing Student Loan Fund or Funds involved until the Secretary determines that there is no longer any such failure of compliance.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 73-GL-36]

CONTROL ZONE AND TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the control zone and transition area at Pellston, Michigan.

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before October 1, 1973 will be considered before action is taken on the proposed amendments. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposals contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

Since designation of controlled airspace at Pellston, Michigan, a new instrument approach procedure has been developed for the Emmet County Airport, Pellston, Michigan. Accordingly it is necessary to alter the Pellston, Michigan, control zone and transition area to adequately protect the procedure and to contain the transition to the procedure within controlled airspace.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.171 (38 FR 351), the following control zone is amended to read:

PELLSTON, MICH.

Within a 5-mile radius of Emmet County Airport (latitude 45°34'09" N., longitude 84°47'45" W.); within 2½ miles each side of the 132° bearing from Emmet County Airport, extending from the 5-mile radius zone to 5½ miles southeast of the airport; within 5 miles each side of the Pellston VORTAC 238° radial extending from the airport to 21 miles southwest of the VORTAC; and within 1½ miles each side of the 315° bearing from Emmet County Airport, extending from the 5-mile radius zone to 6 miles northwest of the airport.

In § 71.181 (38 FR 435), the following transition area is amended to read:

PELLSTON, MICH.

That airspace extending upward from 700 feet above the surface within an 11-mile radius of Emmet County Airport (latitude 45°34'09" N., longitude 84°47'45" W.) and within a 6-mile radius of the Cheboygan Municipal Airport (latitude 45°39'15" N., longitude 84°31'06" W.); within 5 miles each side of the Pellston VORTAC 238° radial, extending from the 11-mile radius area to 22 miles southwest of the VORTAC; within 3½ miles each side of the Pellston ILS localizer northwest course extending from the 11-mile radius area to 14 miles northwest of the airport; and that airspace extending upward from 1200 feet above the surface within a 27-mile radius of the Pellston Airport north of parallel 45°45' excluding the portion overlying the Sault Ste. Marie, Michigan transition area.

These amendments are proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Des Plaines, Illinois, on August 6, 1973.

LYLE K. BROWN,
Director, Great Lakes Region.

[14 CFR Part 73]

[Airspace Docket No. 72-SO-120]

RESTRICTED AREA

Proposed Establishment; Withdrawal

On January 31, 1973, a notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER (38 FR 2988) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 73 of the Federal Aviation Regulations that would establish a restricted area, R-5315, in the vicinity of Cape Hatteras, N.C.

Because the request to accommodate Department of the Navy air combat training has been canceled, the FAA has determined that rulemaking action on the proposed amendment is not appropriate at the present time and that the notice should be withdrawn.

In consideration of the foregoing, the proposal contained in Airspace Docket No. 72-SO-120 (38 FR 2988) is hereby withdrawn.

This withdrawal of the notice of proposed rulemaking is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c))

Issued in Washington, D.C., on August 21, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

[Docket No. 32; Notice No. 73-8]

CARGO SECURITY ADVISORY STANDARDS; INTERNAL ACCOUNTABILITY PROCEDURES

Notice of Proposed Advisory Standard Setting

This is the third in a series of Cargo Security Advisory Standards to be proposed by the Department of Transportation's Office of Transportation Security.

Theft-related losses account for almost 49 percent of the dollar amount of claims paid by a major segment of the motor carrier industry and almost 56 percent of the dollar amount of claims paid by the air carrier industry. Complete data are not available for the railroad and maritime industry; such data as are

V 38-168 AUG 30 73 XUM

available, however, indicate similar percentages. With respect to the motor carrier industry, only 10 percent to 15 percent of claims dollars are paid for "known" theft. (This includes hijacking, robbery, theft, and pilferage.) The remaining theft-related claims dollars go for "shortage", which is defined as "failure to deliver all or part of a shipment to the consignee for unknown reasons." Most theft-related claims dollars, therefore, are paid for losses for which it is not known when, where, or how they occurred.

A basic means of preventing cargo loss is cargo accountability. Each time cargo is handled it should be counted, the count recorded, and the handler identified. Effective cargo accountability begins when a shipment is picked up at the shipper's dock or is accepted by the carrier at its terminal. The cargo count must be accurate and the cargo itself must be continuously traceable to facilitate identification of weaknesses in the chain of custody if a loss occurs. To be effective, accountability procedures must be established, implemented, audited, and followed up.

Accurate checking of cargo against pertinent documents when the cargo moves into or out of a depot introduces into the cargo handling process necessary elements of effective security. Accountability for cargo may change several times between pickup from the shipper and delivery to the consignee. Positive check and control points serve to illuminate where problems are occurring and who is responsible and accountable for the cargo when problems occur. Accurate record keeping and proper issuance of waybills, manifests, and other pertinent documents assist in tracing missing shipments. In order to establish a verifiable chain of custody all such documents should contain legible signatures of all persons having custody of the cargo and accurate and complete details of that custody. To increase opportunity for cross checking, all personnel processing cargo should be thoroughly familiar with not only the cargo itself but also the documents which should accompany the cargo.

It is recognized that there are differences in methods, nomenclature, documents, and procedures among the various modes of transportation. Fundamentally, however, the movement of freight between shipper and consignee involves the same basic elements. The carrier can be a water, rail, air, or motor carrier or any combination thereof. The transportation unit can be a vessel, railcar, aircraft, or truck or any combination thereof. Regardless, freight signed for on pickup is ultimately accounted for with either a clear delivery receipt or a paid claim. Good cargo accountability and control reduce theft and pilferage, shortages, and careless handling and provide quicker discovery of and response to robbery and hijacking.

Carriers striving for reduced operating expenses, greater efficiency, and increased profits should place particular emphasis on this aspect of operations because internal accountability procedures offer the greatest potential for an immediate return with a minimum of cost. Establishing or renewing a system of counting freight, recording the count, and identifying the handler all contribute to increased profits.

The advisory standard which follows suggests procedures and policies intended to assist all parts of the transportation industry in reducing the incidence of loss and theft of cargo entrusted to their care. This advisory standard is not mandatory and nothing in it replaces or modifies any statutory requirement or regulatory authority vested in any Federal, State, or local governmental body.

In consideration of the foregoing, the Department proposes to establish Part 85–3 of the Appendix to Part 85 of Title 49 of the Code of Federal Regulations, to read as follows:

APPENDIX—CARGO SECURITY ADVISORY STANDARDS

PART 85–3—INTERNAL ACCOUNTABILITY PROCEDURES

SUBPART A—GENERAL

Sec.
85–3.1 Purpose.
85–3.3 General.
85–3.5 Definitions.

SUBPART B—SHIPPER'S CARGO ACCOUNTABILITY AND PROCEDURES

85–3.11 Purpose.
85–3.13 General.

SUBPART C—CARRIER CARGO ACCOUNTABILITY AND PROCEDURES

85–3.21 Equipment controls
85–3.23 Outbound freight procedures: pickup (ordinary method).
85–3.25 Outbound freight procedures: stripping and loading.
85–3.27 Return freight.
85–3.29 Inbound freight procedures: stripping and loading.
85–3.31 Inbound freight procedures: delivery.

SUBPART D—EXCEPTIONS

85–3.41 LTL freight.
85–3.43 Dockman responsibilities.
85–3.45 Driver responsibility.
85–3.47 Supervisor responsibility.

SUBPART E—INTERCHANGE

85–3.51 General.
85–3.53 Air cargo.
85–3.55 Marine cargo.
85–3.57 Interchange: truck and rail or vessel and rail.

SUBPART F—CONTAINERS, PALLETIZING, AND UNITIZING

85–3.61 Intermodal containers.
85–3.63 Air cargo containers.

SUBPART G—CONSIGNEE CARGO ACCOUNTABILITY AND PROCEDURES

85–3.71 General.

SUBPART H—"IN BOND" CARGO

85–3.81 General.

AUTHORITY: Sec. 9(e)(1) Department of Transportation Act, 80 Stat. 944; 49 U.S.C. 1657(e)(1), and 85.3 of the Regulations of the Office of the Secretary of Transportation (49 CFR 85.3).

APPENDIX—CARGO SECURITY ADVISORY STANDARDS

PART 85–3—INTERNAL ACCOUNTABILITY PROCEDURES

Subpart A—General

Sec. 85–3.1 *Purpose.*—(a) The purpose of this part is to set forth minimum procedures and guidelines that should be observed in order to account for each step in the cargo movement process and to fix responsibility when exceptions occur.

(b) The provisions herein are general and each may not apply to every transportation mode.

Sec. 85–3.3 *General.*—(a) All areas in which documents necessary for the proper movement or accountability of cargo are processed or handled should be treated as maximum security areas. Specifically, personnel should be restricted from—

(1) Congregating in or using for breaks,
(2) Entering unless authorized, and
(3) Having unlimited and unaccounted access to or egress from—

these areas, and bills of lading and other documents should not be left unattended in these areas.

(b) Personnel preparing or processing the flow of documents and those having access to documents in any way should be included in the chain of accountability of those documents. Generally, such documents should be retained for at least one year; bills of lading should be retained for three years.

Sec. 85–3.5 *Definitions.*—As used in this part—

"Airbill" means the shipping document used for both the air and motor portions of a freight movement.

"Bill of lading" means the document by which a carrier acknowledges receipt of freight and contracts for its carriage.

"Carrier" means a common or contract carrier, but does not mean a private carrier.

"Dock receipt" means the receipt given for a shipment received or delivered at a pier or dock covering cargo for export.

"Freight bill" means the bill rendered by a carrier to a consignee of freight, including the name of the shipper, point of origin, weight, and amount of charges (if not prepaid).

"Manifest" means the document describing a vessel's cargo or the contents of a truck.

"Shipper Load and Count" means that the contents of the transportation unit were loaded and counted by the shipper and not verified by the carrier.

"Shipping container" means any receptacle used for shipping a product.

"Transportation unit" means a trailer, container, truck, vessel, or railcar.

"Waybill" means the document prepared by a carrier at the point of origin of a shipment and forwarded with the shipment, or directly by mail, to the agent at the transfer point or waybill destination, and showing—

(1) Point of origin;
(2) Destination;
(3) Route;
(4) Consignor;
(5) Consignee;
(6) Description of shipment; and
(7) Amount charged for carriage.

Subpart B—Shipper Cargo Accountability and Procedures

Sec. 85–3.11 *Purpose.*—The purpose of this subpart is to set forth minimum procedures and guidelines to assist shippers in preparing cargo for shipment.

Sec. 85–3.13 *General.*—Shippers should—

(a) Number all shipping containers in a shipment and record such numbers on the shipping documents. In addition, each container in a shipment of more than one container should be marked thusly: one of four, two of four, etc.

(b) Place clear and complete delivery and handling instructions on ends, sides, and top of each shipping container.

(c) In marking shipping containers, use indelible inks and paints and water-resistant labels to preclude obliteration or loss of marks, shipping instructions, and handling symbols.

(d) Forward all shipping documents promptly to minimize delay at domestic and international transfer points.

(e) Count the number of pieces in each shipment and retain a record of the count and condition of the pieces, and of the legible signature and employee number of the employee making the count.

(f) When practical, enclose a packing list in each container in a shipment to permit timely and complete investigation of any pilferage or damage.

(g) Consolidate small or non-uniform containers into single-load units. Unitize, palletize, and use intermodal containers whenever possible. Pilfer-proof sealing tape, corrugated fasteners, shrink wrapping, strapping, and banding reduce theft and pilferage.

(h) Require carrier personnel to verify their identity and restrict them to authorized areas. For each shipment, record the names of the driver and carrier, vehicle number, name of consignee, and number of pieces and total weight of the shipment.

(i) Before relasing a shipment to a carrier obtain in ink or indelible pencil the signature of the driver verifying receipt of the freight listed on the manifest.

(j) File in tamper- and theft-proof repository all copies of bills of lading, dock receipts, airbills, waybills, manifests and other documents. Generally, documents should be kept for one year; bills of lading should be kept for three years.

Subpart C—Carrier Cargo Accountability and Procedure

Sec. 85–3.21 *Equipment controls.*—At facilities at which cargo is handled, there should be established and maintained controls on the use on docks and platforms of all handling and moving equipment such as handcarts, forklifts, etc.

Sec. 85–3.23 *Outbound freight procedures: pickup (ordinary method).*—(a)(1) When a dispatcher receives a pickup call he should prepare a pickup order or slip for the pickup driver.

(2) The pickup order should include the date and time of call, the names of the shipper and the consignee, the number of pieces and total weight of the shipment, and the name of the driver.

(b) When the pickup driver arrives at the shipper's facility, he should note the condition of the shipment, count the pieces therein, and compare the count with that shown on the bill of lading. He should then record the date, the number of pieces, and his truck number on the pickup order and the bill of lading and sign his name legibly in ink or indelible pencil.

(c) Upon return to the carrier's terminal, the pickup driver should report to the cashier and surrender all documents and receipts. At this time all documents and receipts should be checked for completeness and accuracy.

(d)(1) The cashier should forward the bills of lading and pickup orders to the manifest clerk who prepares the dock manifest showing the names of the driver, the shipper, and the consignee, the unit number, date, and number of pieces and total weight of the shipment. A copy of the bill of lading should be forwarded to the billing office where the invoice is prepared, the bill of lading is retained, and the line haul manifest is prepared.

(2) Control copies of all bills of lading and other documents used at the terminal should be retained.

(3) Documents for high-value cargo should be specially designated, as by a stamp such as "Supervisor sign". Such cargo itself should be handled in accordance with Part 85–2 of this Appendix, "High-Value Commodity Storage".

Sec. 85–3.25 *Outbound freight procedures: stripping and loading.*—(a) At the carrier's terminal, a separate area should be designated for each of the following types of cargo: outbound, inbound, hold-on-dock, order notify, and OS&D (over, short and damaged).

(b) Upon receiving a dock manifest, a supervisor should code the manifest as to door and unit number and assign a dockman to the particular manifest. Bay doors and equipment should be clearly and properly marked.

(c) The dockman should work from the dock manifest. He should strip the unit and, if freight is docked, note its location on the bill of lading and forward the bill to the office. Bills of lading should not be left with docked freight. If high-value commodities are docked, they should be placed in a security crib pending delivery or transfer.

(d) If freight is loaded the dockman should note on the manifest, in ink or indelible pencil, the number of the outbound trailer, dock number, number of pieces and total weight of the shipment, date, origin number, and his legible signature, and return the manifest to the supervisor.

(e) Exception should be brought to the attention of OS&D and the supervisor immediately. Drivers should be questioned about exceptions as soon as practical. Any trends should be noted, recorded, and acted upon.

(f) The supervisor should compare the manifest with the typed bills of lading, record the line haul unit number on the bills, and sort the bills by destination terminal and line haul unit. Matching bills with freight maintains the audit trail and obviates having bills for which there is no freight and freight for which there are no bills.

(g) The line haul unit should then be closed by a switcher or supervisor. Whoever is authorized to apply seals should then seal the unit and record on the seal log, in ink or indelible pencil, the seal serial number and his legible signature.

(h) The outbound manifest and typed bills by unit should be put together and seal serial numbers recorded in the office by a supervisor.

(i) The outbound manifest and bills of lading should be given to the line haul driver and the unit and seal serial numbers should be checked at the gate upon departure. Both verbally and in writing, the driver should be given instructions regarding handling of any high-value, sensitive, or hazardous cargo.

Sec. 85–3.27 *Return freight.*—(a) Procedures should be established requiring that all returned high-value cargo and other selected commodities be stripped and the appropriate bills of lading returned to the office. Common sense should dictate the handling of bulk cargo.

(b) Return freight and its paperwork should be reinserted into the cargo handling process as soon as possible. The driver's legible signature, the location of the return freight on the dock, and the reason for its return should become permanent records of the carrier. A substantial part of claims paid is attributable to improper handling of return freight.

Sec. 85–3.29 *Inbound freight procedures: stripping and loading.*—(a) When the line haul unit arrives at the destination terminal, the unit number and seal serial number should be checked at the gate and recorded. The driver should take the inbound manifest and bills of lading to the office where the bills should be routed to the delivery unit by door number. One control copy of the manifest and of each bill should be kept in the office.

(b) Only authorized personnel should remove a seal from an inbound trailer. If a hostler has to break and remove a seal on a swing-door trailer before spotting it at the dock, the breaking of the seal should be witnessed from the dock by an authorized person who should check the serial number on the seal against the seal serial number entered on pertinent documents.

(c) The Inbound Supervisor should record on the line haul dispatch sheet the date, arrival time, and unit number. He should also check the number of bills against the manifest and record the date and unit number on each bill.

(d) When the dockman receives the bills he should begin to strip and load. If freight is docked, he should record on the appropriate bill, in ink or indelible pencil, the location of the freight on the dock, his legible signature, and dock number. If high-value commodities are docked, they should be placed in a security crib in accordance with the provisions of Part 85–2 of this Appendix, "High-Value Commodity Storage". If the freight is loaded, the dockman should record on each bill, in ink or indelible pencil, the unit number and his legible signature before returning the bills to the supervisor.

Sec. 85–3.31 *Inbound freight procedures: delivery.*—(a) The supervisor should match the bills of lading signed and returned by the dockman with the control copies and verify the signature of the dockman. He should then prepare the city manifest and put it into the unit "pigeon hole", pouch, or file.

(b) The assigned driver should receive the city manifest and bills from dispatch. He should note and place in the driver pouch the delivery receipt, consignee memo, driver work card, tally sheet, and detention slip.

(c) Upon leaving the terminal, the driver should be checked at the gate for seal or lock, as appropriate. Unit number, time, and date should be recorded.

(d) Upon return to terminal, the city driver should turn in to the cashier the receipts, bills, and city manifests.

Subpart D—Exceptions

Sec. 85–3.41 *LTL freight.*—LTL (Less Than Truck Load) freight should be counted and checked for visible damage at each step of the cargo handling process. This should begin at pickup where the carrier's liability attaches with the driver's signature. This should continue as the freight moves through the carrier's operation and should terminate only when the consignee accepts delivery with a clear receipt.

Sec. 85–3.43 *Dockman responsibilities.*—The dockman who strips the pickup unit, the one who loads the line haul unit, the one who unloads the line haul unit, and the one who loads the delivery unit each should sign for the count and apparent physical condition of each shipment that he handles.

Sec. 85–3.45 *Driver responsibility.*—Drivers should call in any exceptions immediately and a call-in log should be maintained.

V 38-168 AUG 30 73 XUM

Sec. 85-3.47 *Supervisor responsibility.*—Exceptions should be immediately reported to a supervisor who should attempt to resolve them immediately. Exceptions which should be reported to supervisors include not only those of count and damage but also those of instances of bills of lading for which there is no freight and freight for which there are no bills.

Subpart E—Interchange

Sec. 85-3.51 *General.*—A substantial part of cargo is interchanged between carriers, often in the same mode. Cargo moving by water or air often must be handled at terminals and/or over piers, where cargo moves from railroad or truck to forwarded or stevedoring company and then to aircraft or vessel. At the terminus of the movement, the process is reversed. These transfer points are the most vulnerable places for loss of cargo. The same type of accountability procedures apply equally well to export, import, and domestic cargo.

Sec. 85-3.53 *Air cargo.*—(a) Air carriers should count the number of shipping containers and their condition when receiving or delivering cargo. Cargo going from terminal to ramp via cart should be counted as it enters the belly of the aircraft. At destination, it should again be counted as it comes out of the aircraft prior to arrival at the terminal.

(b) The carrier should manifest all shipments for delivery on a trucking manifest. The manifest should show—

(1) Names of driver and the motor carrier and truck number.

(2) Name of air carrier employee checking cargo into truck.

(3) Date and station preparing manifest.

(4) Names of shipper and consignee, airbill number, number of pieces and total weight of shipment.

(5) Any exceptions and name of agent preparing manifest.

(6) Legible signature of the truck driver, in ink or indelible pencil, verifying receipt of cargo as shown on manifest.

Sec. 85-3.53 *Marine cargo.*—(a) Water carriers should keep a tally of cargo transferred from vessel to terminal and provide a freight release to the terminal operator.

(b) Terminal operators should assign marine checkers to count pieces, verify count, and legibly sign appropriate documents in ink or indelible pencil. The original delivery receipt should be retained as a permanent record.

(c) Cargo should not remain in terminals overly long. Delay in sorting, depalletizing, vanning, or devanning contributes to theft and pilferage.

(d) Cargo handlers should be supervised and cargo checked when loaded from terminals. Marine checkers should be present to count and verify and obtain legible signatures, during loading and tie-down on truck or railcars.

Sec. 85-3.57 *Interchange: truck and rail or vessel and rail.*—Interchange between truck and rail or vessel and rail generally involves movement into a terminal and then to a railcar. Accountability is generally assumed by the terminal operator or stevedoring company that does the loading, counting, and sealing. The rail carrier checks the seal and as long as the seal remains intact, assumes no liability for shortage discovered at destination. In a situation of Shipper Load and Count, if seals remain intact, the shipper assumes liability for shortage.

Subpart F—Containers, Palletizing, and Unitizing

Sec 85-3.61 *Intermodal containers.*—(a) Intermodal containers, adaptable to carriage by truck, railcar, barge, and ocean-going vessel, reduce vulnerability to pilferage and theft and eliminate multiple handling of individual items of cargo. A shipper can use such containers to convey goods directly from his premises to his customers.

(b) Reduced handling requirements simplify accountability for shipper, carrier, and consignee. Shippers assume responsibility for accuracy of the count; so long as containers remain sealed ad intact, carriers are not liable for shortages.

(c) Verification and recording of seal serial numbers in accordance with company procedures (see Part 85-2, "Seal Accountability and Procedures") assures accountability in the chain of custody.

Sec. 85-3.63 *Air cargo containers.*—Air cargo containers designed specifically for the configuration of aircraft offer the same advantages as intermodal containers. They provide for more efficient use of the capacity of the aircraft, reduce the number of pieces that must be counted and handled, and minimize exposure to weather, theft, pilferage, and damage, thereby simplifying accountability.

Subpart G—Consignee Cargo Accountability and Procedures

Sec. 85-3.71 *General.*—Delay in taking delivery of cargo increases the possibility of theft and pilferage and makes recovery of lost shipments and pieces more difficult. Since pilferage from shipping containers can sometimes escape detection at time of delivery, consignees should—

(a) Inspect shipping containers for signs of break-in, opening, crushing, and resealing. Shipping containers should be inventoried in the presence of a carrier employee.

(b) Weigh shipping containers and compare the weights with those recorded on pertinent documents.

(c) Note on the carrier's receipt the number of pieces in each shipping container as well as their condition.

(d) Obtain, in ink or indelible pencil, the legible signature of the driver on consignee's copy of the receipt.

(e) Report concealed loss or damage regardless of the apparent condition of the cargo at time of delivery.

(f) Obtain a copy of the carrier's inspection report and file it with copies of the other documents concerning the cargo.

(g) Retain as a permanent record the legible signature, in ink or indelible pencil, piece count, and condition vertification of the employee accepting the cargo.

(h) Retain all essential documents for at least one year; bills of lading should be retained for three years.

Subpart H—"In Bond" Cargo

Sec. 85-3.81 *General.*—Special care should be taken with "in bond" cargo handled under Customs supervision. United States Customs inspectors count, to the greatest extent possible, merchandise landed and quantities delivered. They also verify selected bills of lading at time of unloading. Ordinarily they do not use tally sheets, OS&D (over, short, and damaged) reports, or other records of the importing carrier to determine quantity.

Before taking final action to issue the proposed advisory standard, the Department will consider the timely comments of all interested persons. Comments should identify the docket or notice number (see above) and be submitted to the Docket Clerk, Office of the General Counsel, TGC, Department of Transportation, Washington, D.C. 20590. Comments received on or before October 19, 1973, will be considered before final action is taken. All docketed comments will be available for public inspection and copying, both before and after the closing date for comments, in the Office of the Assistant General Counsel for Regulation, Room 10100, Nassif Building, 400 Seventh Street SW., Washington, D.C., between 9 a.m. and 5:30 p.m. local time, Monday through Friday, except Federal holidays.

This proposal is issued under authority of section 9(e)(1) of the Department of Transportation Act, 80 Stat. 944 (49 U.S.C. 1657(e)(1)), and § 85.3 of the Regulations of the Office of the Secretary of Transportation (49 CFR 85.3).

Issued in Washington, D.C., on August 28, 1973.

RICHARD F. LALLY,
Director of Transportation Security.

[FR Doc.73-18511 Filed 8-29-73;8:45 am]

SMALL BUSINESS ADMINISTRATION

[13 CFR Part 102]

[Rev. 2]

DISCLOSURE OF INFORMATION

Notice of Proposed Rulemaking

Notice is hereby given that pursuant to section 5 of the Small Business Act, 72 Stat. 385, 15 U.S.C. 634, the Small Business Administration proposes to revise Part 102 of Chapter I, Title 13, of the Code of Federal Regulations, revised as of January 1, 1973. Part 102 is the SBA Regulation, which, among other things, implements the Freedom of Information Act, 5 U.S.C. 552.

Prior to final adoption of the proposed revision, consideration will be given to any written comments or suggestions submitted in triplicate to H. Gregory Austin, General Counsel, Small Business Administration, Washington, D.C. 20416, on or before October 1, 1973. Any written material or suggestions submitted will be available for public inspection during regular business hours in the law library of the Office of General Counsel located in Room 714, 1441 L Street NW., Washington, D.C.

Information.—The proposed revision reflects changes in the designation of agency offices, in the official authorized to make final agency decisions on requests for the release of agency records and information, and in the source for summaries of decisions of SBA's Size Appeals Board. A new paragraph in § 102.3 sets forth the agency determination that its mailing lists are not considered public information and are not usually to be made available for commercial or other solicitations.

The revision also includes a new paragraph in § 102.4 to cover the specificity required in identifying requested records as well as the manner in which categorical requests will be handled. Section 102.5 has been changed to allow appeals to the Assistant Administrator for Congressional and Public Affairs of requests for records and information which have not been acted upon within a reasonable time (20 days in normal circumstances) and to provide that appeals will be deemed to include, in the case of information exempt from disclosure, a request that the exemption be waived. Added to the paragraph of this section which governs the agency decision on appeals is a requirement that the notification to the requester include advice on the availability of judicial review.

A new paragraph has also been added to § 102.6 to authorize the waiver of fees when in the public interest to do so and to describe some of the circumstances when it will be so considered.

As proposed to be revised herein, Part 102 would read as follows:

PART 102—DISCLOSURE OF INFORMATION

Sec.
102.1 Purpose and policy.
102.2 Scope.
102.3 Information and records available to the public and exempt from disclosure.
102.4 Public access to information and records.
102.5 Administrative appeal of refusal to disclose.
102.6 Fees.
102.7 Appearances and testimony by SBA officers and employees.

AUTHORITY: Sec. 5, 72 Stat. 385, (15 U.S.C. 634).

§ 102.1 Purpose and policy.

(a) This part establishes policy and procedures governing public access to information contained in the files, documents, and records of the Small Business Administration (SBA). In keeping with the spirit as well as the letter of the Freedom of Information Act, 5 U.S.C. 552, it reflects SBA policy that disclosure is the general rule rather than the exception. This policy in favor of disclosure will be extended to information technically exempt from disclosure under the law where such disclosure would not adversely affect some legitimate public or private interest the protection of which is desirable, would not otherwise violate law or other authority, and would not impose an unreasonable burden upon SBA.

(b) This part is also a recognition that the soundness of many SBA programs depends in large measure upon the reliability of commercial, technical, financial and business information relating to the affairs of applicants for SBA assistance. Much of this information would, if made public, jeopardize the credit and competitive business position of an applicant. It is essential therefore, that applicants be assured that information of this kind is considered confidential. Thus they will be encouraged to make complete disclosure of material bearing upon an application and SBA decisions on whether financial or other assistance should be approved will be made with greater assurance that the interests of the United States will be protected.

§ 102.2 Scope.

(a) This part applies to all files, documents, records, and information obtained or produced by officers and employees of SBA in the course of their official duties as well as all files, documents, records, and other information in the custody or control of any SBA officer or employee. It does not purport to describe or set forth every Agency file, document, record, or item of information which may or may not be disclosed or to incorporate every exemption from disclosure provided by law. Material described is illustrative rather than exclusive.

(b) Moreover, this part deals with the availability of information to the public, including parties involved in litigation affecting the Agency. It does not apply to the disclosure of information to persons, organizations, or institutions participating in SBA programs or activities, or to the executive and legislative branches of the Federal Government.

§ 102.3 Information and records available to the public and exempt from disclosure.

(a) *General.*—(1) All SBA information and records not exempt by law are available for public inspection and copying in, or through, facilities described in § 102.4. Exempt materials may also be made available where disclosure would not adversely affect some legitimate public or private interest, would not otherwise violate law or other authority, and would not impose an unreasonable burden on SBA. Reasonable requests for material not in existence may also be honored where their compilation will not unduly interfere with SBA activities and programs. Requests for information will be answered as promptly as practicable.

(2) SBA Standard Operating Procedure (SOP) 40 03 "Disclosure of Information," which is available in the facilities described in § 102.4, sets forth in detail the information, records, and other data which are, or may be, available to the public as well as those exempt from disclosure. Specific examples of information routinely available in SBA facilities are listed in § 102.4. Examples of information and other materials, available and exempt, in which there should be general interest are discussed in succeeding paragraphs of this section.

(b) *Information and records relating to SBA assistance programs.*—(1) Although SBA assistance programs typically involve the consideration of material constituting in large part trade secrets, commercial or financial information, information submitted in confidence, or information the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, the following kinds of information are nevertheless available to the public:

(i) Names of recipients of loans, small business investment company licenses, certificates of competency, grants, lease guarantees, surety bond guarantees, and other assistance.

(ii) Names of officers, directors, stockholders, or partners of recipient firms.

(iii) The kind and amount of assistance.

(iv) The purpose of the approved assistance in general terms.

(v) The extent of outside participation, if any.

(vi) Statistical data on assistance programs.

(vii) Decisions, rulings, and records showing Agency actions in specific factual situations where identifying details exempt from disclosure may be effectively deleted.

(2) Information exempt from disclosure to the public includes:

(i) Information other than statistical on declined, withdrawn, or canceled applications for assistance.

(ii) Financial or other confidential information about applicants or borrowers obtained from any source.

(iii) Individual case files relating to such activities as loans, licenses, lease guarantees, surety bond guarantees, size determinations, facilities inventory, prime and subcontracting, and Service Corps of Retired Executives (SCORE), and other volunteer organizations.

(iv) Internal Agency communications showing, for example, recommendations on applications for assistance.

(v) Information concerning losses, delinquencies and defaults in individual cases.

(vi) Names of participating lending institutions without their consent.

(vii) Information regarding the character of applicants, borrowers, or other persons.

(viii) Financial reports (including the names of portfolio concerns) of small business investment companies and divestiture plans of such companies.

(ix) Examination, audit, investigation, and litigation reports.

(c) *Opinion Digest.*—(1) *Description.*—This Digest which is available for inspection and copying in the facilities described in § 102.4, is largely a compilation of selected advisory legal opinions involving specific facts and specific parties. As such they do not necessarily reflect final Agency opinions, interpretations, or decisions in any given cases. Moreover, the opinions are based on authority in effect at the time the opinions were rendered and such authority may no longer be controlling because of a change in law, regulation, or other directive pertaining to the matter. They do, however, provide guides to the reasoning utilized in analyzing given problems and questions which may have widespread implications and are made available to the public primarily on this basis rather than as authoritative statements of continuing precedent.

(2) *Identifying details omitted.*—Identifying details have been omitted in most cases to avoid the possibility of violations of 18 U.S.C. 1905 which imposes criminal penalties for the disclosure of trade secrets, financial data, and other confidential information. Also avoided is

V 38-168 AUG 30 73 XUM

the disclosure of other information exempt from disclosure. Absence of identifying details has no bearing or effect on the general public and does not affect the validity of the opinion disclosed.

(d) *Size decisions.*—Agency determinations of the size status of business concerns resulting from appeals to the Size Appeals Board, as provided in Part 121 of this chapter, have been summarized and indexed in the Digest of the Decisions of the Size Appeals Board, available for inspection and copying in the facilities described in § 102.4. Complete decisions will be available on request except that in cases which contain trade secrets, commercial or financial information, or other confidential information, they will be available if identifying details can be deleted without compromising the confidental information.

(e) *Minutes of the Loan Policy Board.*—These are available for inspection and copying in the National Office. The Loan Policy Board was terminated by Reorganization Plan No. 4 of 1965, effective July 27, 1965, and its functions transferred to the SBA Administrator. Despite the Board's abolition, policies adopted by the Board remain in effect until affirmative action by the Administrator changes them. The minutes provide guides to the reasons for many such policies. Part 120 of this chapter contains a statement of SBA's loan policies.

(f) *Personnel and similar files.*—The names, position titles, grades, salaries, and duty stations of SBA employees are public information but their home addresses are not so considered. The disclosure of private or personal information contained in other Agency files, for example, in the files relating to members of SBA advisory boards, committees, or councils and Service Corps of Retired Executives (SCORE) and to applicants for SBA assistance would normally amount to a clearly unwarranted invasion of privacy and thus would be considered exempt.

(g) *Agency staff directives, standard operating procedures, and other instructions to staff.*—All are considered public information except those relating to audits and investigations, internal financial management and fiscal operations, and portions of directives containing confidential standards and instructions, as, for example, instructions concerning negotiations or bargaining in connection with the disposition and liquidation of loans and loan collateral held by SBA.

(h) *Litigation materials.*—Copies of pleadings, motions, orders, transcripts of testimony, and documentary evidence introduced in pending or closed litigation are available once such items are a matter of public record.

(i) *Internal communications.*—Interagency or intra-agency communications not routinely available to a party in litigation with SBA are exempt from disclosure. These would include, among other things, drafts, memoranda between officials or agencies, opinions and interpretations prepared by SBA attorneys and other staff members or consultants for use of the Agency (except as made available in the Opinion Digest referred to in paragraph (c) of this section), research studies performed internally or under contract for internal management purposes, and internal management reports, which relate to the policymaking and decisional processes of the Agency and its officials. However, the exemption does not apply to nonexempt material contained in such communications if severable in such a way as not to compromise the policymaking and decisional processes intended to be protected by this exemption.

(j) *Mailing lists.*—The Agency considers exempt from public disclosure as an unwarranted invasion of privacy mailing lists of its clientele, employees, advisory councils, and other persons and organizations involved or dealing with the Agency. The Agency will not distribute, sell, or otherwise make available the names and addresses of such persons and organizations for purposes of commercial or other solicitation not clearly in the public interest.

§ 102.4 Public access to information and records.

(a) *Facilities.*—Facilities in SBA regional and district offices are available to the public during normal business hours for requesting, inspecting and copying information and records. Reproduction machines will also be available in, or through, such facilities. The Washington, D.C. District Office facilities are available to members of the public in the District of Columbia Metropolitan Area and that office will make necessary referrals to the National Office in appropriate cases. A list of these offices is included in Part 101 of this chapter or may be obtained by writing to the Small Business Administration, Washington, D.C. 20416. Addresses and telephone numbers of SBA offices are also included in the telephone directories for the many cities in which the offices are located.

(b) *Materials routinely available in field office facilities.*—(1) For the convenience of the public certain Agency materials will be maintained and readily available in or through these facilities. These will include:

(i) All SBA directives, policy and procedural issuances, and other staff instructions not exempt from disclosure.

(ii) SBA Rules and Regulations (including Interpretations).

(iii) Opinion Digest.

(iv) Digest of the Decisions of the Size Appeals Board which summarizes decisions resulting from appeals of small business size decisions to SBA's Size Appeals Board.

(v) Public Index of Agency materials and lists of directives, policy and procedural issuances, forms, and reports.

(vi) Names of recipients of SBA assistance, and related information not exempt from disclosure.

(2) Examples of other kinds of materials which, in addition to the above, may also be available, through the field office facilities or in the National Office:

(i) Minutes of the Loan Policy Board (National Office only).

(ii) Management and technical assistance publications issued on a free or for-sale basis, as listed on SBA Forms 115 A and B.

(iii) SBA's Annual Reports to the President and the Congress.

(iv) SBIC Digest and policy procedural releases sent to all small business investment companies.

(v) Press releases.

(vi) Routine statistical reports on Agency activities.

(vii) Pamphlets describing SBA programs.

(viii) Sample SBA forms.

(ix) Comments on proposed rulemaking received from the public (National Office only).

(c) *Other materials.*—Requests for information, records, and other materials not readily available in the field office facilities may be requested through such facilities. Requests will be referred to the proper SBA office and the person making the request will be notified of the availability of the material and any charges involved. If the material requested is the exclusive concern of another agency the request will be referred to that agency. If the material is of concern to more than one agency, the request will be referred to the agency whose interest is paramount for a decision to disclose or withhold the material.

(d) *Identifiable records.*—(1) *Specificity required.*—Requests shall include a reasonably specific description of the particular record sought in order to facilitate its location. A request shall not be denied on the sole ground that the record has not been properly identified if the description and the knowledge Agency personnel have of the contents of their files, together enable the record to be located without unduly burdening the Agency.

(2) *Categorical requests.*—Requests calling for all records falling within a reasonably specific category shall be regarded as "identifiable records" if the Agency can reasonably determine which particular records come within the request, and can retrieve them without undue burden on its operations because of the staff time consumed or the resulting disruption of files. If the Agency determines that there is such an undue burden, the requester shall nevertheless have the opportunity to discuss his request with Agency staff in order to reduce it to manageable proportions.

(e) *Forms for requesting information.*—(1) SBA Form 774, "Request for SBA Forms, Documents, Records and Other Information" is used for processing requests. Any person desiring information or records may be asked to complete Part 1 of the form identifying the material requested and the copies, if any, desired. If requests are received by mail or telephone, Part I will be completed by SBA.

(2) SBA Form 773 is a form letter or notice which will advise the requester of the availability of the material, any charges involved, or the referral of the request to another office or agency.

(3) SBA Form 772 will be used to record transactions involving charges and a copy thereof will serve as a receipt to the purchaser.

§ 102.5 Administrative appeal of refusal to disclose.

(a) *Who may appeal.*—Any person whose request for information or records has been denied, or has not been acted upon within a reasonable time, shall be entitled to submit a written appeal to the Agency. A request shall not have been acted upon within a reasonable time if a decision is not made within 20 working days of receipt of any such request, unless the Agency shall have notified the requester in writing that special circumstances warrant a more extended deadline.

(b) *Form of appeal.*—While no particular form is prescribed, the letter or other written statement utilized for such purpose shall contain a description of the information or record requested, the name and place of employment of the SBA official or employee who denied the request, the reason, if any, given for the denial, and such other pertinent facts and statements as the appellant may deem appropriate. SBA may request additional details where the information submitted is insufficient to support a decison.

(c) *Where to appeal.*—Appeals shall be addressed to the Assistant Administrator for Congressional and Public Affairs, Small Business Administration, Washington, D.C. 20416.

(d) *Nature of appeal.*—An appeal shall be deemed by SBA to constitute a request that the information or records sought are not exempt from disclosure under the law but, if exempt, that they should nevertheless be disclosed in accordance with the policy stated in § 102.1(a).

(e) *Agency decision.*—Final Agency decision on appeals from refusals to disclose information or records shall be made by the Assistant Administrator for Congressional and Public Affairs. He shall promptly review each appeal and provide appellant and other interested parties, if any, with a written notification of the decision. If the decision upholds the refusal to disclose, the notification shall set forth the exemptions from disclosure under the Freedom of Information Act which form the basis of the decision. The notification shall also advise that judicial review is available on complaint to the district court of the United States in the district in which the appellant resides or has his principal place of business, or in which the Agency records are located.

§ 102.6 Fees.

(a) *Basis.*—Factors taken into account in establishing fees for reproducing copies of documents, records search, and compilation of materials include reproduction cost, average salary of employees involved, and overhead cost.

(b) *Method of payment.*—Fees may be paid in cash, by personal check, or by other form of remittance suitable to SBA. Payment shall normally be due at the time the service is rendered. However, where extensive record searches or compilations are involved the person requesting the service shall pay whatever is estimated by SBA to be appropriate before any search or compilation is undertaken. Fees paid in advance shall be held in suspense pending completion of the search or compilation and adjusted when final charges have been determined.

(c) *Prices.*—(1) For documents readily available in SBA facilities the charge for reproduction will be ten (10) cents per page.

(2) For requests requiring a search of SBA records but no compilation, there will be a minimum charge of $2 plus the regular charge of 10 cents per page for reproduction. In addition, the total charge will include a charge based upon employees' time required for the search.

(3) For information which has to be compiled the charge will include the cost of employees' time, cost of computer runs or other equipment use, and other overhead expense. Since there is no obligation on the part of the Agency to compile records or data, requests for compilations must be reasonable and not unduly interfere with normal SBA operations or program activities.

(4) Persons may inspect and copy documents by their own means in the SBA facilities without charge except for search or compilation charges which may be otherwise payable.

(d) *Waiver of fees.*—Fees will be waived when less than $1.00 or when it is in the public interest to do so. Such a waiver will be in the public interest, for example, when in the determination of the Agency the request will not impose an undue burden or expense upon it *and* the request is (1) from another Government organization, Federal, State or local; (2) for the purpose of obtaining information primarily for the benefit of the general public rather than for the primary benefit of the requester, as will be the case with certain requests from news media and from organizations engaged in a nonprofit activity designed for public safety, health, welfare, or education; (3) from employees and former employees seeking information from their own personnel records; (4) from or on behalf of the defending party in connection with a proceeding against such party by the Federal Government; (5) from a low-income person and the fee would impose a financial hardship.

§ 102.7 Appearances and testimony by SBA officers and employees.

Whenever an officer or employee of SBA is served with a subpoena demanding the disclosure of the information or the production of files, documents, and records described in this part, or is requested by any court, committee or other body to disclose such information, the officer or employee shall promptly inform his superior of the requirements of the subpoena or request and shall ask for instructions from the Assistant Administrator for Congressional and Public Affairs with respect thereto. Such officer or employee shall appear before the court, committee or body and, if the Assistant Administrator has not authorized disclosure, the employee shall respectfully decline to disclose the information or produce the files, documents and records demanded or requested, basing such refusal upon this part.

Dated August 23, 1973.

THOMAS S. KLEPPE,
Administrator.

Office of the Secretary

[Treasury Department Order No. 107; (Revision 17)]

DIRECTOR, OFFICE OF ADMINISTRATIVE PROGRAMS ET AL.

Authority To Affix Seal of the Treasury Department

By virtue of the authority vested in the Secretary of the Treasury, including the authority conferred by 5 U.S.C. 301, and by virtue of the authority delegated to me by Treasury Department Order No. 190 (Revised), *it is hereby ordered*, That:

1. Except as provided in paragraph 2, the following officers are authorized to affix the Seal of the Treasury Department in the authentication of originals and copies of books, records, papers, writings, and documents of the Department, for all purposes, including the purposes authorized by 28 U.S.C. 1733(b):

(a) In the Office of Administrative Programs:

1. Director, Office of Administrative Programs.
2. Chief, Communications and Records Management Division.
3. Chief, Printing and Personal Property Division.
4. Records Management Officer, Office of the Secretary.
5. Chief, Directives Control and Distribution.

(b) In the Internal Revenue Service:

1. Commissioner of Internal Revenue.
2. Assistant Commissioner (Compliance).
3. Deputy Assistant Commissioner (Compliance).
4. Chief, Disclosure Staff.
5. Assistant Chief, Disclosure Staff.

(c) In the United States Customs Service:

1. Commissioner of Customs.
2. Deputy Commissioner of Customs.
3. Assistant Commissioner of Customs (Administration).
4. Assistant Commissioner of Customs (Investigations).
5. Assistant Commissioner of Customs (Operations).
6. Assistant Commissioner of Customs (Regulations and Rulings).
7. Assistant Commissioner of Customs (Security and Audit).

(d) In the Bureau of the Public Debt:

1. Commissioner of the Public Debt.
2. Assistant Commissioner of the Public Debt.
3. Director of the Chicago Office.

(e) In the Bureau of Alcohol, Tobacco and Firearms:

1. Director.
2. Deputy Director.
3. Regional Directors.
4. Assistant Director for Technical and Scientific Services.
5. Chief, Technical Services Division.

2. Copies of documents which are to be published in the FEDERAL REGISTER may be certified only by the officers named in paragraph 1(a) of this Order.

3. The Director of Administraitve Programs, the Commissioner of Internal Revenue, the Commissioner of the Public Debt, and the Director, Bureau of Alcohol, Tobacco and Firearms are authorized to procure and maintain custody of the dies of the Treasury Seal.

The officers authorized in paragraph 1(c) may make use of such dies.

Treasury Department Order No. 107 (Revision No. 16) is superseded.

Dated August 23, 1973.

[SEAL] J. ELTON GREENLEE,
Acting Assistant Secretary for Administration.

[FR Doc.73-18435 Filed 8-29-73; 8:45 am]

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration

REGIONAL CRIMINAL JUSTICE PLANNING BOARDS

Cancellation of Proposed Guideline

Background. On June 13, 1973, the Law Enforcement Assistance Administration published notice of a proposed guideline on composition of Regional Criminal Justice Planning Boards. See notice of proposed guideline, 38 FR 15535 (1973).

This guideline would have required that a majority of Regional Criminal Justice Planning Boards established pursuant to the Omnibus Crime Control and Safe Streets Act (Public Law 90-351, as amended by Public Law 91-644, 42 U.S.C. 3701 et seq.) be appointed by local elected executive officials.

Cancellation. On August 6, 1973, the President signed into law Public Law 93-83, the Crime Control Act of 1973 (87 Stat. 197).

Section 203(a) provides as follows:

SEC. 203. (a) A grant made under this part to a State shall be utilized by the State to establish and maintain a State planning agency. Such agency shall be created or designated by the chief executive of the State and shall be subject to his jurisdiction. The State planning agency and any regional planning units within the State shall, within their respective jurisdictions, be representative of the law enforcement and criminal justice agencies, units of general local government, and public agencies maintaining programs to reduce and control crime and may include representatives of citizen, professional, and community organizations. The regional planning units within the State shall be comprised of a majority of local elected officials.

The statutory requirement that a majority of regional planning units be *comprised* of local elected officials supercedes the proposed guideline. LEAA is developing overall guidelines to implement the statutory amendments. These guidelines will be cleared through normal channels with representatives of State and local government.

DONALD E. SANTARELLI,
Administrator.

[FR Doc.73-18411 Filed 8-29-73; 8:45 am]

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ASSOCIATE STATE DIRECTOR ET AL., CALIF.

Delegation of Authority Regarding Contracts and Leases

AUGUST 21, 1973.

Pursuant to the redelegation of authority contained in BLM Manual 1510.03C:

A. The Associate State Director, Chief, Division of Management Services and Chief, Branch of Administrative Management, State Office, are authorized to enter into contracts for supplies and services and capitalized property within the limits of procurement authority delegated to the State Director.

B. The District Managers and Chief, Division of Administration, District Offices; and the California Desert Planning Director, Riverside, with the exception of capitalized equipment and major noncapitalized property, are authorized:

1. To procure supplies and services available from established sources of supply regardless of amount.

2. To enter into contracts pursuant to section 302(c)(3) of the FPAS Act, for supplies, services and rental of equipment and aircraft not to exceed $2,500 per transaction; and for construction not to exceed $2,000 per transaction; provided that the requirement is not available from established sources of supply.

C. The District Managers and Chief, Division of Administration, District Offices; and Protection Specialists, Division of Technical Services, State Office, are authorized to enter into contracts pursuant to section 302(c)(2) of the FPAS Act, regardless of amount. This authority is to be used for rental of equipment and aircraft and for procurement of supplies and services required for emergency fire suppression and presuppression, where the order exceeds $2,500.

D. The District Managers may redelegate the authority for use of Standard Form 44 Order-Invoice-Voucher to any qualified employees under their jurisdiction. The redelegation must be in writing by name designation and subject to monetary and other limitations as may be prescribed by the District Manager. The designated employee, State Office, and Service Centers shall be furnished with a copy of all such redelegations.

E. Delegation of authority regarding contracts and leases published in the FEDERAL REGISTER on January 17, 1973, Vol. 38, No. 11, is hereby revoked.

J. R. PENNY,
State Director.

[Serial Colorado 18844]

COLORADO

Designation of Powderhorn Primitive Area

AUGUST 20, 1973.

Pursuant to the authority in 43 CFR. Subpart 2070, and the authorization from the Director dated August 20, 1973, I hereby designate the public lands in the following described area as the Powderhorn Primitive Area:

COLORADO

NEW MEXICO PRINCIPAL MERIDIAN

Beginning at the northeast corner of Sec. 20, T. 46 N., R. 2 W.

Thence southerly up the east bank of the East Fork of Powderhorn Creek approximately 6½ miles to its intersection with the north boundary of Sec. 21, T. 45 N., R. 2 W.; thence easterly approximately 2¾ miles to the southwest corner of Sec. 13, T. 45 N., R. 2 W.; thence south ½ mile, west ¾ mile, south ¼ mile, east ½ mile, south ¼ mile, east ¾ mile, south ¼ mile, east ¼ mile, south ¾ mile, and west ¾ mile to the northwest corner of Sec. 36, T. 45 N., R. 2 W.; thence south one mile, and east approximately one mile to Cebolla Creek; thence southerly approximately ¼ mile along the west bank of Cebolla Creek; thence west ¼ mile to the southwest corner of the NE¼NE¼ of Sec. 1, T. 44 N., R. 2 W.; thence south approximately 1¼ miles; thence northwesterly approximately one-eighth mile to a point where Cebolla Creek crosses the Cathedral Road; thence northwesterly and then southwesterly ½ mile along the north bank of Cebolla Creek; thence approximately ¼ mile west to the west quarter corner of Sec. 12, T. 44 N., R. 2 W.; thence west ¼ mile, south ¼ mile, west ½ mile, south ½ mile, west ¼ mile, south ¼ mile, west ¼ mile, south ¼ mile, west ¼ mile, and south ¼ mile to the boundary of the Gunnison National Forest; thence 1½ miles west along said boundary, north three miles along said boundary, west eight miles along said boundary to the southwest corner of Sec. 31, T. 45 N., R. 3 W.; thence north 2½ miles to the west quarter corner of Sec. 19, east ¾ mile, north ¼ mile, west ¼ mile, north ½ mile, west ¼ mile, north ¾ mile, east ½ mile, south ¼ mile, east ¼ mile, south ¼ mile, east ¼ mile, north ¼ mile, east ¼ mile, north 1¼ miles to the north quarter corner of Sec. 8, T. 45 N., R. 3 W.; thence east approximately 2½ miles to the northeast corner of Sec. 10, T. 45 N., R. 3 W.; thence south approximately one-eighth mile to the northwest corner of Sec. 11; thence east approximately 2¼ miles to the West Fork of Powderhorn Creek; thence northerly along the west bank of the West Fork of Powderhorn Creek to the north section line of Sec. 20, T. 46 N., R. 2 W.; thence east approximately ¾ mile to the point of beginning.

The area described aggregates approximately 40,400 acres.

The area described is Bureau of Outdoor Recreation Class V-Primitive.

DALE R. ANDRUS,
State Director.

COOS BAY DISTRICT ADVISORY BOARD

Notice of Meeting and Agenda

Notice is hereby given that the Bureau of Land Management Coos Bay District Advisory Board will meet at 8:30 a.m. on September 21, 1973 at the district office located at 333 South 4th Street, Coos Bay, Oregon.

The agenda for the meeting is a field trip to observe timber lands management operations and environmental considerations. No formal discussion is scheduled.

The meeting will be open to the public, but they will be required to furnish their own transportation and lunches.

EDWARD G. STAUBER,
District Manager.

AUGUST 20, 1973.

PROPOSED ALLAMUCHY MOUNTAIN STATE PARK LAND ACQUISITION

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental impact statement for the proposed Allamuchy Mountain State Park Land Acquisition. Notice of availability of the draft environmental statement inviting comments was announced in the FEDERAL REGISTER on November 6, 1972 (DES 72-112).

The environmental statement considers the acquisition of approximately 3,605 acres of land by the New Jersey Department of Environmental Protection to be added to present State holdings at Allamuchy Mountain State Park in Sussex and Warren Counties. The land will help serve the outdoor recreation needs of New Jersey and the metropolitan New York City area.

Copies are available for inspection at the following locations:

Bureau of Outdoor Recreation, Northeast Region, Federal Office Building, Room 9510, 600 Arch Street, Philadelphia, Pennsylvania 19106.
Department of the Interior, Division of State Programs, Bureau of Outdoor Recreation, Washington, D.C. 20240.
Department of Community Affairs, Division of State and Regional Planning, P.O. Box 2768, Trenton, New Jersey 08625.
Office of the County Planning Director, Sussex County Planning Board, P.O. Box 69, Newton, New Jersey 07860.
Warren County Planning Board, 2340 William Street, Alpha, New Jersey 08866.

Copies may be obtained by writing the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151. Please refer to the Statement number above.

Dated August 22, 1973.

JOHN M. SEIDL,
Deputy Assistant Secretary of the Interior.

PROPOSED OPERATION, MAINTENANCE AND DEVELOPMENT OF THE TURNBULL NATIONAL WILDLIFE REFUGE, WASH.

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, Public Law 91-190, the Department of the Interior has prepared a draft environmental statement for the proposed operation, maintenance and development of the Turnbull National Wildlife Refuge, Washington, and invites written comments within 45 days of this notice.

The proposal recommends continued operation, maintenance and development of the Turnbull National Wildlife Refuge, Spokane County, Washington, including acquisition of 2,795.5 acres of additional lands.

Bureau of Sport Fisheries and Wildlife, 1500 Plaza Building, 1500 N.E. Irving Street, P.O. Box 3737, Portland, Oregon 97208.
Spokane County Regional Planning Conference, Court House, Spokane, Washington 99201.
Bureau of Sport Fisheries and Wildlife, Office of Environmental Quality, Department of the Interior, Room 2246, 18th and C Streets, NW., Washington, D.C. 20240.

Single copies may be obtained by writing the Chief, Office of Environmental Quality, Bureau of Sport Fisheries and Wildlife, Department of the Interior, Washington, D.C. 20240. Comments concerning the proposed action should also be addressed to the Chief, Office of Environmental Quality. Please refer to the statement number above.

Dated August 22, 1973.

JOHN M. SEIDL,
Deputy Assistant Secretary, Program Development and Budget.

ALPINE LAKES MANAGEMENT PROPOSAL

Notice of Public Hearing

Notice is hereby given that a public hearing will be held, beginning at 9:00 a.m. on Friday, October 19, 1973, in the Douglas County P.U.D. Auditorium, East Wenatchee, Washington, and continuing at 9:00 a.m. on Saturday, October 20, 1973, in the Rainier Room, Seattle Center, Seattle, Washington. Purpose of the hearing is to consider a recommended land use plan for the Alpine Lakes Area that could result in a recommendation to the Secretary of Agriculture for the establishment of the Alpine Lakes Wilderness, comprised of approximately 285,000 acres. The Alpine Lakes Area is located in portions of the Snoqualmie and Wenatchee National Forests located in Chelan, King, Kittitas and Snohomish Counties in the State of Washington.

A brochure containing a map and information about the proposed Wilderness and management direction for a larger area may be obtained from the following addresses: Forest Supervisor, Snoqualmie National Forest, 1601 Second Avenue Building, Seattle, Washington 98101; Forest Supervisor, Wenatchee National Forest, 3 South Wenatchee Avenue, P.O. Box 911, Wenatchee, Washington 98801; Regional Forester, 319 Southwest Pine Street, P.O. Box 3623, Portland, Oregon 97208. Copies of the draft Environmental Statement for this proposal are available for inspection at the offices listed above.

Individuals or organizations may express their views by appearing at this hearing or may submit written comments for inclusion in the official record to the Regional Forester, 319 Southwest Pine Street, P.O. Box 3623, Portland, Oregon 97208, by November 20, 1973.

JOHN R. MCGUIRE,
Chief, Forest Service.

AUGUST 22, 1973.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

ATLANTA WEST HOSPITAL

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 73-00547-33-43780. Applicant: (DBA) Atlanta West Hospital, the Georgian Villa, Inc., P.O. Box 43566, Atlanta, Ga. 30336. Article: 45 MeV medical type betatron. Manufacturer: Brown Boveri, Switzerland. Intended use of article: The article is intended to be used for investigation in the following projects:

(1) Isolation and identification of viruses or germs causing malignant tumors and study of reaction of such viruses to betatron treatments.

(2) Scientific identification of sources of viruses causing malignant tumors, especially as related to diet.

(3) Development of medically sound treatments for such malignant tumors, especially in the high voltage field, and

(4) Research in the area of cancer prevention.

The article will also be used by medical schools in studying the principles of electron beam therapy.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The Department of Health, Education, and Welfare (HEW) advised in its memorandum dated August 9, 1973 that the extended range in electron energy above 25 million electron volts (MeV) provided by the foreign article is pertinent to the applicant's use in clinical research directed toward the prevention, treatment, and possible causes of some malignant tumors. HEW further advises that it knows of no domestic medical betatrons which provide beam energies exceeding 25 MeV.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

MASSACHUSETTS GENERAL HOSPITAL

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 73-00531-33-90000. Applicant: The Massachusetts General Hospital, Fruit Street, Boston, Mass. 02114. Article: EMI computerized axial tomography instrument. Manufacturer: EMI Ltd., United Kingdom. Intended use of article: The article will be used to diagnose certain types of brain disease on patients, particularly acute patients who are unable to cooperate and who may need life-saving treatment, such as those with brain hemorrhage. Investigative experiments to be conducted will be for a study or assessment of comparative results using the new system of transverse axial tomography.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article is a newly developed system which is designed to provide precise transverse axial tomography. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated August 9, 1973, that the speed and accuracy of the foreign article in providing information on the nature and location of diseased or damaged brain tissue is pertinent to the research study involving comparison of this new system with more conventional techniques. HEW further advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

UNIVERSITY OF CINCINNATI

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 73-00536-33-79500. Applicant: University of Cincinnati, Department of Internal Medicine, General Clinical Research Center, Cincinnati General Hospital, 234 Goodman Street, room C2-3, Cincinnati, Ohio 45229. Article: Random zero sphygmomanometer. Manufacturer: Gelman Hawksley Ltd., United Kingdom. Intended use of article: The article is intended to be used to eliminate bias in the measurement of blood pressure in humans in a study involving the relationship between lipids and blood pressure.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a random zero capability which reduces personal bias in accurate blood pressure measurement. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated August 9, 1973, that the capability described above is pertinent to the purposes for which the article is intended to be used. HEW also advised that it knows of no domestic instrument of equivalent scientific value to the article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

[FR Doc.73-18385 Filed 8-29-73;8:45 am]

UNIVERSITY OF ROCHESTER

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 73-00541-00-46040. Applicant: University of Rochester School of Medicine and Dentistry, 260 Crittenden Boulevard, Rochester, NY. 14642. Article: Side entry goniometer model 1B1102. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is an accessory to an existing electron microscope to be used for research on the ultrastructure of normal and pathologic spleen and bone marrow from animals and humans; the three-dimensional structure of normal and pathologic blood cells both in suspension and within the hemopoietic tissues and the ultrastructural fine detail of the cell membranes at high resolution. In addition, the article is to be used for research training for hematology trainees.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The application relates to a compatible accessory for an instrument that had been previously imported for the use of the applicant institution. The article is being furnished by the manufacturer which produced the instrument

V 38 168 AUG 30 73 XUM

with which the article is intended to be used and is pertinent to the applicant's purposes.

The Department of Commerce knows of no similar accessory being manufactured in the United States, which is interchangeable with or can be readily adapted to the instrument with which the foreign article is intended to be used.

A. H. STUART,
Director, Special Import, Programs Division.

YALE UNIVERSITY

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (37 FR 3892 et seq.).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket number: 73-00546-91-68495. Applicant: Yale University, purchasing department, 260 Whitney Avenue, New Haven, Conn. 06520. Article: Gas mixing pumps. Manufacturer: Heinr, Wosthoff, West Germany. Intended use of article: The article is intended to be used for research focused on photosynthesis of forest tree seedlings. The rate of uptake of carbon dioxide will be investigated in response to variation in temperature, radiation flux density, moisture stress, and the concentration of atmospheric oxygen. The article will also be used in the two courses in Forestry and Environmental Studies, 121b Research Methods in Forest Genetics and 129a, b, Project in Forest Genetics to acquaint graduate students with the principles and applications of photosynthesis measurement.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a capability for accurate metering of three gas streams to ±0.05% using two pumps. We are advised by the Department of Health, Education, and Welfare (HEW) in its memorandum dated August 9, 1973 that the capability described above is pertinent to the applicant's use in studies of photosynthesis of tree seedling's. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the article for the purposes for which the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

A. H. STUART,
Director, Special Import Programs Division.

NATIONAL ADVISORY COMMITTEES

Notice of Public Meetings

Correction

In FR Doc. 73-17929 appearing on page 22814 of the issue of Friday, August 24, 1973, in the table for the Health Services Research Study Section, under the heading "Date, time, place," change the date "September 18-20" to read "September 18-19."

Office of Education

NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION

Notice of Public Meeting

Notice is hereby given, pursuant to section 10(a)(2) of the Federal Advisory Committee Act (P.L. 92-463), that the next meeting of the National Advisory Council on Adult Education will be held on September 13-14, 1973, from 9:00 a.m. to 5:00 p.m., and on September 15, 1973, from 9:00 a.m. to 1:00 p.m., at the Statler Hilton Hotel, 16th & K Streets, NW., Washington, D.C.

The National Advisory Council on Adult Education is established under section 310 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Council shall be open to the public. The proposed agenda includes:

Council reorganization and committee assignments.
Committee reports.

USOE rules and regulations—309 (b) & (c).
Other Council organizational plans for FY-74.

Records shall be kept of all Council proceedings (and shall be available for public inspection at the Office of the National Advisory Council on Adult Education located in Room 1144, Pennsylvania Bldg., 425 13th Street NW., Washington, D.C. 20004).

Signed at Washington, D.C. on August 24, 1973.

GARY A. EYRE,
Executive Director, National Advisory Council on Adult Education.

Office of the Secretary

OFFICE OF ADMINISTRATION AND MANAGEMENT

Statement of Organization and Functions; Correction

The statement for the Office of Administration and Management of the Office of Human Development as printed in the FEDERAL REGISTER (38 FR 20930), dated August 3, 1973 omitted reference to Office of Human Development. The reprint corrects this omission and provides corrected paragraph coding. The corrected statement is as follows:

1R90.00 *Mission.* The Office of Administration and Management will provide administrative and management services to OS/HD offices. It will develop and recommend to the Assistant Secretary, policy, systems procedures, plans, organizational changes and management improvement strategies and assist with the implementation of approved strategies throughout HD. Will serve as the focal point for ASHD budget estimates; develop budget policies and procedures; and serves as liaison with the Assistant Secretary, Comptroller on matters related to budget, audit and accounting. Will be responsible for financial activities including the review of expenditure plans submitted by program offices and develops expenditure reports and special analysis as requested by the Assistant Secretary and program directors.

Will develop, coordinate and implement grant policy and procedures consistent with DHEW and OMB requirements. Will be responsible for grants administration including the development of procedures and requirements for processing grant applications prior to approval. Serves as liaison with OS Contract Office on matters related to procurement policies, procedures and requirements. Provides technical assistance and support to program offices in implementing, interpreting OSHD contract review procedures and requirements. Will be responsible for management analysis including management and organizational statistics, manpower utilization, methods and cost analysis, management systems and standards. Will provide leadership in the development of a unified data management system for ASHD program offices. Will serve as a focal point for special studies initiated by the Assistant Secretary, Department, OMB, and Congress. Will provide administrative support services including procurement, space management, travel requests and reimbursements claims and other general administrative duties. Will serve as the primary liaison with the OS Personnel Office.

1R90.10 *Organization.* The Office of Administration and Management consists of the following organizational elements which report to the Director: 1. Budget and Financial Management Division, 2. Grants and Contract Management Division, and 3. Administrative and Management Services Division.

1R90.20 *Functions.* A. *Office of the Director.* The Director of the Administration and Management unit is responsible for coordinating all of the elements of the Office of Administration and Management. The Director reports directly to the Assistant Secretary for Human Development. The Division Directors of the various organizational elements of Administration and Management report directly to him. He is responsible for all grants, budget, finance, and administrative and management services for all of the offices in the Office of Human Development.

B. *Budget and Financial Management Division.* The Budget and Financial Management Division will be responsible for the consolidation, preparation, and presentation of ASHD's budget estimates. Will provide staff assistance and technical support to program offices in formulating budget estimates. Will analyze and make recommendations on budget requirements to the Assistant Secretary and program directors. Will develop, implement, and maintain a system for financial management and expenditure controls within OSHD. Serves as liaison with the OSC on matters related to budget planning and accounting. Will coordinate OSP planning with HD Planning and Analysis Staff. Prepares financial analysis and special reports at the request of the Secretary and program offices. Serves as the primary liaison with the Regional Comptroller on matters relating to HD budget.

C. *Grants and Contract Management Division.* The Grants and Contract Management Division will serve as the focal point for planning, implementing and interpreting HD's, DHEW's, and OMB's grants and contract regulations, policies and procedures. Will provide staff support and assistance to HD program offices in grant and contract review activities. Will provide assistance with grant processing for all headquarters grant awards and serve as primary liaison with OS Contract Office, DHEW Audit Agency and the Office of Grants Administration Policy on matters related to grants and contract activities.

D. *Administrative and Management Services Division.* The Administrative and Management Services Division will be responsible for planning and directing the administrative and management support activities of HD headquarters offices. Will provide technical and staff assistance in management analysis, manpower utilization, and information systems development. Will serve as the focal point for DHEW and OMB initiated studies. Will be responsible for personnel liaison services, space management and planning, travel services, supplies and equipment, purchase and procurement activities and other general administrative duties. Will serve as primary liaison with OS Personnel operations and OS Office of Administrative Services.

Dated: August 24, 1973.

BRYAN B. MITCHELL,
Acting Deputy Assistant Secretary for Management Planning and Technology.

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part 8 (Social Security Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare (33 FR 5832-33 dated April 16, 1968) is hereby amended as follows:

8-B *Office of the Regional Representative, Disability Insurance* (BDI) is superseded by the following:

8-B *Office of the Regional Representative, Disability Insurance* (BDI)—Provides direction and leadership for the disability insurance and assistance programs throughout the Region. Provides guidance and assistance to both SSA organizations and State agencies involved in regional disability operations, and reviews and evaluates the extent to which the quality review of disability determinations is accomplishing established regional and national goals. Reviews State agency budgetary and other administrative matters. Coordinates with the Regional Commissioner, SSA Regional Representatives, and with DHEW regional officials concerned with the disability program. Establishes and maintains relationships with professional organizations. Participates in public information activities for the disability program.

(Section 6, Reorganization Plan No. 1 of 1953)

Dated: August 22, 1973.

S. H. CLARKE,
Acting Assistant Secretary for Administration and Management.

ADVISORY COUNCIL ON INTERGOVERNMENTAL PERSONNEL POLICY

NOTICE OF PUBLIC MEETING

Pursuant to the provisions of section 10 of Public Law 92-463, effective January 5, 1973, notice is hereby given that a meeting of the Advisory Council on Intergovernmental Personnel Policy will be held from 1 p.m., Tuesday, September 11 through 12 noon Thursday, September 13, 1973.

The meeting will be held in the Studio Room, Airlie House, Warrenton, Virginia.

The Advisory Council's responsibility is to study and make recommendations regarding personnel policies and programs for the purpose of—

(1) Improving the quality of public administration at State and local levels of government, particularly in connection with programs that are financed in whole or in part from Federal funds;

(2) Strengthening the capacity of State and local governments to deal with complex problems confronting them;

(3) Aiding State and local governments in training their professional, administrative, and technical employees and officials;

(4) Aiding State and local governments in developing systems of personnel administration that are responsive to the goals and needs of their programs and effective in attracting and retaining capable employees; and

(5) Facilitating temporary assignments of personnel between the Federal Government and State and local governments and institutions of higher education.

At this meeting the Council will discuss issues and proposals with respect to (1) Equal Employment Opportunity, and (2) Employee Management Relations in State and local government. The meeting will be open to public attendance.

No time will be devoted during the meeting to participation or presentations by members of the public. However, individuals and groups are invited to submit material in writing to the Chairman concerning matters felt to be deserving of the Council's attention. Such material should be addressed to: Chairman, Advisory Council on Intergovernmental Personnel Policy, Room 2315, 1900 E Street NW., Washington, D.C. 20415, Attention: Executive Secretary.

Persons wishing additional information concerning this meeting should contact the Executive Secretary at the above address or by telephone (202) 632-6248.

E. C. WAKHAM,
Executive Secretary, Advisory Council on Intergovernmental Personnel Policy.

ATOMIC ENERGY COMMISSION

[Docket No. 50-323]

PACIFIC GAS AND ELECTRIC CO.

Order Relative to Prehearing Conference and Evidentiary Hearings

In the Matter of Pacific Gas and Electric Company (Diablo Canyon Nuclear Power Plant, Unit 2).

By order dated July 27, 1973, the Board scheduled a prehearing conference on September 6, 1973, and the commencement of the evidentiary hearing on September 17, 1973.

The prehearing conference will begin at 10:00 a.m. (local time) at:

The Royal Inn (Jolly King Restaurant Complex), 214 Madonna Road, San Luis Obispo, Calif. 93401.

The evidentiary hearing will commence at 10:00 a.m. (local time) at the:

Golden Tee Resort Lodge (Sky Room), 19 Country Club Road, Morro Bay, Calif. 93442.

The public is invited to attend both the prehearing conference and the evidentiary hearing. Limited appearance statements will be accepted only at the evidentiary hearing. Oral statements will be limited to five (5) minutes, but written statements without limitation on length may be submitted for inclusion in the record.

It is so ordered.

Issued at Washington, D.C., this 23rd day of August 1973.

THE ATOMIC SAFETY AND LICENSING BOARD,
ELIZABETH S. BOWERS,
Chairman.

[Dockets Nos. 50-443 and 50-444]

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE ET AL.

Seabrook Station, Units 1 and 2

Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matter

Public Service Company of New Hampshire, The United Illuminating Company, Central Maine Power Company, The Connecticut Light and Power Company, Fitchburg Gas and Electric Light Company, Montaup Electric Company, New Bedford Gas and Edison Light Company, New England Power Company, Vermont Electric Power Company, Inc., Ashburnham Municipal Light Plant, Burlington Electric Light Department, Eastern Maine Electric Cooperative, Inc., Holyoke Gas and Electric Department, Hudson Light and Power Department, Hull Municipal Light Plant, Marblehead Municipal Light Department, Middleborough Gas and Electric Cooperative, Inc., North Attleborough Electric Department, South Norwalk Electric Works, and Templeton Municipal Light Plant (the applicants), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, have filed an application dated June 29, 1973, which was docketed on July 9, 1973, for authorization to construct and operate two electric generating units utilizing pressurized water reactors. The application was initially tendered on March 25, 1973. Following a preliminary review for completeness, it was rejected on May 7, 1973 for lack of sufficient information. The applicants submitted additional information on June 15, 1973 and the application was found acceptable for docketing.

The proposed nuclear facilities, designated by the applicants as the Seabrook Station, Units 1 and 2, are to be located at the applicants' site in Rockingham County, in the township of Seabrook, New Hampshire. Each unit is to be designed for initial operation at approximately 3411 megawatts thermal, with a net electrical output of approximately 1194 megawatts.

A Notice of Hearing with opportunity for public participation is being prolished separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before October 8, 1973. The submittal should reference Docket Nos. 50-443-A and 50-444-A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20545, and at the Exeter Public Library, Front Street, Exeter, New Hampshire 03833.

The applicant has also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, an environmental report dated June 29, 1973. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations related to the proposed construction of the Seabrook Station is also being made available at the Office of Comprehensive Planning, Office of the Governor, State House, Concord, New Hampshire 03301, and at the Southeastern New Hampshire Regional Planning Commission, 10 Front Street, Exeter, New Hampshire 03833.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Maryland, this 26th day of July 1973.

For the Atomic Energy Commission.

KARL R. GOLLER,
Chief, Pressurized Water Reactors Branch No. 3, Directorate of Licensing.

[Order 73-8-119]

CIVIL AERONAUTICS BOARD

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Fares Over North/Central Pacific and Within Pacific

Agreements adopted by the International Air Transport Association relating to fares over the North/Central Pacific and within the Pacific; Docket 24488, Agreement C.A.B. 23600 R-1 through R-14, Agreement C.A.B. 23608 R-9 through R-11, Agreement C.A.B. 23619 R-1, R-2, R-3, R-5, R-7 through R-10, R-14, R-15, R-19, R-24, R-25, R-28 and R-29, Agreement C.A.B. 23642 R-1 and R-3.

By Order 73-7-54 dated July 12, 1973, the Board disapproved certain portions of various IATA agreements relating to fares over the North/Central Pacific. Specifically, the Board disapproved as being adverse to the public interest those portions of the agreements which proposed fare increases of approximately four percent, and an additional increase of five percent for U.S.-originating travel which was intended to offset the impact of devaluation of the dollar.

Petitions for reconsideration have been filed by Pan American World Airways, Inc. (Pan American), Trans World Airlines, Inc. (TWA), and Japan Air Lines Company, Ltd. (JAL). Northwest Airlines, Inc. (Northwest), has filed an answer supporting the petitions insofar as they relate to the five percent currency surcharge on U.S.-originating travel. The petitioners allege various errors in the Board's order of disapproval.

Pan American alleges that it did not overstate its Pacific service revenue need by understating its forecast traffic; that its return on investment on North/Central Pacific services under the proposed fare structure would be 11.5 percent; that its capacity levels are reasonable, efficient, and economic; and that the Board was incorrect in finding that JAL does not suffer a revenue loss because of devaluation of the dollar. Pan American asserts that the Board misinterpreted the data submitted by it in support of the agreements in that a comparison was made between forecasts which were not comparable. Pan American contends that the 1972 forecast of 4,018 million revenue passenger miles upon which the Board relied included revenue passenger miles related to industry discount and military blocked-space traffic, while the present forecast does not include those

categories of traffic. Placing its two forecasts on a comparable basis, Pan American contends, would indicate a projected 16.5-percent increase in traffic over the level earlier forecast for 1972.

Pan American further alleges that the Board erred in stating that its forecast rate of return for the total transpacific operations (10.9 percent) was significantly understated insofar as North/Central Pacific services are concerned. Pan American contends that the Board's conclusions are incorrect as they imply that, if American Airlines is losing money on the South Pacific, Pan American would likewise be losing money. Pan American indicates that it did not provide separate forecasts in justification of the North/Central and South Pacific agreements solely because the Board has in the past treated the entire transpacific area as one ratemaking unit. Pan American now separates the two areas and projects rates of return under the proposed fares of 10.9 and 4.6 percent for North/Central and South Pacific operations, respectively. At the present fare levels, Pan American would realize a return of 10.1 percent on the North/Central Pacific.

With respect to distribution of traffic and the magnitude of noncommercial and very low-yield traffic, Pan American states that military furlough traffic has declined 32 percent in the first six months of 1973 over 1972; that the "all other" category now constitutes only 13 percent of total traffic, down from 25 percent; and that even further declines are anticipated. Other commercial traffic has increased 29 percent and it is this growth, together with the decline in low-yield traffic, which assures the reasonableness of the capacity level being offered. Capacity cannot be reduced, the carrier contends, if it is to continue to provide service in accordance with its certificate obligations. Pan American states that it is unfair for the Board to criticize the carriers for carrying large amounts of low-yield traffic, while at the same time decrying an alleged failure to provide a promotional pattern of fares. Finally, Pan American cites alleged losses to JAL which allegedly warrant the five-percent adjustment sought to compensate for devaluation of the dollar.

TWA contends that the Board's conclusion that it provides excessive capacity to transport certain "non-commercial" traffic, and that it should correct its problems through introduction of promotional fares is in error; and that the Board erred in relying on load-factor and return-on-investment standards applicable to domestic services and failed to adequately consider TWA's loss position. TWA states that more recently available information indicates that it, in fact, overstated its anticipated financial improvement. It now projects an improvement from the proposed fare increases of slightly over $2 million, rather than the $2.8 million initially estimated.

TWA indicates that its markets in the Pacific are by their very nature oriented toward military rather than commercial traffic, and that it is unrealistic to conclude that it is wrong to provide capacity to serve this traffic. TWA points out that over one half of its 1972 military traffic consisted of Categories A and Z traffic at rates established by the Board. The balance of military travel was at fares introduced for national interest reasons. TWA contends that traffic using military fares will decline substantially in the future because of the reduction in the scale of military operations in the Far East. Further, although TWA will cease its "perimeter fare" program as of October 29, 1973, it alleges that such traffic has not burdened other traffic or occasioned the operation of excessive capacity. TWA contends that it is operating minimal frequencies and has not provided capacity to accommodate either military or "perimeter fare" traffic, and that present capacity will continue to be offered despite anticipated reductions in these categories of traffic. Finally, TWA contends that the introduction of additional promotional fares geared to stimulation of tourist travel in the Pacific would worsen rather than improve its financial results, because TWA serves military-oriented rather than recreational areas.

JAL's petition is directed to the Board's denial of the proposed 5-percent increase associated with devaluation of the dollar. JAL contends that the expense data obtained from the Department of Commerce and used by the Board is overstated and misleading since it concludes substantial costs not incurred by JAL in connection with its North/Central Pacific operations. JAL asserts that, while the revenues earned by JAL were $77 million, its expenses incurred in North/Central Pacific services were $52.3 million, thus resulting in a margin of revenues over expenses of $24.7 million. Because of the devaluation of the dollar, the net loss in yen will be 913,000,000, requiring an offset of an additional $3,450,000. If the five-percent fare increase were permitted JAL would realize a gain of $3,850,000. Accordingly, JAL requests the Board to reconsider its decision and approve the IATA resolution proposing a five-percent increase in North/Central Pacific fares.

Northwest, in its answer supporting the petitions, asks the Board to reconsider its decision and approve the five-percent surcharge for U.S. originations on the basis that this adjustment is justified by the revenue/expense relationships for foreign carriers operating in the United States. Here Northwest adverts to the data supplied by JAL in its petition, and further states that the Board was unfair in disapproving the increase based on JAL's situation alone, since the five-percent agreement takes into account the effects of currency realignments on a number of carriers.[1]

[1] Northwest also makes certain statements concerning the Board's adjustment of the carrier's capacity and revenue forecasts in our disapproval of the general fare increase. Northwest makes no request for a review of the Board's decision on the general fare structure, and inasmuch as the capacity arguments do not relate to the currency surcharge these allegations will not be considered herein.

The Board is well aware that IATA agreements represent a compromise of various carriers' individual requirements and views, and that the fares agreed upon do not reflect the economics of any one carrier. The U.S. carriers must justify these agreements to the Board and receive the Board's approval prior to implementation, in a sense acting on behalf of non-U.S. carriers as well. As a result, a substantial burden is placed on the U.S. carriers who, because of the rules governing the IATA machinery, not infrequently find themselves voting affirmatively to secure an agreement with which they themselves are not completely satisfied. This in turn may necessitate the preparation of evaluation and justification, including forecasts, which differ from those which top level airline management would prepare in support of a package offering optimum results for the particular carrier.

Recognizing this situation, the Board, in carrying out its statutory obligations, must analyze the agreements and their supporting justification closely and objectively to satisfy itself that they conform to the public interest. The Board must rely not only on the carriers' justifications as presented, but on prior events and developments in the areas concerned, and on recurrent data reported to the Board in Form 41 reports as well as other special reports.

An amalgamation and objective analysis of the information gleaned from these various sources is often made difficult for various reasons. In the instant case, although the North/Central and South Pacific fare agreements were negotiated separately, the carriers chose to justify them on a composite basis. Moreover, justifications and forecasts often are not consistent in their components, and efforts to compare forecasts from year to year and to reconcile differences with the carriers' Form 41 reports represent a formidable task.

Pan American alleges here that the Board erred in adjusting its passenger forecast upward to reflect the revenue passenger miles the carrier previously forecast in support of the 1972 IATA fare package. The carrier alleges that while its earlier forecast included industry discount and military blocked-space traffic, the present forecast does not; and goes on to state that, in fact, the present forecast projects a significant increase in commercial traffic. The rate of return as adjusted by the Board is, therefore, alleged to be overstated.

We are unable to conclude from the data submitted by Pan American that the Board erred in adjusting the carrier's forecast. The data initially submitted in justification of the subject agreements do not lend themselves to support Pan American's conclusion. Our evaluation of the carrier's forecast for 1972 and that submitted in support of the instant agreements does not suggest the exclusion of any given category of traffic and there is no support in the data presented that in fact the forecasts are not comparable.

V 38 168 AUG 30 73 XUM

In its justification dated March 30, 1973, Pan American forecasts for the year ending April 30, 1974, a total of 3.56 billion revenue passenger miles in its Pacific sector operations. This figure is stated to exclude Category A and Z and industry discount traffic. In its forecast operating results, Pan American states its total revenue passenger miles to be 3.85 billion. The table including this latter figure does not reflect any exclusions and would, therefore, appear to reflect the total revenue passenger miles to be realized in the forecast period.

In comparison, Pan American's Form 41 reports show that it transported 4.22 billion revenue passenger miles in calendar 1972. Recognizing that these results were inflated because of a Northwest strike, and since Pan American had previously submitted a forecast in support of the 1972 IATA fare agreements, it appeared more logical to adopt that forecast data, thereby eliminating the distortion of actual 1972 operations. In that earlier forecast, Pan American projected a total of 4.02 billion revenue passenger miles. It would appear that the two forecasts, one forecasting the level of traffic to be realized in 1972, and the instant forecast projecting traffic for 1974 are, in fact, comparable and the documents themselves do not suggest otherwise.

Now Pan American alleges that the two forecasts are dissimilar in that the earlier forecast includes industry discount traffic while the latter forecast does not. Pan American's petition suggests that certain adjustments can be made to make proper comparisons between the two forecasts, which conform with the Form 41 reports to the Board.

TOTAL PAN AMERICAN PACIFIC OPERATIONS—ACTUAL 1972

	Actual 1972	Adjusted by PAA to eliminate Northwest Strike	PAA adjusted forecast for year ending April 1974
Seat miles (million)-----	7,747	7,747	7,929
Revenue passenger miles (million)-----	4,217	4,101	4,046
Seat load factor (%)----------	54.4	52.9	51.0

As can be seen, a projected increase in capacity coupled with a reduction in revenue passenger miles produces a reduction in passenger load factor of 1.9 points.

Elimination of much of the military traffic and a substantial curtailment in industry discount traffic, coupled with the alleged growth of commercial traffic should, even at present fares, increase the carriers' profitability. This is to be expected all the more considering the sizeable increases recently approved on the South Pacific, including a currency increase which fully compensates U.S. carriers for increased costs associated with devaluation. Moreover, to the extent U.S. carriers earn revenue in excess of their expenses at foreign stations, additional profits will be realized. Pan American projects a decline of 4.5 percent in traffic, attributable to implementation of the proposed fare package (a fare increase of 4 percent with no currency adjustment). However, this reduction appears to be significantly understated when compared with the traffic anticipated at the lower March fare levels, which likewise excludes the impact of increases associated with currency adjustments.

In our opinion, the capacity offered together with the mix of traffic are critical factors in the evaluation of any fare package. As we have noted, Pan American is projecting a small increase in capacity, despite a declining trend in load factor. While concededly the revenue mix is projected to change significantly, the carrier itself recognizes that increases in fares have an adverse impact on the volume of traffic. In light of the fact that existing fares are among the highest in the world, and involve trips of relatively great distance, it would appear that profitability should be sought not through constant increases in fares, but rather through more meaningful routing controls and a pattern of fares geared to stimulation of tourism. By this we mean promotional fares at compensatory levels, not fares which would yield 0.70 cents and 2.39 cents, as Pan American would seem to suggest.

We believe that, when entering a negotiation, the IATA carriers must look not only to their financial results in the preceding period but to the underlying causes of those results as well. In other words, we do not believe that the appropriate answer to an unsatisfactory financial position always lies in a general revenue increase. To increase fares to compensate for low-yield traffic, albeit in lesser numbers, while at the same time foregoing adjustment in capacity to improve load factors obtained from commercial travel, imposes an unnecessary and unwarranted burden on the commercial passenger.

Both Pan American and TWA contend they cannot reduce frequencies or total seat capacity. We disagree. In Order 73–7–54, Northwest's forecast was affected significantly by the extensive projected use of wide-bodied equipment. We believe that a similar adjustment is appropriate in this case for Pan American, which states that 75 percent of its revenue aircraft miles on the North/Central Pacific are conducted with B–747 equipment. TWA contends that it cannot reduce its present twice-daily B–707 frequencies, and suggests that it is primarily a military carrier whose routes are not geared to tourism. To the contrary, points such as Honolulu, Hong Kong, Bangkok, and various destinations in India are acknowledged major tourist attractions. In any event, we do not subscribe to the theory that an increase in fares for commercial travelers is justified simply because TWA's operations are geared to the carriage of Category A and Z traffic for which the rates are set at compensatory levels, and military discount traffic for which the rates are set by the carrier itself, and which the carrier argues in a different context is top-off in nature. In summary, we are not persuaded that normal-fare passengers should be asked to pay for excess capacity.

Pan American contends that the Board's comments on the adjusted 10.9-percent rate of return for its total transpacific services implied an excess of 12 percent for its operations over the North/Central Pacific. While our statement might be so construed, we merely intended to suggest a significant disparity between the respective returns earned from South Pacific versus North/Central operations; in other words, that the 10.9-percent rate of return is understated in terms of North/Central operations. This statement is, in fact, corroborated by Pan American itself which estimates returns under the proposed fares of 11.5 percent for the North/Central Pacific and 7.4 percent for the South Pacific. Without the proposed fare adjustments, Pan American projects a North/Central Pacific return of 10.1 percent. We believe that various factors, cited elsewhere in this order, would indicate that absent the proposed increases this return at status quo fares may be understated. In any event, in the circumstances generally surrounding world air transportation today, replete with substandard earnings, a 10.1-percent rate of return cannot be considered unreasonable.[3]

We now turn to the matter of the currency adjustment, and primarily to the arguments advanced by Japan Air Lines pertaining to the impact of the dollar devaluation. The Board concluded in Order 73–7–54 that, based on data then available to us, JAL's expenses in the United States exceed its revenues earned. JAL now supplies what appear to be more accurate and factual data, which refute the ratio of revenues and expenses relied upon by the Board and which indicate that, absent an adjustment in U.S.-originating fares, JAL will experience a loss of $3,450,000. JAL contends that the 5-percent proposed adjustment will provide a revenue increase of $3,850,000, or $400,000 in excess of that that lost by devaluation.

The Board is not adverse to increases in U.S.-originating fares arising out of the devaluation of the dollar and, in fact, has recently approved such agreements for application over both the North Atlantic and South Pacific routes. As we have previously acknowledged,[4] the impact of devaluation on foreign carriers is usually more severe than is the impact on the U.S. carriers. Generally, some overcompensation of U.S. carriers results, while the increased revenues to foreign carriers are not fully compensatory. In short, a proposed increase in fares stemming from currency devaluation must, as a practical matter, be uniform for all carriers and should reflect a compromise which does not affect each carrier equally, but should strike a reasonable balance among all carriers.

In the case at hand, the increase in revenues to the U.S. carriers is not in dispute, although certain cost increases are to be expected resulting from devaluation of the dollar. However, the 5-percent adjustment proposed favors not only the U.S. carriers, but the largest single foreign carrier providing service over the routes as well. It too would receive revenue in excess of that required to off-set increased dollar costs. For this reason, we are unable to conclude that the 5-percent adjustment is a reasonable and equitable compromise.[4]

In view of all of the foregoing, the Board finds that the petitions for reconsideration do not establish any error of consequence which would warrant a reversal or alteration of the Board's action in Order 73–7–54, and the petitions for reconsideration will be denied.

Accordingly, *It is ordered*, That:

1. The petitions for reconsideration of Order 73–7–54 filed by Pan American World Airways, Inc., Trans World Airlines, Inc., and Japan Air Lines Company, Ltd. are denied.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

STARLINE AVIATION LTD.

Notice of Postponement of Prehearing Conference and Hearing

In the matter of foreign air carrier permit application, Canada-United States, casual, occasional, or infrequent service.

Notice is hereby given that the prehearing conference now scheduled for September 14, 1973 (38 FR 22179, August 16, 1973), is hereby postponed to September 25, 1973, at 10:30 a.m. (local time) in Room 911, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., before the undersigned Administrative Law Judge.

Notice is also given that the hearing may be held immediately following conclusion of the prehearing conference unless a person objects or shows reason for postponement on or before September 18, 1973.

Dated at Washington, D.C. August 24, 1973.

[SEAL] THOMAS P. SHEEHAN,
Administrative Law Judge.

CIVIL SERVICE COMMISSION

FEDERAL EMPLOYEES PAY COUNCIL

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92–463, notice is hereby given that the Federal Employees Pay Council will meet at 2 p.m. on Wednesday, August 29, 1973, to continue discussions on the fiscal year 1974 comparability adjustment for the statutory pay systems of the Federal Government.

In accordance with the provisions of section 10(d) of the Federal Advisory Committee Act, it has been determined by the Director of the Office of Management and Budget and the Chairman of the Civil Service Commission, who serve jointly as the President's Agent for the purposes of the Federal pay comparability process, that this meeting of the Federal Employees Pay Council will not be open to the public.

For the President's Agent.

FRANK S. MELLOR,
Advisory Committee Management Officer for the President's Agent.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN THE REPUBLIC OF CHINA

Entry or Withdrawal From Warehouse for Consumption

AUGUST 24, 1973.

On December 30, 1972, there was published in the FEDERAL REGISTER (37 FR 28774) a letter dated December 21, 1972 from the Chairman, Committee for the Implementation of Textile Agreements, to the Commissioner of Customs, establishing levels of restraint applicable to certain specified categories of cotton textiles and cotton textile products produced or manufactured in the Republic of China and exported to the United States during the twelve-month period beginning January 1, 1973. As set forth in that letter, the levels of restraint are subject to adjustment pursuant to paragraph 17 which provides in part for the limited carryover of shortfalls in certain categories to the next agreement year.

Accordingly, at the request of the Government of the Republic of China and pursuant to the provisions of the bilateral agreement referred to above, there is published below a letter of no. 24 1973 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs amending the levels of restraint applicable to cotton textiles in Categories 5/6, 9/10, 20/21, 24/25, 30, 32, 34/35, 41/42, 44, 50, 51, 52, 53, 57, and 59 produced or manufactured in the Republic of China and exported to the United States during the twelve-month period which began on January 1, 1973.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

AUGUST 24, 1973.

DEAR MR. COMMISSIONER: On December 21, 1972, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning January 1, 1973 of cotton textiles and cotton textile products in certain specified categories produced or manufactured in the Republic of China, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, pursuant to paragraph 17 of the Bilateral Cotton Textile Agreement of December 30, 1971 between the Governments of the United States and the Republic of China, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to amend, effective as soon as possible, the levels of restraint established in the aforesaid directive of December 21, 1972 for cotton textile products in the following categories for the twelve-month period beginning January 1, 1973:

Category	Amended Twelve-Month Levels of Restraint[2]
5/6	2,778,159 square yards.
9/10	32,671,653 square yards.
20/21	1,151,858 square yards.
24/25	3,420,305 square yards.
30	2,828,166 pieces.
32	421,550 dozen.
34/35	318,321 pieces.
41/42	146,498 dozen.
44	28,283 dozen.
50	230,025 dozen.
51	369,547 dozen.
52	235,681 dozen.
53	18,853 dozen.
57	188,544 dozen.
59	47,137 dozen.

[2] These levels have not been adjusted to reflect any entries made on or after January 1, 1973.

The actions taken with respect to the Government of the Republic of China and with respect to imports of cotton textiles and cotton textile products from the Republic of China have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[FR Doc.73-18524 Filed 8-29-73;8:45 am]

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton Textile Agreement of December 30, 1971, between the Governments of the United States and the Republic of China which provide in part that within the aggregate limit, the limits for Groups I and II may be exceeded by not more than five (5) and ten (10) percent, respectively; for limited carryover of shortfalls in certain categories to the next agreement year; and for administrative arrangements.

CERTAIN COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN MALAYSIA

Entry or Withdrawal From Warehouse for Consumption

AUGUST 24, 1973.

On September 8, 1970, the United States Government, in furtherance of the objectives of, and under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, concluded a comprehensive bilateral agreement with the Government of Malaysia concerning exports of cotton textiles and cotton textile products from Malaysia to the United States. Under this agreement Malaysia has undertaken to limit its exports to the United States of cotton textiles and cotton textile products to specified annual amounts over a four-year period beginning September 1, 1970 and extending through August 31, 1974. Among the provisions of the agreement are those applying specific limitations to cotton textile products in Categories 45, 46, 49, 50, 51, 53, 55, and 60 for the agreement year beginning September 1, 1973.

There is published below a letter of August 24, 1973, from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs directing that the amounts of cotton textile products in Categories 45, 46, 49, 50, 51, 53, 55, and 60, produced or manufactured in Malaysia, which may be entered or withdrawn from warehouse for consumption in the United States for the twelve-month period beginning September 1, 1973 and extending through August 31, 1974, be limited to certain designated levels. This letter and the actions pursuant thereto are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C. 20229.

AUGUST 24, 1973.

DEAR MR. COMMISSIONER: Under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, pursuant to the bilateral Cotton Textile Agreement of September 8, 1970 between the Governments of the United States and Malaysia, and in accordance with the procedures of Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective September 1, 1973, and for the twelve-month period extending through August 31, 1974, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 45, 46, 49, 50, 51, 53, 55, and 60, produced or manufactured in Malaysia, in excess of the following twelve-month levels of restraint:

Category	Twelve-Month Level of Restraint
45	104,186 dozen.
46	23,153 dozen.
49	17,365 dozen.
50	28,941 dozen.
51	28,941 dozen.
53	17,365 dozen.
55	20,837 dozen.
60	32,414 dozen.

In carrying out this directive, entries of cotton textile products in Categories 45, 46, 49, 50, 51, 53, 55, and 60, produced or manufactured in Malaysia and which have been exported to the United States from Malaysia prior to September 1, 1973, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the period September 1, 1972 through August 31, 1973. In the event that the levels of restraint established for such goods for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of September 8, 1970, between the Governments of the United States and Malaysia, which provide, in part, that within the aggregate and applicable group limits, limits on specific categories may be exceeded by not more than 5 percent; for the limited carryover of shortfalls in certain categories to the next agreement year; and for administrative arrangements. Any appropriate adjustments pursuant to the provisions of the bilateral agreement referred to above will be made to you by further letter.

A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on April 29, 1972 (37 FR 8802), as amended on February 14, 1973 (38 FR 4436).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Malaysia and with respect to imports of cotton textiles and cotton textile products from Malaysia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

ENVIRONMENTAL PROTECTION AGENCY

METHOMYL

Reextension of Temporary Tolerance

E. I. du Pont de Nemours & Co., Inc., Wilmington, DE 19898, was granted a temporary tolerance (PP 1G1144) for residues of the insecticide methomyl (*S*-methyl *N*-[(methylcarbamoyl)oxy] thioacetimidate) in or on the raw agricultural commodity cottonseed at 5 parts per million on July 12, 1971 (notice was published in the FEDERAL REGISTER of July 15, 1971 (36 FR 13174)). The firm received a 1-year extension of the temporary tolerance on September 26, 1972 (notice was published in the FEDERAL REGISTER of October 7, 1972 (37 FR 21363)).

The firm has requested a 1-year reextension of the temporary tolerance for residues of methomyl in or on cottonseed at 5 parts per million to obtain additional experimental data. It is concluded that such reextension will protect the public health.

The temporary tolerance is therefore reextended as requested on condition that the insecticide be used in accordance with the temporary permit being issued concurrently and which provides for distribution under the E. I. du Pont de Nemours & Co., Inc. name.

As reextended, this temporary tolerance expires July 12, 1974.

This action is taken pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(j), 68 Stat. 516; 21 U.S.C. 346a(j)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038).

Dated August 23, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

FEDERAL RESERVE SYSTEM

LANDMARK BANKING CORP.

Proposed Acquisition of North American Mortgage

Landmark Banking Corporation, Fort Lauderdale, Florida, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire voting shares of North American Mortgage Corporation, St. Petersburg, Florida. Notice of the application was published on:

Date:	Newspaper, City and State
August 2, 1973	Sentinal Star, Orange County, Florida
August 2, 1973	Fort Lauderdale News, Fort Lauderdale, Florida
August 3, 1973	St. Petersburg Times, St. Petersburg, Florida
August 3, 1973	Evening Independent, St. Petersburg, Florida
August 4, 1973	Sarasota Harold-Tribune, Sarasota, Florida

Applicant states that the proposed subsidiary would engage in the activities of originating and servicing real estate

V 38-168 AUG 30 73 XUM

mortgage loans. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 7, 1973.

Board of Governors of the Federal Reserve System, August 27, 1973.

[SEAL] THEODORE E. ALLISON,
Assistant Secretary of the Board.

NATIONAL SCIENCE FOUNDATION

DRY VALLEY DRILLING PROJECT

Summary Statement of Proposed Federal Action Affecting the Environment

This summary statement is published pursuant to section 102 of the National Environmental Policy Act. (P.L. 91-190) and the Guidelines of the Council on Environmental Quality (36 FR 7724-7729, April 23, 1971).

The proposed Federal activity is in support of the Dry Valley Drilling Project (DVDP) drilling operations during the 1973-1974 austral summer as a part of the U.S. Antarctic Research Program.

The DVDP, which will be accomplished under NSF grants and contracts by the Department of Geology at Northern Illinois University and associated institutions, is planned to study the diverse geological framework of the McMurdo Sound region, Antarctica, which contains rocks and sediments ranging in age from the Precambrian to Recent. The unique setting will permit a series of independent analyses of Antarctic geochronology, paleoclimatology, and paleomagnetism. The retrieval of continuous hard rock and sedimentary rock core will permit a detailed reconstruction of a period of Antarctic history which played a critical role in the geological and climatic history of the world. Ten to fifteen boreholes are scheduled. Cores will be obtained to a depth of 300 meters.

Scientific objectives of the field project are to drill and collect continuous rock and soil samples from the dry valley area, and to make certain geophysical and hydrogeological measurements in and near the holes. The scientific objectives of the DVDP have been endorsed by the National Science Board, a specialist group of NSF geological consultants, and recognized reviewing authorities in New Zealand and Japan. The planned activities are in accord with the provisions of the Antarctic Treaty.

The United States, New Zealand, and Japan are participating in the funding of the project, and scientists of the three nations will participate in the field work in Antarctica.

In DVDP there are some potential operational failures which may affect the environment. A number of these can be effectively controlled by stringent adherence to previously developed, environmentally sound plans and by having an onsite environmental scientist to monitor operations. Contingency measures have been developed to meet the most likely operational occurrences at each drilling site, e.g., unexpected spillage of drilling muds. These data have been analyzed in accordance with the procedures for devepolment of informational matrices for environmental impact assessment. Through careful and conscientious efforts of experienced polar specialists on site during the activity other unforseen circumstances which may arise will be quickly dealt with.

Planned indoctrination of all DVDP personnel will be effective in reducing accidental problems. The operations plans will be continuously evaluated and updated against actual events.

The probably unavoidable environmental effects include some damage to the soil ecosystems in the immediate vicinity of the drill site, some scarring of the land surface, and possibly some pollution or alteration of the ground water by drilling fluids. None of these are considered of great significance because of their highly localized nature.

Copies of the draft environmental impact statement are available from the Deputy Assistant Director for National and International Programs, National Science Foundation, Washington, D.C., 20550. Comments from appropriate state and local agencies, addressed as above, should be submitted on or before Oct. 1, 1973.

Dated August 27, 1973.

EDWARD C. CREUTZ,
Acting Director.

POSTAL RATE COMMISSION

ECONOMIES OF SCALE

Notice of Seminar

AUGUST 24, 1973.

Notice is hereby given that on September 18, 1973, a seminar on Economies of Scale will be conducted by the Economic Staff of the Postal Rate Commission. The morning session will deal with defining the concept and measurements of economies of scale. Two staff studies will be the basis of the discussion. The afternoon sessions will be a technical conference on methodology of the measurement of economies of scale.

Members of the general public intertested in this matter are invited to attend and participate. A transcript of the seminar will be on file in the Commission's docket room.

JOSEPH A. FISHER,
Secretary.

[70-5380]

CONNECTICUT YANKEE ATOMIC POWER CO.

Proposed Issue and Sale of Notes

AUGUST 23, 1973.

Notice is hereby given that Connecticut Yankee Atomic Power Company (Connecticut Yankee), P.O. Box 270, Hartford, CN 06101, an electric utility subsidiary company of Northeast Utilities (Northeast) and of New England Electric System (New England), both of which are registered holding companies, has filed an application-declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 (Act), designating sections 6 and 7 of the Act and rule 50(a)(2) and 50(a)(5)(B) promulgated thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration as amended, which is summarized below, for a complete statement of the proposed transactions.

Connecticut Yankee proposes to issue and sell, from time to time on or before March 1, 1975, short-term securities in an aggregate principal amount not to exceed $30,000,000 outstanding at any one time. Such securities will be in the form of short-term notes issued to banks (Bank Notes) or commercial paper (Commercial Paper) issued to a dealer in such securities.

The proposed Bank Notes will each be dated as of the date of issue, will have maximum maturity dates of nine months, will bear interest at a rate per annum not in excess of one percent (1 percent) above the prime rate in effect at the lending bank on the date of issue if issued before January 1, 1974, and at a rate to be negotiated if issued after that date, and will be subject to prepayment at any time at Connecticut Yankee's option without premium. The banks which will participate in Connecticut Yankee's short-term borrowing program and the maximum commitment of each bank is as follows:

V 38-168 AUG 30 73 XUM

The Chase Manhattan Bank, New York, N.Y.	$18,000,000
The Connecticut Bank and Trust Company, Hartford, Connecticut	6,000,000
Total	24,000,000

The lines of credit are to be secured by a deposit of 10 percent of the amount of the line at the time it is committed. In addition, at the time of the first borrowing pursuant to the line of credit, Connecticut Yankee will make an additional deposit (compensating balance) of 10 percent of the entire committed line. Assuming a full 20 percent compensating balance and borrowings at one percent (1 percent) above the prime rate, the effective cost of borrowing would be approximately 13.1 percent, based on an assumed prime interest rate of 9½ percent.

The proposed Commercial Paper notes will be issued in denominations of not less than $50,000 and not more than $1,000,000, will have a maturity of not more than 270 days, will not be repayable prior to maturity, and will be sold by Connecticut Yankee directly to A.G. Becker & Company, Incorporated, a dealer in commercial paper, at the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and of the particular maturity sold by public-utility issuers to commercial paper dealers. No Commercial Paper notes having a maturity of more than 90 days will be issued at an effective interest cost which exceeds the prime commercial bank rate at which Connecticut Yankee could borrow from banks in an amount at least equal to the principal amount of such Commercial Paper. No commission or fee will be payable in connection with the issuance and sale of the Commercial Paper. The commercial paper dealer, as principal, will reoffer the Commercial Paper to institutional investors at a discount of no more than ⅛ of 1 percent per annum less than the prevailing discount rate to Connecticut Yankee in such manner as not to constitute a public offering. The Commercial Paper will be reoffered to not more than 200 identified and designated customers in a list (non-public) prepared in advance by the dealer. It is anticipated that the Commercial Paper will be held by customers to maturity, but if such customers desire to resell prior to maturity, the dealer, pursuant to a verbal repurchase agreement, will repurchase the Commercial Paper and reoffer the same to others in the group of 200 customers.

As part of Connecticut Yankee's initial plant financing program approved by the Commission, it had outstanding as of June 30, 1973, $3,875,000 principal amount of notes issued under a credit agreement dated November 23, 1964, as amended (Credit Agreement) between Connecticut Yankee and the eleven participating banks named therein. The notes outstanding under the Credit Agreement will remain outstanding and will not be affected by the transactions described above. It is stated that Connecticut Yankee will obtain a waiver of all relevant provisions of the Credit Agreement to permit the short-term borrowings contemplated in this proceeding.

The funds to be derived from the issuance and sale of Bank Notes and Commercial Paper will be applied by Connecticut Yankee (i) to repay $21,000,000 of existing notes to banks presently outstanding, as authorized by the Commission (Holding Company Act Release Nos. 17244 and 17650), which mature on October 1, 1973, (ii) to provide funds for the construction of radiation waste facilities at its nuclear electric generating plant in Haddam, Connecticut, and (iii) for the purchase of additional nuclear fuel. At the time of the authorization to issue the $21,000,000 of notes to banks, Connecticut Yankee indicated that it would propose to repay these notes at maturity with some form of long-term financing. In addition, Connecticut Yankee now proposes to repay all of its outstanding long-term bank loans by October 1, 1974, at which time it expects to have greater flexibility in determining what form of long-term financing will be in its best interest. For this reason, Connecticut Yankee does not deem it feasible to undertake any long-term financing program for the repayment of the existing bank loans at this time and prefers, in lieu thereof, an interim program of short-term loans to March 1, 1975. Furthermore, it is stated that such a program is made necessary by the definitions of Connecticut Yankee's indenture, which would not permit the issuance of any substantial amounts of bonds at this time for the purpose of refunding bank notes. Connecticut Yankee states that on or before March 1, 1975, the Bank Notes and Commercial Paper will be refunded through some form of long-term financing, the nature of which cannot now be determined.

It is stated that no fees or commissions (including counsel fees) will be paid or incurred, directly or indirectly, in connection with the proposed transactions and that incidental services, valued at an estimated $500, will be performed at cost by Northeast Utilities Service Company, an affiliated service company. It is further stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

Connecticut Yankee requests that the issue and sale of its Commercial Paper notes be excepted from the competitive bidding requirements of rule 50 pursuant to subparagraph (a)(5)(B) thereof in view of the fact that current rates for commercial paper for prime borrowers such as Connecticut Yankee are readily ascertainable by reference to daily financial publications and that it is not practicable to invite competitive bids for commercial paper. Connecticut Yankee further requests that the certificates under rule 24 be filed on a quarterly basis with respect to the Commercial Paper.

Notice is further given that any interested person may, not later than September 13, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration as amended which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such requests should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicant-declarant at the above-stated address, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the application-declaration as amended or as it may be further amended, may be granted and permitted to become effective as provided in rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in rules 20 (a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT, *Secretary.*

[812-3459]

RESIDEX CORP.

Filing of Application

AUGUST 24, 1973.

Notice is hereby given that Residex Corporation (Applicant), Pennbrook Road, R.D. #1 Fair Hills, N.J. 07931, a Delaware corporation, has filed an application pursuant to section 3(b)(2) of the Investment Company Act of 1940

V 38-168 AUG 30 73 XUM

(Act) for an order of the Commission declaring that Applicant is primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding, or trading in securities. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein which are summarized below.

Applicant was incorporated on April 30, 1970, for the purpose of acquiring, by merger, the stock of Steel Crest Homes, Inc. (Steel Crest). Steel Crest had been engaged in the home building and mortgage businesses prior to its merger with Applicant on July 6, 1970. On March 1, 1971, Applicant acquired Clayton Industries, Inc. (Clayton) expanding Applicant's home building business and allowing it to also engage in the businesses of building waste and water systems and commercial construction. On May 1, 1972, Atlantic Residex Corporation (Atlantic), a wholly owned subsidiary of Applicant merged with Streeper Karr III, Inc., which allowed Applicant to expand further in the areas of residential and commercial construction and community development. Prior to its recent acquisition of 45 percent of the voting shares of Co-Build Companies Inc. (Co-Build), pursuant to a tender offer and purchases made under separate agreement, Applicant, together with Atlantic, was engaged in the business of construction of waste and water systems, primarily in Southern New Jersey and Florida, and in the business of residential and commercial construction and community development in Pennsylvania and New Jersey. Co-Build is engaged in in the development of communities, primarily in the Virgin Islands and New Jersey, and in the construction of homes in such communities. Applicant represents that except for temporary investments of available cash proceeds in commercial paper and its present ownerships of Co-Build's shares, it has not owned nor has proposed to acquire investment securities.

Applicant's total assets (exclusive of Government securities and cash items) were $8,609,395 on an unconsolidated basis as of April 30, 1973. If this figure were adjusted to $15,346,895 to reflect Applicant's subsequent acquisition on May 4 of 1,100,000 Co-Build shares worth $6,737,500 on April 30, such shares would represent 43.9 percent of Applicant's assets.

Section 3(a)(3) of the Act defines an investment company as any issuer which is engaged, or proposes to engage, in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis.

Because the value of the Co-Build shares held by Applicant is in excess of 40 percent of the value of Applicant's total assets (excluding cash items and Government securities) on an unconsolidated basis, Applicant is an investment company within the definition set forth in Section 3(a)(3) of the Act.

Section 3(b)(2) of the Act, however, excepts from the definition of an investment company any issuer which the Commission finds and by order declares to be primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding, or trading in securities, either directly or (a) through majority-owned subsidiaries or (b) through controlled companies conducting similar types of businesses.

Applicant contends that it is entitled to an order of exemption under section 3(b)(2) of the Act based upon its non-investment activities in its wholly owned subsidiaries, and its activities in Co-Build. Applicant respectfully requests that the Commission find Applicant to be primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding, or trading in securities and that Applicant is not an investment company.

Applicant asserts that no part of its income has ever been derived from investment securities except in connection with temporary investment in commercial paper in 1970. Co-Build has never paid cash dividends since its incorporation in 1964, and Applicant states that it has no present intention of causing Co-Build to pay dividends. Applicant represents that its intention is to merge Co-Build into a wholly owned subsidiary, if such a merger is feasible. All of Applicant's employees devote all their time to Applicant's operating businesses, and Applicant has never employed a securities analyst.

Applicant contends that it controls Co-Build by virtue of its ownership of 45 percent of Co-Build's voting securities. Applicant also has an irrevocable proxy, until March 31, 1974, to vote an additional 12 percent of Co-Build's voting securities. Six of Applicant's directors are also members of the board of directors of Co-Build. Applicant asserts that through its power to vote more than a majority of the voting securities of Co-Build it can elect all the directors of Co-Build.

Notice is further given that any interested person may, not later than September 18, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicants at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in the matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] RONALD F. HUNT,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Notice of Disaster Loan Area 1002; Amdt. 1]

COLORADO

Amendment to Notice of Disaster Relief Loan Availability

As a result of the President's declaration of the State of Colorado as a major disaster area following severe flooding and landslides beginning on or about March 28, 1973, applications for disaster relief loans will be accepted by the Small Business Administration from flood victims in the following additional county: Alamosa. (See 38 FR 19294)

Applications may be filed at the:

Small Business Administration Regional Office, 721 19th Street, Room 426A, Denver, Colorado 80202.

and at such temporary offices as are established. Such addresses will be announced locally. Applications will be processed under the provisions of Public Law 92-385.

Applications for disaster loans under this announcement must be filed not later than October 15, 1973.

Date: August 20, 1973.

THOMAS S. KLEPPE,
Administrator.

TARIFF COMMISSION

[AA1921-122]

DEFORMED CONCRETE REINFORCING BARS OF NON-ALLOY STEEL FROM MEXICO

Determination of No Injury or Likelihood Thereof

AUGUST 24, 1973.

On May 25, 1973, the Tariff Commission received advice from the Treasury Department that deformed concrete reinforcing bars of non-alloy steel from Mexico are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. In accordance with the requirements of section 201(a) of the Antidumping Act (19 U.S.C. 160(a)), the Tariff Commission instituted investigation No. AA1921-122 to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Notice of the institution of the investigation and of a public hearing to be held on July 24, 1973 in connection therewith was published in the FEDERAL REGISTER of June 4, 1973 (38 FR 14731).

In arriving at a determination in this case, the Commission gave due consideration to all written submissions from interested parties, evidence adduced at the hearing, and all factual information obtained by the Commission's staff from questionnaires, personal interviews, and other sources.

On the basis of the investigation, the Commission has unanimously determined [1] that an industry in the United States is not being or is not likely to be injured, or is not prevented from being established, by reason of the importation of deformed concrete reinforcing bars of non-alloy steel from Mexico sold, or likely to be sold, at less than fair value within the meaning of the Antidumping Act, 1921, as amended.

Statement of Reasons.[2]—The Antidumping Act, 1921, as amended, requires that the Tariff Commission find two conditions satisfied before an affirmative determination can be made. First, there must be injury, or likelihood of injury, to an industry in the United States, or an industry in the United States must be prevented from being established. Second, such injury, or likelihood of injury, or prevention of establishment of an industry [3] must be "by reason of" the importation into the United States of the class or kind of foreign merchandise the Secretary of the Treasury determined is being, or is likely to be, sold at less than fair value (LTFV).

In the Commission's judgment, the first of the aforementioned conditions is not satisfied in the instant case. The reasons for this determination are set forth below.

Deformed concrete reinforcing bars of non-alloy steel (hereinafter referred to as re-bars) are long, solid, approximately round bars hot-rolled from carbon steel billets that have deformations (protrusions) on their outer surfaces. They are used, as their name implies, in concrete to reinforce the concrete and to limit movement of the concrete in relation to the bars. Imported re-bars, including those found to have been sold at LTFV, do not differ from those produced domestically.

[1] Vice Chairman Parker and Commissioner Young did not participate in the decision.

[2] Commissioner Ablondi concurs in the result.

[3] Prevention of establishment of an industry is not an issue in this investigation and therefor will not be discussed further.

Re-bars are generally sold within a relatively short distance from the producing plant (if domestic) or the port of entry (if imported). In determining the industry which would most feel the impact of the LTFV imports, the Commission considered all facilities in the United States devoted to the production of re-bars. However, inasmuch as the sales of the LTFV imports were concentrated in the State of Texas, the Commission gave special attention to the manufacturing facilities for re-bars situated within and outside of the State of Texas which produced most of the domestic re-bars sold in that State in recent years.

The Treasury Department found LTFV sales of Mexican re-bars during 1972. Imports from Mexico were negligible during 1968–70. In 1971—prior to the finding by Treasury of LTFV sales—imports of re-bars from Mexico rose and supplied 0.8 percent of total U.S. consumption of re-bars and 7.6 percent of consumption in the State of Texas. In 1972—when Treasury found LTFV sales of Mexican re-bars—imports from Mexico were lower than in 1971, supplying 0.4 percent of the U.S. consumption and 4.3 percent of the Texas consumption of re-bars. The beginning of the decline in imports from Mexico antedated the filing of the complaint and the institution of the investigation by Treasury by at least 6 months. In the first 5 months of 1973, imports from Mexico were negligible.

From 1971 to 1972, imports of re-bars into Texas from Mexico, as well as from all other countries, declined substantially—by 46 percent and 48 percent, respectively. In the same period, consumption of re-bars in Texas declined only 3.8 percent, indicating a significant increase in the share of consumption supplied by domestic producers. Shipments by domestic producers within or into the State of Texas increased every year, or from about 295,000 tons in 1968 to 368,000 tons in 1970, to 386,000 tons in 1971, and to 421,000 tons in 1972. The larger portion of such increases in shipments was generally accounted for by re-bar mills located in Texas. The value of sales by producers situated in Texas also increased during the period 1968–72. Net profit (before taxes) remained at a healthy level during the period ranging from 11 percent (1968) to 15 percent (1971). During 1971 and 1972 net profits were in fact higher than during 1968–70, when imports from Mexico were nil or negligible.

Data obtained by the Commission do not indicate price depression or suppression by reason of LTFV imports from Mexico. In 1971 and 1972, when imports from Mexico occurred, average net mill returns—a gage of prices realized—for Texas producers of re-bars shipping to the Texas market were 15 percent and 23 percent higher, respectively, than the average of net mill returns during 1968–70, when imports from Mexico were nil or negligible.

None of the foregoing facts indicate injury by reason of LTFV imports of re-bars from Mexico.

It is also the Commission's judgment that there is no evidence of likelihood of injury to a domestic industry by reason of LTFV imports of re-bars from Mexico. Increasing internal Mexican requirements for re-bars preclude the probability of continual exports from Mexico to the United States. Although Mexican production of re-bars more than doubled between 1962 and 1971, almost all the re-bar production in Mexico was consumed there, and exports were small. The exceptions to this pattern occurred in 1971 and 1972 when Mexico exported re-bars to the United States.

Prospects for the expansion of the market for re-bars in certain parts of the United States, including Texas, are implied in recent announcements of additions to domestic capacity. In mid-1973, construction was begun on a re-bar mill with annual capacity for producing about 150,000 tons, in Auburn, N.Y. In June 1973, announcement was made of plans for construction of another mill with capacity for producing 150,000 tons per year in New Orleans, La. In July 1973, disclosure was made of the formation of a joint venture company to build a modern 220,000-ton-per-year plant near Midlothian, Tex.—Midlothian is in the Ft. Worth-Dallas area—which is designed to produce rolled steel products, principally re-bars, angles, and special bar quality steels, among other products, from scrap materials. Construction of the Texas plant was to have begun soon after the announcement, and initial production was expected in about 18 months.

On the basis of the foregoing, the Commission concludes that a domestic industry is not being, or is not likely to be, injured by reason of imports of deformed concrete reinforcing bars of non-alloy steel from Mexico sold, or likely to be sold, at LTFV.

By order of the Commission:

[SEAL] KENNETH R. MASON,
Secretary.

[FR Doc.73-18481 Filed 8-29-73;8:45 am]

COST OF LIVING COUNCIL

FOOD INDUSTRY WAGE AND SALARY COMMITTEE

Notice of Closed Meeting

Pursuant to the provisions of the Federal Advisory Committe Act (Public Law 92-463, 86 Stat. 770) notice is hereby given that the Food Industry Wage and Salary Committee, established under the authority of section 212 (f) of the Economic Stabilization Act, as amended, section 4 (a)(iv) of Executive Order 11695, and Cost of Living Council Order No. 14, will meet at 10 a.m., Wednesday, September 5, 1973, at 2025 M Street NW., Washington, D.C.

The agenda will consist of discussions leading to recommendations on specific Phase II and Phase III wage cases in the food area, and future wage policy.

V 38-168 AUG 30 73 XUM

Since the above stated meeting will consist of discussions of future food wage policy and Phase II and III cases for decision, pursuant to authority granted me by Cost of Living Council Order 25, I have determined that the meeting would fall within exemption (5) of 5 U.S.C. 552 (b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on August 29, 1973.

HENRY H. PERRITT, JR.,
Executive Secretary,
Cost of Living Council.

[Drought Order 69 (Sub No. 1)]

IDAHO

Transportation of Hay to Drought Areas at Reduced Rates

AUGUST 10, 1973.

In the matter of Relief under Section 22 of the Interstate Commerce Act.

It appearing, that by reasons of drought conditions existing in certain portions of the State of Idaho, hereinafter referred to as the disaster area, the Assistant Secretary of the United States Department of Agriculture has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay to the disaster area at reduced rates:

It is ordered, That carriers by railroad participating in the transportation of hay to the counties of:

Bonner	Kootenai
Boundary	

all located in the State of Idaho, referred to herein as the disaster area, be, and they are hereby, authorized under Section 22 of the Interstate Commerce Act to establish and maintain until October 31, 1973, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in Section 6 of the Interstate Commerce Act except that they may be effective one day after publication and filing instead of thirty.

It is further ordered, That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the drought.

It is further ordered, That, during the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one of more of the factors of such aggregate of intermediate rates is a reduced rate established under the authority of this order.

It is further ordered, That any tariffs or tariff provisions published under the authority of this order shall explicity so state, making reference to this order by number and date.

And it is further ordered, That, subject to the conditions in the succeeding paragraphs hereof, the use of reduced rates established by authority of this order may be conditioned upon the release by the shipper of the value of the commodity, which released value, in its relation to the invoice value of the property at time of shipment, shall be in the same percentage relation which the reduced rates bear to the rates which otherwise would apply.

And it is further ordered, That tariffs containing released rates filed under authority of this order shall show in connection with such rates the following notation:

The released value must be entered on shipping order and bill of lading in the following form:

The agreed or declared value of the property is hereby specifically stated by the shipper to be not in excess of (show percent) of the invoice value of the property herein described.

If the shipper fails or declines to execute the above statement, shipments will not be accepted for transportation at the rates subject hereto. Rates published elsewhere in other tariffs lawfully filed with the Interstate Commerce Commission will apply in such a case. Rates herein published on released value have been authorized by the Interstate Commerce Commission in Drought Order No. 69 of August 1973.

And it is further ordered, That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the Office of the Secretary of the Commission and by filing a copy with the Director, Office of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association-Eastern Railroads, New York, New York; the Chairman of the Southern Freight Association, Atlanta, Georgia; the Chairman of the Executive Committee, Western Railroads Traffic Association, Chicago, Illinois; the Vice President and Director, Economics and Finance Department, Association of American Railroads, Washington, D.C.; and to the President of the American Short Line Railroad Association, Washington, D.C.

Dated at Washington, D.C., this 10th day of August, 1973.

By the Commission, Vice Chairman Brewer.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73-18472 Filed 8-29-73;8:45 am]

[Notice No. 343]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before September 19, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74321. By order of August 24, 1973, the Motor Carrier Board approved the transfer to Nebraska-Iowa-Missouri Express, Inc., Kansas City, Mo., of a portion of Certificate No. MC-9644, issued January 7, 1971, to B. T. L., Inc., Kansas City, Mo., authorizing the transportation of general commodities, with exceptions, between points in Buchanan County, Mo., on the one hand, and, on the other, points in a described area of Missouri and Iowa, and Nebraska City, Nebr., and points in its commercial zone. Frank W. Taylor, Jr., Reeder, Dysart & Taylor, 1221 Baltimore Ave., Kansas City, Mo. 64105, attorney for applicants.

No. MC-FC-74596. By order of August 24, 1973, the Motor Carrier Board approved the transfer to Cohey Trucking Company, a corporation, Baltimore, Md., of that portion of the operating rights in Certificate No. MC-73587 issued January 2, 1968, to Elliott Brothers Trucking Company, Inc., Easton, Md., authorizing the transportation of general commodities, over regular routes, between Baltimore, Md., and Philadelphia, Pa., serving all intermediate points and named off-route points, from Baltimore over U.S. Highway 1 to Philadelphia, and return over the same route, restricted against the transportation of traffic originating at Baltimore and destined to Philadelphia and traffic originating at Philadelphia and destined to Baltimore; general commodities, over irregular routes, between points in Maryland on the above-specified regular route between the Maryland-Pennsylvania State line and Baltimore, on the one hand, and, on the other, points in that part of Pennsylvania bounded by a line beginning at Philadelphia and extending along U.S. Highway 611 to Easton, thence along a line extending from Easton through Albany to Pine Grove, thence along a line extending from Pine Grove through Linglestown to Harrisburg, thence along U.S. Highway 230 to Lancaster, and thence along U.S. Highway 30 to point of beginning; and general commodities, over irregular routes, between Oxford and West Grove, Pa., and points in Pennsylvania within 5 miles of West Grove, on the one hand, and, on the other, points in Delaware and Maryland lying between the Chesapeake Bay and the Atlantic Ocean and on and south of the north bank of the Chesapeake and Delaware Canal, including Chesapeake City, Md. Each of the subject general commodity operating authorities is limited by usual exceptions. John R. Sims, Jr., Suite 600, 1707 H Street NW., Washington, D.C. 20006, attorney for applicants.

No. MC-FC-74659. By order of August 23, 1973, the Motor Carrier Board approved the transfer to People's Storage Warehouse Company, a corporation, Warwick, R.I., of the operating rights in Certificate No. MC-94347 issued October 25, 1967 to Royal Van & Storage, Inc., Providence, R.I., authorizing the transportation of household goods, as defined by the Commission, between specified points and areas in Rhode Island, Connecticut, Massachusetts, New York, Maine, New Hampshire, Vermont, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia and the District of Columbia. Allan M. Shine, 915 Hospital Bldg., Providence, R.I., 02903, attorney for transferor, Russell B. Curnett, P.O. Box 366, Harwich, Mass., 02645, representative for transferee.

No. MC-FC-74615. By order of August 23, 1973, the Motor Carrier Board approved the transfer of Leonard Bros. Trucking Co., Inc., of Texas, Grand Prairie, Tex., of portions of Certificates Nos. MC-19227 (sub Nos. 87 and 88) issued to Leonard Bros. Trucking Co., Inc., Miami, Fla., authorizing the transportation of: Self-propelled articles, related machinery, tools, parts, and supplies, and commodities used in or in connection with the natural gas industry, and stringing and picking up of pipelines, and other services in connection therewith, between points in Texas. W. O. Turney, attorney, 2001 Massachusetts Ave., Washington, D.C. 20036.

No. MC-FC-74665. By order of August 24, 1973, the Motor Carrier Board approved the transfer to suburban Coach Lines, Incorporated, P.O. Box 7291, Asheville, N.C., of Certificate No. MC-128306 (Sub-No. 2), issued to Lawrence C. Stoker, d.b.a. Suburban Coach Lines, Asheville, N.C., authorizing the transportation of: Passengers and their baggage, express and newspapers, between Asheville and Brevard, N.C., serving all intermediate points.

[SEAL] JOSEPH M. HARRINGTON,
Acting Secretary.

[Notice No. 116]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 24, 1973.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67 (49 CFR 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, on or before Sept. 14, 1973. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 22278 (sub-No. 44 TA), filed August 15, 1973. Applicant: TAKIN BROS. FREIGHT LINE, INC., 2125 Commercial Street, P.O. Box 5000, Waterloo, Iowa 50704. Applicant's representative: Paul Rhodes (same address as applicant). Authority sought to operate as a *common carrier,* by motor vehicle, over irregular routes, transporting: *Pre-stressed concrete, precast concrete, and construction elements, concrete,* from Waterloo, Iowa, to points in Illinois on and north of U.S. Highway 36, for 180 days. Supporting shipper: C. W. Shirey Company, 1845 La Porte Road, Waterloo, Iowa 50702. Send protests to: Herbert W. Allen, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 875 Federal Building, Des Moines, Iowa 50309.

No. MC 30319 (Sub-No. 142 TA), filed August 13, 1973. Applicant: SOUTHERN PACIFIC TRANSPORT COMPANY OF TEXAS AND LOUISIANA, 7600 South Central Expressway, Dallas, Tex. 75216 and Mailing: 9 Main Street, San Francisco, Calif. 94105. Applicant's representative: Lloyd M. Roach, 1517 West Front Street, Tyler, Tex 75701. Authority sought to operate as a *common carrier,* by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving Dolen, Tex., as an off-route point in connection with applicant's present regular route authority to and from Cleveland, Tex., via Texas Highway 105, for 180 days.

NOTE.—Applicant does intend to tack with MC 30319 at all interchange gateways. Supporting shipper: Lone Star Industries, Inc., P.O. Box 98, Houston, Tex. 77001. Send protests to: Transportation Specialist Gerald T. Holland, Interstate Commerce Commission, Bureau of Operations, 1100 Commerce Street, Room 13C12, Dallas, Tex. 75202.

No. MC 30844 (sub-No. 475 TA), filed August 14, 1973. Applicant: KROBLIN REFRIGERATED XPRESS, INC., 2125 Commercial Street, P.O. Box 5000, Box zip 50702, Waterloo, Iowa 50704. Applicant's representative: Paul Rhodes (same address as applicant). Authority sought

V 38-168 AUG 30 73 XUM

to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned or preserved foodstuffs*, (1) from Holland, Mich.; Henderson, N.C.; Iowa City and Muscatine, Iowa; Toledo, Fremont, and Bowling Green, Ohio; Salem, N.J.; and Mechanicsville, Chambersburg, Leetsdale, and Pittsburgh, Pa., to Greenville, S.C.; and (2) from Greenville, S.C., to points in Alabama, Georgia, Mississippi, Tennessee, and New Orleans, La., and the commercial zone of New Orleans, restricted to shipments originating at and/or destined to the facilities of H. J. Heinz Co., for 180 days. Supporting shipper: Heinz U.S.A., Division of H. J. Heinz Company, P.O. Box 57, Pittsburgh, Pa. 15230. Send protests to: Herbert W. Allen, Transportation Specialist, Bureau of Operations, Interstate Commerce Commission, 875 Federal Building, Des Moines, Iowa 50309.

No. MC 51146 (sub-No. 327 TA), filed August 6, 1973. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, 2661 South Broadway, Green Bay, Wis. 54304. Applicant's representative: D. F. Martin (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Mattresses and upholstered box springs*, from Mason, Ohio, to Detroit, Mich., for 180 days. Supporting shipper: J. L. Hudson Company, 1206 Woodward, Detroit, Mich. 48226 (John A. Stein, Traffic Manager). Send protests to: District Supervisor John E. Ryden, Interstate Commerce Commission, Bureau of Operations, 135 West Wells Street, Room 807, Milwaukee, Wis. 53203.

No. MC 60470 (sub-No. 22 TA), filed August 15, 1973. Applicant: MOTORCAR TRANSPORT COMPANY, 1280 Joslyn Avenue, Pontiac, Mich. 48055. Applicant's representative: Walter N. Bieneman, Suite 1700—One Woodward Ave., Detroit, Mich. 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Automobiles, trucks, and buses*, as described in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, in initial movements, in truckaway service, from Janesville, Wis., to points in the Lower Peninsula of Michigan, for 180 days. Supporting shipper: General Motors Corporation, 30007 Van Dyke Avenue, Warren, Mich. 48090. Send protests to: Melvin F. Kirsch, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 1110 Broderick Tower Bldg., 10 Witherell, Detroit, Mich. 48226.

No. MC 82063 (sub-No. 44 TA), filed August 14, 1973. Applicant: KLIPSCH HAULING CO., 119 E. Loughborough, St. Louis, Mo. 63111. Applicant's representative: Ernest A. Brooks II, 1301 Ambassador Building, St. Louis, Mo. 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk, in tank vehicles, from Kansas City, Kans.; Kansas City and North Kansas City, Mo., to points in Virginia, North Carolina, Florida, Louisiana, Nebraska, Alabama, Texas, Indiana, Tennessee, Arkansas, Colorado, Georgia, Illinois, Indiana, Iowa, Kentucky, Montana, New Mexico, North Dakota, Ohio, Oklahoma, South Carolina, Wyoming, Michigan, Minnesota, South Dakota, Wisconsin, and Mississippi, for 180 days. Supporting shippers: Southwest Grease & Oil Co. (Kansas City), Inc., 3148 Roanoke Rd., Kansas City, Mo. 64111; Cook Paint & Varnish Company, P.O. Box 389, Kansas City, Mo. 64141; Thompson-Hayward Chemical Company, 5200 Speaker Road, Kansas City, Mo. 66110; and Rhodia, Inc., Chipman Division, 120 Jersey Ave., New Brunswick, N.J. 08903. Send protests to: District Supervisor J. P. Werthmann, Interstate Commerce Commission, Bureau of Operations, 210 N. 12th Street, Room 1465, St. Louis, Mo. 63101.

No. MC 97357 (sub-No. 49 TA), filed August 10, 1973. Applicant: ALLYN TRANSPORTATION COMPANY, 14011 South Central Avenue, Los Angeles, Calif. 90059. Applicant's representative: David P. Christianson, 825 City National Bank Bldg., 606 South Olive Street, Los Angeles, Calif. 90014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Distillate and residual fuel oils*, (1) from points in Kern County, Calif., to points in and within 20 miles of Glendale, Ariz.; to points in and within 20 miles of Tempe, Ariz.; and to points in and within 20 miles of Page, Ariz.; and (2) from points in Los Angeles County, Calif., to points in and within 20 miles of Page, Ariz., for 150 days. Supporting shipper: Aromalene Oil Company, 2750 East Spring Street, Long Beach, Calif. 90806. Send protests to: Walter W. Strakosch, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 7708, Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 112963 (sub-No. 45 TA), filed August 14, 1973. Applicant: ROY BROS., INC., 764 Boston Road, Pinehurst, Mass. 01866. Applicant's representative: Leonard E. Murphy (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal feed ingredients*, in bulk, in tank vehicles, from Reedville, Va.; Harmony, N.C.; Cambridge, Md.; Salisbury, Md.; and Wilmington, Del., to Woburn, Mass., for 180 days. Supporting shipper: Lipton Pet Foods, 209 New Boston St., Woburn, Mass. Send protests to: Darrell W. Hammons, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 150 Causeway St., 5th Floor, Boston, Mass. 02114.

No. MC 114045 (sub-No. 387 TA) (Correction), filed August 2, 1973, published in the FEDERAL REGISTER issue of August 20, 1973, and republished as corrected this issue. Applicant: TRANS-COLD EXPRESS, INC., Finley & Belt Line Rd., P.O. Box 5842 (Box zip 75222), Dallas, Tex. 75240. Applicant's representative: J. B. Stuart (same address as above).

NOTE.—The purpose of this partial republication is to show the applicant correct MC number as No. MC 114045 (Sub-No. 387 TA) in lieu of No. MC 144045 (sub-No. 387 TA), which was published in error in the FEDERAL REGISTER. The rest of the application remains the same.

No. MC 124160 (sub-No. 7 TA), filed August 14, 1973. Applicant: SAVAGE BROTHERS, INCORPORATED, 602 East Main Street, American Fork, Utah 84003. Applicant's representative: Lon Rodney Kump, 720 Newhouse Building, Salt Lake City, Utah 84111. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in bulk, from the mine located approximately 12 miles west of Huntington, Utah, to the railroad head at Price, Utah, and the railroad head at Morhland, Utah, restricted to traffic having a subsequent out-of-State movement, for 180 days. Supporting shipper: Peabody Coal Company, Deer Creek Mine, Huntington, Utah (Neldon Sitterud, Superintendent of Operations). Send protests to: District Supervisor Lyle D. Helfer, Interstate Commerce Commission, Bureau of Operations, 5239 Federal Building, 125 South State Street, Salt Lake City, Utah 84138.

No. MC 124236 (sub-No. 53 TA), filed August 13, 1973. Applicant: CHEMICAL EXPRESS CARRIERS, INC., 1200 Simons Building, Dallas, Tex. 75201. Applicant's representative: Leroy Hallman, 4555 First National Bank Bldg., Dallas, Tex. 75201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry silica moulding sand and dry resin coated moulding sand*, from Mill Creek, Okla., to Amarillo, Tex., for 180 days. Supporting shipper: Hydro Corporation, 2200 NE. 3rd, P.O. Box 1006, Amarillo, Tex. 79105. Send protests to: Transportation Specialist Gerald T. Holland, Interstate Commerce Commission, Bureau of Operations, 1100 Commerce Street, Room 13C12, Dallas, Tex. 75202.

No. MC 125358 (sub-No. 13 TA), filed August 14, 1973. Applicant: MID-WEST TRUCK LINES, LTD., Canadian Corp., 1216 Fife Street, Winnipeg, Manitoba, Canada 14. Applicant's representative: William S. Rosen, 630 Osborn Building, St. Paul, Minn. 55102. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural chemicals*, for the account of Monsanto Company, from the plantsite and warehouse facility of Monsanto Company near Muscatine, Iowa, to ports of entry on the International Boundary line, between the United States and Canada located at or near Pembina, N. Dak. and Noyes, Minn., on traffic having a subsequent movement in foreign commerce to the provinces of Saskatchewan, Alberta, and Manitoba, Canada, for 180 days. Supporting shipper: Monsanto Company, 800 North Lindbergh Boulevard, St. Louis, Mo. 63166. Send protests to: J. H. Ambs, District Supervisor, Interstate Commerce Commission, Bureau of Operations, P.O. Box 2340, Fargo, N. Dak. 58102.

No. MC 128030 (sub-No. 46 TA), filed August 15, 1973. Applicant: STOUT TRUCKING CO., INC., P.O. Box 177, RR #1, Urbana, Ill. 61801. Applicant's representative: R. C. Stout (same address as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Bleacher seats and parts thereof*, from Champaign, Ill., to points in California, Idaho, Oregon, and Washington and (B) *basketball backstops and parts thereof*, from Champaign, Ill., to points in the United States when shipped with bleacher seats, for 150 days. Supporting shipper: Mr. T. E. Ignasiak, Universal Bleacher Company, 1303 N. McKinley, Champaign, Ill. Send protests to: R. G. Anderson, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1086, Chicago, Ill. 60604.

No. MC 128375 (sub-No. 99 TA), filed August 13, 1973. Applicant: CRETE CARRIER CORPORATION, P.O. Box 249, 1444 Main, Crete, Nebr. 68333. Applicant's representative: Duane W. Acklie (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Tinplate* moving in van equipment, for the account of Allen Products Co., Inc., a subsidiary of division of Liggett & Myers, Incorporated, New York, N.Y., from Weirton, W. Va., to the plantsite of Allen Products Company at or near Crete, Nebr., for 180 days. Supporting shipper: Mr. Glenn Petrine, Distribution Manager, Allen Products Company, Inc., Allentown, Pa. 18101. Send protests to: Max H. Johnston, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 320 Federal Building & Court House, Lincoln, Nebr. 68508.

No. MC 133168 (sub-No. 3 TA), filed August 6, 1973. Applicant: DELTA EXPRESS, INC., P.O. Box 776, River Road, Natchitoches, La. 71457. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, lumber mill and forest products, particle board, wallboard, fiberboard, pulpboard, poles, piling, posts, and ties*, from points in Louisiana located on and north of U.S. Highway 190 and on and west of the Mississippi River (except points within East Carroll, West Carroll, Madison, Tensas, Point Coupee, and St. Landry Parishes, La.), to points in Arkansas, Louisiana, Mississippi, Missouri, Alabama, Florida, Georgia, Illinois, Indiana, and Kentucky, for 180 days. Supporting shippers: (1) Paul Bellenger Lumber Company, P.O. Box 189, Jackson, Miss. 39205; (2) Mueth Lumber & Plywood Co., P.O. Box 12786, St. Louis, Mo. 63141; (3) C. A. Reed Lumber Company, Inc., P.O. Box 267, Bernice, La. 71222; (4) Stewart's Forest Products, P.O. Box 2776, Little Rock, Ark. 72203; and (5) Williamette Industries, Inc., P.O. Box 907, Albany, Oreg. 97321. Send protests to: District Supervisor Ray C. Armstrong, Jr., Bureau of Operations, Interstate Commerce Commission, T-9038 U.S. Postal Service Bldg., 701 Loyola Avenue, New Orleans, La. 70113.

No. MC 134779 (sub-No. 5 TA), filed August 16, 1973. Applicant: JANESVILLE AUTO TRANSPORT COMPANY, 1263 Cherry Street, P.O. Box 959, Janesville, Wis. 53545. Applicant's representative: Walter N. Bieneman, Suite 1700, One Woodward Avenue, Detroit, Mich. 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Automobiles, trucks, and buses*, as described in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, in initial movements, in truckaway service, (1) from Pontiac, Mich., to Janesville, Wis. and (2) from Pontiac, Mich., to points in Iowa, Minnesota, and Wisconsin, restricted to the transportation of traffic moving through Janesville, Wis., for 180 days. Supporting shipper: E. R. Wiseman, Traffic Planning and Rates—GM Logistics Operations, General Motors Corporation, 30007 Van Dyke Avenue, Warren, Mich. 48090. Send protests to: Barney L. Hardin, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 139 W. Wilson St., Madison, Wis. 53703.

No. MC 136008 (sub-No. 11 TA), filed August 14, 1973. Applicant: JOE BROWN COMPANY, INC., 20 Third Street, NE., P.O. Box 1669, Ardmore, Okla. 73401. Applicant's representative: Rufus H. Lawson, 2400 Northwest 23d Street, P.O. Box 75124, Oklahoma City, Okla. 73107. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Light weight aggregate*, in bulk, (1) from the plantsite of TXI, Dallas, Tex., to (a) plantsite of Day Block Company, Ardmore, Okla.; (b) plantsite of Shawnee Concrete Block & Brick Co., Shawnee, Okla.; (c) plantsite of Ada Block Company, Ada, Okla.; and (d) plantsite of Oklahoma Brick Corp., approximately 3½ miles northwest of Union City, Okla. and (2) from the plantsite of TXI, Eastland, Tex., to (a) plantsite of Thomas Concrete Products Co., Oklahoma City, Okla. and (b) Comanche Concrete Products Company, Lawton, Okla., for 180 days. Supporting shipper: Day Block Company, Thad Day, 1401 Monroe NE., Ardmore, Okla. 73401; Ada Block Co., C. R. Whitwell, 1001 W. 18th Street, Ada, Okla. 74820; Oklahoma Brick Corp., Wm. G. Tait, 2642 Northwest 10th St., Oklahoma City, Okla.; Shawnee Concrete Block & Brick Co., George McLaughlin, 3501 N. Harrison, Shawnee, Okla.; Comanche Concrete Products Co., Jackson J. Russell, 8 Wallock, Lawton, Okla. 73501; and Thomas Concrete Products Co., Tom A. Thomas, Jr., 5500 S. High, Oklahoma City, Okla. Send protests to: C. L. Phillips, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Rm. 240–Old P.O. Bldg., 215 Northwest Third, Oklahoma City, Okla. 73102.

No. MC 138957 (sub-No. 1 TA), filed August 14, 1973. Applicant: DEVANE HARADON, doing business as B–D–H TRUCKING CO. 9320 Southwest Barbur Blvd., Portland, Oreg. 97219. Applicant's representative: George R. LaBissoniere, Suite 101, 130 Andover Park East, Seattle, Wash. 98188. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Alcoholic beverages* (beer-wine) and (2) *paper and paper products*, (1) from San Francisco commercial zone, Menlo Park, St. Helena, Madera, and Los Angeles commercial zone, including Van Nuys and Azusa, Calif., to points in Washington, Multnomah, Clackamas, and Lane Counties, Oreg., and (2) from Portland, Oreg., and its commercial zone, to Los Angeles commercial zone, including Buena Park and San Francisco commercial zone, San Jose and Sacramento, for 180 days. Supporting shippers: Spear Beverage Co., 3808 N. William, Portland, Oreg. 97227 and Western Kraft Corp., 5800 Southwest Western Avenue, Beaverton, Oreg. Send protests to: District Supervisor W. J. Huetig, Interstate Commerce Commission, Bureau of Operations, 450 Multnomah Bldg., 319 Southwest Pine St., Portland, Oreg. 97204.

No. MC 138963 TA (correction), filed August 7, 1973, published in Notice No. 113 dated August 16, 1973, and republished as corrected this issue. Applicant: JAY ROZELL, doing business as ROZELL TRUCK LINES, 1003 Cedar, Minco, Okla. 73059. Applicant's representative: R. H. Lawson, 2400 Northwest 23d, Oklahoma City, Okla. 73107.

NOTE.—The purpose of this partial republication is to correct the applicant's name to JAY ROZELL, in lieu of RAY ROZELL, which was published in the FEDERAL REGISTER in error. The rest of the application remains the same.

MOTOR CARRIERS OF PASSENGERS

No. MC 138990 (sub-No. 1 TA), filed August 15, 1973. Applicant: INTERSTATE BUS SERVICE, INC., 8675 Northwest 53d Street, Miami, Fla. 33166. Applicant's representative: Richard B. Austin, Suite 123, Koger Building, Miami, Fla. 33166. Authority sought to operate as a *common contract*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage* in sightseeing bus service as a part of a total package or prearranged air or water and ground transportation movement between Port Everglades, Dodge Island, Miami International Airport, Fort Lauderdale/Hollywood International Airport, Miami Beach, and Fort Lauderdale, Fla., on the one hand, and, Cape Kennedy, Disney World (Orange County), Cypress Gardens, Busch Gardens, Rainbow Springs, Key West, and Silver Springs, Fla., on the one hand, and from the named sightseeing points above set out back to the named origin points above set out. Restricted to traffic moving in a combined, prearranged or packaged tour with an immediate, prior or subsequent movement by air or water, for 180 days. Supporting shippers: Duva

V 38-168 AUG 30 73 XUM

[Notice 68]

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

AUGUST 24, 1973.

The following applications (except as otherwise specifically noted, each applicant (on applications filed after March 27, 1972) states that there will be no significant effect on the quality of the human environment resulting from approval of its application), are governed by Special Rule 1100.247[1] of the Commission's general rules of practice (49 CFR, as amended), published in the FEDERAL REGISTER issue of April 20, 1966, effective May 20, 1966. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one (1) copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) of the Commission's rules of practice further provides that each applicant shall, if protests to its application have been filed, and within 60 days of the date of this publication, notify the Commission in writing (1) that it is ready to proceed and prosecute the application, or (2) that it wishes to withdraw the application, failure in which the application will be dismissed by the Commission.

Further processing steps (whether modified procedure, oral hearing, or other procedures) will be determined generally in accordance with the Commission's general policy statement concerning motor carrier licensing procedures, published in the FEDERAL REGISTER issue of May 3, 1966. This assignment will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

No. MC 263 (sub-No. 209), filed June 22, 1973. Applicant: GARRETT FREIGHTLINES, INC., 2055 Garrett Way, Pocatello, Idaho 83201. Applicant's representative: Wayne S. Green (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sugar*, from Billings, Mont., and points within four miles of Billings, to points in North Dakota and South Dakota.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo., or Billings, Mont.

No. MC 1824 (sub-No. 61), filed July 10, 1973. Applicant: PRESTON TRUCKING COMPANY, INC., 151 Easton Boulevard, Preston, Md. 21655. Applicant's representative: Frank V. Klein (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving Medina, N.Y., as an off-route point in connection with applicant's regular route operations between Baltimore, Md., and Buffalo, N.Y.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or Buffalo, N.Y.

No. MC 2253 (sub-No. 59), filed June 25, 1973. Applicant: CAROLINA FREIGHT CARRIERS CORPORATION, N.C. Highway 150 East, Cherryville, N.C. 28021. Applicant's representative: W. C. Mauldin, P.O. Box 697, Cherryville, N.C. 28201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cellulose acetate flake*, in bulk, from Celriver, S.C., to Rome, Ga.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at either Atlanta, Ga., Charlotte, N.C., or Greenville, S.C.

No. MC 2253 (sub-No. 61), filed July 5, 1973. Applicant: CAROLINA FREIGHT CARRIERS CORPORATION, N.C. Highway 150, East, Cherryville, N.C. 28021. Applicant's representative: W. C. Mauldin, P.O. Box 697, Cherryville, N.C. 28021. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Candy and confectionery, and related products* (except in bulk), and (2) *advertising matter, premium and display materials* when shipped in the same vehicle with commodities described in (1) above, in vehicles equipped with mechanical refrigeration, from the plantsite and warehouse facilities of M&M/Mars, Division of Mars, Incorported, located at Doraville, Decatur, Atlanta, and Albany, Ga., to points in Ohio, Illinois, New Jersey, Indiana, Maryland, New York, Pennsylvania, Virginia, and West Virginia, restricted to the transportation of traffic originating at the plantsite and warehouse facilities of M&M/Mars, Division of Mars, Incorporated.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga., or Washington, D.C.

No. MC 2860 (sub-No. 124), filed June 19, 1973. Applicant: NATIONAL FREIGHT, INC., 57 W. Park Avenue, Vineland, N.J. 08360. Applicant's representative: Francis W. McInerny, 1000 Sixteenth Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment), between Somerville, N.J., and points in Morris County, N.J., on the one hand, and, on the other, points in New York and Pennsylvania, restricted against the transportation of traffic originating at, destined to, or received from or delivered to connecting carriers at Somerville, N.J., or in Morris County, N.J.

NOTE.—Common control may be involved. Applicant is presently authorized and is conducting operations between points in Pennsylvania and New York via Somerville, N.J. The sole purpose of this application is to add Morris County as an additional gateway area so as to permit the use of terminal and fueling facilities proposed to be established in Morris County. Applicant states that the requested authority can be tacked at Somerville, N.J. and Morris County, N.J., to serve points in Southern New England.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 4963 (sub-No. 44), filed July 30, 1973. Applicant: ALLEGHANY CORPORATION, doing business as JONES MOTOR, Bridge Street & Schuylkill Road, Spring City, Pa. 19475. Applicant's representative: Roland Rice, Suite 618, Perpetual Building, 1111 E Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cabinets*, wooden, *parts thereof, counter tops*, with or without vinyl covering or plastic, and *sinks*, setup or knocked down, from the Boise Cascade Corporation plants and warehouses located at Fenwick, Paw Paw, and Moorefield, W. Va., and Berryville, Orange and Winchester, Va., on the one hand, and, on the other, points in Maine, New Hampshire, Vermont, Connecticut, Rhode Island, Massachusetts, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, North Carolina, South Carolina, Tennessee, Illinois, Indiana, Iowa, Michigan, Ohio, Missouri, and the District of Columbia.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 5470 (sub-No. 80), filed June 15, 1973. Applicant: TAJON, INC., R.D. 5, Mercer, Pa. 16137. Applicant's representative: Donald E. Cross, 918–16th Street NW., Suite 700, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alloys, ores, and metals*, in dump vehicles, from New Kensington, Pa., to points in Connecticut, Delaware, Illinois, Indiana, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Rhode Island, Vermont, Virginia, and West Virginia.

NOTE.—Applicant states that the requested authority can be tacked with its existing authority at: (1) New Kensington, Pa. to provide a through service from various points in Ohio, Pennsylvania, New York, Kentucky, West Virginia, Connecticut, New Jersey, and Tennessee to the destination states requested herein; and (2) Alloy, W. Va., and Ashtabula and Marietta, Ohio to serve additional destinations in various southern states and Wisconsin, Kentucky, Missouri, North Carolina, and South Carolina. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. or Pittsburgh, Pa.

No. MC 5470 (sub-No. 81), filed June 18, 1973. Applicant: TAJON, INC., R.D. 5, Mercer, Pa. 16137. Applicant's representative: Donald E. Cross, 918–16th Street NW., Suite 700, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Asphalt*, in bulk, in dump vehicles, from Perth Amboy, N.J., to points in New York, Ohio, and Pennsylvania.

NOTE.—Applicant states that the requested authority can be tacked with its existing authority in No. MC 5470 at various points in Ohio; (1) to serve additional points in West Virginia and those in New York west of U.S. Highway 15; and (2) to serve additional points in Kentucky, and West Virginia within 40 miles of Ironton, Ohio. Applicant further indicates that tacking may occur at points in Pennsylvania, but no new service could be rendered. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. or Pittsburgh, Pa.
